

MINING, BUSINESS AND STOCKS

COPPER STRIKE
ON PROMONTORYHoward S. Stowe and Ogden Associates Have Discovered
A New Camp.

SITUATED WEST OF OGDEN

On the Lucia Cut-off—New Company
Formed in Junction City
Today.

Howard S. Stowe was called to Ogden on Saturday in response to a telegram advising him of an important strike of copper ore in a property in which he is interested not far from Promontory station on the Ogden-Lucia cut-off of the Southern Pacific. Some of Mr. Stowe's associates had just come in from the scene of the strike and he was asked to meet them and talk over the advisability of incorporating a new company, which is to be known as the Lakeside Copper company. The new organization was effected today and Mr. Stowe is expected to return from the Junction City this afternoon.

An Ogden paper, in speaking of the new discovery, says:

"On July 6, members of the party making up the present ownership were directed to a discovery made by a farmer named Whitaker. A few minutes investigation convinced the Ogden men that there was an unlimited amount of copper ore disclosed and they made terms for the property and soon after secured control. Since then they have staked the ground and now have twenty claims. At the discovery point four shots disclosed enough ore to load three cars and the first shipment to the Murray smelter will be loaded at Saline, 1½ miles from the mines, on next Monday. They estimate that the shipment will return six per cent copper and some silver and gold. The first consignment will be made up of unassorted ore, just as blasted from the ground.

The ore outcroppings stand 15 feet above the surface and the mineralized portion of the vein is fully 20 feet wide, exposed for a distance of 200 feet.

Saline, the shipping point, is 2½ miles west of Promontory station. Near the sidetrack has been established the new town of Tisdale, destined to be a bustling mining camp within a few months, but at present marked by a shanty and canvas tent, where the miners make their headquarters.

NEVADA OPERATORS HERE.

Messrs. Douglass and McQuillan on
Way Home From Denver.

W. J. Douglas and J. W. McQuillan, prominent Tonopah mining operators, are in the city today. They came last week to attend the Elks' reunion at Denver, and will go via Butte, Portland and San Francisco. They will be joined here in a day or two by Frank Golden and J. H. Bailey, also identified extensively in mining pursuits in Nevada.

WALL'S BINGHAM DAM.

What the Bulletin Says About Recent
Dynamic Incident.

The Bulletin of Bingham gives the following account of the blowing up of the dam built in Carr Fork canyon by Col. Enos A. Wall:

"The controversy over damming of the Carr Fork water above the town limits reached a climax Monday when Frank J. Mallett, watermaster, aided by some workmen put three sticks of dynamite under the foundation of the dam and blew it up.

"The matter which has taken a serious turn had its inception last Saturday when the breastwork constructed by the engineer Col. Wall was finished and part of the water of Carr Fork was diverted into a flume built along the side of the hill. The town board decided that the mining man had no right to use the water which has been used for agricultural purposes and instructed the watermaster to prevent it being diverted for the Wall mill.

"All day Monday a force of men under foreman Oliver were busy repairing the work. About 2 o'clock they were notified that the dam was to be blown up by dynamite. No attention was paid to the warning and shortly after the dynamite was placed under it and the fuse lit with the result that there was nothing left of the work of Col. Wall's men.

"That the matter will now be brought into the courts is a certainty. It is understood Col. Wall has permission to build the dam from Barney Quinn, who owns the property and water right. The incident brings up the old story of the water and sanitary conditions of Bingham. The town board holds that to use the water for milling purposes will deprive the people of Carr Fork of it and will result in much disease as the water is used for drinking purposes.

"Col. Wall contends that the town has no right to the water as it is not owned by the corporation and is beyond its jurisdiction."

GOING TO NORTHWEST.

General Manager Nicholas Treloar and Cashier F. W. Stenclir, the latter of the local offices of the Yampa Smelting company expect to leave this week for the northwest and after making an inspection of the mine and smelter of the Britannia Mining company.

will go up into Alaska for a brief outing. They will be joined at Vancouver, B. C., by Capt. Henry Stern, president of the company.

ALMOST READY.

Steam Shovel Practice to Begin at
Utah Copper This Week.

