

ITEMS.

FROM MONDAY'S DAILY.

HERE AND ELSEWHERE.—The annual return of the Imperial Library in Paris for 1898, acknowledges, amongst other donations with which its different collections have been enriched, "Mormon religious works," presented by Gen. Dix, the American Minister to France.

HEALTH.—So intimately are we associated one with another, so well known is almost every member of the community to the greater portion of his fellow citizens that no sooner is any one sick than almost the whole city is aware of it.

DIED.—On Wednesday, 17th inst., at St. Louis, Mo., of inflammation of the bowels, Benjamin Jones, aged 45 years and 6 months.

BUTTER PLANT.—A plant has been discovered from which an excellent article of butter can be manufactured for about sixteen cents per pound.

GHOSTS.—There is a subtle vapor constantly arising from decaying substances; it is the "manes" or spirit, departing into the air. It is this emanation which is the most dangerous ghost and the most difficult to lay.

INDIAN AFFAIRS IN MONTANA.—The force of soldiers and citizens who went in chase of the Indians after the late fight near the Yellowstone, succeeded in recapturing the cattle stampeded by them; but the party did not come across the "red gentry."

A short time since a band of Blood Indians made a raid on a saw mill at Benton Creek, about twenty miles from Diamond City. They were repulsed by parties armed with shot guns.

FROM TUESDAY'S DAILY.

FISH CULTURE.—The Danville Advertiser says: "Seth Green, of the Caledonia trout springs, has achieved a crowning triumph in sending trout spawn to England. A few months since he sent 3,000 ova to Mr. Buckland, the superintendent of the British fisheries, and brook trout that might have claimed for a birthplace the trout ponds at Caledonia, are to the British manor born and are sporting in the Royal Gardens, Kensington.

citizens who intend to attend to the culture of fish in our Territory. If ova can be sent without injury across the Atlantic to Europe, how much more easily can they be brought into this country, as soon as the railroad is fully opened.

ACCIDENT ON THE C. P. R. R.—Our telegrams to-day contain an account of a serious accident on the Central Pacific road beyond Elko. Two engines ran off the line, which resulted in the termination of eight human lives and the destruction of fourteen cars.

ODDS AND ENDS.—President George A. Smith and party reached Nephi last evening on their way home. . . . To-night "Leah the Forsaken," and "Dombey and Son" are the attractions at our Theatre. . . . To-morrow night Mr. Herne takes his first and only benefit.

INDIAN RAID.—We learn, through a letter from Mr. Volney King, of Fillmore, that the Indians made a raid on Scipio last Saturday, and captured one hundred head of horses. Owing to the storm causing the wires to work badly we have not been able to obtain any further particulars by telegraph.

DIED.—In this city, on the 30th inst., of spasms, Alfred C. son of Alfred and Amanda C. Best, aged two weeks. The funeral services took place to-day, at residence, 7th Ward.

SHOOTING AT SOUTH PASS CITY.—On the evening of the 19th inst., Frank Zerner, commonly known as Vinegar, was killed by Samuel Fairfield. It appears that they had some little difficulty last summer about an arasta, Zerner had hired of Fairfield. Fairfield sued him a few days ago for its use.

FROM WEDNESDAY'S DAILY.

SPEEDY JUSTICE.—We learn by Deseret Telegraph Line, that about noon to-day, a transient person entered the house of Mr. William Butler, at Marriot settlement, Ogden, and tried to force Butler's wife. In so doing he greatly abused her and killed one of her children and severely wounded another.

SEXTON'S REPORT.—Salt Lake City Sexton's report for March, 1899. Males 17, females 14. Of these, adults 11, children 20. Reported causes of death: Fevers 10, inflammations 4, consumption 3, marasmus 3, child bed 3, convulsions 2, still born 1, peritonitis 1, dropsy 1, spinal affection 1, congestion of the lungs 1, suicide 1, total interments 31.

LANDSLIDE.—From Bro. Heber P. Kimball, whose mule train arrived from the terminus this morning, we learn that a land slide occurred on Tuesday, at some point on the line, between Echo and Deseret, which would impede travel for a day or two.

THE LECTURE LAST NIGHT.—Mrs. St. Clair's lecture was much more numerous attended last night, than on her first appearance in this city. We understand that she will deliver another lecture to-morrow evening.

CHANGE IN THE WEATHER.—All Fool's Day has ushered in a very pleasant change in the weather in these parts. The rain, snow, sleet and hail which have made everything out doors so uncomfortable for the past few days, are giving place to-day to King Sol in full splendor.

Mrs. St. Clair's LECTURE'S.—Every person who attends Mrs. St. Clair's lectures is guaranteed some article of goods, worth, at usual retail prices, the cost of tickets. She lectures to-morrow evening.

