STRANGE STORY.

Our readers have been apprised that
the heirs of Alexander Humphrey
Alexander have revived their claim of
proprietary rights to the Canadian fish-
eries. The history of this claim, as we
find it elaborately given by the New
York Times, is rather curious. The
basis of the claim is a grant made by
James I., of England, to Sir William
Alexander, of Menstrie, first Earl of
Stirling. King James was very desir-
ous of colonizing Canada, especially
the shores of the Gulf of St. Lawrence.
Into this scheme Sir William Alexander
warmly entered, and for his advocacy
of it he was created Earl of Stirling,
with succession to his heirs male. He
was also given by Royal letters patent
a large tract of land, embracing the
whole of Nova Scotia and a large por-
tion of Canada East. This grant cov-
ered the most important mackerel fish-
eries. The vice royalty of these immense
possessions—which carried with it the
right to create baronets of Nova Scotia
all persons who should purchase 16,000
acres of land in the colony—was like-
wise made hereditary in the family of
Sir William. The Second Earl of Stir-
ling, becoming peculiarly involved,
sold this Canadian grant to a French
colonist. By the treaty of 1632, the
British colonies in Canada were ceded
to France, and were, in 1713, restored
to England by the Treaty of Utrecht. In
neither of these treaties is there any re-
cognition of the claims of the Earl of
Stirling. With the Eighth Earl, by
reason of the failure of male heirs, the
Earldom became extinct. In 1824
Alexander Humphrey, on the ground
that he had a maternal grandfather
of that name, was permitted by
royal decree to assume the sur-
name of Alexander. He represented a
female descendant, while the Earldom
and possessions of Stirling were con-
fined by the original grant to the male
heirs. This difficulty was overcome
by the production of a document pur-
porting to be a charter from Charles I.,
confirming the first charter, and includ-
ing female heirs in its privileges. After
a lengthy legal investigation this
charter was pronounced a forgery. Fail-
ing to establish his claim to the Ear-
ldom and estates of Stirling in the Scot-
tish Courts, Mr. Alexander came to
this country, and in 1853 offered to sell
his Canadian claim to the United
States, and some negotiations were
actually held but nothing came of them.
The trial for forgery is reported in the
Modern State Trials; it is very evident
that Mr. Alexander had full faith in
his claim, and in the genuineness of the
documents offered in support of it. He
was the instrument of some designing
persons, who used him for the further-
ance of purposes of their own.
That the Canadian possessions were
sold by the second Earl of Stirling has
been clearly established. In the origi-
nal patent, the succession was confined
to the heirs male, and authentic evi-
dence of its extension to the heirs female,
by Charles I., is wholly wanting. Into
this story the *Times* introduces a French
female fortune-teller, who furnished
Alexander with the forged charter, but
we have not space to give it entire.
That journal adds in conclusion: "Un-
less the heirs of Mr. Alexander have
obtained better evidence than that
which their father possessed, they will
be unable to establish their rights to
the Canadian fisheries."

HOMER, the Spiritualist, who has made
so much money and so many dupes in
England, has been to St. Petersburg.
He went with the design of humbug-
ging the Russians as badly as he had the
English, but he failed most completely.
The scientific men of St. Petersburg
were after him with a sharp stick, and
they insisted upon investigating pro-
ceedings at his seances. He consented
to this provided they would comply
with certain conditions. They agreed
to this, because, as they informed him,
they did not regard him as a very skill-
ful conjuror. At his first trial a com-
mittee, appointed to investigate, kept a
sharp lookout and Home failed to pro-
duce his usual manifestations. A second
appointment was made, but when the
time came round Home was absent,
pleading indisposition as the cause.
Another night was appointed, but again
the great medium could not attend be-
cause of sickness. He subsequently
stated that he could not give any more
seances in St. Petersburg because, un-
der the influence of the weather he felt
a great diminution of his spiritualistic
powers. Home left the next day for
London. The Russian scientists deserve
a conspicuous niche in the temple of
philosophy and common sense for com-
pelling Home to go home and acknow-
ledge himself beaten.
