"It is a fact worthy of note that more of our American bishops have been admitted to the holy office on the 25th day of January, than any other day in the Christian year. dominated his file as it has come to be the dominant power in all the earth." At the evening services, Bishop Olms-stead of Colorado gave a review of the history of the church, deprecating pop-ular ignorance on the subject, which hindered the church's mission. He said, there could be and is only one church one Christ, one faith and one baptism and the unity of the church is not de-stroyed through the fact that customs stroyed through the lact that customs differ. The church of England was the first to declare itself independent of the Roman pontiff who asserts falsely that his power is divine. The advance of elvilization in this country is due to the Bondida produce correle who hence inglish speaking people, who brough helr religion, social amenities and cusoms from the glorious mother country Bishop Funsten said that the Ro man soldiers had taken the religion of the church to the British isles. The reformation washed away the defile-ments. The first settlers in Jamestowr brought the church with them to this country. The revolutionary war had wrought great havoc to the church o England in Virginia, where at the out break of the war there were 200 churches, es, and in 1800 only 15. The speaker deplored the fact that the word of God was not used in some public

schools, for the moral training it would give the children if nothing else. The bishop closed with a tribute to Bishop Tuttle, the ploneer, who pre-
