

BRIEF TALKS WITH UTAH LAW MAKERS.

Strange Geological Erosions in Kane County—A Coal Mine That Has Burned for Seven Years—Mineral Wealth in Beaver.

H. S. Cutler, the Kane county representative in the House of Representatives, says that geologists claim that Kane, with its series of plateaus and deep canyons running down into the Colorado canyon is the most pronounced known example of erosion on the earth. He says that the men who make a study of the structural formation of the earth's surface say that the erosion of wearing away of these plateaus is of comparatively recent date, that is to say within the last 500 years or so.

The county, says the big man from Kane (Mr. Cutler is a man with the frame of a giant), rejoices in being the best timber land in the State. In fact the timber lands of the State are now practically confined to Garfield and Kane counties. Lack of transportation prevents the extensive cutting of timber as it does the mining of bituminous coal, of which there is an abundance, the nearest railroad point being Kanab, the county seat, which is right on the Arizona line and a hundred and fifty miles away. Taking of coal, by the way, the coal mine in the Pahreah country in which there was an explosion

Has the State a Right to Impose a Dogma of Medical Practice?

A correspondent writes: Under this heading Dr. A. Lutand, editor of the Journal de Medicine de Paris, published the following article in that journal. It was translated from the French by T. C. M., and published in Vol. 46 of The Cincinnati Lancet-Clinic, a weekly journal of medicine and surgery, Dec. 29, 1900. As the information comes from the regular medical profession and shows conditions as they are today, especially in Utah, it will be of great value to the people and legislators of Utah. Will you kindly publish the article in the "News?"

Dr. Lutand says: "The mania to legislate on matters of medicine and hygiene, derived from England and Germany, has now developed in France. Not only are laws made more or less oppressive to the liberty of the people, but even against the rights of the physician himself. That which starts in the fact that the instance of individuals belonging to our own medical corporation, is certainly not the general practitioner, those who gain a living honorably and by hard labor in the exercise of the medical profession, who have asked for such enactments against personal liberty and added restrictions to the art of healing; the latter know full well the dangers of contagion.

There exists in Paris a sort of syndicate, composed of doctors who, being unable to secure a practice, are disliking and shrinking from the arduous duties that the regular practice of our profession presents, constitute themselves the protectors of the public health. They are legion in Paris; these hygienists in office; they form a powerful corporation, a sort of free masonry whose members distribute among themselves the wonderful profits of the practice by contributions in which I have unfortunately taken a part. One of this kind was given the title of professor of hygiene by the municipal council in exchange for a dozen conferences held with janitors of dwelling house flats, he receives a salary of \$2,400 a year (official list); yet another inspects the sanitary service at a salary of \$3,600 per annum; a number of these draw enormous fees from the minister of the interior, or from the numerous bacteriological laboratories that they themselves created. Finally, one such specialist expert exchanged his practice with few patients in a poor district of the city for a salary of \$5,000.

"My protestation is made here; it is made to especially call the attention of the general medical practitioners to the dangers presented by the laws and regulations applied or yet projected for the purpose of placing under subjection or enslaving the public and the corps of general practitioners. This legislation commenced by making obligatory for all physicians to declare all affections, the contagious character of which still rests on the very uncertain foundation of bacteriology. [The health department of the United States now have their official bacteriologist. In order to determine whether a case of sore throat is malignant, or a number of special investigations by means of guinea pigs, taking some twenty-four to thirty-six hours, is required. Meantime the patient has time to spread the malarial, and under some official orders to die and be buried before the result of bacteriological investigation is known.—Translator.] But our hygienists go farther on their road; they wish to assure the triumph of the laboratory idea over that of the clinic by improving their so-called preventive injections.

"Having already succeeded in rendering Jennerian vaccination, that is opposed and resisted by a large number of physicians, obligatory, but going beyond this point even they wish to impose their preventive vaccinations against hydrophobia, cholera, tuberculosis, plague, diphtheria, syphilis; the number of serums is today considerable; there are more serums than malarial. It is easily seen that this well-conceived plan of the hygienists and the men of the laboratory is to subject the man of our profession to the exploitation of their products; they wish to make preventive injections obligatory. They want to worm out by complicity with parliament a good little law for themselves, and hope for its administrative regulation. Thus no child will be allowed to go to school unless it has been vaccinated against diphtheria, tuberculosis, plague and cholera; at public schools as with the regiment, it is necessary to 'forward march!'

