

## RACE PROBLEM IN CALIFORNIA

Has Not Reached Stage of Mob Violence but it Must Come Soon, Says Hayes.

AND HE LOOKS FOR TROUBLE.

Claims He Represents View of Ninety-Five Per Cent of People of the Golden State.

Washington, Feb. 25.—The Japanese question was the subject of brief consideration in the house today during the consideration of the judiciary bill.

Representative Hayes (Cal.) declared that the people of California would not only exclude the Chinese from the soil of their state, but also the Japanese and "all other orientals in the category."

"The race problem in California has not reached a stage of mob violence," said Mr. Hayes, "but it must come. When men are hungry, I look for trouble. There are 30,000 white men in San Francisco, and yet in my district there are 10,000 Japanese and nearly all of them are employed. I believe I represent the view of 95 per cent of the people of California in asking that Congress protect us from this menace and aid in preserving the home of the Pacific coast for the Caucasian race. There is an immediate and pressing necessity to stop the influx of orientals."

Mr. Hayes' remarks were greeted with applause by the Democrats. Representative Chalmers (Cal.) expressed his approval of the exclusion of the Japanese and Chinese, which he said was advocated not only by organized labor, but by all labor.

"I have been a laboring man all my life," said Mr. Chalmers, "and I am against this immigration. The Caucasian race has always been the dominant race, as now, and will be as long as there are any of us left."

While superior to the oriental races, Mr. Chalmers said the Caucasian race cannot compete with the Chinese in the matter of starvation.

"If you let them in," he continued, "you would starve our labor out. It is currently reported that there are 1,000,000 American laborers out of employment."

Mr. Chalmers added that he has had a high regard for the president-elect since the first time they met, when Mr. Taft appeared before the house committee on foreign affairs in advocacy of excluding the Chinese from the Philippines.

Representative Harrison (N. Y.), speaking of oriental exclusion, said he would vote for Japanese exclusion if he continues as a member of the foreign affairs committee.

Representative Hepburn (Ia.) declared the servant problem in this country would be solved by the admission of orientals, claiming that 500,000 orientals for domestic service would displace the American servant.

## COMMISSIONER SMITH'S REPORT ON TOBACCO TRUST

Washington, D. C., Feb. 25.—Herbert Knox Smith, commissioner of corporations, today made public subdivisions 2 and 3 of part 1 of his report on the tobacco industry. They deal with the present organization of the tobacco combination, so-called, its degree of control in that industry and the development of that control.

These divisions of the report, resulting from a thorough investigation into the business operations of the tobacco combination, contain an elaborate discussion of the methods by which the manufacture of tobacco, except cigars, has come under the control of a comparatively few capitalists. Commissioner Smith says:

"In the tobacco combination are the American Tobacco company and its three great subsidiary combinations, the American, Sun and Company, the American Cigar company and the British-American company, besides 12 other subsidiary companies doing business in the United States, Porto Rico and Cuba. The combination controls a total net capitalization of over \$100,000,000. A very small group of 50 stockholders controls 90 per cent of the outstanding voting stock of the American Tobacco company, through which controlled the entire combination is controlled."

## GOV. SPARKS HOME RANCH IS SOLD

Idaho, Feb. 25.—The home ranch of late Gov. Sparks was sold at public auction here Tuesday afternoon by the sheriff to the Farmers & Merchants bank of Idaho for \$40,295.25. The property includes 37 acres of land with improvements and water rights. The sale was made with the approval of the district court, and in accordance with the will of the late governor.

**Folger's Golden Gate Coffee**

Always uniform—our best product—sold in 1 lb., 2 lb., 5 lb. and 10 lb. cans.

Your grocer will grind it—better if ground at home—not too fine.

## SHAKE IT WELL IN THE BOTTLE

Splendid Prescription to be Mixed At Home and Directions.

BACKACHE IS A WARNING.

How to Find Out if the Kidneys Are Affected and What to Do—What Causes Rheumatism and Blood Disorders.

There are more cases of kidney trouble here now than ever before, while recent reports show that more people are dying each year of some form of kidney disease than any other cause.

When there is sickness, examine the urine. Rheumatism is only a symptom of kidney trouble, nothing more or less than excessive uric acid in the blood, which the sluggish, inactive kidneys have failed to get out, leaving it to decompose and settle about the joints and muscles, causing intense suffering, frequently resulting in deformity, often reaching the heart, when death comes.

