

BY TELEGRAPH.

AMERICAN.

NEW YORK, 22.—A motion was made in the Supreme Court to-day to dismiss the attachment of \$110,000 in the hands of Belmont & Co., being the balance of the \$500,000, less than fifteen per cent. commission, which Richard Peliston won last May in a lottery. The attachment was granted at the suit of E. W. Denny, who says that Peliston promised him half his gains if he came to New York and helped to get the money.

A private London dispatch says that Lord North has placed a million sterling in the hands of Jay Cooke, McCullough & Co. of London.

A formidable strike of Crispins took place to-day, for the purpose of compelling the employers to return to the old scale of prices made after the last strike. In the dull season the employers refused to pay the scale, and now, in the busy season, the men demand compliance with the contract.

AUGUSTA, Ga., 22.—The following dispatch has been received from Tallahassee, Fla., dated September 21st: "A terrific storm prevailed throughout this section of country on Friday. Several stores were unroofed, thirty or forty houses blown down and several others badly damaged. A great number of gin houses were destroyed. The crops are considerably ruined. Three or four lives were lost and several persons were wounded. A large number of cattle were killed. The roads are blocked by fallen trees, and telegraph wires and fence are down for miles. The loss in this county is immense. Bridges were completely washed away, houses floated and families made homeless. Newport is also reported swept away."

SAN FRANCISCO, 12.—Alexander McLean has instituted a suit in the 12th District Court against the Blue Point Gravel Mining Co., to recover \$40,000 damages for personal injuries. He claims that a blast was carelessly discharged in the mine, no notice being given, and that a piece of rock struck his arm and broke it, making him a cripple for life.

It has been ascertained that no one was lost by the wreck of the *Costa Rica*. Both the white men and the Chinamen who were supposed to have been drowned made for the shore and came to the city; they reported themselves to-day.

WASHINGTON, 22.—The President and General Babcock returned this a.m., and registered at Willard's Hotel. In the course of the morning the President called at the Treasury department and had a conference with Secretary Richardson, the result of which may be inferred from the fact that subsequently the Secretary stated that the President will do anything within the law, but in no particular will he go beyond his clerical authority. He will at all hazards maintain the safety of the treasury and protect the credit of the U. S. in the present financial crisis. In answer to inquiries nothing was elicited to sanction the report that action will be taken in regard to placing \$44,000,000 of the legal reserve at the disposal of the N. Y. city banks. The treasury has a sufficient amount on hand to meet all legitimate demands.

The Secretary of the Treasury will send Assistant Secretary Hillhouse to-night \$2,000,000 dollars in greenbacks, to prevent the possibility of his becoming embarrassed in the purchase of bonds.

The following cable dispatch has been received at the Navy Department: "Glasgow, Sept. 22. 'To the Secretary of the Navy, Washington. 'The *Polaris* was lost on the 15th of October. We were picked up by the *Ravenscraig*, twenty-five miles south of Cape York, and she transferred eleven of us to the *Arctic*, which arrived at Dundee on Tuesday. Three got on board the *Intrepid*, which has not yet arrived. Eleven will leave on Tuesday's steamer, the *Antwerp*."

"Signed CAPT. BUDDINGTON."

BROOKLYN, 22.—In consequence of the Wall street panic the presidents and other officials of the various banks here held a consultation, in order to determine what course they should pursue in the event of a panic and run on their banks; they resolved to aid each other in the event of a panic, and to sell

government bonds before refusing to pay at once.

OTTAWA, Ont., 23.—The Dominion parliament meets on Thursday, the 24th of October next.

A special to the *Citizen*, from Newfoundland, says the legislature has been dissolved, and general elections will be held throughout the Island on the 8th of November. The local government will appeal to the country on the cry of confederation, and the Island will at once enter the Dominion if they succeed, as it is expected they will.

GOLD HILL, Nev.—At eleven o'clock this morning the Gold Hill foundry was the scene of a bloody affray. John Nagle, a former employee, and Patrick Karvin, the engineer, had some words, resulting in a fight, in which Nagle stabbed Karvin. James Brown and William Roughman attempted to separate them, but were both stabbed by Nagle. Brown and Karvin are both seriously injured and may both die. Roughman is not seriously hurt. Nagle was afterwards arrested and is now in jail.