"Our free-will has already disappeared before the laboratory idea. Each new serum is pompously announced in the well-paid public press before being submitted to the criticism of the clinic; it is not the doctor, but the public that is misled by the question. When the doctor is called to the patient's bedside, the clinic says, when his child has a sore throat, 'Quick, doctor, inject that serum!' If there is a pupal complication, they desire Marmorek's serum for their wives; they have read notices of its valuable properties in the public press. In fact, the general practitioner no longer directs the treatment; he is only a syringe in the hands of the laboratory men. I warn all my colleagues against the invasion of these medical salary grabbers, who, not content

either the vaccination protects from smallpox or it does not protect; if it protects, the vaccinated are protected and can run no risk of danger from the unvaccinated. For this reason perfect liberty should be allowed, and those who refuse vaccination should be allowed to remain free. But when an individual is found infected by a malarial fever, for this reason perfect liberty should be isolated, this isolation should be made in such a manner that the patient should be allowed to have any method of medical treatment he desires.

"Finally, Dr. Levinson enumerates the cases in which the law may intervene in matters of medicine and hygiene as follows: "1.—Since everywhere the law, and justly, claims that all persons exercising an art or trade should be attentive and skillful, and being held responsible for the privations caused by others, by inattention or lack of skill the same responsibility must weigh upon the practitioner of the healing art. 2.—The perniciousness of certain materials called poisons, when one employs them, present such dangers that the law, for the purpose of public safety, may only authorize their possession by certain persons and specify the conditions under which other persons may purchase or possess such poisons.

"3.—The law must regulate the conditions of isolation of patients attacked by infectious maladies, on condition, nevertheless, that this malady shall be indisputably contagious, but always under the condition of safety to the rights of the patient as to the medical treatment he demands. In this regard a caution will be very necessary to preserve citizens from medical exaggerations. I say this for the purpose of making themselves important, multiply in a most ridiculous fashion the pretended contagious maladies, basing their claims on mere hypotheses. 4.—The law must interfere in the question of removing the dangerous defecations and seek the best and quickest possible way to destroy the same. 5.—The law must interfere in the case of all diseases that arise from overcrowding of population, especially in cities."

TO ENTERTAIN CHICAGOANS.

Hon. Spencer Clawson Writes to Gov. Wells Regarding Commercial Club.

Governor Wells is in receipt of a letter from Spencer Clawson, who has been in Chicago on business, about the intended visit to Salt Lake of the Chicago Commercial club. Mr. Clawson is anxious to have the visitors, who are among the most influential citizens of Chicago, properly entertained, and he suggests to the Governor that the Governor write the secretary of the club inviting its members to visit Salt Lake and that the leading merchants and bankers of Salt Lake be asked to form a committee to properly receive and appropriately entertain the visitors. All members of the club will be present on this trip, which will be made about March 15th. The club will meet Saturday to perfect details for the trip. The Chicago Commercial club is the oldest and most exclusive organization of its kind in the country, and its limited membership consists of George E. Adams, E. E. Ayer, W. T. Baker, A. C. Bartlett, E. M. Barton, E. W. Blum, H. B. Butler, Eugene Cary, W. J. Chalmers, J. M. Clark, R. C. Clowry, A. J. Easting, J. H. Ekeles, Bernard A. Eckhart, E. E. Farrell, J. A. Farrell, J. Marshall Fish, W. A. Fuller, L. J. Gage, J. J. Gleason, J. S. Hannah, F. H. Head, H. N. Hinchman, Christopher Hotz, J. L. Houghteling, Marvin Houghton, C. L. Hutchinson, John J. Dwyer, J. Jones, J. A. Kane, K. Rollin A. Keys, E. O. Keith, C. Kimball, H. H. Kohlstaed, Victor F. Lawson, T. J. Lefens, Robert T. Lincoln, C. H. McCormick, J. H. Macfarlane, R. H. McVey, J. C. McGee, C. W. Clark, John J. Mitchell, Thomas Murdoch, F. B. Peabody, E. M. Phelps, O. W. Potter, Norman B. Ream, Edward P. Ripley, M. A. Ryerson, Byron L. Sells, J. H. Smith, J. A. Spang, Melville E. Stone, Charles H. Wacker, George C. Walker, J. H. Walker, D. H. Burham and C. H. Hulburd. These men represent the financial, commercial, newspaper and social life of Chicago, and each is one of America's leading men in the line of business he represents.

