

MINING, BUSINESS AND STOCKS

NEVADA ALPINE
ORE AT SAMPLER.

Car Load Shipment Comes In
From This Low Mountain
Mine.

AN IMPORTANT FIND MADE.

Lower Level Shows Some Sensational
Values—Little Second
Class Ore.

At the sampler today is a fifty-ton
lot of ore from the Nevada-Alpine
mine, operated by the O'Meara-Lynch
company, which will be settled for on
tomorrow's market.

Recent developments made in this
property indicate that it is keeping
up its reputation of being one of the
big mines of southwestern Nevada.
On the lower level has been encountered
a body of ore which shows values
of 39 per cent lead and as high as 270
ounces in silver.

There are few mines anywhere that
can boast of having no waste dump,
yet that is about the situation at the
Nevada-Alpine. Practically everything
taken from the mine in the course of
development has been high grade ore.
W. P. O'Meara, treasurer, and one
of the principal shareholders, said dur-
ing the day that he did not believe
the company could scrape up a good
wagon load of second class ore around
its works.

WOULD SOLVE PROBLEM.

T. J. Patten of Provo Becomes Interest-
ed in Smelter Fuel Question.

Special Correspondence.

Provo, Oct. 11.—J. Patten of Provo
became interested in the smelter
fuel question some time ago, and be-
thought himself of his nephew, John
Patten, of Baltimore, as a good man
to solve the question. He wrote to Mr.
Patten, who took the matter up, and
he now believes he has invented a pro-
cess by which the poisonous substances
can be separated from the smoke and
converted into commodities of com-
mercial value. He has written the elder
Mr. Patten that he has applied for a
patent on his process, and has sub-
mitted it to the American Smelting and
Refining company in New York, where
it is being tested.

From tests made by himself he has
no doubt of its practicality. The pro-
cess has also been brought to the at-
tention of the Salt Lake Valley smel-
ters, through Dr. Whitcomb, who believes
it is meritorious, and its efficiency will
without doubt be tested by the local
smelters.

Mr. John Patten is the son of John
Patten of Miami, where he was born.
He left Utah at an early age and went
to Nevada, where he engaged in min-
ing. He developed great wealth for his
family and went west, where he has
devoted himself to mechanical and
chemical study and experiments, and
has patented a number of inventions
which have proved profitable to him.
At present he is engaged in the manu-
facture of artificial ice on a large scale
by machinery and process of which he
is the inventor, and discoverer, and
which are in use not only in the United
States, but in Europe.

BULL VALLEY CLAIMS.

Onyx Properties to be Developed in
Washington County.

James Wilder was in town Monday
on his way home from Bull Valley, says
the Iron County Record. He has been
working on his property for the past
two months. He says the properties are
all in good shape, and some are going
to be extensively developed this winter.
Hall and English intend spending con-
siderable money on their ground as do
also other mine owners. Mr. Kelley, who
has been recently joined by A. F. Greg-
gson and O. E. Johnson, and others,
and formed a company and incorporated,
is now on the ground looking over
the properties and intends commencing
work soon. The Bromide company is
steadily developing its claims and get-
ting some good looking rock.

Mr. Roudy and Mr. Atkin, so Mr.
Wilder understood, are going to work
in the near future on their Onyx claims.
The reported rich strike of Hall and
English is no dream for they have
struck it rich and can get good values
at the grass roots. The Wilder and
Harris property joins the English
claims so they are confident they will
soon tap the ledge in the tunnel, that
they are now running for that pur-
pose.

Bull Valley is to be the coming camp
of southern Utah and some valuable
mines but wait the hand of man to
develop them. We have yet to learn of
the first mining man who has investi-
gated that district that has not been
elated over the bright prospect and
made great predictions for its future.
Just keep your eye on that country,
and you will one day see a camp there
that is the equal of any in the west.

STRIKE A GOOD ONE.

Ore Found in Stockton Mine Identical
With That of the Honeine.

That the recent strike reported in
the Stockton mine at Stockton is one
of the most important events in the
history of the camp there is not the
slightest doubt.

Manager Treman, who came in from
camp last night, where he had been
on an inspection trip, declared during
the day that the first report sent out
from Stockton concerning the new find
had not been exaggerated. The
disclosure is certainly the biggest ever
made in the mine.

