Granite boys left the city with a trainload of rooters who will cheer them during the battle with the Junctlon-ites. The Ogden game will be one of veterans against comers and each side feels that whichever wins will be forced to say. 'We had to play to do it.' The Salt Lake game will be forced to say. Home on Account of Death of Guard Evans.

Public sentiment resulting from the death of Guard Evans of the Agricul-tural College eleven has become so strong that no more football games will be played in Logan this year. The col-lege trustees met last evening and voted this way, although leaving the Aggies free to play any games they may get on the outside. This means that the Nov. 3 game with the U. can be played in Sait Lake or on neutral ground and the Los Angeles game will be played on the coast. Football is not to be eliminated, as can be seen, but tho death of Evans has made Logan cold towards football.

"IT WAS A PLAIN LIE."

Says Zueblin That He Advocated Inter marriage of Whites and Blacks.

Boy Has Lived Eight Days and No Prospect of Immediate Death. New York, Oct. 31.—With bis skull fractured in two places, Clarence Mit-chell, 10 years old, has lived for eight days at St. Joseph's nospital, Yonkers, and there seems to be no probability of his immediate death. Surgeons consider the case very unusual. They say that it is, perhaps, the first case on record where a person has lived so long after a fracture at the base of the skull. The second fracture is in the arch of the skull. The boy was run down by an automobile and although the hospital surgeons operated on him immediately, they had no hope trait he would live more than a few hours. He has not re-covered consciousness and all the nour-ishment the nurses have been able to give him has been milk. Prospect of Immediate Death.

marriage of Whites and Blacks. Kansas City, Mo., Oct. 21.—Prof. Chus. Zueblin of Chicago, who was quoted by two Kansas City papers last week as having advocated in a university exten-sion lecture here, the inter-marriage of the white and black races, denies hotly that he ever said anytuing of the kind. "It was a plain He," he said last night, "manufactured to injure one whose views on many social and economic questions do not suit the convenience of men who are getting an undue advan-tage of society. "Right in this connection the attention of the men and women of this country should be aroused to the great menace to free speech and square dealing in this conntry. It is that those who have special interests or graft to protect con-spire to ruin any man whose ideas are not conventional or safe to those inter-ests."

Willow Charcoal Best For Use.

Willow Charcoal Best For Use. Charcoal has been used for absorbing foul odors and neutralizing noxious gases for centurles. Dupont, the powder manufacturer, learned that willow shoots two to three years of age made the best charcoal. It is most porous. Fetid breath, whether from stomach or teeth, pyrosis (or gastric pain), diar-rhoea and constipation simply cannot exist under the action of charcoal. Charcoal oxidizes all gases, or in other words, changes foul smelling odors into oxygen, thereby doing away with all foulness and rendering even such gases beneficial to the system by giving it more oxygen. New York, Oct. 31 .- What they be lieve to be an attempt to defraud American buyers of French paintings has been discovered by the customs authoritles here. Customs examiners found that a number of paintings imported from Paris bore daubs of paint in one corner, evidently for the purpose of covering the signatures. When this layer of paint was removed it was discovered that beneath were the names of great artists, Corot, Diez, Rousseau and others of equal prominence, It is believed that the paintings are by obscure artists and that the forged names were carelessly their discovery certain, thereby great-ly enhancing the value of the paint-

Will COIDS After DANGERROUS, Because you have contracted ordinary colds and recovered from them without treatment of any kind, do not for a mo-ment imagine that colds are not dan-gerous. Everyone knows that pneumonia and chronic catarrh have their origin in a comomn cold. Consumption is not caused by a cold but the cold prepares the system for the reception and devel-opment of the germs that would not otherwise have found lodgment. It is the same with all infectious disease. Diph-theria, scarlet fever, meales and whoop-ing cough are much more likely to be contracted when the child has a cold.
