

A SWEDISH DAIRY. Miss Claussen, of Point Reyes, conducts the dairy on which is the most successful Swedish system, one which is materially from that in vogue in California. The dairy is situated on a hillside, the top of which is 200 feet above the level of the sea. The water is constantly running, and the milk is of the best quality.

Many would think the cream would not rise from the milk, but this is an error. When the odor and warmth of the animal are all removed, the cream will all float. The cream of the milk is of the best quality, and the butter is of the best quality.

Everything about the dairy is of the best quality. The butter is of the best quality, and the cream is of the best quality. The dairy is of the best quality, and the butter is of the best quality.