WOMAN WITH A BEER GLASS

Does Considerable Damage to the Head of a Colored Waiter.

Will Ray, a colored waiter at the Knutsford, became involved in a row in a resort on Commercial street early this morning, and got decidedly the worst of the argument. What makes it worse for Ray, he was pat completely out. The woman accomplished the task by hitting him over the head with a heavy beer glass, cutting the temple artery, causing the blood to flow freely. Dr. Giesy found it necessary to close it up. At last account, Ray was resting easily at the Knutsford.

NICK WAS SHOT AT.

Returns From Seefeld With Story of Conditions There.

Nick Guhransen, who has been serving as deputy sheriff since last Thursday down at Seefeld, guarding the property of the Pleasant Valley Coal company, returned to Salt Lake yesterday. He reports the weather as extremely cold down there, and says it is an altogether undesirable place to do duty in. He claims that on Saturday morning about 2 o'clock, while he was on watch, two persons shot at him near the powder magazine. One of the bullets, he says came uncomfortably close to his face, and the other almost touched his knees. He claims that no effort was made to investigate the cause of the shooting, and as he did not wish to remain as a shooting target, decided that Salt Lake had a more congenial atmosphere to live in. He says about forty deputies, a lot of 12 to 20 black, are down there on guard. One hundred and fifty miners are working and about 600 are still on strike, with but little prospect for settlement.

SMALLPOX DEVELOPMENTS.

Only four cases of smallpox were reported to the health board yesterday afternoon. They were: Thomas A. Reamer, aged 22, 63 South Seventh west street; George Svenson, aged 21, 347 East Second South street; Carl Cowan, 611 South Third West street; Ada Cowan aged 15, 365 West Sixth South street.

A communication from State Medical Inspector Baker who is at Coveville, states that he has discovered forty-five cases of smallpox at that place. He says the people there are somewhat disinclined to report the situation.

PLACER MINING LAWS.

Representative King Urges Their Extension to Saline Lands.

[SPECIAL TO THE "NEWS."] Washington, D. C., Jan. 23.—Wm. S. Tucker, wife and daughter of Salt Lake, are here.

Representative King today made a big fight in the House on the bill to extend the placer mining laws to saline

What She May Expect.

The Goal of Love is Marriage and the Goal of Marriage is Maternity.

When a young man and young woman are very much in love every step of life they take is timed to the music of the wedding march. The happy consummation may be years away, but down the path of the years the clear eyes of love discern the spot which some day they shall call home. And when the marriage is consummated and the home founded another thought begins to fill the minds of wife and husband, that thought that lies so deep for words, the thought of a cooling baby.

voice of the pattering of tender baby feet and the music of happy baby laughter.

If the love of man and woman leads to marriage, and marriage leads to maternity, what is the plain and obvious duty of the woman about to assume the obligations of wifehood and motherhood? It is her duty to prepare herself for her own sake and the sake of the children that may be given her, as well as for the sake of her husband and her home.

HOW TO PREPARE.

The first thing to do is to cure diseases of the delicate organism which determine the health and strength. Regularity must be established, disagreeable and weakening drains must be stopped, weakness must be cured.

"I have taken six bottles of Dr. Pierce's Favorite Prescription," writes Miss M. Fyfe, Pleasanton, Cal., "and two bottles of the 'Pleasant Peppets,' as you advised for congestion of the uterus, and for weakness, and can safely say that your medicine has been most beneficial to me. I am much better health again, which I had not had for over three years, until taking your medicine. I thank you for your kind and prompt attention to my letter asking advice."

