MINING, BUSINESS AND STOCKS

FORENOON SALES REACHED \$23,195.45

Heavy Transfers of Daly-Judge During this Morning's Call of The Mining Exchange.

DALY-WEST WANTED ALSO.

The Value of Stocks Averaged Close To \$5 Per Share-The Closing Quotations and Sales.

Heavy transfers of Daly-Judge, and a good sized bunch of Daly-West, on the Mining Exchange this foren on swelled the totals to quite large proportions, the average being brought close to \$5 per share. Altogether, 5,475 shares exchanged hands, for which was paid the sum of \$23,195.45.

That Daly-Judge is considered a good buy at present prices was evidenced by the demand for it this morning. While one broker had a seiling order to execute, 1,400 shares were unloaded with out any serious break in the price. The first sale was made at \$11.25 and the stock was offered at \$11.10 at the close Daly-West was started off at \$37.55, followed by a decline of 25 cents a share. Butler-Liberal tallied at 14% cents Lower Mammoth strengthened to 49 A small lot of New York Bonanza was offered at 19 cents and taken. The marketing of several cars of good Tetro ore today had no visible effect on Tetro, the price being practicalunchanged.

The clesing quotations and sales were posted as follows: TODAY'S QUOTATIONS.

DALY-WEST ZINC PLANT. Supt. Sherman Bas a Force of Men Grading for New Structure.

Supt. Sherman is taking advantage of this fine weather by pushing the grading for the new zine plant at the Daly-West with all possible speed, and a splendid showing is being made, Mr. Sherman is loath to make predictions as to when the new plant will be in operation, as delay in receiving ma-chinery is so likely to occur, but hopes at any rate to have things moving by b. 1. The new plant is to be fitted with a refining process upon which up with a refining process upon which Mr. Sherman has very recently secured a patent, and which has been tried by him with very satisfactory results.

The Daly-Judge mill is running on 200 the Daly-Judge milling one daily, also

ons of first-class milling ore daily, al-though it is not yet working to its full sapacity. Several improvements are being made at the mill, among them the installing of automatic stokers and a large blower to furnish a continuous

T. Mixer, superintendent of the Creole, went across the mountains Thursday afternoon to have another ook att the Columbus Consolidated be-fore the snow blockades the trails, Several of his eastern friends are in-erested in the property, and he is hap-by to state that he is sending them a nore glowing account than ever new strike of steel galena that; was nade just a month ago has already grought the company \$15,000, and they have scarcely begun to develop it yet. This is probably the richest of the nany chutes of ore they have encounered and assures the Columbus of beng a great mine. The water powoming a great mine. The water pow-r plant that will develop 600-horse-ower should be completed early in he coming year, when they can push levelopments to make ready for a large nill to be erected next season. Mr. dixer reports good progress being nade in the Creole cross-cuts, which are now out considerably over 100 feet rom the shaft. A little water has been rom the shaft. A little water has been necountered in the northwest crosscut, he southeast crosscut has lately been arrying material that closely resembles the carbonate ores and looks very healthy. The lessee shipped another carload of ore this week.—Record.

THE MAJESTIC SMELTER. A Broken Elevator Cable Causes Another Shut Down at Milford.

Shut-Down at Milford.

Acting General Manager Kinnon, of the Majestic mines at Milford, was in the city yesterday conferring with local officials of the corporation. Another accident occurred on Friday evening which necessitated the closing down of the smelter until today, but it is expected that the fires will be burning again tonight. The elevator transmission cable broke, shutting off the ore and fuel from the feeding floor. The cable was spliced, but this proved

the ore and fuel from the feeding noor. The cable was spliced, but this proved unsatisfactory and a new and stronger rope was ordered.

The Milford Times, in speaking of the work of the new smelter says:

"The Majestic smelter has been in steady operation since last Saturday steady operation since last Saturday and Manager Kinnon reports that its work has been as satisfactory as could be expected, under existing conditions be expected, under existing conditions. It has been run at about half capacity, from 120 to 150 tons daily, and up to last night had produced 45 tons of matte, two cars having been shipped to Sail Lake. This matte has been of very high grade, much higher the. high grade, much higher than Mr. Kin-non desired, running at times up to 60 per cent cupper. From 35 to 40 per cent the best grade for the market, and ir. Kinnon is adjusting the furnace work with a view to bringing about this result. As soon as the ore handlers and other green employes become thoroughly familiar with their work, the hotblast will be turned on and the furnace speeded up to its capacity of 250 tons daily tons daily

tons daily.

