LABOR MEN ARE BADLY WORKED UP

Attempt to Commit Utah Federation to the Saloons Acts As Boomerang.

BREWERS' FINE ITALIAN HAND

The Attempt to Railroad Resolution Through First Started in Ogden By Brewery Workers.

The attempt to commit the Utah Federation of Labor to the cause of the saloon element as set forth in the "News" yesterday, has stirred up the members of that organization to such an extent that many of the leading delegates of the Federation are openly condemning those who took part in the proceedings and the next meeting of the affiliated trades promises to be one of the most interesting yet held by that body. The fact that a meeting of a few members of the Federation, to which the president and other officers were not invited, but which was largely made up of employees of the breweries, could have the arrogance to give out a resolution binding both the state and city federation to use their influence against prohibition, has aroused the indignation of many of the members and they are not at all backward in giving expression to their views.

"I do not care to have my name published in connection with this thing," said one of the officers of the federation this morning. "You can rest assured that the Utah Federation of Labor will not stand for any such action. Why should the federation commit its members to the support of the liquor dealers just because a few brewery workers feel that their jobs are in danger? Isn't the manhood and womanhood of the state worth more than a job for my part, I can't see wherein the federation should act either one way or the other in the matter."

WILL BE INVESTIGATED.
"Why do you think our hard working members would vote against prohibition, just to gratify the desire of a few brewery workers who cannot be expected to do differently? If the matter were brought before the federation for a vote?" asked another of the officers of the Utah Federation of Labor. "This thing of giving out a resolution purporting to come from the federation, when the federation as a body had absolutely nothing to do with it, will be investigated, and you can rest assured there will be 'something doing' when the responsibility is fixed."

The question of prohibition came up before the state meeting of the federation at Ogden last month, and an attempt was made at that time to "railroad" through a resolution against prohibition, but after fully understanding what the measure meant, some of the strongest delegates took a hand in the affair with the result that the motion was lost and another resolution pledging the brewery workers to use their best effort toward eliminating the cheap "divine" and other undesirable liquors, adopted.

It is plainly evident from this statement that the brewery interests are not stopping at any measures that will serve to defeat the wishes of the people, and in addition, to attempt to have a whole labor organization composed of men who go to make up the bone and sinew of the state, and who have wives and children to be directly benefited by the adoption of prohibition, is only one example of the methods to which they will resort.

A MATTER OF CHOICE.

Really, as a matter of choice, we would rather have ten persons deposit \$1 each than one person \$10; or ten persons deposit \$10 each than one person \$100; or ten persons deposit \$1,000 each than one person \$10,000. True, these smaller deposits give us more labor in caring for them—still we prefer them. No one, therefore, should be at all timid about making in small deposits. Make our bank your bank.
