Will Yet Lead the World in Educational Matters - Other Notes Of Interest.

Special Correspondence.

Provo, Utah Co., May 29 .- A large audience assembled in the Tabernacle yesterday forenoon at the commencement exercises of the Brigham Young academy. The large number of graduates and students marched from the academy to the tabernacle to the strains of the academy band after the opening devotional exercises. President B. Cluff Jr. presented his annual report of which the rollowing is a brief synopsis:

PRESIDENT'S REPORT:

The enrollment of the Brigham Young academy for the twenty-seventh aca-demic year, including the Beaver branch, has been 1622, divided among the several schools as follows: Kinder-enter 55 encourteen code 256 mis garten 75, preparatory school 259, mis-sionary school 142, High school 119, Normal school 433, Training school 157, Commercial school 192, Music school 349, College 37, Beaver Branch 233. Less those counted twice (374), makes the total 1.622. The enrollment last year was 1,475, showing an increase this year over last of 147. The teaching force numbers 59.

During the year the school has been called upon to mourn the loss of two teachers, Brother Stanley Partridge and Sister Mary Woodruff, and two students, William Jensen of Mapleton and Roy Willis of Mammoth.

The needs of a new building for the preparatory and missionary schools are more imperative than ever, but it is pleasing to note the quick response of the different stakes that have been asked for assistance, and the Alumni association at its business meeting on the 27th inst. unanimously decided that the association would co-operate with these stakes and raise in the near future the needed \$3,000 for the \$18,000building.

The reports of the different teachers presiding over the different "Domestic Stakes" showed that the moral status of the school has been of a very satisfactory nature.

President Cluff also acknowledged, in behalf of the board, gifts of libraries, one on economics and sociology by the commercial class, and one on American antiquities by the graduating class of

At the close of the president's address, Dr. Brimhall entered the building from the rear and was enthusias tically applauded. A gelection was rendered by the Academy band. Dr. J. M. Tanner was introduced as the comencement orator. He expressed

He showed that this objection was not of much force, and as an illustration cit-ed the case of Dr. Widtsoe of the Ag-ricultural college, whose treatise on lucern had been acknowledged by Aus-tralia and Canada to be of untold value to those countries, and he knew more of the soils of Utah than any man in the state.

Dr. Tanner announced that the Church board of education had had un-der consideration the establishment of an educational fund, to be used for the education abroad of students who were not able to do so without assistance It had been suggested that the teachers of the Church schools would con-tribute one-half of one per cent of their salaries to that fund, and contributions would be made by the Church.

Special Correspondence. Eureka, Juab Co., May 25 .- During the past week several cases of diphthe-ria have been discovered in the camps of Robinson and Mammoth, which had been hid from the quarantine officers, and it is feared innocent people have been exposed to the disease. The offi-cers are doing their utmost to stamp out the disease, and several families have been quarantined.

reservation to her; she never breaks a confidence, and her advice is the best in the world.

The questions asked of a woman by a male physician are embarrassing, and often revolting to a sensitive nature. In consequence the whole truth is not told; this makes it difficult for female troubles to be successfully treated even by the best physicians, and is the reason so many women grow worse rather than better. A woman understands a woman better than a man, there are symptoms which sick women have that a man cannot understand, simply because he is a man, but the whole truth may be told to Mrs. Pinkham, and her vast experience enables her to give advice which leads to a cure.

All women who suffer should secure Mrs. Pinkham's advice; it costs nothing but a letter addressed to her at Lynn, Mass. Female troubles are real troubles, and must be treated understandingly. For a quarter of a century Mrs. Pinkham's advice and Lydia E. Pinkham's Vegetable Compound have been helping women to get strong and well, and her great file of letters prove that more than a million women have been restored to health and strength by her advice and her medicine when all other means have failed.
