THE GREAT COUNTRY PAPER I refer especially to the clause stating that the kindergarten is alrendy a part of the puble school system, and free to all children. Our state law provides that kindergartens may be a part of our school system, but with one exception, this law has not yet been put into op-eration. is what counts in advertising. One advertisement one tim may, and often does, produce results, but people have many things to look at and think of To impress them permanently with any one article takes persistent and continued hammering,

"It is a mistake to suppose a thing has become sufficient-ly well known to need no more advertising. The public has a strangely short memory. A firm which had for twenty years spent \$50,000 a year in making a particular article public, tried the experiment of reducing their outlay to \$25,000 per annum. But the next year it took \$100,000 to restore them to their position. Enormous fortunes are amassed by those who advertise largely, judiciously, and in-cessantly; but all who have had experience in the matter will confirm the statement that the latter is the one great point. It does not do to relax in exertion."
