Being Shipped to Salt Lake.

F. W. Correll has gone out to Ante-lope Springs Mining company's prop-erty in Humbold county, Nev., to sup-erintend development work at that promising group of claims, and to at-tend to the shipment of a car of con-centrates which are now being for-warded from the mine to the railroad, a distance of about 22 miles. The lot consists of about 50 tons of jig concen-trates which carry about 39 per cent lead and 50 ounces sliver in addition to its zine contents. The ore is being developed by tunnels on the vein and is a low grade product which carries about 16 per cent zine. Thus far the management has not been able to successfully separate the zine, but by increasing the lead and silver in the concentrates the zine has been kept at 16 per cent thus making it marketable. The company has run three tunnels F. W. Correll has gone out to Ante

CONCENTRATES. One of the best tests of the worth of a mining camp, after all, is the size of its payroll. The last pay day in Ely witnessed the disbursement of \$250.-000 to employes of the mines. With all the faufare of the Nevada mining camps since the discovery of Tono-pah, this is the heavlest monthly pay-roll in Nevada since the days of the Comstock of 20 years ago, when the payroll of the Virginia City and Gold Hill mines stood at about the same fig-ure.-Ely Expositor. The statement of banks and trust companies of Greater New York not re-porting to the clearing house shows that those institutions have aggregato deposite of 31,225,21,400; total cash on hand 3140,127,600 and loans amounting to \$1,188,441,300.

ure.-Ely Expositor. Thomas W. Lawson has the following to say of the copper merger: There may be a copper merger which will in-clude Amalgamated and International Smelters, but if there is and Amal-gamated goes in at 100 and Interna-tional at 200, then Utah Copper will surely go in at anything from 160 to 240 and Nevada Consolidated at from 60 to 95 or any other old price that Dan 60 upgenheim can find a pencil leady 60 to 36 of any other of price that Dan Guggenheim can find a pencil leady enough to make figures with. There is in this ago of Guggenheim suprem-acy in the copper world a mighty staunch love tendril leading from the Guggenheim's throne to the doormat upon which at the present time kneels the Amalgamated crowd.