Pain at the back, frequent painful and suppressed urination and other symptoms of weak bladder are not the only signs of kidney trouble. Many cases of stomach disease, headache, pain in the heart, inactive liver, etc., are but symptoms of the cause of which can be traced to feeble, clogged kidneys.

A simple test of the urine is to void a small quantity in a bottle or glass and let it stand over night, next morning, if there is a reddish brown sediment, or white, fleshy substance present, either consult some reputable physician, or take a good vegetable treatment. The following prescription is recommended: Urinary secretions and the sufferer can mix it at home. Compound Karsol, one ounce. Fluid Extract Sarsaparilla, one ounce. Compound Syrup Sarsaparilla, three ounces. Shake well and use in teaspoonful doses after each meal and at bedtime.

Where any of the symptoms enumerated above are present, good results can be followed immediately the use of this simple prescription.

will of the governor which contained a clause that any of his property deemed necessary should be sold to liquidate the debts of the estate. The bank held the mortgage on the property as security for a note which, with interest, amounted to the sum paid for the ranch. There were no other bidders.

The governor at one time was rated one of the wealthiest men in the state, but spent most of his fortune being elected governor and trying to be elected to the United States senate.

## STRONG DEFENSE OF FREEDOM OF THE PRESS

Frankfort, Ky., Feb. 25.—A strong defense of the freedom of the press in criticism of public officials was written by Gov. Augustus Wilson today in granting a pardon to the Herald Publishing company of Louisville, publishers of the Louisville Herald, for an indictment in the Calloway and Trigg circuit courts of western Kentucky, charging the paper with criminally libelling Justice Thomas P. Cook and Commonwealth Atty. General P. Smith. The two officials preside in the district in which the greater part of the night rider troubles in western Kentucky occurred.

Gov. Wilson wrote: "If the courts don't put an end to the rule of crime in the counties in which the judge and commonwealth attorney are elected and uphold law and order, the only hope of permanent relief from such conditions is an enlightened public sentiment aroused by the press of the country, and instead of punishing the newspaper which makes a fight against such conditions it should be regarded as fulfilling a duty."

## TERRIBLE TRAGEDY ON A CALIFORNIA RANCH

Napa, Cal., Feb. 25.—A terrible tragedy was enacted at the ranch of Capt. J. J. Brice, near Oakville, and about 19 miles north of here, at an early hour this morning. A foreman named Wallace on the ranch hit an Italian dairyman over the head with an axe, causing a wound which proved fatal later. Wallace then cut his own wife's throat with a case knife, but she was not seriously injured. Using the same knife, he slashed his wife's throat from ear to ear. He then set fire to the house occupied by himself, wife and hired help, totally destroying it. Wallace was brought to the county infirmary here. He has a slight chance to recover. Jealousy is believed to be responsible for the series of crimes.

## ARRESTED FOR BANK ROBBERY.

Tulsa, Okla., Feb. 24.—Charles Wells, a bartender 32 years of age, was arrested yesterday at the instigation of the Pinkerton detective agency and taken to Portland last night by Deputy Sheriff Leonard of Portland. It was learned that Wells is suspected of complicity in the \$7,000 East Side bank robbery at Portland several months ago, though at first connected with the arrests refuse to talk of the arrests. While in custody at Portland, he was 23 weeks spending money freely.

## GETTING FUNDS UNDER FALSE PRETENSES

New York, Feb. 24.—J. M. Fuller, who was arrested here recently charged with obtaining funds under false pretenses for a "journalists' fund," was still held by the police today, having been remanded for 48 hours after being arraigned in the Jefferson police court yesterday afternoon. Fuller had in his possession photostatic copies of a letter purporting to have been written by President Roosevelt to the president of the International League of Press Clubs. The letters read as follows: "Sir.—Through you permit me to send my greetings to the journalists represented in your association. In particular, I wish you well in your movement and construction of the journalists' home. Renewing my good wishes for the success of your efforts, I am, therefore, yours, THEODORE ROOSEVELT."

## CHARGES BY GOV. KIBBY.

Phoenix, Ariz., Feb. 26.—The legislature in joint session yesterday listened in charge made by Gov. Kibby against J. C. Adams, a fair commissioner charged with obstructing handling in favor of his own horse, and Adams, in his own defense, afterwards a vote of censure was given Adams. A committee waited on the governor, asking him if he desired to appear in it. He had a message to send. He replied negatively.

