

DUNN NAMES WILLIAM J. BRYAN

On Calling Roll of the States
Alabama Yielded to Nebraska
To Name Candidate.

CHEERED BY THE CONVENTION

Set Forth in Clean Cut Phrases Character and Principles of the Man
—Seconded by Judge Powers.

Convention Hall, Denver, July 9.—A small American flag had been placed on every delegate's chair prior to the beginning of the evening session. This was the unmistakable evidence of the nominating session of the convention and quickened the interest of the spectators, who early made a rush for the galleries, filling them to overflowing. At 7 o'clock, however, there were few of the delegates in their places. They had lingered long at dinner, the slow dying twilight of the Colorado evenings proving deceptive as to the hour.

"The secretary will now proceed to call the roll of states for nominations for the office of president of the United States," shouted Chairman Clayton.

"Alabama," called the clerk.

The chairman of that delegation arose and was recognized.

"Knowing that Nebraska will make no mistake in nominating the right man," he said, "Alabama yields to Nebraska."

"Mr. J. Dunn of Omaha will speak for the Nebraska delegation," announced the chairman of that state, while the cheering which followed the first statement from Alabama continued unabated.

Mr. Dunn, who was to make the speech, is scarcely of middle age. His clean cut, determined look, clean shaven face, is accentuated by dark brown hair, which, owing to the emphatic manner in which he emphasized his speech with his head, was soon touching the center of his forehead. He spoke clearly and with a pleasing manner of delivery. His speech was as follows:

DUNN NOMINATES BRYAN.

"Mr. Chairman and Gentlemen of the Convention:

"Crises arise in the life of nations when danger threatens their institutions and, at times, imperil the advance of civilization.

"Every people that has left its impress upon history has faced such crises.

"In most instances, where grave dangers have threatened the safety of the state, some great character, some master mind has been found, produced as it were by the conditions themselves, with capacity to direct aright the energies of the people. It has been true of the ancient world; it has been true of the modern world; it is true of this republic. We have such a crisis to meet today. The favor-seeking corporations have gradually strengthened their hold upon the government until they now menace popular institutions.

THE GREAT QUESTION.

"The question is, whether this government shall be restored in the interest of all, or whether it shall remain an instrument in the hands of the few for levying tribute upon all.

"In his special message to Congress last winter, President Roosevelt declared, substantially, that certain wealthy men have become enormously rich by oppressing the laborer, depriving the public and practicing all forms of iniquity, have banded together, and by the unhindered use of money endeavor to secure freedom from restraint and to overshadow and discredit all who honestly administer the law.

CONTROLLED BY TRUSTS.

"For many years, and especially during the last 12 years, these very men have been in control of the Republican party; they have financed every campaign of that party for a quarter of a century. These exploiters of the people, whom the president has so scathingly denounced, have given their enthusiastic support to the Republican candidates and policies. They laid their hands upon the trust funds of insurance companies and other corporations and turned the plunder over to the republican committee. The money thus

fished from the innocent and helpless, to purchase Republican victory, has not been repaid.

"The platform adopted by the late convention shows that the Republican party in truth represents. In framing the platform, every genuine reform which the president has advocated was scorned and repudiated. The Wisconsin delegation asked that one or two reform planks be placed in the platform, and for its pains was denounced as Democratic. The convention by a vote of 8 to 1 refused to approve those planks which the president for four years has been urging upon his party.

"SYSTEM" ADMIRERS TAFT.

"The mask of hypocrisy has been torn from the face of those who pretend to favor the reforms advocated by the president, and it is now apparent why the 'system' admires Taft and hates the senator from Wisconsin. When compelled to choose between an appeal to the conscience of the nation in defense of its platform and candidates, on the one hand, and the millions that the special interests may be dependent upon to contribute on the other, that convention rejected the people and continued its alliance with Mammon.

"If the charges made by the president are true—and they are true—we are indeed face to face with a situation as grave as any in our history. How shall it be met? The good sense, patriotism and united action of the people alone can remedy present evils.