The body encountered is unquestion-
ably a shoot off from the Catherine
vein, which is one of the prominent
ledges of the Honeine mine, which is
to be followed until it leads the miners
into the main vein. The extent of
the shoot has not been fully deter-
mined, but there is at least an indica-
tion of very high grade ore and identical
with that found in the best ore shoots
of the Honeine mine and associated
with it are some large bodies of low
grade ore.

Manager Treman has ordered a force
of men to work building ore bins and
to prepare for shipments to the valley
smelters.

The fact having been demonstrated
that the Catherine vein crosses over
the mountain into the Stockton prop-
erty, will undoubtedly greatly enhance
the value of the Silver Coin group, by
tying between the Stockton and Galena
King properties.

Samples of the Stockton ore are in
the hands of a local assayer today.

ON MINING EXCHANGE.

Star Con. the Only Stock Sold During
The Regular Call.

Star Consolidated saved the day, so
far as the regular call of the Salt
Lake Stock & Mining exchange is con-
cerned, during the forenoon. That
stock was the only seller, 500 shares
going at 16 1/2 cents. The condition of
the market showed little improvement
even with the unlisted stocks called
during the open board session as Col-
umbus Consolidated was the only one
of this class registering a transfer; but
Century, Star Consolidated, Uncle Sam
and Yankee Consolidated, which are
listed, found slight demand, bringing
the totals of the forenoon calls up to
2,600 shares, representing a valuation
of \$1,165.13.

The closing quotations and sales
were as follows:

IN DRUM DISTRICT.

Provoites Will Locate Ledge Found by a
Shepherd.

Special Correspondence.
Provo, Oct. 11.—A. G. Debe of this
city and T. J. and Heber Barratt of
American Fork have gone to the Drum
Mountain district, in Rush valley, for
the purpose of locating a ledge of gold-
bearing rock from which the Barratts
found some very rich float a short time
ago, while they were in that section of
country with their sheep.

GRAND CENTRAL
MAMMOTH CASE.

The Former Won a Complete
Victory in the Decision of
The Supreme Court.

JUDGE BARTCH'S OPINION.

How Trouble Started—Silveropolis
Claim Involved—A Hard Fought
Legal Battle.

The decision made yesterday by the
members of the supreme court in the
Mammoth-Grand Central suit was the
all absorbing topic of conversation in
mining circles today.

The case had been in the courts for
a little more than six years and it was
one of the hottest contested legal bat-
tles ever fought in Utah in which
valuable mining property was involved.

The effect of the decision, which
was written by Chief Justice Geo. W.
Bartch and concurred in by his as-
sociates, Justices McCarthy and Straup,
is to give the Grand Central company
the portion of the ledge that has been
in dispute and which was awarded to
it by the ruling of the lower court.
The latter is also sustained in its re-
fusal to permit the Mammoth company
to set up new Apex theories on the
opinion of the Judge of the lower court
that two ledges instead of one existed
and that the Mammoth company
presented its case differently. The decision
has won hands down.

The opinion is a voluminous affair,
containing about 32,000 words.
In the original complaint the Grand
Central company alleged that the
Mammoth had trespassed upon the
Silveropolis claim and taken ore of the
value of \$300,000. The Mammoth
company alleged in its answer that
the ore bodies were in a vein, the apex
of which was in the first northerly ex-
tension of the Mammoth ledge, and
that it was entitled to it on its dip for
a length corresponding to 1,100 feet on
the surface of the Extension claim and
on down through the Grand Central
Silveropolis and Consort claims. At
the same time the Mammoth company
filed a counter claim against the Grand
Central for \$350,000 damages for ore
excavated by the latter from the same
ledge.

The case was tried and decided in fa-
vor of the Grand Central, and the de-
fendant's counter claim was dismissed.
The evidence in the case was the de-
termination of the case. Judge Thom-
as Marlowe, the trial judge, stated
that in his opinion there were two
ledges and that the one in conflict prob-
ably had its apex in the Grand Central
claim and the other in the Mammoth
claim, and that had the action been
properly brought the Mammoth
might have recovered damages. As a
result of that the Mammoth
company asked leave to amend its
counter claim to meet the view of the
court. That phase of the litigation was
then thrust into the hands of the su-
preme court, which in its decision re-
fused to grant the petition of the Mammoth.
An appeal was taken to the supreme
court, it being agreed by both sides
that the question of damages should be
left for later determination.

JUDGE BARTCH'S OPINION.

