TWENTY MILLION CONCERN.

Parts That Samuel Newhouse and Senator Lewis of Utah Are Playing in Big Steel and Iron Company—Senator Clark Has Been Seen and Will Soon Get Report.

A Denver publication has become wise up over what is going on in the iron regions of Utah, and makes the assertion that J. C. Osmond and Samuel Newhouse are interested in the formation of the Utah Iron and Steel company, which Senator A. B. Lewis appears to be the moving spirit. It bases its belief on the grounds that C. Parsons, the well known Denver attorney, has been here. It says:

"C. Parsons, the attorney in the formation of the Utah Iron and Steel company, expected back from Utah this morning, and will file with the secretary of state the incorporation papers of the company. The capital stock will probably be \$20,000,000."

"Senator Lewis of Utah is the promoter of the company. Mr. Parsons is attorney for Senator Lewis and also for Samuel Newhouse, and by the latter company the ones who are doing this work are already here for that purpose. This, however, can be neither confirmed nor denied."

The owners of several of the principal iron properties have made a proposition and it is said it has been favorably received by Senator Clark. But everything depends on the report submitted to him later by his men.

It has been suggested that an advantageous place for the erection of rolling mills and steel plants would be along the shores of the Utah Lake. There water can be had at all times in abundance. Nothing has materialized as yet, but there are among the things being talked about.

"While the steel plant will be located in Utah there is a reason for incorporating in another state. This is that in case of a suit involving \$2,000 or more the suit would be taken direct to the United States court and not to the district court, as would be the case if the company was incorporated in Utah."

There is a probability that Senator Clark will play an active part in the opening up of the iron properties of the state. He is looking for traffic for the Salt Lake Route and not only that, he realizes the fact that an immense amount of money can be made out of the iron business.

There are rumors going the rounds that the senator will have his lieutenants go over the proposition thoroughly with some of the owners of iron lands there, the ones who are doing this work are already here for that purpose. This, however, can be neither confirmed nor denied."

ELDERLY ASK FOR PERMITS.

Pres. McQuarrie Makes an Appeal in Their Behalf to Mayor Low.

They desire to resume Street Preaching in New York—His Honor Has Matter Under Adjudication.

(Special to the "News")

New York, July 17.—John G. McQuarrie, president of the Eastern States mission of the "Mormon" Church, made an appeal yesterday to Mayor Low to allow the elders under his mission to preach on the streets.

The mayor of New York has refused to permit street preachers to preach on the streets. This action was taken when it was reported to the mayor that the "Mormons" were exhorting the people on the streets to get more than one wife.

"The usual objection that is urged against our faith is the much-misunderstood practice of polygamy," said President McQuarrie to the mayor. "Under certain conditions, it was considered right and was advised by the Lord. It is something that is regulated by the laws of the land. It always takes time to adjust social conditions. The doctrine has ceased to be taught in the Church."

New York, July 16.—Mayor Low today gave a hearing to counsel for the city and to the counsel for the "Mormons," otherwise known as the "Mormons," and John G. McQuarrie, president of the Eastern States mission of the "Mormon" Church, on the question of continuing the mission of the "Mormons" in New York.

The question of continuing the mission of the "Mormons" in New York was the subject of a hearing before Mayor Low today. The mayor's decision was to refuse to permit street preachers to preach on the streets.