Dr. Pierce's Favorite Prescription meets the needs of women at every period of life. It is invaluable in that transition period when the girl becomes a woman, establishing regularity and promoting the general health. It dries the excessive and enfeebling drains, heals inflammation and ulceration and cures female weakness. From the time of the first change from girlhood to womanhood until the last change of life, in the weakness of womanhood and trials of motherhood, Dr. Pierce's Favorite Prescription is a true woman's friend. It makes women strong and well.

"It is a pleasure for me to recommend your medicine," writes Mrs. Rhoda Russell, of Navarro Co., Texas. "I had suffered for years with a disagreeable drain and other female troubles, but now, thanks to Dr. Pierce's medicine, I am much better and your medicine has done me more good than all else. I took nine bottles of 'Favorite Prescription' and six of 'Golden Medical Discovery.' Had it not been for Dr. Pierce's medicine, I could not have suffered continually the rest of my life. I shall always praise these preparations. The cost of them is so little compared with the good I felt, yet I owe you for what you have done for me."

lands which he won out by the passage of the bill. Mr. King this morning appeared before the committee on the irrigation of arid lands and made an able argument in favor of having the geological survey make a survey of the lands and water system to be needed. The committee will meet again next Monday and Mr. King expects they will make a favorable report. A patent has been granted John Pattem of Mant, for trip for hay forks.

MRS. P. T. COOK OF EUREKA DEAD.

[SPECIAL TO THE "NEWS."] Eureka, Utah, Jan. 22.—Mrs. P. T. Cook was operated upon at the Eureka hospital last week for tumor and died at that place last evening. Mrs. Cook was 53 years of age at the time of her death and has been a resident of Eureka for a great many years.

A husband and son, Wm. Cook of Mercer, survive her. The funeral services will be conducted from the I. O. O. F. hall tomorrow afternoon, under the auspices of the Eureka lodge No. 12 I. O. O. F.

JOHN ELLISON OF MAMMOTH DEAD.

[SPECIAL TO THE "NEWS."] Mammoth, Utah, via Eureka, Jan. 22.—John Ellison, aged 22 years, died last night at the home of his parents here, from pneumonia.

Mr. Ellison was a single man and had been employed as tax car man at the Mammoth, where he caught a severe cold that developed into pneumonia. The remains were prepared for shipment and today sent to Mt. Pleasant for interment.

HAMILTON ARRAIGNED.

E. W. Hamilton, alias Keefe, was arraigned yesterday afternoon in Judge Timmony's court on four charges. One was assault with intent to murder Henry Lewis. The other three were assault with a deadly weapon, with intent to do bodily harm to Officers Marney E. Pack, John Smith and E. P. Pratt. He pleaded not guilty to each of the charges and waived preliminary hearing. His bonds in the first case was fixed at \$4,000, in the second, \$2,000, and in the third, \$1,000. Hamilton is represented by Attorney C. E. Wanless.

PROPERTY TRANSFERS.

Abstract of file in county recorder's office, Salt Lake City, January 22nd: William M. Butcher to Alfred B. Hirth, warranty deed, 4x5 rods southeast corner lot 6, block 20, plat A.....\$1,000 Laura E. Holt to G. C. Wayne, warranty deed, lots 12 to 20, block 2, East 5th addition.....400 Adaline McCausland to Leo G. Block, warranty deed, lots 2 and 3, block 1, Brighton.....400 Adaline McCausland to Leo G. Block, warranty deed, blocks 9 and 16, Garden City addition.....50 Richard Troize to H. W. Fuller, warranty deed, lots 34 and 35, block 1, Erie.....675 H. Adams to George J. Fox, warranty deed, lots 39 and 40, block 3, Central Park subdivision, 1,300.....\$5,750 Total.....\$7,750

THE NEXT STEP.

In wifely preparation is to prepare for motherhood. Preparation by the use of Dr. Pierce's Favorite Prescription will give bodily strength and mental cheerfulness. It will banish that feeling of fear and apprehension which so many women suffer from at this time. It will encourage the appetite, induce refreshing sleep, and make the baby's advent practically painless.

