

SECRET EVENING NEWS.
September 10, 1868.
AND OTHER MATTERS.

REMARKS—The beautiful play of the actress and the Serf, to be presented to the audience on the occasion of Miss Ince's benefit, will give fine opportunity for the display of the fair benefactor's great talents; and the names of Miss Adams, Miss Ince, Messrs. McKenzie, Graham, Lindsay and others. In the performance will be most attractive, and the audience a crowded one. Miss Ince has volunteered her services for the occasion.

PROPOSED BENEFIT.—We understand it is proposed to give a Benefit, next week, to the veteran actor Mr. T. A. Lyne. The subject has been under contemplation for some time, and there is little doubt but the performance will be most attractive, and the audience a crowded one. Miss Ince has volunteered her services for the occasion.

CORRECTION.—There have been numerous inquiries made at this office and at the President's Office, concerning a telegram said to have been received from Capt. Gillespie, stating that he had been killed in the late battle of the Little Bighorn. A copy of the telegram was kindly furnished by President Lincoln, and was by him over-ruled yesterday morning. It bore date the 10th inst., and stated that Captain Gillespie had that day passed Bridger.

DON'T BOIL THE SUGAR.—As the season for making preserves is not yet over, the following from the *Miner* is worth trying. That sugar says that cane sugar by long boiling is converted into grape sugar, losing one third of its sweetness. In preserving fruits, therefore, avoid boiling the sugar. Boil the juice by itself, and when it becomes nearly cool, add the sugar. It dissolves readily. One third less sugar in this way, and fermentation is prevented as well as crystallizing.

BRING FINISHED.—For some time past workmen have been busy on the Theatre, putting the finishing touches upon the exterior of the building. The scaffolding is removed from the front, and the steps are being put down to-day leading to the entrance.

THE COLORADO NAVIGATION.—The Pacific and Colorado Steam Navigation Company's creditors were invited to attend a meeting on the 4th inst., at the Committee Rooms, 21 story, Merchant's Exchange, California street, San Francisco, to receive an account from Albert Dibble, Esq., agent for the sundry creditors of the company. Whether it be that the progress of the Colorado, which is rapidly nearing completion, has given a death blow, at least for the present, to the hopes of those who depended upon a trade between San Francisco and Salt Lake City by way of the Colorado, or that the project for which the company was organized has not met with success, and is seldom heard of now, there is little doubt but that the navigation of the Colorado will be eventually developed, and that an extensive trade will be thus opened up, by water, between northern Arizona and Southern Utah, on the one hand, and San Francisco with more distant maritime cities on the other. But for the present, the subject is making little noise in the world.

PROBABLY VERY VALUABLE.—We take the following from a California paper; and of the claim of the inventor is well-grounded. It may revolutionize railroad traveling: "There is an invention at the Mechanics' Institute Fair, which the inventor, Dr. Deers, claims will prevent railroad accidents, at dangerous places on roads he proposes to use a center rail which is grasped by horizontal friction wheels attached to the car, which he thinks will render it an 'utter impossibility for any car to run off the track.'"

DIED AT 3 p.m. on the 9th inst., at the residence of Charles C. Rich, 17th Ward, Sarah Day, wife of John Pea, aged 55 years and 8 months. She has been a faithful member of the church of Jesus Christ of Latter-day Saints for 25 years. She is the mother of 17 children. She died as one falling asleep, without a struggle. Missouri papers please copy.

THE PRICE.—The quantity of wood and hay coming into market is a little on the increase, with wood selling at about \$12 per cord, and hay at \$10 per ton.

TRAIN IN.—Messrs. Naisbitt & Hindley's train of nine wagons got in to-day loaded with 25,000 pounds of merchandise for Walker Bros., 14,000 pounds for Jennings & Co., and some for Naisbitt & Hindley. The trip was made in twenty-two days, and the animals look in good condition.

THE WEATHER.—We are now having beautiful weather, and the showers which have fallen occasionally for a week past, are almost as if "the latter rains" were to come our thirty soil, as the former rains do in the season for them.

ABOUT BOYS.—We clip from the Gold Hill News: "Mr. A. R. Hope has written a book about boys, in which he says some good things. He writes by classifying boys, and here are some of the classes: 1. Young gentlemen. I consider as I pen the disgusting name. You know what I mean?—the beardless beings who wish to be thought men and dandies, and to eat and smoke, swear and swagger, with more or less impunity. If you go out into the streets on a Saturday afternoon you will see hundreds of them, whom you would like to take between your finger and thumb, and drop quietly into the gutter. 2. Mamma's Darling's.—A large and increasing class, I grieve to say, though I would speak tenderly of them, that their degradation is often caused by circumstances over which neither they nor the wisest of writers and fathers have any control, viz food and foolish diet, and who will make them wear comfortable and cozy, and keep them in the house when it is cold, and encourage them to cry when they are hurt." "We are more than gratified that the first class have not made their appearance among us, and the second class is fast disappearing. But Mr Hope's classification is worth noting, and wise mothers will endeavor to prevent their sons belonging to either."

STOCKING PONDS.—The subject of multiplying fish is so important that it should be kept constantly in mind. The following taken from the *Virginia Freeman* of the 3d inst. is worth considering, for by stocking small ponds from large ones, the ova will be ready for sale and for increased propagation at the spawning season. In Lake Utah there is abundance of the trout which could be readily taken out, and by this means ponds could be stocked, and all the requisite supplies for breeding brought to be obtained with great ease. "Lock Ellis, McKenney, and others, living along the southwest shore of Lake Bigler, are working all the small lakes on the Western Summit with trout from that magnificent sheet of water. The small fish are taken out alive, where no fish formerly existed, and there deposited. Myriads of them have been thus transplanted to their new homes this season, and are flourishing very finely. The greater number of them quite large, passing through their new outlet contain water as pure as ever flowed from the springs. Trout will thrive in any of the largest to the smallest—and it is the intention to stock every sheet of water on the mountains with this delicious fish."
