

THE HANAUER SMELTER

What Now in the Big New Furnace About
the First of the Month.

ITS CAPACITY 100 TO 125 TONS DAILY.

ROSS'S LOOK IN COTTONWOOD—Nickel
Kings Yankee Stock—Young America
State in the Pitt.

Improvements in the Hanauer smelter are far progressed so as to make possible the melting in of the big new furnace about October 1st. A writer and informed in the previous said that the work was fast losing competition, and that the smelter would present a fine new appearance when started up again. The plant has been closed down for nearly 30 days undergoing necessary changes, these consisting of new buildings, a large furnace and other attachments essential to the success of an Al Smelter. The new furnace will have a capacity of from 100 to 125 tons of ore daily, and the company's new contracts will keep it pinging away almost indefinitely.

WHAT EVANS LICK.
comes to have a Young Yankee in the
Upper End Cottonwood.

"HIS Evans, whose birth in the Cottonwood is well along, has now made his first appearance in the stock market. He is the son of the George Evans of the day of which should give him a day or two to become a boner.

Mr. Evans, one of our principal

stockholders in the Western

and Eastern Gold fields, is the

successor of Mr. John Evans, who

has passed away. He has stayed

with us through thick and thin,

when his father's health was failing.

He has now sold his interest in

the Western Gold fields, and

has turned his attention to the

Eastern Gold fields.

He has now sold his interest in

the Western Gold fields, and

has turned his attention to the

Eastern Gold fields.
