

He Sends His Message to the Members of the City Council.

WARNING AS TO FRANCHISES.

Urges the Exercise of Extreme Care In the Granting of Long-Term Privileges.

The annual message of Mayor Morris for the year 1904 was submitted to the elty council last evening, and was read to that body by City Recorder Critchlow, after which it was referred to the committee on enrollment with instructions to have printed 100 cloth-bound copies and 100 paper-bound copies at a cost not to exceed \$500. The message, which contains some very interesting figures in connection with the city administration during the past year, follows in full;

Mayor's Office, Sait Lake City, Utah, Feb. 18, 1905,

To the Honorable, the President and Members of the City Council:

Gentlemen-I respectfully submit this, Gentiemen - I respectfully submit this, my second annual communication, to you, together with the annual reports of the various departments of the city, offering therewith such suggestions and dations as the occasion seems to warrant.

BONDED INDEBTEDNESS.

The total bonded indebtedness of the

The total bonded indebtedness of the city is \$2,78,000, being 800 5 per cent Interest bonds of \$1,000 each, \$500,000; 200 4 per cents of \$500 each, \$100,000; 1,350 4 per cents of \$1,000 each, \$1,350,000; and 56 45 per cents of \$1,000 each, \$548,000, as follows: as follows:

Issue of May 1, 1804, 20 years, 5 per cent (Series No. 5).......\$ 900,000 Issue of Sept. 1, 1898, 20 years, 4 per cent (Series No. 6)...... Issue of Oct. 1, 1900, 16-20 years, 4 per cent (Water Series No. 250,000

250,000 500,000 200,000 548,000

Total\$2,798,000

The annual interest on these bonds The annual interest on these bonds amounts to \$122,660, a decrease in inter-est over the year 1903 of \$2,740. This was accomplished through funding the issue of July 1, 1892, 10-20 years, 5 per cent (Series No. 4), \$548,000, at a lower rate of interest.

COMPARISON BY CITY AUDITOR.

The auditor submits a comparison of financial condition as follows-Dec. 31, 1903, and Dec. 31, 1904:

- 1903-Net balance general funds, Dec. 31, 1903-\$33,906.21
- meral taxes uncol-acted Dec. 31, 1903. 49,500.37 Vater rates uncol-lected Dec. 31, 1903, 33,841.18
- Net cash balance and collectints Dec. 31, 1903...\$117,247.76

ous 28,637.90 31,666.00 3,018.10

Increase over the year 1903. \$10,323.55 BOARD OF PUBLIC WORKS.

This department reports the past

year one of activity, more work hav-ing been done during this period than in any five years preceding. During the year were laid six blocks of street paving, as against two blocks in the year 1903. In addition to this the work of paving Brigham street, from State to Seventh East street, has been com-menced. It is estimated that the total cost of street paving and grading dur-ing the year 1904 will amount to \$90,-274.36, as against \$24,355.49 in the year

There were 3.57 miles of sewer laid during the year, the aggregate cost being \$26.507.39, and provision has been made for 10.51% miles more during the

ensuing year. Three and ninety-two one-hundredths miles of water mains were laid during the year, the aggregate cost being \$27,-449.19, and it is proposed to lay 1 1-3 miles the present year.

SAVING IN SIDEWALKS.

During the past year 14.92 miles of cement sldewalk were laid at an aggre-gate cost of \$80,166,15, at a saving in this class of work to property holders and the city of about 16 per cent over the cost in previous years. In addition to the Toregoing, some 2.75 miles of ce-ment sidewalk have been laid by pri-vate individuals at their own expense. The following suggestions and recom-The following suggestions and recom-mendations I quote from the report, all of which I heartily indorse:

PUBLIC WORKS SUGGESTIONS. "In view of the extent of vements that will probably be made during the present year, particularly along the line of sewer and water main extension, we desire to suggest that so far as practicable the materials for so far as practicable the materials for these classes of work be obtained in future from our own citizens. We be-lieve in patronizing home industries, and thereby giving employment to our own citizens, and we recommend that proper steps be taken to ascertain if materials, etc., used in the construction of these improvements cannot be obmaterials, etc., used in the construction of these improvements cannot be ob-tained in Salt Lake City at as little cost and give as satisfactory results as those obtained from outside points. To illustrate: We understand that cer-tain partles contemplate starting a plant for the manufacture of sewer pipe. If such a plant is erected and operated, and its product and prices are right, we think they should be writ-ten in all our future specifications. Again, we understand that certain firms in this city (Crane company, Dafirms in this city (Crane company, Da-vis Howe & Co. and Silver Bros.) manvis Howe & Co. and Silver Bros.) man-ufacture hydrants which, it is claimed, are the equal of the Ludiow hydrant, which we are now using, and which ap-pears in all our specifications. These claims, it appears to us, should be in-vestigated by competent and disinter-ested parties, and, if found to be true, such hydrants should be used and writ-ten in future specifications, as we are ten in future specifications, as we are advised that they can be furnished as low as the Ludlow, now in use as be-fore stated. PATRONIZE HOME INDUSTRY.

DESERET EVENING NEWS: TUESDAY, FEBRUAR, 21, 1905. structed dangerous to the public. It has been demonstrated repeatedly that the concrete walls for the support of the gutter plates do not afford sufficient strength to stand the continued and heavy traffic passing over them, and on nearly every intersection we have re-ceived complaints of loose plates which we at once replace and are almost the ceived complaints of loose plates which we at once replace and are almost im-mediately notified that the same condi-tions again exist. We therefore recom-mend that in all future work of this character permanent foundation walls for these plates be constructed by sub-stituting the concrete walls, now used, with either a stone curb or a brick wall of suitable thickness to remedy this dewith either a stone curb or a brick wall of suitable thickness to remedy this de-fect in the present construction. The additional cost of this charge will con-sist only in the cost of the stone (should these be preferred to a brick wall), which cost would be increased about 25 per cent, but would then be a perma-nent improvement resulting no cutbar

nent improvement requiring no outlay for maintenance, and would also ob-viate any possibility of accident to the public SIDEWALK EXTENSIONS INTER-RUPTED. "The completion of the work on cer-

tain sidewalk extensions, as you are al-ready informed, was interrupted by the institution of legal proceedings which may result in deferring the completion of said work for an indefinite time, of said work for an indefinite time, and as there are other extensions where similar conditions exist it is possible that further interference may be inter-posed in a similar way, the conten-tion of some property owners being that respect should be had to surface contours of long existing walks rather than a strict compliance with the so-called established plans of grade. In view of these facts we think the pro-priety of a conformity to the wishes

priety of a conformity to the wishes in residence districts might well be considered in preference to a strict compliance with arbitrary grades, es-pecially in view of the possible avoid-ance of a repetition of unfriendly criti-cism and protests by property owners,

"The foregoing suggestions are doubtless matters which should prop-erly be passed upon by the engineering department, and we therefore recom-mend, in case suggestions meet with your approval, that they be referred to said department for action thereon." ENGINEERING DEPARTMENT. The report of the engineering department for the year shows the re-ceipts to be \$5,597.50, and the cost of maintaining the department in its reg-

maintaining the department in its reg-ular and fixed work was \$15, 990.62, leaving the net cost thereof but \$10,-033.12, as against \$12,014.28 for the year 1903; a decrease for 1904 of \$1,981.16, The gross expenditures of the year were

Regular and special payrolls., \$29,772.60 Vouchers 4,971.02 Total\$34,743.62

An increase over the year 1903 of \$8,-470.00

Of the gross amount (\$34,743.62) \$18,-753 was for special work done, and of this latter amount, about one-half was or is to be, recovered into the city treasury through special assessments for sidewalks, etc., collected by the city treasurer.

PUBLIC IMPROVEMENTS MADE. The public improvements made dur ing the years amounted to \$182,235.42, divided as follows:

Watermain extensions\$ 27,449.19 4.190.66 Canal Repairing street pavements .. 11,415 Bridges

545.47 Miscellaneous, grading streets, Total\$184,235.42

The work of 1903 amounted to\$125,238,-38; hence the improvements in the year just passed exceeded the previous year 50 per cent. The work contemplated for 1905 is:

Paving South Temple street from State to Seventh East street; Paving the west side of State street from Fourth South to Tenth South street; completing gravel sidewalk extentions com-meneced in 1904; and constructing meneced in 1904; and constructing about two miles of cement pavement. ENGINEER'S RECOMMEDATIONS. The report states that at the present time the city has five and one-halt miles of paved streets of which 2 6-10 miles on which the contractors' guarantee has expired, costs, approximately, \$3,600 per annum to keep in repair, As each year will witness more new pav-ing and, therefore, as more streets will finally revert to the city's care, the engineeer recommends de-creasing the distance between curb lines in the residence discricts, which will not only reduce the cost of re-pairing, but will be a reduction in the original cost of paving to the property-owners. The engineer also recommends very strongly the use of macadam on all streets where traffic is not excessive and suggests that a few experimental pavements be laid, with the view of testing the various kinds of stone, na-tive asphaltum, etc., within reach of this city. WATER MAINS NOT WELL LAID.

