If the powers fail to retion of claims. It is to consist of a president, who shall be an imperial prince, and of two min-isters, one being the president of a board, and the other a member of the grand council, with direct access to the emperor. thur for Information.

Credited on Evans & Co's Books with \$1,000-Col. Woodruff Severely Reprimands Captain Read.

Washington, April 16.-Secy. Root today cabled Gen. MacArthur asking for additional information concerning the reports of frauds in Manila. It is expected that a reply will be received tomorrow. While definite instructions have not been given Gen. MacArthur heretofore to make a searching and complete investigation, it is understood that the requests for information were of a character to imply that the department expected such an investigation would be made. Nothing definite has been received from Gen. MacArthur about the alleged frauds, although ref-erence has been made to the investi-

gation in cablegrams received. The first dispatch on the subject from Gen. MacArthur said that there had been exaggeration in the press reports, but the persistence with which the re-ports have been reiterated and the news dispatches today giving names and specific amounts have indicated to the department officials that perhaps Gen. MacArthur was not advised fully when he made his first report. It can be stated that the department intends o have all the information possible he subject and Gen. MacArthur will be

Read to be thoroughly honest.

JAPAN'S FINANCIAL CONDITION. Consul General Bellows Says it is Far

from Encouraging. Washington, April 16 .-- The financial

condition of Japan at present is far from encouraging, and the bankers, statesmen and business men are exerting every effort to avert a pending panic. This statement is conveyed to the state department in a communica-tion from United States Consul-Gen-eral Bellows at Yokohama.

The situation, as analyzed by the shrewdest financiers and statesmen of the empire, show that the Chinese in demnity secured at the close of the Japanese-China war, together with large national loans, led to the exploiting of many public and private under-takings, which caused money to be unusually plentiful among the coolle or laboring classes. THERE are two values to every purchase what it costs and what it pavs you. Cork costs 8 cents a pound, but if you are drowning half a mile from shore, its value would be "not what you pay for cork, but what cork saves you." WOMAN

IS LIKE A DELICATE MUSICAL INSTRUMENT

In good condition she is sweet and lovable, and sings life's song on a joyful harmonious string. Out of order or unstrung, there is discordance and unhappiness. Just as there is one key note to all music so there is one key note to health. A woman might as well try to fly without wings as to feel well and look well while the organs that make her a woman are weak or diseased. She must be healthy inside or she can't be healthy outside. There are thousands of women suffering silently all over the country. Mistaken modesty urges their silence. While there is nothing more admirable than a modest woman, health is of the first importance. Every other consideration should give way before it. Bradfield's Female Regulator is a medicine for
