

FLOATING FRAGMENTS.

Mr. Phil. Robinson will lecture to-night.

A storm is impending but delay is its ally.

The Tabernacle Choir goes to Provo on Saturday.

Regular meeting of the City Council this evening.

Regular meeting of the Seventies at the Council House to-morrow night.

Next Friday is Good Friday and consequently the following Sabbath is Easter Sunday.

Beaver City recently donated \$1,000 toward the building fund of the Main Temple. A generous subscription.

"I have to speak to you again children, I shall punish some of you," said the woman. "I'll wait till it's over," said he, pulling out his marble.

The patient boy went to a neighbor for a quart of milk. "I haven't any but sweet," said the woman. "I'll wait till it's over," said he, pulling out his marble.

Men are like an old-fashioned country wagon. When loaded, everything works well and smoothly; with nothing in it, it rattles so it can be heard for miles.

Dr. Rockman, whose card appears in our column, to-day, was formerly of San Francisco and has been located in our town for 12 months. His office is opposite the Walker Bros.

Mr. Jos. H. Parry advertises his mineral water, black, blue, violet and green. They are of remarkably fine quality and the colors are unusually brilliant. They flow freely, do not corrode and are not injured by the action of frost.

People having occasion to pass along First South, west of East Temple Street, complain that the sidewalks are obstructed by the ropes and poles. If the children of the 14th Ward School and others would turn their ropes lengthwise east and west, instead of north and south, the difficulty would be partially obviated by giving pedestrians a part of the sidewalk.

A man named Gibson, who keeps a station at Little Rattle-snake, on the Idaho and Overland road, had a man working for him whose name is unknown, as he had been in Gibson's employ only three days. Gibson went out looking after cattle and on his return learned that the man had outraged his eight-year-old daughter and fled. Gibson pursued him and caught him on the stage, made him get off and go back the road a short distance, where he shot and killed him. The verdict is, served him right. -Silver State.

LOCAL AND OTHER MATTERS.

Watch and Chain.—Last Tuesday a section workman on the Utah Central R. R. lost a silver Geneva watch and chain between Payson and Santaquin. The finder will confer a favor by forwarding the articles to this office for the owner.

Presbyterian School.—It is reported that the Presbyterians have purchased a piece of land in the Fifteenth Ward, south of Mr. Henry Moore's place, and soon to commence the erection of a building to be devoted to school purposes.

A Wholesale House.—The advertisement of Messrs. Clark, Eldredge & Co. appears in our columns to-day. This firm is doing an excellent and increasing business, and have lately enlarged their premises, the salesroom being double its original size. They are wholesale dealers in groceries, crockery, glassware, tinware, brushes, woodenware, etc., and announce that they are prepared to offer unusual inducements to customers.

Managing Rapidly.—We have just received a call from Brother Robert Campbell, who some time ago met with a severe accident by breaking his arm through a fall on the ice. He states that through the unrelenting attention of Dr. Seymour B. Young, the bones of his arm are again knitted so as to liberate it from the splints, with every indication of its being speedily restored to its former use. He desires to return thanks to his numerous friends for their kindly sympathy and good feelings manifested on his behalf.

Fatal Accident.—A distressing fatal accident occurred on the U. P. R. R. at Echo, on Saturday, the 17th inst. Among the emigrants on the train were a family named Hughes, the father's name is Thompson. On their arrival at Echo they stopped for a short time, during which a three-year and a half old boy of Mr. Hughes' stepped out and stood on the platform of the car. The train started suddenly and the child was thrown down between the cars. He struck on the couple's leg, breaking his back and one of his legs. The poor little fellow died in a short time after the accident took place. -Ogden Herald.

Effects of Malt Feed.—The Denver Tribune has worked up quite a sensation in that town regarding alleged deadly effects upon children from the use of malt from cows fed upon malt. It professes to have made deductions from actual facts. A good deal of that species of feed is given to cows in this city, and while it is not advisable to jump at conclusions on the subject, it may be well for those who give the sour stuff—the refuse of breweries—to cows, to first ascertain whether or not it does have an injurious effect upon the lactated product.

Quibbling Contemporaries.—The Ogden Herald takes the Beaver Union to task because the latter prints its material in place of monarchical. The Union retorts pointedly and claims its spelling of the word to be the same as used in current literature. The Ogden paper hurls another shot at its southern neighbor by pointing to page 736 of Webster's unabridged edition of 1865, in which the extra d appears. We hope to see the north and south united on this momentous issue, and see nothing to hinder it, especially as the 1869 edition of Webster's gives it both ways. Now suppose the two papers call it even and quit, that the universe may not involve into irretrievable chaos by the continuance of such a gibe.

Mr. Robinson's Humor.

Editor Denver News.

As a friend of Mr. Phil Robinson, the illustrious correspondent, who lectures this evening, I will add to your faithful columns of last evening, that the gentleman's addresses related in his lecture are not only of a very thrilling and sensational character, but also very humorous. Some of the situations are strikingly ludicrous, when contemplated from this distance, although they may have been differently considered by the correspondent at the time. We can safely say that the audience this evening will be highly amused, as well as deeply interested by the address of Mr. Robinson. GALLIC.

SALT LAKE CITY, March 19th, 1883.

Discharged on a Technicality.