The report is very thoroughly and artistically compiled. It reflects great credit upon the department of the enbetween streets, as ling carts gineer and contains a deal of valuable information respecting the rapid growth and advancement of the city in the matter of public improvements. I indorse all of the engineer's rec-These 9 fully su sideration FOLICE ommendations.

IRRIGATION AND WATER SUPPLY DEPARTMENT.

The exp for the ye The expense of maintaining this de-partment for the year just passed amounted to \$12,891.67, with a credit for hay furnished the several depart-ments of the city of \$1,557.95, and cash credits for hay sold and lease of grav-el pits of \$779.15; leaving the actual cost of the department for 1904 \$11,-\$54.6 The improvements made during the

year were: New flume in Mill Creek canyon. \$ 650. New weir for Parley's canyon

New wehr for Farter's canyon ... Mowing machine Parley's canyon station Armstrong ranch, repairs Bridge on State street 750 Total cost of improvements ... \$2,275

The total value of city real proper-ty and improvements reserved for public or municipal purposes is repre-sented to be \$1,275,782, and the total value of city real property and im-provements held as private property \$76,937, making a grand total of \$1,352,-719.

RELATIONS WITH FARMERS AM-ICABLE.

The commissioner reports the most amicable feeling between the city and the farmers on Parley's creek, in the matter of the exchange of waters of the Salt Lake and Jordan canal for the waters of Parley's creek, and says: "We have experienced no trouble or unpleasant features in working under the contract during the past season." The commissioner recommends that a certain flume in Par-ley's Canyon, known as "Par-ley's Canyon Surplus Ditch, Incorpor-

that a certain nume in Par-ley's canyon, known as "Par-ley's Canyon Surplus Ditch, Incorpor-ated," should be investigated by the city attorney, with the view of having it removed, claiming there is danger of the said corporation, in three years, claiming a permanent water supply from the city. The commissioner fore-sees only trouble and litigation to the city allowing this flume to remain. city by allowing this flume to remain. The commissioner also recommends the widening of the road in City Creek anyon, and that graved teams be de-parred from using this road during the

ummer months. The foregoing recommendations hould have the careful consideration of your honorable body.

"To patronize home industries not only helps to build up our city by help-

ing the manufacturerer, individually and personally, but by keeping 75 per cent of the cost of such manufacture within our own borders, tends to stim-ulate our municipal growth by benefit-ting all classes of the community as well as by attracting labor from other points and thereby increasing our popu-lation and our wealth.

"The above recommendation and ar-gument does not apply solely to manu-facturers, but also to those who handle the manufactured articles which we need and are able to furnish, such as

will accomplish as good results at ap-proximately as low figures as those we obtain from outside points. To illus-trate: In the matter of valves, the Crane company of Chicago have long had an agency here; employ men, pay taxes and thus contribute to the welfare of our city. This house handle a valve which it claims is the equal (in respect of merit and price) of the Ludlow valve.

of merit and price) of the Ludlow valve, now in use, and which we obtain from Troy, N. Y. This claim, we think, should be investigated, and the Crane company, as well as others similarly situated, be given a chance, at least, of our patronage, other things, of course, being equal. In short, our specifica-tions along these lines should not be restrictive, and anything like exclusive-ness should be avoided; the questions only to be considered, being economy, excellence and efficiency. excellence and efficiency.

SMALL HYDRANT COVERS.

'We would also suggest with referthe regular small brick hydrant covers be substituted for the large ones now being used, the advantage in using the small covers lies in reducing the amount of sidewalk space taken up, as against the space occupied by the larger cover in constructing the brick hydrant boxes. The gain in sidewalk space by this substitution will be about one-third, and we are advised by the water department officials and others, that equally satisfactory results will be ob-tained. covers lies in reducing the

GUTTERS ARE EXPENSIVE.
