

PRESIDENT ON DUTY OF CONGRESS

Calls Its Attention to the Necessity of Passing Much Needed Legislation.

SENATOR HALE IS SARCASTIC.

Says He Trusts Committee Having Matters in Charge Will Take Heed of the Admonition.

Washington, March 1.—President Roosevelt today transmitted to Congress a message endorsing measures pending before Congress intended to prevent the spread of contagious diseases of animals from one state to another or to foreign countries. The message points out that the right of the secretary of agriculture to regulate the interstate movement of animals exposed, but not actually diseased, must be recognized if the spread of such disease is to be prevented. The president urges that the proposed remedial legislation be enacted into law before the adjournment of Congress. The message follows:

"To the Senate and House of Representatives: Your attention is respectfully called to the necessity of passing legislation at this session which will supplement existing laws intended to prevent the spread of contagious diseases of animals from one state to another, or to foreign countries. Two bills, each designed to cure defects in existing laws, are now pending before the Congress. The measures are practically identical. One is house bill 17,288; the other senate bill 1,737. These bills have been favorably reported by both branches of Congress. The federal courts have held that the statutory powers of the secretary of agriculture are inadequate to enforce laws that prevent the interstate movement of animals which have been exposed to contagion, but which at the time of shipment have not yet developed visible signs of disease.

"I fear if no remedial legislation be granted at this session, that it may be impossible to continue to enforce the necessary measures for controlling this spread of disease, and that serious, widespread and irreparable injury will be caused to the livestock interests of the United States. If the federal quarantine is rendered ineffective, state quarantine against state, each requiring compliance with differing statutes, the way to market may be blocked or rendered very difficult for shipments of livestock; contagious diseases of livestock may be so disseminated through the stockyards and channels of commerce that foreign countries will restrict the export of animals and possibly cause the United States to lose all of which would be disastrous to the livestock industry.

"I therefore put in an earnest plea for early action in this matter and commend to you the favorable consideration the two bills proposed by the committees on agriculture and referred to in this message.

(Signed)
THEODORE ROOSEVELT.
The White House, March 1, 1905.

IMPORTANT SCIENTIFIC DISCOVERY.

A Clinical Preparation That Positively Kills the Dandruff Germ.

A most important discovery has been made after a year's patient laboratory work aimed in a certain direction—it is Newbro's Herpicide, a preparation that prevents falling hair, and speedily and permanently eradicates dandruff. These evils are caused by a germ or parasite that burrows into the scalp, throwing up dandruff, as it seeks to sap the life of the hair at the root. There's no baldness without falling or thin hair, no thin hair without dandruff, and no dandruff if the germ is destroyed. Newbro's Herpicide is the only preparation that will do the work. "Destroy the cause, you will remove the effect." Sold by leading druggists. Send for a sample to The Herpicide Co., Detroit, Mich. Z. C. M. I. Drug Co., Special Agents. 98

quarantine had been read in the senate, Mr. Hale said:

"I trust that the committee having charge of these matters and, for that matter, the whole senate, will take notice of the admonition that we have not been prompt in passing needed legislation, and I hope that the committee, so far as it has discretion and so far as the few hours of the session left will permit, will bring the bills in and thus do its duty as committees of this body are presumed to do."

TWO LETTERS FROM FATHER COPON OF RUSSIA

Paris, March 1.—The Socialist organ Humanite today prints and comments upon two letters reproduced from the Tribune Russe, bearing the signature of "Georges Copon," (or "Gapon," the name of the Russian priest who led the workmen towards the imperial palace at St. Petersburg Jan. 22, resulting in much bloodshed). The letters appear to be authentic, although several interviews on somewhat similar lines heretofore have been discredited. One is a letter addressed to "Nicholas Romanoff, former czar and actual assassin of Russia," and says the blood of innocent workmen and their wives and children will forever separate their assassin and his heirs from the Russian people. The fury of the people has now been unleashed and it will be useless to offer them promises.