DEMOCRATIC PARTY'S DUTY.

"The Democratic party must furnish the leader which present conditions demand, and he must be a man known to be free from the influences that control the Republican party. He must be a man of superior intellect, sound judgment, positive convictions and moral courage—one who will meet the forces of plutocracy with the naked sword of truth—one who knows no surrender. He must have a genius for statecraft; he must be a man of experience in public affairs; he must have ability to formulate policies and courage to defend them.

"The Democratic party has many distinguished men who might be chosen as our standard bearer; but it has one man who above all others possesses the necessary qualifications and is eminently fitted for this leadership.

IN PRAISE OF BRYAN.

"He is a man whose nomination will leave no doubt upon the minds of the people on every public question. His genius for statecraft is shown by the constructive work he has done in proposing reforms, and by the ability with which he has defended his position. But we may go farther.

"A few months since, he visited the principal nations of the world. He came in contact with the leading minds of the age, and the world abroad recognized his greatness and paid him the tribute justly due to men of high attainments.

"In the most distinguished peace convention that has assembled in recent years, he proposed a plan which, if adopted, would prove more effective than any arbitration treaty that has ever been made, and by his influence he secured its approval by the representatives of the 25 leading nations there assembled.

"Is he thoroughly informed regarding the issues of this campaign? Read his speeches and his writings, which for nearly 20 years have been a part of the political literature of the nation. Is he sincere, brave and determined? Even his political opponents now admit that he is.

SOME CHARACTERISTICS.

"Honesty is inherent in him. He was an honest lawyer before he entered politics. He was honest in his political methods before his statesmanship was recognized by the nation; and he has been honest throughout his political career.

"His convictions have been his political creed.

"Believing in the ultimate triumph of the right, he has never examined questions from the standpoint of expediency.

"He has been a consistent champion of the reserved rights of the states. He favored the election of senators by direct vote before the house of representatives ever acted favorably upon the subject. He championed tariff reform when the west was the hot-bed of protection.

"He favored an income tax before the income tax law was written. He attacked the trusts when Republican leaders were denying that any trusts existed before the crusade against rebates and discrimination began.

"He has always been the friend of labor, and has among the first to urge conciliation between labor and capital. He began to oppose government by injunction more than a decade ago. He announced his opposition to imperialism before any other man of prominence had expressed himself on the subject, and without waiting to see whether it would be popular.

Maple-Flake

It's All Food
Not merely all wheat. Plenty of foods are all wheat without being all food. Maple-Flake is all food because our process makes all the starch digestible. That process takes 96 hours. It is so expensive that other makers don't use it. They think you would rather save five cents per package. But would you? Let us tell you the facts, and see. First, our wheat is steam-cooked for six hours. Think of that—for six hours! Then we cure it. Then flake each berry so thin that the full heat of our ovens goes through. Then we toast the flakes 30 minutes in a heat of 400 degrees. Think of that—30 minutes at 400 degrees. All that is essential. No cheaper method can make the starch all digestible. Starch, to be digestible, must be made soluble. The particles must be separated so the digestive juices can get to them. The shorter the process, the less starch will digest. The rest is worse than wasted. It ferments and disturbs the stomach. The chief cause of gas on the stomach is that fermented starch.

It's All Food

Maple-Flake is the food that's all food. The one wheat food that's all nourishment, because it all digests.

It's the ideal food for children. So we make it delicious by cooking the wheat in pure maple syrup. The flavor is so tempting that children demand it.

It is better—don't you think?—to entice children, rather than force them, to eat the food that is best for them?

The only food served in individual packages in hotels, clubs, cafes, and on dining cars.

Maple-Flake is the food that's all food. The one wheat food that's all nourishment, because it all digests.

Laws

"When a Wall street panic burst upon us a few months ago, he promptly proposed a remedy, the guarantee of bank deposits, and so popular has this and liver to healthy, natural action. The surest remedy known, 35c. The plan became that of the day, a national issue and supported by the masses of the people. He has long advocated legislation which will secure publicity as to campaign contributions.