WINNEMUCCA, 22.—The stage that left here yesterday a. m., for Silver City, was stopped by three masked men, fifty-four miles from here, and robbed. Wells, Fargo & Co's treasure box was taken. Col. Wood, U. S. paymaster, en route for Camp McDermott, to pay off its troops, was among the passengers, and was also robbed. The amount which the robbers got is not yet known. Before leaving Winnemucca the paymaster's clerk told several persons that they were going to pay off the troops. Several suspicious looking characters heard him, and it is thought they got horses and started ahead of the stage and waited for it to come up. No resistance was made by Wells, Fargo & Co's messenger or the passengers, although they were well armed.

CHICAGO, 23.—In Chicago to-day there is a very perceptible feeling of relief from the oppressive effect of the New York excitement the last few days. The scarcity of currency, owing to causes that are very manifest, is the only depressing influence now felt in business circles, and if the letting up continues in New York even this will soon be obviated. Our bankers are in excellent spirits. The past day has been quiet at all banks, and public confidence seems to be fully re-established. Deposits at savings institutions to-day have very considerably exceeded the applications for deposits.

LOUISVILLE, Ky., 23.—There were twenty deaths at Shreveport yesterday. The disease is spreading in the suburbs and attacking acclimated persons, and the blacks, who have been generally exempt. Superintendent Lhomedien reports that the disease is becoming nearly as alarming as the pestilence.

RICHMOND, Va., 23.—The People's Bank, First National, Merchants' National Bank and Planters' and Merchants' Bank, all of Petersburg, Va., suspended this morning. The Citizen's bank has declined payment. Other failures are reported.

WASHINGTON, 23.—The Commissioner of Internal Revenue holds that the liability to pay taxes by a dealer in leaf tobacco does not attach to the act of purchasing. Any person may purchase leaf tobacco at a sheriff's sale, or directly of a farmer or any other person without incurring any liability to pay the special tax before. It is selling leaf tobacco that creates such liability.

N. Y., 23. The Crispins' strike ended in victory for the workmen, the employers acceding to their demand for an increase of wages.

A startling case of baby farming has just been discovered, the principal being Mrs. Ellen Roberts, of 212 East 35 St. A neighbor testified that no less than 30 children of tender age had died in Mrs. Roberts' house in five months. She was arrested to-day.

SAN FRANCISCO, 23.—The body of a drowned man was found at Hunter's Point, by an Italian fisherman, this morning, and taken to the Morgue. In the pockets of the clothing was found a certificate of discharge to William Conn, a seaman on the steamer *Idaho*, dated at San Francisco, March 9, 1873; also several letters dated at Trent College, Wilford, Nottingham, England, addressed, "My Dear William," and signed, "Your loving wife, Annie Conn." There was also a Clay Street Savings Bank pass book, showing a balance of \$253.27, to the credit of Jonathan Ruddle. The first entry is dated February 13, 1867. The pockets contained a knife and pipe, but no money.

Nothing is known of the circumstances of his death, but one eye is very black, as if he had been struck a severe blow, and there are three scalp wounds on the forehead, which might have been made by the rocks on which he was found.

It is stated that the new line of steamers between this port and Guaymas, La Paz, and Colorado River, will be inaugurated on or about the 5th of October, the steamer *Montana* running alternate with the *Newburn*, making trips every twenty days.

To-day four steamers, the *Pacific*, *So. Thomas*, *Senator* and *Gypsy*, went down to the wreck of the *Costa Rica*, to make preparations for an attempt to extricate the vessel from her rocky bed. All of the cargo has been removed, and preparations are being made to get her off.

Mary Callahan, the young lady who was yesterday found guilty of petty larceny, in stealing a fifty-dollar gold note from her mistress, was to-day fined twenty dollars by Judge Louderback. A benevolent lady paid the fine and has procured a home for the unfortunate girl, who expresses a desire to reform.

OTTAWA, Ont., 21.—The Government has received advices by cable, stating that Mr. Tilley has been successful, and has placed on the London market a five per cent. loan of £5,000,000 sterling for the intercolonial railway. The bids amounted to £4,000,000 sterling, at an average premium of four and a half per cent., the interest to begin on the first of October.

NEW YORK, 24.—A *Herald* special from London, says that William Morton, second mate of the *Polaris*, who discovered the open sea of Kane in 1854, and is among the rescued of the Buddington party, has made a statement concerning the death of Captain Hall.

