LOCAL BANK ELECTIONS.

Now That Panic is Over, Business Be-At a moment's gins to Resume Normal Propor-Notice at our tions-Situation in Salt Lake, Fountain.

The local business situation for the week continues to show a re-establishment of the financial situation on a stronger basis than ever. The local mancial feature of the week was the annual stockholders' election in the national and Walker banks, though the Utah National election was postponed until the 30th inst., at the instance of Mr. McCornick, until certain features relative to the composition of the next directory are more clearly defined to the satisfaction of the majority of the stockholders. The Walker directory chose officers immediately; the Comchose officers immediately; the Com-mercial National directory will can be officers as soon as absent members re-turn to town, the Deserst National di-turn to contrast next Thusday and tectors elect officers next Tuesday, and the Bank of the Republic on the 30th inst. The state banks hold their an-

nul meetings in the spring. It is noticed with satisfaction that the bank clearings are continuing to creep up nearer and nearer the figures ereep up nearer and nearer the figures obtaining a year ago. so that in a few week it is hoped the differences whit have disappeared. In banking, the conditions foreshadowed in the "News" financial articles of the past week, rel-ative to the probable wiping out of the deficit in the New York City bank reserves, have been realized. In fact, the results are beyond expectation. reserves, have been realized. In fact, the results are beyond expectations. Not only was the deficit cleaned up, but \$6,000,000 was realized in excess of the legal requirements. The result has been a very decided increase in finan-cial transactions on the stock exchange, in both bonds and stocks. Some of the best bonds fully recovered in val-ue all that was lost in the panic, and the best stocks also recovered largely. But for some time to come, bonds bears-ing a definite rate of income will grow in value more rapidly than stocks, for until people forget the lessons taught In value more rapidly than stocks, for until people forget the lessons taught by the recent panic, they will be mo inclined to purchase securities with a guaranteed rate of interest than in the purchase of stocks with uncertain earning power.

IMPROVED CONDITIONS.

TMPROVED CONDITIONS. The improved conditions are also re-flected in the desapening of call loan rates in New York, as also the rate for time money, and for commercial loans. And as heretofore stated, con-ditions in New York repeat themselves over the entire country. Moreover, the people who say, "Let Wall street go to the dogs; what concern have we about Wall street," don't know what they are talking about. The facts are that all the money interests of the world are closely linked together, and no ser-fous disturbance can take place any-where without affecting the whole fi-maneial body of the world. For illus-tration, suppose any of the European powers should engage in a great war. Every investor, over the country, who held any of the securities issuing from that power would send them home for sale or redemption. This would create a local panicky condition that would be everywhere reflected. There have been very gratifying lessons taught by the panic just disappearing, in re-gard to local stocks and bonds. The improved conditions are also re-

been very gratifying lessons taught by the panic just disappearing, in re-gard to local stocks and bonds. Says a Salt Lake financier, "Our best bonds have scarcely receded a point; and our best stocks have re-ceded but very little, while very few have sold at a reduced figure. A num-ber of people saved their money for purpose of investing in local stocks and bonds when the recession of prices would uroduce what might be called and bonds when the recession of prices would produce what might be called a snap, in their purchase. But they have been disappointed. No snaps have presented themselves. Now that our financial panic has practically dis-appeared, the entire energies of the country should be directed toward country should be directed toward lifting up and revivifying prostrate industries for they will need more care and doctoring than did our money disturbance. It would be useless to deny the fact that our industrial af-fairs are suffering severely, and it is hoped that the return of confidence in our roney matters will operate to start the wheels of noveress again. Let us the wheels of progress again. Le: us all hope to this end."

The wholesale clothiers are pushing the sale of spring lines of su s and overcoats. There is a better tone re-ported in the market, as retailers are moving their stocks of stple suits and plain overcoats at regular prices. BUSINESS NOTES

The steady climb in the list of the favorites among the commercial stocks was again evidenced this week, when several of the leaders showed unmistakable signs of regaining their old figures. This was especially true of Deseret Savings bank, Home Fire Insurance and State Bank of Utah, all of which were bid for at the prices named below, but were unobtainable. Utah-Idaho preferred advanced 15c to \$7.80, a large number of transactions taking place, and many new stock-

NEW YORK IN DANGER OF BEING SWEPT BY FIRE.

New York, Jan. 18.—Declaring their belief that New York is in danger of being swept by a serious fire and that the city is resting in false security, the board of fire underwriters yesterday began what is expected to be a com-prehensive investigation of conditions, which, if not remedied, they are al-ready convinced, render a calamity in-evitable. They have engaged W. C. Robinson, an engineer, who investigat-ed the Baltimore ruins and the San Francisco burned district, to undertake the work here. Mr. Robinson said yesterday:

Mr. Robinson said yesterday: "With a gale wind blowing and the fire department delayed 15 or 20 min-utes in getting to work, the fire break-ing out in one of the downtown sky-scrapers would in all likelihood get beyond their control and, leaping from building to building, beyond the reach of puny streams of water, destroy hundreds of millions worth of property. HEPBURN ACT.

Railrads Moving to Have its Enforce. ment Suspended-

Chicago, Jan. 18.—The unsettled con-dition in the financial world is to be used by the railroads as an argument to defer the enforcement of that section in the Hepburn act providing that no road can own coal lands. This section becomes effective March 1. It was learn-ad yesterday that the railroad attorneys intend to appeal to the department of justice for delay on the ground that it is impossible for prospective purchasers of the mines to raise the necessary money.

In case the desired delay should not be granted there is a disposition on the part of some roads to contest the law. They contend that it is unconstitutional, as it attacks interests yested under charter authority prior to the enactment of the measure.