A MAN OF PEACE.

"He believes in peace—in universal Christian peace. He believes the destiny of nations should be determined not by wars, but by applying the principles of justice and humanity.

"Career proves that successful leadership is determined by the success or failure of great principles rather than by election to high office. We have met to plan the campaign against the trusts, the campaign under whom the masses will enter every.

"We are here representing all that is best in the traditions of our party; we feel again that the spirit that animated the Democrats in the days of Jefferson and Jackson.

VOTERS HAVE SPOKEN.

"The voters have spoken, and we assemble to give expression of their will. The voice for the third term calls Nebraska's favorite son to be the standard bearer of his party in this gigantic contest.

"Since time began no grander tribute was ever paid to any man by a free people. He is recognized today as the most representative citizen of the nation, the peer of any living man.

"First nominated when 10 years younger than any other presidential candidate ever chosen by a prominent party; living in a state 500 miles farther west than that in which any president has ever lived, he has grown in the affections of a free people as the years have passed.

"Without an organization to urge his claims; without a campaign fund to circulate literature in his behalf; without a path of beaten feet; without a predatory corporation to coerce its employees into his support; without a subsidized newspaper to influence the public mind; he has won a signal victory at the primaries.

"Forming in one unbroken phalanx, extending from Massachusetts to California, and from Michigan to the glades, the yeomanry of the party have volunteered their services to make him the party candidate, and they will not lay down their arms until he has won the nation's chief executive.

NEBRASKA PRESENTS BRYAN.

"Nebraska's democracy which saw in him, when a young man, the signs of promise, places in nomination as the standard bearer of our party the man who in the thrilling days of '96 and 1899 bore the battle-scarred banner of Democracy with fame as unsullied and as brightly as any before he entered politics. Nebraska presents him because Nebraska claims his dwelling place, and proudly enrolls him among her citizens; but his home is in the hearts of the command of my state and the mandate of the Democracy of the nation, when I offer the name of America's great commoner, Nebraska's gifted son, William Jennings Bryan."

POWERS SECONDS NOMINATION.

"Massachusetts yielded to Utah, and Judge O. W. Powers of that state made a brief speech seconding Mr. Bryan. Judge Powers started out by paying a tribute to Massachusetts, but the delegates, in disorder, soon demanded that he speak to the point. Judge Powers proceeded to finish his speech, unheeding the disorder that prevailed throughout.

"Mr. Chairman: Few sovereigns have greater power than the president of the United States. He rules eighty millions of people. He controls eighty millions of thinking human beings. Their enterprise is marvelous. Their history is glorious. Their achievements are wonderful, and their future is beyond human comprehension. Their government was founded upon liberty and equality. Each man was granted an equal chance with his neighbor, to unlock with his industry the doorway of opportunity. Education, advancement, and absolute freedom from oppression either by force or through cunningly devised laws is their rightful heritage. With the birth of our nation, the rights of the lowliest human being were recognized and his ambitions were limited only by the extent of his abilities and the earnestness of his endeavors. That encouraged, our people have advanced, until America is a world power and the Stars and Stripes have become the representative of virtue, manhood and perfect womanhood whose strength is known and respected wherever the sun shines and humanity lives.

"By reason of our Constitution, our chief magistrate wields a power but few comprehend. He molds our laws and controls our policy. His office is one requiring the loftiest statesmanship and the greatest sagacity. The office should be filled by a man so close to the people that he can hear their heartbeats and understand the longings that thrush with the pulsations of their earnest life. Dear the voice of flattery, his ear should be quick to discern the moan of distress from the lips of toil. Blind to the dazzling jewels of wealth and power, his eyes should see that our strength and influence depends upon the well-being of the millions who fight the unending battle for existence. Believing in our institutions, his motto should be America for Americans. He should declare that upon this continent we have the right to legislate and to advance internal improvements as to protect the property we create without let or hindrance from abroad. He should believe in the Monroe doctrine and be ready to defend it. He should recognize that wherever our flag is raised by virtue of the Constitution and that no discriminating taxation can be permitted, even though donated by the concentrated power of unlimited capital. He should scorn all entangling alliances abroad and resent all foreign interference with the affairs of this continent.