He attended him personally up to the moment of his death. Hall returned on the 24th of September, 1871, in perfect health from a journey north in dog sledges, on which trip he was accompanied by Hubbard C. Chester, chief mate, and the two Esquimaux, Joe and Hans Christian. After Hall had been a short time in the cabin he took some coffee, and immediately after became sick, and vomited. Hall said they were poisoning him. Morton, it is evident, believes as Hall did. He also suspects the subsequent medical treatment. Morton has a violent feeling against Dr. Bissell, which may color his judgment.

The governing committee of the Stock Exchange met at 9:30 this a.m., and decided not to open the Stock Exchange to-day, and the Secretary of the board issued an order that the Exchange should not be opened until further orders.

Gold opened at 112½. WASHINGTON, 24.—Gen. Barney, special agent of the treasury, has arrived here direct from Texas. The quarantine of towns and cities in that State is so rigid that he found it difficult to obtain transportation from point to point, the running of trains and other means of communication being almost entirely suspended, in consequence of the scare among the people occasioned by the prevalence of yellow fever in some sections of the State.

Gen. Barney says that at the time he left Brownsville there was at Matamoras, Mexico, what was called a brigade of soldiers, fully officered, but containing only about three hundred men, which threatened to make a raid into Texas in retaliation for the one lately made into Mexico by the United States forces. Mexicans assert that there are two sides to the matter of depredations along the Rio Grande; that while they are willing to admit that outrages, in the nature of cattle stealing, are occasionally committed by lawless bands of desperate Mexicans who cross the Rio Grande and drive across a few Texas cattle, there are similar outrages committed by persons belonging in the U. S., who cross into Mexico and steal horses and mules from Mexican citizens, and take them back to Texas. By the vigilance of the U. S. forces under Gen. Hatch this practice has lately been pretty effectually broken up.

PHILADELPHIA, 24.—A terrible tragedy took place here last night, in the Twenty-seventh Ward. Thos. B. Parker, residing at 4,215 Kensington Avenue, shot his wife, the ball taking effect in the eye, and glanced downward. He is then supposed to have shot himself, as the police, on entering the house, found him lying on his bed with a

pistol in his hand, the ball having passed through the eye into the brain. The wife is living this morning, and there are some hopes of her recovery. The cause of the quarrel is not yet known. The couple were out driving yesterday afternoon, and have appeared to live happily together. Parker was a gentleman of large wealth, and is well known in Philadelphia. The suicide and attempted murder took place about one o'clock.

EUROPEAN.

LONDON, 22.—A conflict took place in Steadman's yesterday between some Irishmen and the policemen. The officers were compelled to use their clubs vigorously, and did not succeed in dispersing the rioters until many had received severe injuries. There is great excitement in the town.

PARIS, 23.—Jean Jaques Coste the celebrated French naturalist, is dead.

ROME, 23.—The press are delighted with the reception accorded to King Victor Emanuel at Vienna and Berlin, and express their satisfaction at the cordial relations sustained by Italy towards both Germany and Austria.

A dispatch from Gibraltar says that a terrible explosion occurred on the steamer *Brooklyn*, when she was 100 miles from that place. Four persons were instantly killed and many scalded. It is feared that many of the injured will die.

A dispatch from Hothrall says that the Shah on arriving there expressed his disgust at the plot which had been concocted in his absence to overthrow his Grand Vizier.

The remains of Donald Dalrymple, late Member of Parliament for Bath, have been taken to Norwich for interment. It is said that he never recovered from the fatigue caused by his journey to America.

MADRID, 23.—The English yacht *Deerhound* has been released by order of the government.

Correspondence.

KANAB, KANE CO., Sept. 6th, 1873.

Editor Deseret News:

Kanab has got through her heated term—the weather was hot and dry till near the end of August, many days ranging near 100 in the shade. Had a beautiful shower, one inch of gentle rain, on Sunday last. Climate now very beautiful. The same day we had preaching from a goodly company of missionaries from St. George, consisting of Elders A. F. McDonald, P. C. Liston, J. M. Moody, Jos. Orton, Erastus Snow, Jr., and Hayden W. Church. They gave us much valuable instruction, urging progress and the benefit and necessity of union; that without it we were like a yoke of cattle, "pulling off" against each other, treading off each other's shoes and hoofs; that it were better to be united on a third rate plan than be disunited.

Fencing of our Co-op. farm has been finished. Wheat, oats, corn and potatoes have been grown with promising results. Credit is due J. L. Bunting for his persistent effort in proving the capacity of the soil.