It will be several days yet before the Utah Copper company will begin steam shovel practice in Bingham. While the company had hoped to have at least one of the machines in order by this time, George H. Styer, general manager of the railroad company in failing to get some of the switches built and connected up has greatly delayed matters. However, if everything goes well, one machine will be in operation before the close of the week.

MR. RADDATZ HONORED.

Former Supt of Honerine Mine Given
A Surprise Party.

E. J. Raddatz, former superintendent of the Honerine mine at Stockton, was about the worst surprised man in the city today. During the afternoon he was asked to call at the offices of the Honerine company in the Atlas block by Frank Shirrer, the company's bookkeeper. When once inside, the doors were locked and in the presence of Mr. Raddatz's successor and several employees of the Honerine organization the retiring superintendent was presented with an elegant ring, diamond set, bearing emblem indicative of a thirty-second degree Mason. The presentation was made by Mr. Shirrer, who, with Sam Mordock, represented the employees of the Honerine company, the donors, and who took this means of showing their esteem for Mr. Raddatz, under whom they had worked during his services as the chief mine official, which covered a period of seven years.

Although Mr. Raddatz was taken quite off his feet over the little surprise party given in his honor, he made a fitting response and asked the committee, which had taken him in charge, to convey to each and everyone of the employees of the Honerine company his appreciation of the compliment shown him.

MR. RADDATZ WILL LEAVE FOR CALIFORNIA

Thursday with his family, and pro-

poses to remain there for at least two months and give up his entire time to pleasure seeking. This will be Mr. Raddatz's first vacation since he began driving the great Honerine drain tunnel, which was completed during his administration.

PARK CITY SHIPMENTS.

Daily Judge Still Leads—Rumor of
A Consolidation.

The ore shipments from Park City last week aggregated a little over 2,000 tons. The Daily Judge continues to lead with Silver King as a close second. The shipments and their respective contributions to the smelters were:

Tons.

Silver King, 621

Daily Judge, 435

Daily Judge, 410

Daily Judge (fine middling), 264

Kearns-Kelth, 56

Little Bell, 137

New York, 32

Moore Con, 21

Jupiter, 15

Total, 2,041

The New York Bonanza property is looking so good that according to one of the directors it will not be necessary to hold any more meetings for the purpose of levying assessments, says the record. Handling from the mine has been going on all week, and the product is still being taken out at the mine. The vein, carrying a big streak of gold ore has now been uncovered for a distance of 100 feet from the 650 level to the 75 level, and where the ore was expected and looked for in fact, ore has been uncovered. About 35 tons of ore have been shipped this week, and from this big proceeds are expected. The management is very highly pleased with conditions at the mine.

Operations at the Steamboat mine at the head of Snake Creek canyon, are in full blast again with a force of 15 men. Wm. Witt of Heber City, being in charge of the work. It was found necessary to do considerable repairing at the mine before work could be resumed, a snowslide last winter having carried away the blacksmith shop and the tunnelhouse, scattering the tools which were stored there all over the mountain.

To avoid a repetition of this trouble a tunnel will be run to the left, from a point about 20 feet in from the mouth of the present workings so as to reach the surface so high on the slope that it will be impossible for slides to reach it. There is still a great deal of snow in the neighborhood of the mine, and it is packed almost as hard as ice.

According to one of the officers and heavy stockholders of the Odis company the property is opening up better and better every day. There is still a lot of money being paid out, and the mine is paying for its own development. An average of two cars of ore per week is being sent out, and if necessary the output can be much increased on short notice.

It's the same old story from the On the Lucia tunnel, looking ahead and hoping for the best. About the same flow of water is coming from the tunnel, the water is steadily lowering in the shaft, and tapping the big body will occur in the near future, if the good ground holds out and nothing unforeseen happens.

A complete outfit of boilers and machinery, formerly used by the Ontario company, was sent to Ely, Nev., this week to be installed at the Kearns and Keith mines in that camp. Tom Walden, formerly superintendent at the Altamont, and now in charge of the Kearns-Keith interests in Nevada, has been superintending the removal of machinery.

The surplus fund of the Daily Judge company is being added to at the rate of \$10,000 per month, and this in the course of development and prospecting with very little stopping being done. While no information has been received concerning dividends, it is understood that such will be declared in a short time and that when once begun they will continue to be posted regularly.