"Bombs and dynamite and the terror of popular insurrection await thy offspring and all assassins of the people. Rivers of blood as never before perhaps will flow and even Russia herself may perish because of thee."

"Take warning therefore and quickly renounce with all thy family the throne of Russia and present thyself before the tribunal of the Russian people."

"Have pity on thy children, thou who offerest peace to others and withhold it from thine own."

The other letter is addressed to the Russian people. In it he declares that the streams of their blood recently shed have formed an immense revolutionary torrent which will now sweep forward irresistibly. It adds:

"Occupy yourselves ceaselessly with the propaganda and organization of armed insurrection. A plan for a general strike is being elaborated as soon as possible by your committee for your revenge and your defense."

"The hour of your delivery and victory is near."

"Vengeance has already struck Sergius and will strike the whole brood of imperial vipers."

"Rise then, poor miserable and oppressed Russian people! Throw away nothing to lose and everything to gain."

"The letters are dated Feb. 20, but the place where they were sent from is not given."

Father Gapon is understood to be in Switzerland.

The Patrie asserts that the Russian embassy will take steps to prosecute those engaged in the elaborate revolutionary appeals against Russia.

RUNAWAY FREIGHT CAR.

Collided With Mail Car, Injuring Seven People.

Portland, Ore., March 1.—Seven persons, one woman and six men, were more or less seriously injured in an accident in which a runaway freight car on the Oregon Water Power and Railway company here collided with a mail car from Casadero.

When ascending Boring hill, near Barton station, the motorman observed a runaway freight car descending at a furious rate of speed, and quickly reversed the motors. The momentum of the car offered resistance, but the reverse motion was begun and considerable speed gained before a collision that was inevitable took place.

There were a number of passengers in the forward section of the car and, being warned of the impending danger, several had passed into the mail compartment before the crash came. The front end of the mail car and the freight car were wrecked, but the presence of mind of the motorman and prompt action prevented serious injury to the passengers. Most of the injured were taken to the hospital, but none was seriously injured.

Shot a Man and Suicided.

Portland, Ore., March 1.—During a fit of temper, J. Donahue, aged 35, who had been discharged as a driver for a laundry company, shot and wounded Alexander Orth, one of the proprietors, in the arm. Orth fell to the ground, and, thinking he had killed his former employer, Donahue ran a block and a half to the woods of a resident, where he killed himself. Donahue fired four times at Orth, but only one bullet took effect. Donahue came here from Anaconda, Mont., where he was employed as a machinist.

Oregon Land Frauds.

San Francisco, March 1.—Henry W. Miller was brought before Commissioner Heacock today under indictment in the Oregon land fraud cases. Miller is charged with inducing 100 entrymen to commit the crime of perjury. He was held under \$2,000 bonds. Miller has already been indicted under a similar charge in this state.

Frick Co. Raises Wages.

Uniontown, Pa., March 1.—Notices have been posted at all the plants of the H. C. Frick company, indicating a wage increase of 10 per cent to begin March 1. General good times is given as the reason for the advance. W. J. Hainey and the Cochran company, independent coke operators, promptly announced that they would pay the same scale. The increase affects 30,000 men.

Women Drug a Merchant.

Reno, Nev., March 1.—William Roberts, a well-known business man of this city, was driving with two women in his automobile. He reported to the officers when found lying on the main street of the new town a few hours later, that he had been drugged and robbed by his companions. The women, after drugging him, he says, relieved him of everything he had of value and threw him on the street in the center of the business section of the city. The Sparks officers are investigating the case.

EDWARD O. WOLCOTT DEAD.

One of Colorado's Best Known Citizens Dies Suddenly at Monte Carlo, France.

WENT THERE FOR HIS HEALTH.

Was a Staunch Republican, Standing By His Party on All Questions.

Denver, Colo., March 1.—Former United States Senator Edward O. Wolcott, one of the best known Coloradoans, died at Monte Carlo, France, today. This information was received in a cablegram which reached here this evening. The senator had gone to Monte Carlo in the hope of obtaining relief from influenza in the milder climate of southern France. While the cablegram did not give the real cause of his death, it is known that he had suffered from stomach trouble for a number of years.