"I was pleased that Dr. Pierce answered my letter," writes Mrs. C. V. Young, of 21 South Regent Street (Lee Park), Wilkesbarre, Penna. "I had consulted a physician before my husband persuaded me to take your medicine. My back used to almost break when at work and I would get sick at my stomach and have such headaches I did not know what to do. They used to get me nearly crazy, and I used to dread to get up. I felt so bad. Then I began taking your medicine. When baby was expected I took it all the time I was that way. I felt fine all the time and I never ever have a nervous headache any more. I have a perfect room of a boy; he is the light of our home. I am now twenty years old and my baby is almost eight months old. I feel well and weigh 135 pounds, and the baby 23½ pounds. We feel very grateful for the good your medicine did for us. We are both hearty, thanks to Dr. Pierce's medicine."

FOR BABY'S SAKE.

the use of Dr. Pierce's Favorite Prescription is advised for all expectant mothers. It not only helps the mother, but helps the child. All the child's strength must come from the mother. "Favorite Prescription" gives the mother strength to give her child.

There is no alcohol in "Favorite Prescription" and it is absolutely free from opium, cocaine and all other narcotics. Women suffering from chronic ailments are invited to consult Dr. Pierce by letter free. All letters are privately read and privately answered and the written confidences of women are guarded by the same strict professional privacy observed by Dr. Pierce in his personal consultations with women at the Invalids' Hotel and Surgical Institute, Address Dr. R. V. Pierce, Buffalo, N. Y.

The Invitation to consult Dr. Pierce by letter free is not to be confounded with the spurious offers of medical advice which are made by irresponsible persons without knowledge or professional experience.

YOUNG MARRIED PEOPLE.

and those looking forward to marriage will find Dr. Pierce's Common Sense and his intelligent, reliable, and health and happiness. This great work containing 1,008 large pages, is sent free on receipt of stamps to pay expense of mailing only. Send 21 one-cent stamps for the book in paper covers, or 31 stamps for the cloth-bound volume. Address Dr. R. V. Pierce, Buffalo, N. Y.

WILL NOT PARTICIPATE.

Princeton Gives Reasons For Not Sending Students to Inauguration.

Princeton, N. J., Jan. 23.—The university will not send a body of students to Washington to represent it at the inaugural exercises on March 4. At a meeting of the faculty, it was unanimously decided to send the following letter to the committee on arrangements for the inauguration day program:

"The faculty of Princeton university acknowledge with thanks the invitation to send a body of students to represent this university in the inaugural parade and ball at Washington on March 4. We feel obliged to decline the invitation, not on any political grounds nor from lack of patriotism, but solely because, in our opinion it lies outside the functions of the university to send its students away at a very busy time of the year to participate in public parades and social festivities. The amount of time in each year which students actually spend in college is already too short. In our judgment, it is unwise to send students well nourished and strengthened by attention to their present duties and by mastering the studies which will enable them to understand the principles upon which our institutions are conducted.

BASKET BALL MATTERS.

Umpires and Referees Chosen—First Game Tomorrow Evening.

A meeting of the basket ball teams was held yesterday afternoon in the Y. M. C. A. rooms for the purpose of electing umpires and referees for the league lately organized.

Representatives were present from the L. D. S., All Hallows colleges and the Y. M. C. A. The umpire chosen are W. Saunders, N. Smith and R. Ross; referees, R. Romney and Fred Goddard.

The first of the league games will be played tomorrow night at the Social hall between the L. D. S. and Y. M. C. A. teams.

Stand Down Off.

E. B. Munday, a lawyer of Henrietta, Tex., once fooled a grave-digger. He says: "My brother was very low with malaria fever and jaundice. I persuaded him to try Electric Bitters, and he was soon much better, but continued their use until he was wholly cured. I am sure Electric Bitters saved his life. This remedy expels malaria, kills disease germs and purifies the blood; aids digestion, regulates liver, kidneys and bowels, cures constipation, dyspepsia, nervous diseases, kidney troubles, female complaints; gives perfect health. Only 50c at Z. C. M. I. Drug Dept."

NO WONDER THEY WONDER.

Rather more than half the people who go east via Denver take the Burlington Route.

The only thing they wonder at outside of the excellence of the service is why the other half doesn't go the same way.

No wonder they wonder.

Burlington trains for Omaha, Chicago, Kansas City, and St. Louis, leave Denver at 4:00 p. m. and 10:00 p. m.

Train for Black Hills leaves Denver 11:30 p. m.