Rumors are afloat of a huge consolidation, which, it is said, is being engineered by Jas. McGregor, who intends gathering together the Jupiter, Keystone and other promising Thayer's canyon properties. No definite information concerning the deal has been given out, but it is said to be of immense proportions and of untold benefit to the camp.

A. S. CAMPBELL.

Stock Broker, 216 D. F. Walker Bldg.

IMPERIAL OF
CHERRY CREEKPeter H. Cannon, in From Nevada
Says Mine Will Soon
Produce Again.

RECORD IS A GOOD ONE.

In Early Days of This Historic Camp
—Biscuit and National
Shipping.

Peter H. Cannon, one of the pioneer mining operators of Cherry Creek, Nev., has returned from that camp, and brings the information that work has been resumed on the Imperial property of which a great deal of high grade silver-gold ore has been shipped in the past.

The completion of the Nevada Northern railroad for Cherry Creek has made it possible for some of the old mines that have been idle for years to operate profitably. This is the case with the Imperial, for it contains extensive bodies of ore which now have commercial value. Heretofore it has cost \$12 a ton to ship ore to the Salt Lake market, but since the railroad came in, it can be delivered to the smelters for \$3.50 per ton, or a saving of \$7.50 per ton. This alone is an important item and it is not to be wondered at that the owners of property at Cherry Creek have been content to keep the mines in a state of inactivity until the railroad came.

In the early days of the camp a great deal of ore was shipped from the mine of Cherry Creek, and Mr. Cannon states that the Imperial responded with no less than 35 carloads, which netted anywhere from \$80 to \$100 per ton. But when the slump in silver came, everybody went out of business. The mines were closed and have remained down almost ever since.

The National Mining company has begun shipping and the Biscuit Mining company is preparing to. The latter has the equipment needed, and the management is shaping up things for a record.

Of the celebration given last week in honor of officials of the Nevada Northern Railroad company, Mr. Cannon says the affair was pulled off without a hitch, and the event will go down in history as a memorable one for Cherry Creek. It was the beginning of a new era for the camp. In the future it will do its share towards the enrichment of the world.

MORE ABOUT DOUGLAS.

Letter From Superintendent Tells of
Progress of Development Work.

A letter received from J. H. Smith, superintendent of the Nevada Copper company's Douglas mine, near Yerington, Nev., came to the local offices of the company today and it contains the information that the Ore vein continues to show in a medium grade of ore. The surface work, outlined some time ago for the Douglas and Francis claims, has been completed and on the latter on which is being driven the Hagenbarth adit. Mr. Smith states, he has made some fine exposures. Work is going on in numerous other places and there seems to be ore everywhere. In company with Mr. Arentz, one of the Nevada Copper company's engineers, Mr. Smith says he was shown through the Ludwig mine, adjoining the Douglas and which is a regular shipper, by Superintendent Somers. Ore in the Ludwig makes large caves and deposits its characteristic lime formation. The high grade ore coming from the mine at the present time is being sacked without sorting for shipment and runs about 25 per cent copper.

CONCENTRATES.

Broker E. M. West and family are
enjoying a brief outing in Ogden canyon.

C. D. Porter, the Nevada mining operator, spent yesterday in Ogden canyon.

The Godiva Mining company is getting ready to provide additional equipment for its Tintic mine.

Broker E. G. Woolley, Jr., of Pollock & Company, brokers, has purchased a new 40-horse power automobile.

It is expected that the smelter at the Lost Creek, owned by the Lost Creek, Ida, district will be blown in this week.

Harry Griffith, secretary of the Mountain Dell Mining company, was in the American Fork district several days last week.

Horace Dunbar, mining editor of the Tribune, visited Park City yesterday, which was his first visit to that most interesting camp.

The Parley's Canyon Lime & Stone company, of which E. O. Perkins is manager, has begun the development of its property near "Old Arm Chair."

The equipment necessary for the operation of a five stamp mill has been sent to the property of the Wheeler Mining company near Yerington, Nevada.

S. Osborne of American Fork has sold a 50 per cent interest in several mining claims in American Fork section to Harry Rankin of this city for a consideration of \$100.

Last week's ore and bullion shipments amounted to \$121,500. Saturday's contribution being: Crude ore and concentrate, \$25,500; base bullion, \$33,000; gold bullion, \$6,000.

