Owing to the labor disturbances in Colorado and San Francisco, there has of late been quite an exodus from those places of artisans into this state in general and this city in particular. There

What a Firm Thinks May Happen if State Coats of Arms are Chosen.

Adm. Gen. Burton is in receipt of an interesting letter from the E. A. Armstrong Manufacturing company of Chicago relatives to a letter from the war department in which it is suggested that the different states make some distinctive feature in the new regulation uniform individual to each state, as for instance the badge worn in the center of the cap. The firm says: "As to the suggestion that the different states adopt the coat of arms of the state as a cap device—Heaven defend us!—what a lot of fearful attempts in embroidery will be produced. What impossible ships, buildings, human beings, bears, volvieres, rampant lambs, and peaceful mountain lions. Every manufacturer would have his own interpretation of how much or how little would constitute the design he would be able to get his embroiderers to caricature. In the majority of the states, the coat of arms is complicated to make it possible to embroider the same in bullion (good effect in so small a space) because the result would be a gross grotesque. We recommend to the different states the present army cap as it stands."

It does not do this in a day, but it does it—has done it in thousands of cases.