"Such a president must come from the ranks of the people. He should come from the great west, where the voice of God, borne upon the breezes of the prairie, bears a message of more importance than arises from the tongue of the stock ticker in Wall street. Such a president of necessity must come from the Democratic party, whose principles were crystallized from the longings in the human heart for liberty. Such a president was nominated at Chicago in 1896, when the Democracy of Jefferson was re-narrated and the roar of human acclaim that greeted his name swept out of the convention like a tidal wave of hope and bore upon its crest the suffrages of 6,000,000 of un-bought voters, who named him as their choice. He rallied a well nigh hopeless party and so well did he endow it with his lofty courage that it not defeat without faltering and finally proudly holds his name aloft as a beacon of promise. He is today once more the choice of the Democratic party for president. He is today the choice of the common people, and in the name of the state of Utah, I second the nomination of William J. Bryan."

FOR PROTECTION OF COAL MINERS

United States Government to Begin Series of Scientific Investigations With Explosives.

EXPERIMENTAL STATION.

To Be Established Where Tests of Various Powders and Dynamite Used in Blasting Will Be Instituted.

Special Correspondence.

Washington, D. C., July 6.—The United States government, within the next few weeks, will begin a series of scientific investigations into the causes of disasters in American coal mines in the hope that the present frightful mortality may be reduced to a minimum. By August 1, in accordance with plans approved by Secretary of the Interior Garfield, the interior department will have a complete experimental station in operation on the grounds of the arsenal in Pittsburg, Pa.

For some time before the Hemenway amendment to the legislative appropriation bill, making an appropriation of \$150,000 for this work, became a law and the money available, government officials were busy making tentative plans for the station in order that their safety in the presence of the deadly work lay of the year. Just the other week, 23 miners were killed and 30 injured in and about Wilkes Barre, Pa.

This prompt action was considered necessary because of the fact that the terrible mortality record of last year is being continued into the second year. This year was considered an unusual one, 3,200 being killed in the coal mines as against 2,961 the year before. From unofficial estimates it appears that 16 more have been killed or injured each work day of the year. Just the other week, 23 miners were killed and 30 injured in and about Wilkes Barre, Pa.

TEST OF EXPLOSIVES.

At the Pittsburg experimental station, tests of the various dynamites and powders used in blasting coal will be made with a view to accurately determining the cause of the disasters. A cylinder of fireproof and equally deadly coal dust. Explosives of all sorts will be hurled by means of mortars into a masonry boiler-plate cylinder, which has previously been filled with gas, and the effects will be carefully noted. If ignition fails after severe tests, the use of these explosives will be urged upon the mine owners of the country.

That part of the experimental station in which the explosives are to be tested will be in the form of a cylinder, 100 feet long and six feet in diameter, lying on its end. An explosive mixture of fire damp and air in one case or coal dust and air in another, will be pumped into the cylinder and the cylinder will be closed. A big steel mortar will be fired into the cylinder, and the products of combustion will go right into the explosives.

PITTSBURG SELECTED.

Pittsburg was selected as the site for the station because the government is already in possession of available land and buildings there, but this site is especially favorable because it is in the heart of the eastern coal field, and in the state where 1,514 men lost their lives in the coal mines in 1907 (nearly half of the total for the entire United States). It is also an advantage to have the natural gas so obtainable as this gas corresponds nearer to fire damp than any other.

The cylinder in which the explosions are to occur are to be made of heavy boiler plate. Safety valves will be placed all along the top and will be left unattended in such a manner that whenever there is an explosion the valves fly open upon their hinges.

