

FLOATING FRAGMENTS.

From J. H. Parry we have Frank Leach's "Popular Monthly" for July.

Samuel Worthington has lost a yellow and white spotted cow. See advt.

This morning Mr. Robert Watson departed for the East, to transact business in his capacity of purchasing agent for C. C. M. I.

The many friends of Brother William Greenbeck and wife will be pained to learn of their bereavement, death having deprived them of the society of their little boy. Brother Greenbeck is on a mission in England.

Mr. F. Meyers, of the clothing department of Z. C. M. I., left for the East this morning. The object of his trip is to purchase the fall and winter stock of that line of goods and arrange for the institution of clothing for the institution for future seasons.

This morning we had the pleasure of a fraternal call from Mr. H. A. Burnham, a member of the editorial staff of the Boston Herald. He was accompanied by Mrs. Burnham and his niece. The latter is a resident of Bountiful. Mr. and Mrs. B. are on an extensive pleasure tour through the West and Southwest.

LOCAL AND OTHER MATTERS.

High Council.—The members of the High Council are requested to meet in the Council House, to-morrow evening, June 16, at 7:30 p.m.

WILLIAM W. TAYLOR, Clerk.

Returned from Colorado.—Yesterday afternoon President Joseph F. Smith, President Woodruff and Elder Brigham Young, of the Quorum of the Apostles, returned from their visit to Conejos Lake, Colorado.

Under Bonds.—The case of Jonathan D. Farrington, Farmington, charged with polygamy, came up before Commissioner McKay this morning at 10 o'clock. The defendant waived examination and was held to answer to the next Grand Jury in bonds of \$2,000. Seven witnesses were also held to appear before that body, in surties of \$200 each.

A Day Time.—Yesterday the Sunday and day schools of the Twelfth Ward, accompanied by relatives and friends, had a gala time at Calder's Farm. The happy throng numbered nearly five hundred. All the children were conveyed in vehicles to and from the grounds free of charge. Various kinds of fun and frolic were engaged in, and at two o'clock Superintendent T. V. Williams addressed the youngsters, and good things of a substantial character were distributed among them. A pleasant feature of the affair was the presentation to Mr. W. Van Cott by his pupils, of a Webster's Unabridged Dictionary, with stand. A pearl-handled gold pen was also presented by the scholars to his assistant, Miss C. Sharp.

The balance of the day was spent in various sports, including foot-racing, running in sacks, potato-paring matches, etc., to the great amusement and expert in which prizes were awarded.

THE MATCH FACTORY.

A DESERVING INSTITUTION THAT SHOULD RECEIVE ENCOURAGEMENT.

This morning a representative of the News visited the "Great Western Match Factory," in the Second Ward, and was much interested in witnessing the details of manufacture. Any person visiting a factory of this kind would be repaid by what he learns. The timber used is quaken-asp from our mountains. It is admirably adapted for the purpose. The timber is cut into round lengths. These are put through an ingenious and intricate machine, and cut into ribbons of great length, uniform thickness and about twelve inches wide. As these pass through the machine they are cut partially through in regular lines suitable to the folds of the boxes, which are made with astonishing rapidity by women and children at their homes.

The wood for the matches or splints is made in a similar way, in narrow strips, being put through a machine, every click of which, repeated each second, turns out thirty, aggregating 1,800 a minute. The splints are placed in a contrivance which, when shaken, arranges them in regular rows, when they are readily laid into large square boxes. They are next placed in a machine which arranges them in order in frames containing 2,800 holes, with a match in each. In this situation the points are dipped in the sulphur. The process that follows is to run them over a roller which revolves in a quantity of phosphorus, and the matches are made. They are subsequently deftly removed from the frames and loaded by children.