The news of Senator Wolcott's death came as a shock to the residents of this city, where his long public services had made him a household word. Politicians now gathered in the city, attracted by the gubernatorial contest, forgot the contest for a time, and the one topic of discussion was the senator's death and the possible result it would have on the political situation in Colorado, where he has been a recognized leader for more than a score of years.

Edward O. Wolcott was born at Long Meadow, Mass., March 26, 1848. He was the son of a farmer and a school teacher, and was educated at the University of Harvard law school. Coming to Colorado in 1871, he taught school, edited newspapers and practiced law in turn. As a public speaker he gained something of a reputation, and this brought him into politics. In this pursuit his rise was phenomenal.

In 1889 he became the unanimous choice of the Republican caucus for United States senator, and was chosen for this exalted position by the joint assembly. He was re-elected in 1896, but was defeated in 1901, although the nominee of his party. As an orator Senator Wolcott was unequalled, and his speeches in Congress and at political conventions were masterpieces of oratory.

What he deemed loyalty to party induced him to break bonds with his colleagues from the west at the St. Louis convention in 1896, that nominated McKinley. He refused to join a bolt in which his own colleague from Colorado, Senator Teller, was a leader, brought about by the adoption of a "gold" plank in the platform.

Throughout the agitation for silver he remained steadfast to the principles of the Republican party as enunciated in the St. Louis platform, and at the time his following so greatly outnumbered the "high five" Senator Wolcott was the moving spirit in the organization of the International Bimetallist congress, which convened in England, and represented the United States at the meeting.

It was Senator Wolcott who nominated James G. Blaine at the Minneapolis convention in 1892. He was also the temporary chairman of the national convention at Philadelphia in 1900 when McKinley was given his second nomination. Since his retirement from the senate in 1901, Senator Wolcott lived most of the time abroad because of ill-health. He continued to be a power in Republican politics of the state and had a strong following. Despite the fact that there was a spirit of opposition against him in his own party.

HAZEN, NEV., LYNCHERS.

Are Nervous Over Rumors of Intended Investigation.

Hazen, Nev., March 1.—The town is quieter than it has been for several weeks. Under the circumstances, however, there is an anxious feeling growing out of rumors of an intended investigation. Although it is expected that the officials of Hazen will not make any inquiry, it is thought that Gov. Sparks will do all in his power to hunt out and convict the members of the mob if the Hazen officials do not take action.

The people of Hazen are silent as to the identity of the lynchers, but it is quite certain that an investigation would result in a speedy arrest. Last night there was a rumor in Hazen that the lower half of town where "Red" Wood, the lynched man, stayed while in town, intended to organize and fire out who composed the lynching party, with a view to retaliation. The rumor proved to be baseless, the night passing off without incident.

Laborer Cuts His Throat.

Vancouver, B. C., March 1.—H. D. Hexom, a laborer, tried to commit suicide this afternoon, cutting his throat with a razor and inflicting injuries which will probably prove fatal. Hexom's wife was arrested, charged with being an accomplice in her husband's attempt of self-destruction. The police say she was present at the time and advised her husband to kill himself. Both Hexom and his wife are said to have been drinking.

Nan Patterson's Case.

New York, March 1.—After hearing arguments on the writ of habeas corpus and certiorari, having for their objects to secure the release of Nan Patterson from the Tombs prison, where she is awaiting trial for the murder of Caesar Young, Justice Gaynor, in the supreme court in Brooklyn today reserved decision. Miss Patterson was not in court.

Oklahoma Anti-Trust Act.

Guthrie, O. T., March 1.—The anti-trust bill passed the lower house unanimously today. The bill defines trusts and legislates against them. One section provides that all pipe lines in the territory shall be considered as common carriers and shall be subject to the laws regulating these.

Express Safe Robbed.