As in all this mesa country, good land is much more abundant than water. But much can be done to obviate the lack of water, by draining marsh land; piping the water through the sand to prevent waste, loosening the soil, breaking contact around the growing vegetation to prevent the heat from drying out the soil and over-heating the roots, for we know that an adobe will dry out ten times faster than loose soil, it being a conductor of heat, proportionate to its density; besides, by loosening, the moisture of the air can penetrate the soil. Our gardens should be laid out so that horse-power can be used. Much can be done by being prepared to direct the small floods of July and August. Much can be done by mulching. Very much can be done by utilizing the wind to draw water from wells. As the water in Kanab field is only a few feet from the surface, ten thousand wind mills could be run and still there would be a great surplus of this cheap power, which abounds here, and which we will have to guard against by a system of wind breaks, of evergreen trees, for side walks and hedge plants, to make fruit growing a success and palliate our land drifting and cutting, a great torment to vegetable as well as animal life.

Facilities for herds can be increased by digging wells where there is good range.

I have fruited the Black Hamburgh, Lady Downs, White Chasselas and Syrian this season. They bid more promisingly than at St. George. All, except the Syrian, are ripe now. According to last season, we have yet two months of ripening sun; no killing frosts till November. Father Ellsworth, of this place, has fruited near to ripeness the Isabella and Romain (white raisin). They promise well. Plums and some varieties of apples and pears and cherries give evidence of good promise. Gypsum, which abounds here, seems hurtful to some varieties. The Peacock pear, a variety introduced in Dixie by Bro. J. E. Johnson, a local pear from N. Y. State, grows with great vigor and healthiness.

I am nursing trees, vines, roses, &c., to plant in the arid wilds of Arizona, to do what I can to 'make the desert blossom like the rose.'

Kanab as yet is undeveloped, its facilities are scarcely known. Rattlesnakes, scorpions and tarantulas infest our city plot; some have been killed on my lot this season.

My brethren, the Lamanites here, are slow to drink in the "new-fangled" (to them) idea. However, they will receive presents from Agent Ingalls and Commissioner Powell.

PI-UTE.

TERRITORIAL DISPATCHES.

PER DESERET TELEGRAPH LINE.

ST. GEORGE, 23.—A writ of *habeas corpus* was issued by Judge Boreman, of Beaver, addressed to B. H. Paddock, requiring the delivery of Captain Stone, recently convicted of larceny by the jury in the Probate Court here. Mr. Paddock, who officially is a special creation of the Judge, served the writ on the Sheriff, Seegmiller. They started last evening for Beaver, and it is presumed that another case will be cast adrift on the jurisdiction plea, unless he be cared for by the Sheriff of Lincoln county, Nevada, who holds requisition for him from the Governor of that State. But in either event Washington county will be saddled with several hundred dollars expense in the effort to honor the laws and preserve the people's rights.

MAC. OGDEN, 23.—Geo. Tessier, a well known San Francisco broker on his way east, got off the cars at Corinne, and while there last night he was set upon by a desperado named O'Neil. O'Neil got badly whipped.

Work on the Utah Northern Railroad is progressing rapidly. It is expected that the portion between here and Brigham City will be completed by February.

Boss Tweed passed east this morning.

INDIAN MOUNDS.—The following extract, from the forthcoming work of Professor J. L. Barfoot, of the Deseret Museum, entitled "Guide to Salt Lake and Neighborhood, for 1874," will be read with interest by many:

These mounds are situated west of the city, about eight miles. They certainly negative the conclusions some have arrived at, that "this valley was, a few years ago, covered by the lake." That these mounds were burial places of a former race of Indians who dwelt here for many generations, is probable; that men acquainted with the manufacture and use of implements, such as are used now in Arizona, Mexico and other places, were the mound builders, the numerous "metals," or grinding mills, flint and obsidian knives, arrowheads, spears, pestles and mortars, and especially the pottery, testify. One of these mounds was originally some eighty feet long by fifty in width, with a height of twenty feet; others were smaller, but they are so drifted it is even difficult to conjecture their former size. One vase, taken from a small mound recently, is artistically made, comparing favorably with "Moqui ware" and resembling fragments of pottery found on the site of the Utah Central Depot in 1868; the tools found in both places are also similar. These things among others the crania of human beings, as well as other Indian relics, are preserved in our Museum, and they may lead to enquiries that will result in showing that a race of Indians lived in these valleys respecting whom there are no traditions.