A series of port holes on the sides, covered with one-half inch glass, will enable those conducting the experiments to see the results of the explosions. From the observation house, 90 feet away, the steel mortar which will hurl the explosives into the cylinder, will be fired by electricity from the observation house.

ECZEMA AFFLICTS WHOLE FAMILY

Suffered for Two Years with Terrible Itching and Burning—Children in Fearful Condition—Unable to Sleep and Kept Scratching.

EIGHT SPEEDILY CURED BY CUTICURA REMEDIES

"The Cuticura Remedies cured eight in our family (my husband, six children and myself) of a terrible eczema. We all of us had the children could sleep at night for scratching themselves. They were broken out thick and crusted all over. Then it would itch and burn and big sores came on their hips and legs. They would cry with them and I myself suffered terribly with the itching and burning. We were this way for two years. It would get worse in the winter. I used all the home remedies that I could hear of without any relief and then I went to a physician and got medicine three different times but it did not do us any good. I did not know what to do so I went to a friend and asked her what it was she used for her children, and she told me it was the Cuticura Remedies. I sent at once for the Cuticura Soap, Ointment and Resolvent Pills. I also got one more box of Cuticura Ointment and two cakes of Cuticura Soap. They relieved us at once and in a short time we were cured. I am truly glad of finding a cure for eczema, and I shall recommend the Cuticura Remedies highly to every one so afflicted. Mrs. RUBY B. BOICE, Rockcastle P. O., Jackson Co., W. Va., Mar. 3, 1908."

SKIN HEALTH

Obtained by Cuticura Soap and Cuticura Ointment.

For preserving, purifying and beautifying the skin, for cleansing the scalp of crusts, scales and dandruff and the stopping of falling hair, for softening, whitening and soothing red, rough and sore hands, and for treating itching humors, eczemas, rashes, itching, irritations, inflammations and chafings of infants, children and adults, there is no more effective and economical remedy than the Cuticura Remedies. They afford immediate relief and point to a speedy cure in the majority of cases when other remedies fail.

Cuticura Soap (5c.), Ointment (50c.), Resolvent Pills (25c.), and Cuticura Gated Film (25c.), are sold throughout the world by the Cuticura Remedies Co., 137 South Main St., Boston, Mass.

house which is to be parallel with the cylinder itself.

MINERS INVITED.

While these tests are being conducted, operators and miners will be invited to be present. In order that they will be able to see clearly the explosions of gas or dust, a piece of paper will be placed across the face of one of the safety valves with a piece of gun cotton suspended about six inches away. When an explosion occurs, the flames will burn the oil paper and ignite the gun cotton.

In connection with the experimental station there will be a miniature mine with drifts, headings, rooms and ladders. This place will be filled with smoke or gas and experiments will be made with apparatus capable of sustaining life in these vapors. Miners will be taught how to wear this apparatus and how to save their comrades who may be unconscious in the mine following an explosion. It is believed that with some such apparatus in use last December when 800 men were killed in four mine explosions, a number of the victims of these disasters might have been saved had they been reached in time. As it is now, following an explosion, with the mine filled with poisonous vapor, no one will venture in the mine some time after the accident. A sad illustration of this is seen in the explosion at Hanna, Wyo., March 28, in which 70 miners were killed. No one has yet entered the mine, the bodies being still there.

EXPERTS IN CHARGE.

The investigations will be conducted by a trained mining engineer experienced in such work. The station itself will be in charge of Lawrence Hall, the government explosive expert, with Dr. Walter O. Snelling as explosives chemist.

The results of the investigations will be published for the benefit of the mine bureau of the various coal producing states, the mine owners and the miners themselves. Simple instructions will be issued from time to time to the miners in half a dozen different languages. There is no intention of interfering in any way with the inspection work of the state bureaus. The work is wholly investigative in character, and educational in purpose. It is the purpose of the United States officials to co-operate with these bureaus to the extent of supplying information concerning the mysteries of the catastrophes in the mines. It is expected that the results will be accepted by the state bureaus as a guidance to future state laws governing the safety of miners.
