It is made of copper and was put into the cellar under Heidelberr castle in 1763 by the Elector Charles Philip. When it was completed, twenty-four persons held a banquet in it. Until 1769 it was constantly kept full of Rhine whie, but the custom was abandoned in that year, and it has since been preserved as an object of interest and has been exhibited to the vast number of tourists who have made the pligrimage to the noted castle.