This morning, J. E. Anderson, the brutal fellow charged with lascivious conduct toward little children, was discharged from custody on a technicality. Mr. Jonsson, the defendant's attorney demurred to the complaint, in behalf of his client. The principal grounds of the demurrer were that the court had no jurisdiction in the premises; that several different offenses alleged to have been committed at different times, were charged in the same complaint; that sufficient facts were not shown to constitute a public offense, and that the ordinance under which the charge was brought was null and void. Salt Lake City having no right to make it. The matter under advisement, the result being that the demurrer was sustained and the defendant discharged.

An Interesting Time.

President George Q. Cannon and Wilford Woodruff attended Sunday evening services in the Fifteenth Ward Hall, each speaking in a very interesting and instructive manner. They were highly pleased with the congregational singing, which is a very attractive feature of the religious worship of the Saints in that section of the city.

Centralizing Corruption.

For a long time houses of ill-repute have been spreading over the city of Denver, fastening upon the social structure of the community with the horrible grip of a monster octopus. Lately Chief of Police Lomery issued an order for all establishments of that character situated away from Holiday street, to remove to that part of the town. The Denver Tribune asserts that the order has been very generally obeyed.

A Sensible Mother.

We learn that yesterday a lady residing in one of the western wards of this city discovered a pair of kid gloves that her son had stolen from a ward store. With commendable promptness she marched the youthful culprit to the superintendent of the establishment from which the articles had been purloined, returned them and requested that he be punished. The lady took the most sensible course that could have been taken under the circumstances, being the best calculated to make a salutary impression upon the mind of her son. If his act of dishonesty had been covered up or in any way condoned, the boy would have been encouraged in dishonest pursuits.

We learn of a similar case which occurred at Z. C. M. I., in which some gloves were stolen by a boy of very respectable parents, residents of the same ward as the other family.

Dye Poisoning.

In an eastern village recently a little girl died from blood poisoning, caused by wearing red and yellow colored stockings. The color rubbed off upon the child's legs. Soon after an eruption appeared, first upon her feet and the part of her legs covered by the stockings, and gradually spread over the remainder of her legs and the lower part of her body. There was also a marked tendency to blotting. She was sick five or six days, and although everything possible was done for her, it was of no avail.

The attendant physician, Dr. D. B. Smiley, said that all the symptoms were those of arsenic poisoning, and he had no doubt the cause of death was the absorption into the circulation of the poison of the dye used in the stockings. The relation of this incident is published that persons reading it may be in a position to guard against danger from a similar source.

Burglary.

Some time during last night the saloon of Nystrom & Tufts, on Main street, was burglarized. Foreible ingress had been obtained through a small aperture in a back window after removing some boards from it. In consequence of the limited space passed through the party who entered the place must have been a small boy, it being impossible for a grown person to have accomplished the feat.

Cash to the amount of about six or seven dollars and four bottles of bilious pills were carried away by the thieves. This morning a broken tin and fifty-five cents were found on the ground near the window at which an entrance was gained, having evidently been dropped there by the burglars.

Attempted Burglary.

About two o'clock this morning night watchman Geo. Hilton saw a couple of men emerge from the east end of the alley at the rear of the Theatre saloon. Suspecting that something was wrong he went to the rear of the premises and found the upper part of the window open and the glass broken. The under part, covered with sheet iron, had also been forced open with some implement. A subsequent investigation, in company with officer H. Pratt, disclosed the fact that burglars had entered the back room and tried to break through the partition door, in which they were unsuccessful. The thieves did not get anything. About a year ago a fellow named Hanlan was captured in the act of breaking into the same establishment.

Thursday Night.

On Thursday night Mr. John S. Lindsay will put "A Soldier's Fortune," an exciting French play, upon the stage at the Opera House. This play has never been performed in Salt Lake City before, and is likely to draw a full house.

FATAL SHOOTING AFFRAY.

ONE KILLED AND TWO PEOPLE WOUNDED.

The Orion Era, of St. John's, Arizona, of March 16th, has the following:

"On the 28th of February, a desperate fight occurred at Mineral, among a number of Mexicans. It appears a Mexican, from this place went into that section of country to work, and got into a row with some people who reside there.

During the fight, Patricio Padilla was shot and died soon afterwards. The wife of Juan Perera received a scalp wound from a pistol shot, and Chon, from St. John's, was knocked down and beat over the head with a rifle, making some ugly wounds on his head and causing him to become insensible. Chon was brought to St. John's, and made complaint against Juan Perera and Sylvester Padilla, for an assault with a deadly weapon, with intent to kill.

The jury at the coroner's inquest over the dead body of Patricio Padilla, rendered a verdict, 'That Patricio Padilla, came to his death from the effects of a pistol shot fired while in the hands of Chon.' The latter was immediately arrested, but all the parties have since been released on bonds, and their examination is taking place before J. T. Leasure, Justice of the Peace, St. John's Precinct.

The case of the People vs. Juan Perera and Sylvester Padilla, charged with assault with a deadly weapon with intent to kill, came up on Wednesday, 7th inst., and continued during Thursday and Friday. Mr. Ruls and Gutierrez for the prosecution, and Mr. Miles P. Romney for the defense. The examination resulted in the acquittal and discharge of Juan Perera, and Sylvester was held under \$500 bonds to appear before the Third Judicial District Court."

An Interesting Time.

President George Q. Cannon and Wilford Woodruff attended Sunday evening services in the Fifteenth Ward Hall, each speaking in a very interesting and instructive manner. They were highly pleased with the congregational singing, which is a very attractive feature of the religious worship of the Saints in that section of the city.
