

LOCAL AND OTHER MATTERS.

CORRESPONDENTS writing for publication are requested to write on one side of the paper only. No notice can be taken of anonymous communications. Correspondents' names must in every instance accompany their communications, not necessarily for publication, but as a guarantee of reliability.

THEATRICAL.—Last night the attendance at the Theatre, though fair, was not so large as the excellence of the entertainment presented might have been expected to draw together. The playing in "Mathilde" was very good, all the parts being well sustained. Of Madame Scheller's personation of the title role, we can only repeat what we have said before: it was touching, pure, elevating, natural and artistic.

The "Two Puddifoots" is a good farce, full of opportunities to make mirth, but it was played a little slow occasionally. On a second representation it ought to keep the house in roar, it excited more than a few fits of exuberant laughter last night. The cast in it is a very strong one.

To-morrow night "Lucille, The Story of a Heart" will be played for the first time here. It is a pretty and affecting drama, with enough of the gay in it to relieve the melting and pathetic parts. Madame Scheller sustains the title role; Miss Alexander plays the sprightly Julie; Mr. McKenzie is the twice blind loved one; Mr. Lindsay as Lucille's father; Mr. Graham as the patient and unsuccessful lover; and Mr. Margetta as the comic link who makes Julie happy—or at least a wife. The story of the play is simple but well told, and the character of Lucille is one in which Madame Scheller will shine, for it displays those estimable qualities of the heart which make so great a characteristic of her playing.

The "Two Puddifoots" is the farce.

POLITICAL.—Samuel Morris, who had been cooking for an officer at Camp decomposed with a Henry rifle and pistol." He was caught this morning, after having sold the rifle for thirty dollars, and is now locked up awaiting a trial. Yesterday he had bought four and a half dollars' worth of riding wear, on Wells, Fargo & Co's stage; but this morning it was found that he still lingered near the scene of his triumphs, and he was bound over with a guard to the City Hall.

NEW TICKETS.—The Evansville, Indiana, Courier, elevates a new ticket for the Presidency at the coming election, and dues it the "People's Ticket." The candidates are strong and would find plenty of eager voters. They are: "For President, General Greenback; for Vice-President, General Low Taxes."

PREPARED.—The celebration on Saturday will be an interesting affair; and as the schools, Sunday, District and Select, will form a principal feature on the occasion, preparations are being made to make it all that could be expected. Getting new banners painted; re-touching ones that have been used before and need it, is progressing in more than one ward, and the appearance of the schools will be gratifying to those who have care of them and a credit to the city.

CENTRAL PACIFIC RAILROAD.—We learn today from a gentleman just in from the west, that the cars would be running to the Big Bend of the Truckee, about twenty-eight miles this side of Reno, from the first to the fifth of this month; that is, some time between to-day and Sunday. There is a force of some ten thousand Chinamen at work on that end of the line, with several hundred whites as overseers, mechanics, etc. The track is being laid at the rate of a mile a day; but when they reach the plains they expect to lay three miles a day. The track-lay of which considerable has been said, is no, in use.

FROM St. GEORGE.—We met with Elder Richard Bentley this afternoon, just in from St. George, which he left yesterday week, the 23d ult. When he left the general health was good; the crops were excellent; the wheat harvest was almost finished; the fruit crop was most abundant; bush beans were pretty good; improvements were going on; and the Tabernacle was up to the water-table. On the way up, the crops looked well, except at Round Valley and Nephi, where the ravages of the locusts are very visible. The wheat looked very promising, and we believed there would be at least an average crop gathered between St. George and this city. We were glad to see Bro. Bentley looking so well, and to learn that his family also are well.

INTERESTING CORRESPONDENCE.—Our readers will be much interested in the excellent correspondence of Elder Joseph W. Young, and his descriptive account of the Muddy region. Such correspondence is not only valuable for present information but for historical purposes; so that when the changes of a few years will have almost entirely altered the circumstances around the inhabitants there and the appearance of the place, this may be referred to for a description of what it once was.

WHAT IS THE CAUSE?—Our correspondent from Springfield, Sanpete, says that the mails for that locality, for some reason unknown to him, are delayed, making a difference of several days in their obtaining their papers. On last Saturday they got the issue of the News, which should have reached them the Tuesday previous; and they were looking for Saturday's mail to reach them on Tuesday. There is a fault somewhere. Who shall, and where is it?

SMALL POX AND ITS CURE.—The small-pox is raging in San Francisco; and numerous inquiries have been made for a remedial agent that will meet the virulence of the disease. In the "Globe of the West," is a letter on the subject, in which the *Sarsaparilla Purpurea* (hunman's cup) more commonly known as the "Pitchee plant," is said to be an unfailing remedy. A letter is quoted, written by F. W. Morris, M.D., resident physician of the Halifax Visiting Dispensary, in which he states in the most positive terms its efficacy and his acquaintance with the results following its being administered—a cure being effected in every instance. Dr. Herbert Miles of the British army is also cited as an authority who describes its application as follows:

"First.—In the case of an individual susceptible to the influence of small-pox, but with no distinct eruptions upon him, a wineglassful of the juice of the plant is to be taken. This will remove the heat, but not the eruption. After a second or third dose, given at intervals of from four to six hours, the pustules subside, apparently losing their vitality. The patient feels better at the end of each dose, in the greatest expression of the disease. Second.—In a subject already covered with the eruption of small-pox in the early stage, a dose or two will dissipate the pustules, and subdue the heat. The skin, from being watery and high-colored becomes pale and abundant, while from the first dose the feeling of the patient assures him that 'the medicine is killing the disease.' Under the influence of the remedy, in three or four days the eruption subsides, although as a precautionary measure, the patient should be kept in the house until the ninth day. No marks of the eruption have been left when treated with the above medicine. With regard to the method of acting (as is believed by the Indians) in the way of a preventive, in those exposed to infection, it is curious to note that in cases where the remedy had been used, the people have a dose continually during the day, so as to keep the antidote in the blood, which according to the Doctor's report, had the effect today the disease in almost every instance where the antidote was thus taken."

ARRIVALS AND DEPARTURES BY STAGE.

From the East.—J. M. Dooly, C. W. Johnson, H. N. Phillips, THOMAS GRIER, T. H. JOHN, Judge SHAW, J. M. Dooly, John Rogers, W. Haase and wife, J. Woodmance, Ben Hampton.