A. J. Davis, president of the Salt Lake City camp, spent yesterday in Ogden canyon. Mr. Davis expects to leave in a few days for Nevada to leave after mining interests.

A San Francisco correspondent of Pollock & Co. wired today that indications favored a settlement of the threatened labor difficulties in the camps of Tonopah and Goldfield.

Clarence E. Alder, mining manager of the United States Smelting, Refining & Mining company, with Judge R. N. Backus, made an inspection of Millard Hill mining property in American Fork canyon last week.

Col. John Weil, president of the Nevada-Utah Mines & Smelters corporation, departed for the east again on Saturday afternoon, after making an inspection of that corporation's Utah and Nevada interests.

The old Petro Mining company has been dissolved, the property of that corporation now being an asset of the Utah Apex Mining company. Shareholders will receive a dividend of four mills per share, which will wind up the company's business.

M. L. Effinger, who is interested in the Silver Peak, Nevada, district, is in the city today and will leave for the southern Nevada camp within the next few hours. Mr. Effinger purchased the company which has taken over the Blair mine at Silver Peak.

The gypsum beds in Lost Creek can-

you are causing much talk these days. Recently Alexander Jennings of more or less notoriety in Utah, together with two gentlemen named the Cannon from Salt Lake, have been surveying and relocating the claims which have been located by several others at various times. Jennings now says that this time it means the development of the beds. A mill will be erected and kins to convert the gypsum into plaster of Paris. It is a good proposition and it ought to succeed.—Richfield Repeater.

A car load of new machinery for the Sevier Con Mining company, consisting of a large condenser and a turbine wheel of mammoth proportions was sent down to Sevier last week. The machinery was loaded in a solid coal car in order to avoid the trouble which would have had to be built. Rather than do this shipped the machinery back to Salt Lake to have it transferred to a flat car. The machinery should have been installed by this time, but the unloading from such an ungainly car was too big a proposition.—Richfield Repeater.

F. C. Calkins, geologist of the United States geological survey, assisted by D. F. McDonald, has begun a detailed study of the areal geology of the Phillipsburg quad in Montana. W. H. Emmons will afterward take up the economic geology of the district. This area lies just east of the famous Anaconda district. Within its confines are the well known silver and gold mines, called the Granite and Bimetallic. It is of interest to note that certain coal-bearing formations have been observed in this quadrangle. An effort will be made to determine the economic value of the coal which they carry.

Peace has been declared at Ramsey, Colorado, Northern Nevada. Sam Wheeler of the same town on one side and Captain A. H. Mayne of Goldfield on the other have agreed on a division of the disputed property and the injunction has been withdrawn on the request of the petitioners. This leaves Mayne with the discovery claim. Wheeler & Norcross with improved claims on a north extension, Reynolds & Robinson of Goldfield with a south extension. In addition two extensions on the Reynolds and Robinson property are held by Toll Brothers and Ticker, while Davis of Dayton owns a parallel ledge. Two other ledges almost as large have been opened up by other parties and a Salt Lake outfit has promised to begin shipping ore within 30 days—Goldfield Sun.

One hundred De Forest Wireless stock at \$3.00. Must be sold at once, so give us a bid. E. M. West & Co., Tel. 1455. 327 D. F. Walker Bldg.

LOCAL MARKETS.

Today's local markets are supplied with green corn, which is selling at 40 cents a dozen. There are also carloads of oranges and bananas, watermelons, of which the market has been short, lemons, onions, potatoes, and quite an array and varied assortment of vegetables. Then there is plenty of sea bass now, a very edible and cheap fish. Beef, wholesale, is a shade lower. Corn is up 5 cents. The following prices are the ones prevailing today:

RETAIL.

Timothy, per cwt. 1.00
Wheat, per cwt. 1.00
Corn, per cwt. 1.00
Barley, per cwt. 1.00
Oats, per cwt. 1.00
Flour, straight grade, per cwt. 2.20
Flour, extra, per cwt. 2.40
Bran and shorts, per cwt. 1.20
Straight shorts, per cwt. 1.20
Corn meal, per cwt. 2.20
Spinach, 3 lbs. 25
New potatoes, per lb. 10
Green peas, per lb. 15
Egg plant, per lb. 25

MEATS AND POULTRY.