## REPORTS ON STEEL MERGER

Two Will be Laid Before Senate Committee on Judiciary When It Meets Monday.

VERY MUCH WIRE-PULLING.

President's Action in Matter Cause of Decidedly Divergent Views As to Authority.

Washington, Feb. 25.—Two reports will be before the senate committee on Judiciary on Monday when it meets to vote on the investigation of the absorption of the Tennessee Coal & Iron company by the United States Steel corporation. Since the publication of the majority report of the sub-committee declaring the merger violated the Sherman law, and rebuking the president, the minority, Messrs. Clark of Wyoming and Dillingham have put their dissent in the form of a report. All day there was much wire-pulling in the senate preparatory to the vote. The minority contends the senate does not know upon the committee the duty to investigate or consider whether the absorption was a legal transaction.

It will be asserted that the direction to the judiciary committee is limited to an opinion as to the president's authority "to permit the absorption," as is shown by his message.

The minority finds that there were just three relevant and important things disclosed by the president's message. They are that the president told representatives of the steel corporation he could not advise them to take the action proposed, that he felt it no public duty of his to interpose any objection under the facts and circumstances detailed to him; and that the president assumes all responsibility for his action.

That the president acted under the facts as he then understood them is the opinion of the minority.

It is declared that any other construction of this resolution would be tantamount to asking the committee to judge the president's act, not in the light of the circumstances and facts surrounding him at the time of his action, but of those subsequently developed. In their opinion this would manifestly be unfair and unjust.

It is pointed out that he notified the attorney-general of the conversation he had had with Messrs. Gary and Frick, but before receiving the letter from the president the attorney-general advised him that the United States steel corporation had not been under the ban of the law, and that in his opinion the absorption of the Tennessee concern would not change the legal situation.

It is declared that this fact demonstrates that the president was acting entirely within the duties of his office.

## RADIA THOR EQUALS RADIUM

New Orleans, Feb. 25.—At last night's session of the Southern Homeopathic Medical association, Dr. E. H. Bailey of the Hahnemann medical college, Chicago, announced the discovery of radia thor, declared to have all the properties of radium without its harmful effects, and to be within the reach of people of moderate means. It was discovered as being made from certain species of pitch blende, of which 20 tons have been discovered near a Colorado mine, with much more in sight. Dr. Bailey declared it generates the purple ray, which he said is used successfully in the treatment of lupus.

Dr. Bailey said that only within the last week he has his experiments reached a stage where he feels justified in making public announcement of the discovery which he will soon do.

Chicago, Feb. 25.—Dr. F. H. Blackmar of Hahnemann Medical college, today gave out further details of the discovery of radia thor which was made public at New Orleans yesterday by Dr. E. H. Bailey, also of Hahnemann college.

"One of our most curious experiments with the new substance," said Dr. Blackmar, "was the taking of a photograph through a glass lid, on which some radia thor had been spread. The powerful rays of this element enabled the light to pass through the (iron plate, thus permitting a photograph of a number of pennies and other articles on the opposite side."

"Its basis is pitch blende, but with this element are mingled others whose names I don't care to discuss at this time."

"Some of them are so rare that we kept them in a safety deposit vault. The new element, while far from being expensive, will be within the reach of everybody who needs it. Its action is quite as efficacious as that of radium. There is not enough radium in the whole world to treat all the people who need its curative properties."

"The therapeutic value of our radia thor or the rad-X has been established beyond question in the 14 months that we have been using it for the treatment of disease. It never has failed to give

## Your New Spring SUIT

Is at 322 South Main.

We have just received from America's foremost manufacturer a full line of the season's latest creations in men's clothing, such as are shown only by the leading merchants of this country, and to introduce these suits we have decided to make the following specials for Saturday only:

\$35.00 Suits for \$16.45

Men's and Boys' Hats and Footwear.

1-2 PRICE Sale Starts at 9:30 Saturday.

It's Right Below Walker's

poor and in many cases it has cured. Some of the diseases on which it acts successfully are cancer, tuberculosis of the skin, ulcers, birthmarks and nervous afflictions. Its rays are as effective as those of radium, although it does not act so quickly. Its moderate action keeps it from being harmful, causing, as radium is likely to be when in the hands of unskilled persons. It has the same relative power as radium, that is, it seems to act only on diseased cells, leaving the healthy tissue unaffected. This power which has been described by Sir Frederick Trevelyan in a recent article nobody is able to explain."

