CRITICAL CONDITION OF PARIS!

NEW YORK.

An appeal to the Provisional Government.

NEW YORK, 23.—The *Journal de Paris* published on the 11th, and the *Gauleis* reprinted on the 12th, contain a long appeal to Government, the substance of which is as follows: You know your army of relief is a phantom. The provinces can't come to help Paris. You ought to confess the truth. You know it is equally impossible to cut through the Prussian lines, so that the garrison may reach the Loire, to get provisions. For such a sortie you must win a great battle, which with your present army you can never do.

Louis Blanc publishes an address to the defenders of Paris, congratulating them on the failure of the armistice. They cannot and ought not to treat with the enemy whilst it is occupying French soil. Paris must replace herself at the head of France, then she may suggest mediation by a tribunal composed of two monarchial and two republican powers, the latter the United States and Switzerland; but even then it will be just as necessary to act in order to raise France in the estimation of the world.

Another correspondent on the 16th, telegraphs but 40,000 horses remain of 100,000 in the city.

D'Aureilles' plan of defense comprises three lines, with extended entrenchments armed with heavy artillery. The third line has Orleans on the north, which has powerful earthworks; the second line is about Arthenay, where 100,000 workmen are employed besides soldiers. The first line is still higher up. Keratry is following up a similar plan in the west, so that if the French are repulsed, as is probable, in the first attack on Paris, they will fall back on the first entrenched lines, under cover of which they will prepare another attack. D'Aureilles has repeatedly offered battle to the army nearest him, but in vain.

The army of the Loire is moving past the enemy's front, leaving 50,000 to protect its flank and rear. Reports make it 100,000 strong. The estimate is over 150,000, with numerous heavy artillery. Herold's special, Berlin, 23.—The Russian post office authorities have quarantined the postage on journals for Turkey and Greece, to prevent, as believed, an outbreak among the Slavonic subjects of the Sultan.

Gen. Manteuffel, at last accounts, was in the neighborhood of Laon. Tribune's special, from Paris: After the 15th the flesh of horses, mules and asses was regulated by a tariff, like beef, and rations thereof were issued by the government. The people bear their privations well, thus far. Charcoal is eight times the usual price, and the consumption of gas after seven in the evening is forbidden.

Arago resigned the mayoralty on the 18th. Jules Favre succeeds him as the government delegate, fulfilling all the functions of mayor. The offices of the mayor and prefecture are abolished, but in reality they still exist. They are, however, under the control of the government for the national defense, and the result is general dissatisfaction. One district has refused its rations a fortnight sooner than an adjoining district, and the rations have varied in different districts from fifty to a hundred and fifty grammes. This week all are reduced to forty grammes. Today and yesterday the distribution was made of equipments and material for the newly mobilized companies of the national guard, preparatory to the long expected sortie.

FOREIGN NEWS.

GREAT BRITAIN.

Petition in favor of the Pope—Russia to be conciliated.

LONDON, 23.—Trevelyan lectured here to-night on army reforms, and urged the abolition of the purchase system.

The city of Bradford has avoided a contest over the school board, by agreeing to the appointment of five Churchmen, three Independents, two Baptists, two Methodists, two Catholics, and one Friend.

The Queen has returned to London from Balmoral. The iron-clad *Constitution*, just finished, was found to be so top heavy, that she had to take three hundred tons ballast before it was considered safe to ship her armament.

The Catholic Bishops of Prussian Poland, have presented to King William a petition in favor of the Pope. It is noticed with more than surprise that Granville sent his note to Russia without waiting for the approval of his colleagues. A cabinet council was held to-day, at which it was resolved to adopt a more moderate tone towards Russia and seek to conciliate her.

A serious engagement has taken place at Haricourt on the Oise. No particulars received. The *Herald's* special correspondent, from Paris, writing by balloon, says, to-day I went through the Bois de Boulogne. It is dismally blackened by fire and ravaged by the axe. I traveled to the outskirts of the Place Boulogne. St. Cloud is only partially burned. The scene all around is impressively desolate. A German battery of twenty-four cannon was recently unmasked in the garden Maccard. The Germans have also erected a mortar battery in the main avenue of St. Cloud, and a battery of cannon at Brimbois. The government yesterday accepted from the makers 3,000 breech-loading rifles, the range of which is 8,000 yards. The ring-leaders of the riot of the 31st were all liberated.

Correspondence.

SPANISH FORK,

Nov. 21st, 1870.

Editor *Deseret News*.—Dear Brother, Last spring I sent some silk-worm eggs to Mr. Edward Muller, of Nevada City, Cal., to try them. I received a letter from him a short time since reporting his success. As it contains some items of general interest, pertaining to this valuable industry, I enclose an extract from it.

I have been engaged in raising silk for the past four years, under very unfavorable circumstances, arising from a scarcity of feed and the want of a suitable building to feed in; still I have had unvaried success. When I first received my eggs I had an impression that they were the old French variety. At the request of Mr. Wm. Haynie, of Sacramento, I sent him samples of cocoons and eggs, and he pronounced them Japanese Annuals, and says that the silk is good, strong fibre. The same eggs have been sent to Cache Valley, Southern Utah and Fort Gunnison, and have been pretty well distributed through Utah county, and all pronounce them vigorous and healthy. Upwards of twenty families have raised silk in Spanish Fork this season, of the same variety and all with good success. The value of the silk worms eggs, produced in this place the past season, is about three hundred dollars, and a ready market has been found for them in California; we have also sent a few ounces to France and Italy. All we lack to prosecute this rich industry, is extensive plantations of mulberry trees. Here the climate, soil, and everything pertaining to the production of silk is very favorable. The fact is now clearly demonstrated that Utah is eminently a silk producing country.

An increasing interest is being felt in this business here. Our co-operative silk company has commenced fencing a piece of land for a mulberry plantation, and expect to plant it with trees to be used next season. The well known energy and perseverance of Bishop A. K. Thurber, president of the company, will be a guarantee of its success.

Your brother in the gospel.

SAMUEL CORNARY,

Secretary Co-operative Silk Co.

NEVADA CITY,

Oct. 17th, 1870.

MR. SAMUEL CORNARY: OF SILKWORM EGGS. You sent me last spring nearly all hatched and the worm was a healthy one, during all its stages. I fed them on white mulberry leaves. The worm was of a white color, and spun an oval shaped cocoon, one end very pointed, the other round; some cocoons were of a greenish color, others of a dark yellow, they spun a good quality of floss; still, the cocoons averaged 1,300 feet of silken thread of the strongest and most excellent kind I have seen for a long time; they reeled very neatly without hot water.

I have raised mostly French Annuals this year, for I believe they are the most profitable, and I have had good success; others in the valleys (Sacramento) had bad success with annuals; they will never succeed in raising regular crops of Annuals; the roots of their trees stand in water, partially. Some feed leaves from the young trees altogether, and most of them have too large cocoons, all of which are unsuitable to the health of the silkworm. I would suggest small cocoons, to contain not more than 250,000 worms; and even then, plenty of ventilation, because fresh air is essential, never shut the air off entirely, even if the nights are very cold. My silkworms, this last spring, withstood a temperature one night (I left the windows open for experiment) of thirty-five degrees Fahrenheit in the room; outside in my garden, it froze. The thermometer was thirty-two, Ed. MULLER.

JUST OPENED!

THEODORE LUBBE,

Manufacturer of Ladies' and Fancy FURS,

EAST TEMPLE ST.,

At FLORENCE SEWING MACHINE SALESDROOM

Opposite Salt Lake House,

Has on hand and for sale a Fine Assortment of
