MINING, BUSINESS AND STOCKS

IDAHO DISTRICT ON EVE OF REVIVAL

Charles T. Mixer Believes the Camps of Custer County Worth Looking Into.

COUNTRY WAS ACTIVE ONCE

Lack of Transportation Facilities Drawback Now-Conditions at Mackey Copper Camp.

That now is a good time for mining men to look itno the mining districts of Custer county, Ida., is the firm be-Her of Charles T. Mixer, who returned from a trip to that region today.

"The country up that way is quiet at the present time," said Mr. Mixer, "and has been for a number of years; but I believe it is going to pick up and there is no reason to doubt but that some good mines will be developed.

"Transportation facilities are the worst drawback to the country, but, in a little time, that difficulty will be over come. It is pretly generally under-stood that the Mackey branch of the Oregon Short Line will be extended on to Salmon City, possibly in the near fu-

Mr. Mixer made the trip to the north for the purpose of examining into the merits of a certain mining property for an eastern citent. He went in from Ketchum, although the bulk of the travel to the interior is from Mackey. The late success achieved by the Minnie Moore mine, near Halley, is finding the ore bodies which were lost in a faulting of the formation, he says, has had the result of giving encouragement to the property owners in all of the old districts of central Idaho, which were once more active than they are now Hence, the country seems to be on the

eve of making advancement again.
The citizens of Mackey, Mr. Mixer says, are naturally very blue over the financial distress that has befallen the White Knob Copper company, and which has resulted in the property of the corporation being placed in the hands of receivers. The general limpression prevails in camp, however, that the affairs of the corporation will soon be straightened out and that the mine will be placed in the hands of conservative management. One of the most serious needs of the company, in order to keep the smelter in operation, is a supply of sulphide ore. The development work done in the past has been confined largely to the oxidized zone. The opening of the ore channels lower down is essential.

MINING STOCKS ACTIVE,

May Day and Consolidated Mercur Make Some Advances.

May Day seemed to furnish the at traction of the day on the Mining Exchange. Brokers were in possession of some heavy buying orders when they entered the pit and altogether close to 18,000 shares were transferred during the forenoon sessions. The stock sold up to is cents and closed a shade under that price. Uncle Sam Consolidated was called for, but holders seem to antheipated a rise and are not inclined to leosen. Yankee Consolidated continued in favor and a limited quantity of the Consolidated Mercur sold as high as 40 cents a share on the open board. Sacrargento passed the day practically The closing quotations and sales were

Tonopah Miner. The west drift on the 275 level is out 160 feet and continues in one of very high grade. The raise from the 400 level is up 85 feet and the face shows six feet of one that will run from \$200 to \$300 a ton. There are numerous bunches and several streaks ore carrying ruby, brittle and her: silver, which give assays as high as \$5,000 a ton. A carload of ore is sacked the dump ready for shipment and ill go forward in a few days. Three frills are at work and each is making a progress of about six feet a day in hard quartz. The crusher is in place and will stars up next week. Tonopah Extension stack continues strong, sales having been made during the week at

from \$2.10 to \$2.25.
There has been much activity in Midway stock druing the past 10 days on account of a reported strike in the mine. It is learned from the management that the north crosscut on the 635 level last week encountered a strong ledge formation about 500 feet from the shaft. The character of the ore is similar to that of the great Macdonald ledge in the Montana Tonopah and while the ledge matter is badly broken up, there is every indication that a strong ledge in place will be de-veloped in a short time. Work is progressine as usual throughout the mine and while the management is reticent as to the developments, it can safely be predicted that Midway will soon take its place in the front rank of the

great mines of the Tonopah district. The Montana-Tonopah closed down Tuesday night on account of the break ing of one of the pillar blocks of the engine, which resulted in the cogs beng stripped from the pinion. engine is being taken out and replaced by a Webster, Camp & Lane hoist. The new machinery will be in place by Monday and operations will probably e resumed by the end of next week In the meantime ore shipments are going forward with the usual regularity, there being a large quantity of shipping ore on the dumps. President Knox, Secy, Dunlap and General Manager Gillies are expected to arrive in Tonopah about the middle of next

M. L. Effinger, general manager of the Lookout mine in Fish Lake Valley, left for the mine this morning to com-plete arrangements for the shipping of Geo. E. McClelland of the Jumbo, who recently purchased the half inter-Gilbert & Thomp uable property, returned from the east this week, and in co-operation with Mr. Effinger, who owns the other half, will push the work of development and ore extraction with the greatest possible

Another strike of exceptional rich ness and proportions was made last week, this time on the Tonopah Club claim, a short distance east of the dall and directly north of the Adams Goldfield company's property. In a prospecting trench 26 feet of ore that carries values ranging from \$60 to \$500 per ton has been exposed, and but one wall has been encountered. The oreshoot has been proved by numerous open cuts for a distance of 100 feet in length - Tonopah Miner.