## A HUNT FOR MILLIONS.

Chicago, Feb. 25.—Three million dollars in \$100 bills is hoarded in a vault in the powder of either the car barn building or Paul Stensland, the former Milwaukee avenue banker, according to Mr. and Mrs. Charles L. Salverson. Late last night they were digging their way through the treasure when they were seized by the police.

When taken to the station they said a spirit had guided them to the spot where the money lay. They were released and advised to wait until daybreak before continuing their search.

## TOO MANY ELECTRIC FLAT-IRONS IN FIRE

Chicago, Feb. 25.—Complaints that the installation of electric flat-irons has increased the cost, not only of the current they use, but of all other electricity consumed, have been made to a local electric lighting company and to city officials. It is said that these irons have been supplied to between 10,000 and 15,000 consumers, and that the cost of the current for the irons, but the moment the current was turned on it cost the consumer an average of 50 cents, even if the iron was not used again.

The flat-iron has the same effect as increasing the number of lamps in a house of six or seven, and if used at the same time the lamps are burning, increases what is known as the "primary charge" for the use of electricity. The use of the flat-iron, together with lamps, at any time during each month, causes a higher maximum charge and necessitates a correspondingly increased payment at the full rate.

An official of the company declares that with proper use, there is no ground for complaint. "The flat-irons are usually used in the day time, when the lights in the house are not burning," he said, "if they are so used the maximum cannot be reached. It is a very simple matter and entirely within the control of the consumer."

## NEGROES ROB CHINAMAN.

Chicago, Feb. 25.—San Kee may die as the result of injuries inflicted by two negroes who invaded his laundry, beat him into unconsciousness and tried to cash a check for \$45. They overlooked \$182 which Kee had hidden under newspapers and \$180 under a counter among bundles.

## CAPT. MCLEAN

Capt. W. H. McLean of the big ocean steamship City of Sydney from San Francisco and Panama makes this important statement:

In December, 1904, I was in the last stages of Bright's Disease. San Francisco physician told me that there was no show for me. The dropsy was so deep that I could stick a finger in the flesh almost an inch. J. W. Burnham, President Burnham & Marsh Co., told me he knew several cases of Bright's Disease that had recovered under Fulton's Renal Compound. My old friend Donlon of Donlon & Peck told me the same thing—said he knew of worse cases than mine that got well. This started me. The first half-dozen started the change, and I am at this writing (ten months later) as well as ever, and can pass for life insurance. I have told passengers from all over the world of my recovery. This treatment ought to be known all over the globe.

CAPT. W. H. MCLEAN, Pacific Mail Dock, San Francisco, Bright's Disease and Diabetes are curable in 87 per cent of all cases by Fulton's Compound. Send for literature—F. Hill Drug Co.

When to suspect Bright's Disease—weakness or loss of weight; dropsy; puffiness ankles, hands or eyelids; kidney trouble after the third month; urine may show sediment; falling vision; drowsiness; one or more of these.

## WOMAN'S NIGHTMARE

No woman can be happy without children; it is her nature to love them as much so as it is the beautiful and pure. The ordeal through which the expectant mother must pass is so full of dread that the thought fills her with apprehension. There is no necessity for the reproduction of life to be either very painful or dangerous. The use of Mother's Friend prepares the system for the coming event, and it is passed without any danger. This remedy is applied externally, and has carried thousands of women through the crisis with but little suffering.

## MOTHER'S FRIEND

Book containing information of value to all expectant mothers mailed free.

BRADFIELD REGULATOR CO. Atlanta, Ga.

Ever stop to think that you have to wash dishes 3 times a day, 1095 times a year?

If you could save one-half the time devoted daily to dish-washing, we figure it would amount to about 15 days in a whole year. Rather startling, isn't it?

Sift a teaspoonful of GOLD DUST in a dishpan full of hot water, and it will wash your dishes in just half the time taken by the ordinary soap method.

Better still, it will give you cleaner, sweeter dishes—dishes that are not only clean on the surface, but that are sterilized and sanitarily safe.

The reason is that GOLD DUST is a positive antiseptic vegetable oil soap in powdered form; it goes deep into hidden places and routs every germ. It instantly dissolves in hot or cold, hard or soft water, and does all the hard part of the task without your assistance.

Does not hurt the hands