"Besides the high percentage of copper mentioned above, the matter contains very good values in gold and silver. The result shows the ore is of a profitable grade, and that the operation of the plant will yield the company

WHY SILVER ADVANCED. An Aspen Man Says it Was Due Entirely

To Government Parchases. Mr. Ed F. Browne of Aspen, says the Mining Reporter, reviews Mr. Guggen-heim's recent interview on the present movement and price of silver. Mr. Browne attributes the recent rise en-tirely to our tirely to our government's authorized purchases of sliver for Philippine coinpurchases of sliver for Philippine coinage and vigorously combats the idea that the monetary commission and the American Smelting and Refining company have had any part in the matter. He refers to the absence of a surplus of sliver builion in the United States and Mexico, and thinks if our government shall continue to purchase sliver either for Philippine or domestic coinage in sufficient amount to use up the age in sufficient amount to use up the output of our mines that silver's price will advance to 75 cents or even \$1 with-

Montanans Should be Careful.

Commenting on the Montana Copper Mr. Heinze has a right to do business in Montana. He is not obliged to sell out to an opponent. He is not compelled to abstain from battling for his poed to abstain from battling for his political rights. He is at liberty to prosecute his rights as he sees them in the courts. It is not his legar fault if the courts decide in his favor. If the courts are biased the remedy lies with the people who elect judges. But it will require time to reform the courts if they need reforming, and meanwhile is there need of providing distress and starvation as an object lesson regarding the laws and the judiciary? If Mr. Heinze was to be dethroned as a political leader and Amalagmated influences permitted to make the laws and name permitted to make the laws and name the Judges, is it assured that the ad-ministration of justice would be clean-er than it now is? Montana people have need to think long and deeply lest the backfires which they may prove more destructive than the fire they seek to extinguish.

MAY DAY DIRECTORS.

President Cunningham and Messrs Darmer and Campbell Inspecting Mine. The May Day mine in Tintic is now managed by the board of directors of that company. President James A. Cunningham and Directors J. E. Darmer and John Campbell are now conducting an examination of the property with a view of mapping out a cam-

paign for the future.
It has been learned that some radical changes are about to be inaugurated in the conduct of the affairs of the company. The figging plant is in operation still and the superintendent has reported that it has lately been giving very good results.

THE BEAVER CONSOLIDATED. Cross-cut from 500 Level Penetrates

Some Interesting Territory. Supt. Harvey D. Trenam of the Beaver Consolidated mine of Beaver county arrived from the southern camp this morning and will return again this evening with General Manager Trenam. Cross-cutting is now in progress from the 500-foot station and the latter has penetrated some interest-ing territory and developments of the

STRIKE WILL NOT INTERFERE With Operation of United States Smelters In Colorado.

lext few days may bring about

radical changes.

General Manager D. C. Jackling of the Utah Copper company, who is also associated with the United States Reduction & Refining company, operating in Colorado, when asked today if the strike of coal miners in the Centennial state would zeriously hamper the operation of the plants there, re-

plied that it would not. The company has a supply of fuel on hand to last for a period of six months. Of course, he said, if the difficulty is not settled by that time and the mines not running the consequences might be more serious.

UTAH CON. CONTRACTS.

Five Hundred Tons of Steel to be Used In Additional Buildings.

Manager R. H. Channing, of Utah Consolidated, may award the con tract during the afternoon for the structural steel for the additional smelter buildings to be erected at the company's plant near Murray. Alto-gether it will require at least 500 tons of steel. With the signing of this one the principal contracts will be out of the way. Last Saturday two of the important ones were disposed of. The Norberg Manufacturing company cap-tured the contract to furnish an 450 horse power tandem compound engine and the Westinghouse Electric com-pany the 250 K. W. direct current elec-

tric generator The excavations for the new plant will be dug soon, but it will be several months before the smelter is ready for operation

HIGH GRADE ORE IN THE STOCKTON

An Important Discovery Has Been Made on the Six Hundred-Foot Level of This Mine.