Justice Bartch, after summing up what
had been done by the lower court, con-
cluded:

"Whether the court erred in finding
that the vein mentioned in the counter
claim of the Mammoth, and upon
which trial was had, at its apex and on
its strike, left lot 38 (the court found
north extension) at a point 620 feet
north of the side line of that lot.

"Whether the court erred in refus-
ing to permit the defendant to file the
amendment to its counter claim, and in
refusing to permit the filing of its pro-
ffered original counter claim, in each of
which it was alleged that the vein
found at the south end of lot 38, at its
apex and on its strike, left lot 38 (the
court found north extension) at a point
620 feet north of the side line of that
lot.

"All other questions are subordinate
to and in support of one or the other
of these two," the court holds.
After going into the evidence of the
case very minutely and after quoting
authorities and the various hearings, Jus-
tice Bartch draws his conclusions and
sums up his ruling as follows:

"If, after operations have been con-
ducted by appellants for more than thirty
years, and after all these preparations from
these protracted trials, the appellant is
yet so uncertain as to where the apex
of the vein through which it claims the
ore bodies is in dispute, is that at the
mere suggestion of the trial judge, with-
out proof to warrant the suggestion,
it is willing to abandon its position,
that the apex is in lot 38, and change it to
the Golden King and Bradley, showing that
it is yet unable to say where, then surely its
theory would form an unsafe basis upon
which to found judgment.

"Upon careful examination of this
subject, we entertain no doubt that the
proffered amendment was made, as the
record discloses, not to conform to the
view of the court, but to conform to the
views expressed by the judge, and that
he very properly refused to let it be filed.
"It is a wholesome rule that one shall
not be permitted to fix his rights by a
plea, and one necessary to the proper
administration of justice. The
appellant having founded its claim to the
ore bodies in its neighbor's ground
upon reserved or extra-lateral rights,
has received no injury by its failure
to establish a vein in its own ground
which would warrant a recovery, and
therefore cannot complain of the judg-
ment against it, for it still owns all of
its possessions. By this decree the ap-
pellant has been deprived of none of
its property, although, if it had been
successful, it would have acquired an
immediate portion to its neighbor's land.
"Not unmindful of the grave respon-
sibility that attaches to the final de-
cree of a case of such magnitude and
importance, we have examined with
conscientious caution the voluminous
mass of evidence, and in extensive and
deliberate discussion have announced our
views upon the various questions in-
volved, and have come to the inevitable
conclusion that the appellant has shown
no right of recovery under its counter
claim and no right to amend its plead-
ings."

MESSAGE FROM TONOPAH.

Brings the News of Important Develop-
ments in the Tonopah.

A message from T. J. Lynch at Tono-
pah, received during the day, brought
the information that some important
developments had taken place in the
West Tonopah property, that the ledge
portrayed of the camp had been en-
countered there, and that there is every
reason to believe that that part of the
camp is going to come rapidly to the
front.

AT NEW MILL SITE.

Utah Copper's Temporary Office Build-
ing is Completed.

Out at the site selected for the new
mill for the Utah Copper company, quite
an extensive camp has been established
and the work on the excavations and
foundations for the massive building
that is to be reared on the spot is pro-
gressing in a very satisfactory manner.
J. R. Pocht, the company's new con-
structing engineer, has his forces or-
ganized for work and last night car-
penters had finished his office building
so that it could be occupied. Other
company buildings are in course of con-
struction, and lumber is arriving daily
for additional uses.

Mr. Pocht was in the city during the
day and held a conference with Man-
ager Jackling with reference to the work
he now has under way and to matters
pertaining to the future.

Grand Central Dividend.

The directors of the Grand Central
Mining company met in Provo yester-
day afternoon and voted a dividend of
\$12,000, to be paid on the 15th inst. The
dividend is payable on the 15th inst. The
company closed against transfers on
the 12th inst and reopened again on the
13th inst.

Announced Officially.

It is officially announced, says a dis-
patch to a Reno paper, that the United
States Smelting company has taken
over the Richmond and Eureka Con-
solidated Mining company and that the
old property, which was at one time
subject of litigation and expensive
litigation, is to be opened up on a
large scale. Its ores are to be shipped
to Salt Lake and will be used chiefly
for fluxing purposes by the United
States smelters. The Eureka and Pac-
ific railway will be extended to the
Richmond dump at once and a new
mill will be made on \$90,000. Eureka is al-
ready booming as a result of the an-
nouncement.

CONCENTRATES.

The Phoenix mine at Bingham is go-
ing to have another lot of ore treated
through the Wall mill.