Memphis, Tenn., March 1.—An east-bound passenger train on the St. Louis & San Francisco railroad, known as "The Arkansas Traveler," was stopped by three bandits eight miles south of Mammoth Springs, Ark., today and the express car robbed. The safe was blown open and all of its contents, about \$2,000, were secured.

Cossacks Kill School Boys.

Batoum, Caucasus, March 1.—A number of school boys participated in rioting at Katsunais and several of them were killed or wounded by Cossacks. Order was eventually restored.

SOME SECRETS OF PATENT MEDICINES.

The Origin of Some of the Famous Medicines.

If we could trace the origin of the many things which enter into our daily life we doubtless would be greatly surprised at what we would learn. In some instances we would find their beginning in mere accident.

In other cases we would find that they originated in some stroke of genius. For instance, Comley's History of New York State states that:

"Of the men who have given wealth, stamina and character to the Empire State, the medical profession has furnished example in the successful and justly celebrated physician, Dr. R. V. Pierce, of Buffalo, N. Y. Especially educated for the profession, he early supplemented his studies by extensive and original research in its several departments. Devoting his attention to certain specialties of the science he has so carefully investigated, he has been rewarded in a remarkable degree. That his success is real is evidenced by the fact that his reputation as a man and a physician does not deteriorate, and the fact that there is a steady increasing demand for his medicines proves that they are not nostrums, but reliable remedies for disease."

Dr. Pierce's establishment at Buffalo is one of the show points of that flourishing city and is well worth a visit just to see how modern medicines, even though they be patent, are compounded with the utmost skill, by trained chemists, and on the most scientific principles. It is also worth while for the purpose of seeing the methods followed by which each applicant, whether he be a correspondent or a patient at the hospital, secures the care of eminent specialists in medicines and surgery. Once these things are seen, it will be speedily acknowledged by the most skeptical that all patent medicine businesses are not the frauds which some careless papers have declared them to be.

Dr. Pierce's Golden Medical Discovery is a pure medicine, made from barks, leaves and roots of plants and trees indigenous to America. It is a remedy without alcohol or any poisonous ingredient and taken from the sylvan forests. It has stood the test of the public's approval for the last third of a century. For purifying the blood it has no equal for positiveness and safety. It is most effective for a chronic cough, as it has a soothing effect upon the mucous membrane of the throat so that a cough is smoothed out and at the same time the blood-vessels are given a stimulation which throws off a cold, bronchitis or incipient consumption. Really a cold is nothing but the stagnation of the blood-vessels of the human system. If people want to remain strong and healthy they should see that their kidneys are active. The medicinal value of one plant which

makes up a part of this good old remedy, the "Discovery," is the positive action it has upon the kidneys. Many hundreds of testimonials have been received by Dr. Pierce from those people who have suffered from kidney disease and have been cured by the use of Dr. Pierce's Golden Medical Discovery.

"Your 'Golden Medical Discovery' cured me of rheumatism after I had tried a dozen remedies without relief and also gone West in search of health," writes Harry Kitter, of 1643 6th Street, Denver, Colo. "Only those who have suffered with this dread malady know the pain and misery I endured for over five years. Whenever the weather was damp or cold my troubles were increased and my joints would be so stiff and sore that I was hardly able to move about and often unable to dress myself. I used a number of highly recommended medicines, but they had no effect whatever on me, and I came to Colorado hoping to regain my health, but failed to obtain the relief I had hoped for. A gentleman in the house where I lived advised me to use Dr. Pierce's Golden Medical Discovery, and in four months and a half after I began using it I was a well man, and have had no touch of it for the past seven months."

The most precious possession on earth is perfect health. It is the ground work of all prosperity in life; and few people grudge any reasonable expenditure which will be the means of restoring it; but one of the most disheartening things in the world is for any one who works hard for his money to keep paying it out for doctors and medicines that do no earthly good. It is like throwing it into the fire.

The "Golden Medical Discovery" is a medicine that will help you no matter what ails you. This is true because it works directly at the root of all disease—the digestive system, the blood, the nerves, the liver and kidneys. Keep these in healthy condition and you cannot be sick.