The company are now making daily from fifteen to twenty gross of boxes, but have a capacity for one hundred. The establishment is under the superintendency of L. J. DeLoach, who is entitled to a good deal of credit for his enterprise and courage in sticking to the concern through serious difficulties, entailed by the destruction of the first establishment by fire. He is aided by John Bohman, a practical match-maker of long experience. The resumption of business after the fire was last January, and in consequence of the exceedingly cold weather at that time, it was impossible to maintain some of the materials at the proper temperature, and by an oversight, some inferior matches were then placed on the market. It is to be hoped that this intrinsically trifling incident will not impair the reputation of the factory, which is turning out a very excellent product, quite equal to the imported square matches, and quite as cheap. The proprietors of the factory are all working men, struggling to gain a foothold in establishing and perpetuating a useful industry. Give them encouragement.

RELATING TO THE ELECTIONS.

AN OPINION AND ORDER OF THE COMMISSIONER.

SALT LAKE CITY, June 13th, 1888.

Alex. Ramsey, Chairman of the Commission.

Sir:—Your committee appointed on May 7th, to examine and report in relation to the election to be held at the August election, in 1888, respectively report. There are to be elected members of the Legislative Assembly in all the Legislative Districts of the Territory; and also certain county and precinct officers.

As to those officers who should have been elected at the August election in 1888, we find, that by law, some of them are to be elected for a certain number of years; some for a given term, "and until their successors are elected and qualified." In regard to vacancies, and the time and manner of filling them, the local laws are difficult of construction. In view of the Congressional legislation, but in deference to the decision of the Supreme Court of Utah as to vacancies, in the case of Kinball vs. Richards, in 1882, sustaining the appointment of the Governor of Utah, we are of the opinion that all offices which should have been filled at the general election in August, 1888, are to be filled at the next general election in August, 1889, for the unexpired term.

We are further of the opinion that the offices of Territorial Superintendent of District Schools, Territorial Auditor of Public Accounts, Territorial Treasurer, and Commissioners of the Public Lands, are, under the Organic Act of the Territory of Utah, to be appointed by the Governor, with the assent of the Legislative Council, and that the assent of the Legislature is not required for filling those offices by an election of the people, in conflict with said Organic act, and are therefore invalid.

Respectfully,

A. B. CARLTON, G. L. GODFREY, Commissioners.

The report was adopted and the following order made:

"That at the general election to be held on Monday, August 6, 1888, there are to be elected members of the Legislative Assembly in all the several Legislative Districts of the Territory, and also certain county and precinct officers. And that all county and precinct officers which should have been filled at the August election, 1888, are to be filled at the August election, 1889, for the unexpired term."

FIRE AT FRISCO.

SIX OR EIGHT HOUSES DESTROYED—NARROW ESCAPE OF INMATES.

The following dispatch was received this morning:

"Soon after ten o'clock last evening Frisco was alarmed by fire. It was thought at one time that the whole eastern half of the town would be burned down. This is the second attempt to burn the town within the past week. Mr. Ruffe and family barely escaped in their nightclothes. All their effects were destroyed. Mr. Goodrich suffered the same fate.

The fire originated in the old leaning works boarding house, and spread very rapidly. It is situated in the southern part of town. A very heavy gale was blowing from the north. Six or eight houses were burned, the result of incendiarism. There are strong threats of lynching. One arrest has been made.

Theatre.—Salt Lake theatre-goers are seldom very enthusiastic. They will at all times and on all occasions and fine scenery often with few demonstrations of approval. The splendid performance of Lawrence Barrett and his efficient company have started the audiences in the Salt Lake Theatre out of their usual torpor. Hamlet was so finely rendered that the applause was frequent and deafening, and the great actor was repeatedly recalled. Last night his impersonation of Lancelotti in "Francesca da Rimini" set the packed house fairly wild. Again and again was the curtain rung up that the plaudits of the audience might be showered upon the tragedian who stirred their emotions to the very depths, the close of the second act bringing forth recalls. Morbid sensitiveness common to deformed but refined natures, extreme jealousy followed by pathetic tenderness, rage, anger and remorse, were represented by Barrett with wonderful fidelity to nature, his rich voice and magnetic influence thrilling the hushed spectators and making insatiable the desire for more.