L. A. Juffs, manager of the Superior
Alta property at Alta, has a small
force of men at work there.

Hugh Park, a former well known
Utah mining man, who is the wholly
resident of California is in the city.
The ore and bullion settlements re-
ported late yesterday by McCormick &
Co., were as follows: Crude ore and
concentrates, \$35,500; base bullion, \$25-
500.

George Arbogast and Robert Mulhall,
who have had a verbal opinion on the
Daily-East mine, east of town, made
the first payment the fore part of the
week. The amount was small, but it
goes to show that the above parties
have much faith in the future—Pioche
Record.

RHEUMATISM
NEURALGIA, KIDNEY TROUBLE
CURED BY SWANSON'S "5-DROPS"

C. L. HIGGINS, Belding, Mich., writes:
"When I commenced taking '5-DROPS' I was in
bad shape. My left foot was swollen terribly.
My back was sore and I could not walk without
my cane. Aras and shoulders were so lame I could
not take of my coat. My kidneys were in bad
shape and the uric acid in my neck was so bad
so that I could not look up. They pained me
so at night that I could not sleep. Now after
taking Swanson's '5-DROPS' the swelling is all
gone out of my foot, hands and knees and my
joints are limbered up and my neck is all
right."

It does not matter whether you are suffering from
Inflammatory, Nervous, Muscular or Articular
Rheumatism; whether your whole system is full of uric
acid, whether every part of your body is aching and every
joint is out of shape, Swanson's "5-DROPS" will positively give
instant relief and make a permanent cure. "5-DROPS" is an internal and external
remedy combined, and will give quick relief to the sufferer by application to the
affected parts, while a permanent cure is being effected by its use internally.
Neuralgic pains cease at once when "5-DROPS" is used. Nothing else
ever discovered will afford such early relief or effect a cure so quickly. In Neuralgia
the nerves are inflamed, they throb and shoot from congestion and arrested circula-
tion. "5-DROPS" hastens circulation, quiets the nerves and the pain stops.
You, who are suffering from Kidney Trouble or Liver Complaint will
find a positive cure in "5-DROPS." It is the most effective remedy ever
discovered for these diseases. A single dose will give immediate results. It goes
direct to the spot. It keeps the liver cells properly at work. It restores the kidneys
to their normal condition by removing the acids which are the cause of the trouble.
"5-DROPS" is the most powerful blood purifier ever discovered.

STOCKS OPENED
SOME HIGHER.

Dealings Were On a Rather Small
Scale and First Gains Were
Not Much Extended.

PRICES WERE WELL MAINTAINED

Lackawanna Made Phenomenal Rise
Of 28 Points—Bonds Were
Steady.

New York, Oct. 11.—Opening prices in
the stock market today followed the ear-
lier London quotations to a higher level.
Dealings were on a light scale. Stocks
did not extend their opening gains much,
although a dozen or more were brought
within the range of 1 point advances.
Buying, as on yesterday, was fair. Illinois
Central, Northern Pacific, Chicago North-
western and So. St. Marie and Steel
foundries rose 1, Delaware & Hudson 1/4,
Reading 2, Steel Foundries rose 1, Del-
aware & Hudson 2 1/2, Reading 1 1/2, Steel
Foundries preferred 2, Central Railroad of
New Jersey 1 1/2 and Wisconsin Central 1/4.
There were sales of Lackawanna at an
advance of 20 points. Great Northern pre-
ferred was weak. Northern Pacific 1 1/2.
Trading was quiet, but prices were well
maintained and some of the high priced
stocks made sensational movements.
Lackawanna rose 28 points to 18 1/2, a record
price. Delaware & Hudson and Central
Railroad of New Jersey gained 1/4; Steel
Foundries preferred 1/4, Reading first pre-
ferred 2. One point gains were established
by St. Paul, Rock Island preferred, New
York 1 1/2 and 1 1/4, Reading second
preferred. Losses were Pacific Coast,
Great Northern preferred and Northwest-
ern 2. Prices receded slightly at noon.

There was no particular feature to the
dealings between 12 and 1 o'clock and the
market was fairly steady. Lower in the
afternoon. Reading continued to be bought heavily,
and Locomotive reached 6 1/2. Great North-
ern preferred yielded 1/4.

LIVE STOCK.

CHICAGO.

Chicago, Oct. 11.—Cattle—Receipts, 21-
000; market steady. Hogs, 3,000; steady.