BOSTON AND TERRACE MINE. Sinking in Progress in Copper Vein Recently Encountered.

A message received in this city from Supt. Heath of the Boston & Terrace mine, located in the New Foundland mining district, states that the strike of copper ore made in the winze sunk from the tunnel level recently has witened out to seven feet.

An assay of samples from the vein, brought to the city recently showed values of 27 per cent copper, 18.9 per cent lead, 46.5 ounces in silver and \$2.49

Manager C. T. Burchard is expected to arrive from Boston next week.

UTAH COUNTY SLATE.

Hathenbruck Property, Near Provo, May Become Productive.

Specimens of slate from the quarries of F. W. C. Hathenbruck of Provo, which were brought to the city during the state fair week have attracted quite a little attention, and the product bears every evidence of possessing all the qualities which go to make up a first-class commercial article.

When the fact is considered that the slates to be used in the new Federal building, as well as those in a number of other buildings in this city, are supplied from quarries located in other states, it can readily be seen that if Mr. Hathenbruck can do as he says he can-furnish an article that will stand the severest test, he is in possession of what can be made a money making

well known manufacturer's agent in this city, in talking on this subject not long ago, said he had been unable to find any Utah slates that would endure the elements; that in Jests he had seen made, it was found that the material would deteriorate when exmaterial would deteriorate when exposed to the air, and gradually crumble and fall to pieces. For this very reason, he declared, the government would accept nothing for the local postoffice but the California product, which had been thoroughly tried and not found wanting. "There is nothing finer or better," he went on, "for roofing purposes than slate, and I dare say dozens and dozens of houses would be built and dozens of houses would be built in Salt Lake with slate roofs every the right kind of product could be obtained nearer home and the cost

reduced to a minimum. The gentleman had not seen the Hathenbruck slate, which has since been examined by government experts. The Hathenbruck quarries are located within a short distance from Provo.

AT THE U. S. MINES.

New Galena Tramway Will be in Operation by Nov. L.

At the Galena mine in Bingham, the management of the United States Min-ing company is carrying on an ener-getic campaign of development. A drift is being run along the strike of the new vein encountered some time ago on the fourth level, where immense bodies of ore are being prepared for extraction.

While this work is in progress, anoth-er force of men is engaged in running a cross-cut to the Galena vein.

The new aerial tramway, 1,656 feet in Development work is progressing in length, is rapidly being installed and the usual satisfactory manner at the Supt. Allen says it will probably be Tonopah Extension mine, says the ready for commission about Nov. 1.

DEVELOPMENTS IN UNCLE SAM CON

Something of an Important Nature Is Said to Have Occured In Tintic Mine.

LEASERS ARE DOING VERY WELL

Is the Statement Made by Director Jas. Chipman - May Open Into Another Yankee Con. Bonanza

The activity displayed by Uncle Sam Consolidated during the past few days has created considerable talk in mining circles and investigation has proven that there are good reasons to believe developments of a decidedly important character have been made in that Tin-

Manager Dern being out of the city, a representative of the "News" called upon James Chipman, who is the next official in authority, today, for information bearing on the subject. He was not inclined to admit that anything of an important nature had occurred, how a ever, he declared; the leasers have been doing pretty well of late and have been sending in ore of a very good grade. The leasers are working on the south end of the Humbug vein, Mr. Chipman stated, both above and below the tun-

A gentleman who came in from Tintic this morning, but who did not care to be quoted, said there is a well founded belief in camp that the Uncle Sam is going to repeat what was once done by the Yankee Consolidated.

Many of the buying orders for the stock executed by brokers during the past week, it was said, were sent in from the Juab camp. Two carloads of high grade ore from the leasers were in today's market.

RAILROAD TO GOLDFIELD. Tonopah Road May Extend Its Tracks To New Gold Camp.