Many of the cures of the "Golden Medical Discovery" seem almost miraculous. Its effect is almost immediate. It takes hold at once. It tones up the stomach, invigorates the liver, regulates the bowels.

It gets right in the blood and carries strength and comfort to every fiber of the body. It nourishes and invigorates the weakened, irritated nerves and puts the entire system in perfect tune.

It is a safe medicine. Safe for adults—safe for children. It contains no sugar, syrup, whiskey, alcohol or dangerous opiates. Therefore, it does not create a craving for stimulants. It is distinctly a temperance medicine.

If a medicine dealer tries to substitute some other preparation when you ask for "Golden Medical Discovery"—look out for him. He is either ignorant or dishonest and you can't trust him.

THE KING OF BLOOD PURIFIERS SSS

In every collection of things there is a superior, one that stands above all the rest and is known as the best, or king of its class. By its record of forty years of cures S. S. S. has demonstrated its superiority over all other blood purifiers and is known and recognized everywhere as the best—The King of Blood Purifiers. The people everywhere endorse it, and there are few homes where this great remedy is not known and used, and today there are thousands in all parts of the country who have been cured of diseases by its use and who are daily recommending it to those who are in need of a blood purifier. It has held the confidence of the public for this long period of time, and is more in favor now than ever before, because it does all that is claimed for it, and "S. S. S. for the blood" has grown to be a household saying.

One of its greatest claims to the title of "The King of Blood Purifiers" is that it is purely vegetable, being made entirely from roots, herbs and barks of the forests and fields, selected for their purifying and healing action on the blood and their fine tonic properties for building up and strengthening the entire system. Not so with the usual blood medicines, for they contain Potash and other strong mineral ingredients that derange the stomach and digestion and otherwise damage the health.

Bad blood is responsible for most of the ailments of mankind. When from any cause the Liver, Kidneys, Bowels or other organs of bodily waste become torpid, dull or sluggish in their action, and fail to carry out the poisons which are being constantly formed in the system, these poisons are absorbed by the blood. As this vital fluid is the very life of the body, nourishing and supplying strength, through its circulation, to every muscle, nerve, bone and tissue, disease in some form is sure to follow when it becomes contaminated.

Eczema, Tetter, Acne, Pimples, Boils, etc., while they show on the skin have an underlying cause which is far deeper—a poisoned blood supply—and until this is corrected and the blood made pure and strong, the distressing itching and burning as well as the disfiguring, humiliating symptoms will remain to torment the sufferer. No amount of salves, washes, skin foods, rouge, etc., can reach the trouble; a real blood remedy is required. S. S. S. cures these and all other skin diseases, and when it has cleansed the blood of the poisons and impurities the cure is permanent and lasting. Rheumatism, Catarrh, Scrofula, Chronic Sores or Ulcers and Contagious Blood Poison are all deep-seated blood diseases. When the blood becomes contaminated with the poisons producing these diseases, the entire circulation grows polluted and vitiated, and these painful and dangerous diseases will continue to grow worse until this vital fluid is cleansed and made strong and healthy again.

In all these disorders S. S. S. has proved itself a perfect remedy, and has well earned the title of "The King of Blood Purifiers." It goes down into the blood and forces out all poison of every kind, all waste and foreign matter, and makes it pure and health-sustaining in nature intended, curing the disease permanently. Nothing reaches inherited blood taint or old chronic troubles like S. S. S., and being a strictly vegetable remedy it can be taken by old or young without fear of bad after-effects or injury in any way to the system. Not only is S. S. S. a blood purifier and system builder of the highest order, but a tonic and appetizer without an equal, and is unexcelled in cases of general debility, loss of appetite, weakness, that tired, run-down condition, lack of energy and force, and other distressing complaints common to Spring and Summer months.

If you have any blood trouble write us about it, stating the case fully, and our physicians will help you to get rid of it by free medical advice and will send books on the different diseases, which contain valuable information, without charge.

THE SWIFT SPECIFIC COMPANY, ATLANTA, GA.