CONNECTION WITH THE U. P. R. R.—Wells, Fargo & Co's. coaches commenced to run north from this city this morning to connect with the U. P. R. R. about three miles this side of Ogden city; the coaches will leave this city every morning at seven o'clock.

POLICE.—Reuben Dodd paid \$10 this morning into the City Treasury for getting drunk and disturbing the peace.

INDIAN RAID.—Through the courtesy of President B. Young we are enabled to lay before our readers the following telegram received per Deseret Telegraph Line:

On Saturday last a man came in from the range, stating that some stock were driven off; he had found a saddle, blanket and a tired-out horse with some other things. The next day six men went out and found that about one hundred head of cattle and horses were gone. To-day the men are off gathering up stock with the intention of finding how many are missing. They know Indians have taken them, as they have found tracks and every appearance of them. No guard at all with stock as yet.

CalLED.—We had a very pleasant call this morning from Major J. W. Powell, who is in charge of the Colorado River Exploring expedition, which has been engaged on a geological and topographical survey in Colorado and part of Utah. He is acting on behalf of the Natural History Society of the State of Illinois, to which he makes his reports. The expedition is assisted by the Smithsonian Institute, the funds for the purpose being appropriated by the Government. He has twenty-five men under his charge, and this last season explored the Grand and Green River Canyons. He is now getting boats made in Chicago, with the intention of embarking at Green River City, to go down the Colorado as far as Callville, to connect with the survey of Lieut. Ives, made some few years since.

The Major expresses himself as being very highly pleased with everything he sees here, and considers our city and country very interesting to a student of nature. He has come in, principally, to obtain what information he can respecting the Colorado.

AN IMPORTANT DISCOVERY IN THE MEDICAL ART.

CONSIDERABLE interest is being felt at the present time in the East in the use of sifted dry earth for deodorizing and disinfecting purposes. It has been so successfully used in several instances that it is now proposed to substitute earth closets for water closets in the Pennsylvania Hospital, Philadelphia. In testing the efficacy of sifted dry earth in one of the experimental commodes sent out by the Earth Closet Company at the hospital, it answered so excellent a purpose in absorbing bad odors that it occurred to one of the faculty to try its effect on the wound of a patient who was suffering from a compound fracture of the leg. The wound was in an unhealthy condition and the discharges, amounting to a pint in twenty-four hours, were so offensive as to cause a sickening and even dangerous stench. But the effect of the application of the dry earth was magical. The offensiveness was overcome, the intense pain was relieved, and the wound commenced to heal as it had not done before under the application of other remedies.

A gentleman who visited the hospital communicates to the New York Evening Post the cases he saw which were being earth-treated.

First: Two patients suffering from serious varicose ulcers.

Second: A railroad brakeman whose hand was crushed a year and a half ago.

Third: Another railroad brakeman suffering from a similar injury.

Fourth: A farm laborer who had three of his fingers nearly cut off and his hand fearfully torn.

Fifth: A laborer burned in the face and arms and his knee pan shattered, by the explosion of a condemned shell.

Sixth: A woman with her neck and a large part of her body very severely and dangerously burned.

Seventh: A woman who had her entire breast removed for cancer; the wound of which was dressed with dry earth.

In these different cases the effects of the application of dry earth were very wonderful. Where pain and inflammation existed, they were removed; and, in other cases, inflammation was prevented by the timely use of this simple remedy. In wounds, where there was a festering mass of carious bones and inflamed flesh, all the unfavorable symptoms disappeared with a few days' application of earth, and a healthy granulation ensued. This discovery promises to be of great benefit to the human family. Already it has been the means of alleviating unspeakable suffering, and it seems probable that the pustules of the small pox must give up their pain and their offensiveness at the application of dry earth. Here is a remedy which is within the reach of every one; and it can be easily applied. From the description of these cases we feel convinced that, by the timely application of the earth treatment, the amputation of limbs can be avoided in many instances where, under the old system of practice, it seemed absolutely necessary.

Western Missouri papers claim that Major Miller, editor of the Decatur Magnet, is the handsomest man in the nation. He has received several gold-headed canes as prizes for beauty.

The Hindoos extend their hospitality to their enemies, saying: "The tree does not withdraw its shade even from the wood cutter."

THE CITY CO-OPERATIVE POTTERY ASSOCIATION

ANNOUNCE to the Public that in consequence of having commenced business on the principle of co-operation, they are prepared to sell Ware at greatly reduced prices.

A liberal discount will be allowed to Trade purchasers.

Co-operative Branch Stores can be supplied on terms that will amply satisfy the purchasers.
