EVENING NEWS.

he arm, to become paralyzed from

Saturday - August 15, 1885

He is not worthy of the honycomb That shuns the hive because the bees have HAVE AN AIM. stings.

An atmless man is one of the most to be pitied upon earth. He goes drifting along with the tide of fate, without any prospect of an ancorrge in the present and little hope for the future, a miserable, shiftless being, a curse to blue eff and is subley at large. across the water, rather than into it. Ise men, and court rather than shrink from struggles. Lift op cour buisness rather than sink with it. Do anything -everything honorable—sooner than pass through life anniess and purposs-less, a worthless straw, blown by the winds of forthess to the the the forthese to the forthese t imself and society at large Have an aim, some purpose in life. The great Giver of all good restowed The great Giver of all good to some powers, some less, a worthless straw, blown by the hangings of the rudder were and ropped faculties of his mighty divinity. No winds of fortune, to at the last fall wear weak, and suddenly it had dropped with a shifty to reason; without something of cunning plished.

in his hands; without some knowl-edge that will bring recompense and happiness, if but rightly used. The talent, if only a single one, was not given to be burried; the brain not curi-ously fashioned to lie of its own sloth;

Purifying Water with Alum.

the house top

Those of our readers who have traveled on the Mississippi river know how turbid the water is, and they may want of use; the intricate machinery have seen people tie a bit of alum to a the muscles, to rust for want of the thread, let it down into a tumbler of

you would do, and proclaim as from Helpless Upon a Friendless Sea!

COUTSP

the writer

polish of friction; and the mysterious telegraph of nerves, to become inert, because there is behind it no tele-graph of action. The lack of a tirm purpose caused the primal curse to fall upon the ha-man race. It was the utter absense of it that made temptation and the curse have followed down the long line of ages until the present hour. The much to be pitied human wrecks that strew the shores of the science of the science of time are proof water. Double this quantity may well be used, as a rule. This amount of alum is too small to be perceptible to the taste, or to exert any physiological shores of the stream of time are proof positive of this. We see them upon every side; they foom up from every headland, are stranded in every shoal,

and sunk in every quicksand. A firm and well defined purpose, one carefully and faithfully wrought for, would have The alum may be used au clarifying water by filtration. If a very sma

and well defined purpose one carefully and faithfully wrought for, would have water by filtration. If a very small carefully another by definition of the small carefully another by definition of the small carefully and view of the very shifting wind. He has no determined port ahead for which be there and while without stay or star by night; is lost in the chases of the elements—a human lear futtered and whirled without stay or resting place.
To accomplish any stable good or wealth or reputation in this world, a man must know what he is going to do, and do it. The dogma of chance in our lives is a sutterly talse as in creation. Greatness is very rarely thrust upon mankind; and riches come not without the patient seeking. "The bottle is to be plugged with cotton, which should first be worked in warm warm of the should its to remove the adhering and the duration without the patient seeking. "The bottle is to remove the adhering and the target and plates is as utcerly talse as in creation of the plates is the duration of the plates is the duration of the should first be worked in warm in this with the duration with the bettom of a glass flask or other bottle. The neck of the funnel or a duration should be the other in the seeking. "The bottle is to be plugged with cotton, which should first be worked in warm in the worked in the resentance." without the patient seeking, "The sky does not rain larks," and gold lies deeply hidden. Grain that is to bring plenty and fatness is not indigenous to which should first be worked in warm water to remove the adhering air, and to well it well. It should be packed in quite closely, a little at a time, un-til it forms a layer two or three inches he soil, and we cannot gather figs from thistles. The stately and massive tree from the homely discourse-until it thick

is not the upshooting of an hour, and To insure accuracy in the amount of knowledge comes not with the burning of a single candle. There is no lamp of Aladdin for us, and the ring to which To insure accuracy in the amount of alum used it is best to make a solution of half an ounce of alum to a quart of water. Dissolve the alum in a cup of holling water, pour this into a quart measure, and fill up with cold water. Keep in a properly labled bottle. Fifty-tour drops of this solution, or a scant teaspoonful will contain two and three-tenths of grains of aum which is the e must be slaves is toll. The lives of the truly great teach the lesson of purpose and aim most forci-bly. Their aim was unwavering, and the reaching towards it constant. The top of the mountan of success is not top of the mountan of success is not gained by single leap, be it never so great. The winter stores of the ant and the bee are only gathered by un-ceasing labor towards one end. The aimless man never yet accom-plished any mighty result. The spas-

"Yes, indeed, honey; I knowed yer was Ole Abe the berry minute I sot my eyes on yer. I seed yer once at yer plished any mighty result. The spas-modic effort of to-day was nullfied by fied by this process, the greater part of the organic matter being removed from the panular Science Vers. the organic matter being removed from it.-- Popular Science News. he indolence and carelessness of the co-morrow. Gale Manufacturing Co.

CHILLED PLOWS AND HORSE HAY RAKES.

In addition to the above goods, we sell the Peerless Reapers and Mowers, California Concord Harness, Buffalo Barbed Wire, also agreat of Farm and Garden Hand Implements, consisting of Rakes, Forks, Hoes, Lawn-Mowers, etc., etc.

The Mitchell Farm and Spring Wagons and Road Carts are manufactured expressly for the Utah, clabo and Montana trade, of the very best material that money can buy and under the superintendency of **Henry Mit**-chell, a practical wagon manufacturer of over *hity* years experience. We perusrantee that they are first class in all respects, and second to none in the market.

the Walter A. Wood's Harvesting Machines are absolutely unequalled for strength. Durability, hasy Running and Simplicity. Read the following second of machines under and sold by the Wood Company 1 is 1980-27,903; [35], 40,41, 1822, 44,220, 1881, 10,022 [1884, 48,315; nothing but the superiority of the machines could possibly cruse such extensive and constantly increasing state. The above function words of project than anything we could sates. The above figures speak louder words of praise than anything we could nossible say They have enlarged their factory so as to be able to fill increased in ters for 1885

The John Deere Plows have a world-wide reputation for excellence i lie fact that Deere & Co, have the *largest* steel plow manufactory in the *world* is sublicient guaranty of the superiority of the goods they manufacture.

Russell & Co's Threshers, Engines and Saw Mills, are fast taking the load, and in the near future will stand without a rival. A person that has ever used a Massilon Thresher will never use any other. Every Machine we have sold has given the most perfect satisfaction.

The Gilpin Sulky Plow is the only single lever sulky plow made. The contributed at stands without a ricid for strength, lightness of draught, derly and quality of work. No person having any regard for horse flesh purchase any other sulky plow after using the one-lever Gilpin.

The Gale Manufacturing Company spare to expense to make their Solay liake superior to any in the worket - Call and examine their goods, and the convinced of the superiority of their Rakes also of their Chilled Plows.

The cap snapped. He tried a second
