

**AMERICAN FORK FLOOD
HIGHEST IN 45 YEARS**

(Special Correspondence.)
AMERICAN FORK, June 4.—The recent hot spell has brought the waters

from American Fork canyon to the flood stage. The city fathers have a force of men protecting the property along the banks of the stream. Some damage has already been done, as the gravel fills up the channel and causes the water to overflow. One bridge was

taken out of the canyon last night. The power company has increased its force watching its pipe lines. So far they have successfully combatted the stream and the pipe lines are still whole. Higher water prevails now than has done since the year 1864.

DRY FARM PROSPECTS.

AMERICAN FORK, June 4.—Several members of Cedar Valley Development company, paid a visit to the farms Monday last, viewing grazing in

the northern and central portions of the valley and at the present time big crops are expected. James H. Clark of this city has 90 acres of Turkey Red wheat in the north end of the valley and it looks like a very

good stand, 16 inches high and just preparing to come in head. Mr. Edg. Mulliner also has some fine grain in this vicinity he also has some trees set out and garden peas looking fine. The Cedar Valley Development company has 600 acres, the greater part of

it looks exceedingly well and will be in head in one week. Its foreman, as the least estimate. The stockholders of this company have worked long and been very loyal in keeping the payments and it now looks though success will be their reward.