It is believed in Tonopah and Gold-field that the Tonopah railroad will be extended to the latter place during the coming winter. Definite information on the subject was expected during the re-cent visit of President Brock and Secre-tary Heller of the Tonopah Mining com-pany but the officials, while they admitted the matter had been thoroughly dia. cussed, a final conclusion had not been

President Brock will be in San Francisco during the present week; probably for the purpose of taking the matter up with the Southern Pacific company to reach an understanding as to traffic arrangements. He may be ready to an-nounce the plans of his company upon his return to camp about a week hence.

GOLD CRATER CAMP.

A Nevada District Where Salt Lake Men Are Active. The Gold Crater district in Nevada

continues to attract wide spread attention in Tonopah and Goldfield, where Roy Ridge of this city, and partners, have found a property which bears every evidence of being a bonanza. In a shaft sunk to the depth of 20 feet a foot ledge has been uncovered, which assays from \$70 to \$200 to the ton. R. L. Colburn, the former Salt Lake broker, is interested in the townsite located there, and is said to be making big money out of the sale of lots.

A stage line is shortly to be established between the new camp and Goldfield, a distance of 26 miles.

BINGHAM CON. SMELTER.

New Construction Work for the Present Year About to Close.

The new briquetting plant ordered installed by the directors of the Bingham Consolidated Mining company sometime ago has been completed. The finishing touches were put on to it yesterday, and it is now ready to go into commis-

With the finishing of the fifth furnace, which will occur in a few days, the new construction work for the present year will be brought to an end.

AT THE TETRO.

E. G. Woolley Jr. Reports Conditions There as Very Encouraging.

E. G. Woolley, Jr., assistant manager of the Tetro mine of Tintic after a night spent in examining conditions at that property, returned to the city this morning thoroughly pleased with the outlook for that property.

The winze being sunk from the lower

level continues to disclose a good grade of ore and the indications are indeed en-

While prospecting this week on the While prospecting this week on the Gold Crown claim of the Wheeler Turquoise and Gold Mining company at Ray, Arthur Kunze uncovered a deposit of turquoise of the robin-egg blue variety. Mr. Kunze, when approached on the subject, would not state the extent of the discovery, but it is understood that it is a very important one,-

H. H. Clark, Kenneth M. Jackson, Geo. F. Badgett and Prescott Ely returned Monday from a trip to the Bull Frog district, and all express themselves as well pleased with the outlook at the new camp. Mr. Clark states that the restrictions of the control of the contr that the party spent several hours panning and horning from a 15 foot ledge situated three and a half miles from the original discovery, and that the results indicated that the entire ledge will yield a good milling product, with several stringers of shipping ore. Considerable work is being done in the new district and by the end of the year several of the most promising proper-ties wil be thoroughly proved,-Tono-

MARKET REMAINS QUITE APATHETIC

Traders Took Advantage of Some Strength at Opening to Unload Stocks.

REACTED BELOW YESTERDAY.

A Spirited Rise In St. Paul Caused Market to Become Much

Fi. ner.

New York, Oct. 11.-The trading in stocks today at the opening was quiet and the gains which were general did not

exceed half in any case. Traders took advantage of the opening strength to unload stocks, and the market reacted to below last night. The grain and cotton carriers and Reading were without much support. Large orders for Atchison came in one the decline and its rally to \$4% helped to stiffen the rest of

the market. The market steaded and became very dull at about last night's level, where it was held by the firmness of the transcontinentals. Union Pacific and St. Paul followed Atchison with a rise of a point and Brooklyn Transit gained 1. There were gains of a point in St. Louis and San Francisco second preferred and Chicago & Eastern Illinois preferred and of 1% in St. Joseph & Grand Island second preferred.

Bonds were rather heavy at noon. The market grew sensibly firmer under spirited rise in St. Paul, which carried it to 168%. The Gould southwesterns and

It to 188%. The Gould southwesterns and the Pacifics were hought and the eastern trunk lines were also in favor, New York Central rising to 130%.

Trading operations on the long side continued until well in the afternoon. Union Pacific rose to 1.05 and United States Steel preferred to 77%. Prices in general recovered to the opening range, Protititaking sales lowered St. Paul, United States Steel preferred, Union Pacific and Reading a large fraction around 2 o'clock and the market eased off.