DEVELOPMENTS SATISFACTORY

To Manager J. J. Trenam, Who Has Re turned from a Business Trip East -Plenty of Milling Ore.

Manager J. J. Trenam of the Stockton mine at Stockton, and the Beaver Consolidated, of Beaver county, has returned from a business trip east which asted for a period of several weeks.

Last Friday Mr. Trenam visited the former and expressed himself today as being very well satisfied with the progress made with developments during his absence.

The shaft, when he left for the east, was at a depth of 600 feet; it is now down 680 feet and will be continued to the 700 where a double station will e established and cross-cuts run to the east and west, as has been done and is being done on upper levels. On the 600, west from the shaft, Mr. On the 600, west from the shaft, Mr. Trenam states that one of the finest chutes of ore ever opened in the mine has been encountered. It is of an excellent quality. The extent of this chute has not been fully determined, but it is undoubtedly very large and seems to be entirely independent of any of the channels previously evalured and but it is undoubtedly very large and seems to be entirely independent of any of the channels previously explored and is apparently made by a blind fissure which is just beginning to show on the 500. So far, the chute avareges about 8 feet in thickness, while a cross-cut shows it to be as much as 2 feet in places. The quality of the ore is improving with development; the chute has been followed for a distance of about 20 feet. Twenty tons of the higher grade product has been taken out for shipment to the valley smelters. Manager Trenam explained that the chute opened on the 200, 300, 400 and 500 levels lies further to the west and work is being pushed ahead with one machine drill with the idea of tapping it also on the 600 level. Developments on the 500 on this chute shows a vast improvement over the upper levels and the belief is expressed that when it is again encountered on the 600 a furge body of high grade ore will make its appearance.

shaft down to its present depth

The shaft down to its present depth shows no indication of water and with the completion of the Honerine drain tunnel none is expected.

Some vast bodies of milling ore have been blocked out in the Stockton mine and as seen as facilifies for treatment are available the property will soon respond in a manner which will please the stockholders.

CONCENTRATES.

The Minnie Healy mine at Halley,

Frank H. Lathrap has arrived in Tonopah and expects to remain there indefinitely,

Manager A. E. Hyde, Jr., of the Annie Laurie mines, at Gold Mountain, re-turned to camp this morning.

at Park City has cone to Oregon to ex-amine a property for Nebraska par-

Supt. C. T. Mixer of the Creole mine

F. H. Buhl, P. I. Kimberly and Walter G. Filer are at Twin Falls, Ida., looking over the big irrigation enterprise there.

Zeb Kendell, a prominent Tononah mining man, who has been in the city for a couple of weeks, has returned to the Nevada camp. The arrival of 13 cars of ores and

one of matte were reported at the T. & B. samplers this foreneon. State Senator A. B. Lewis is expected to arrive from the east this after-

President R. D. Evans, managing Director A. F. Holden and John Hays Hammond spent last night at the Cen-tennial-Eureka mine in Tintic.

Manager Tony Jacobson, of the Co-Consolidathed, expects to visit that Alta property temorrow.

The Tetro mine reported at the samplers today with three cars of ore, two high grade and one low grade.

The Wheeler & Wilson mine of Big Cottonwood canyou reported in the lo-cal market with a car of lead ores to-George H. Robinson, manager of the

Tintic company's mines in this state, went to Butte Saturday night to con-sult with Heinze, the Montana copper magnate. Park City ore shipments last week, Park City ore snipments last week, which were reported through the Mackintosk sampler, amounted to 4,519,040 pounds as follows: Daly-West, 2,389,000; Creole, 32,900; Silker Kink, 2,098,040.

Arthur E. Gibson of Sunnyside is reported to have sold his interest group of uranium claims in Grand county. The purchaser and the price named in the transaction were not ob-

The forwarding of ores from he Yam-ea mine at Bingham to the Bingham Con. smelter, under its new contract with the latter will commerce this week. The output is to be increased week. The output to 200 tons per day.

Simon Guggenheim, who was in the city last Saturday, continued eastward in the evening and was accompanied by Manager C. W. Whitiey of the American Smelting & Refining company. The latter returned to the city this morning.

Announcement has been made by the Announcement has been made by the executive officials of the United States Mining company of the appointment of Clarence E. Allen as general superintendent of all the mines of that correction. poration. Heretofore his authority has been confined only to the Centennial-Eureka in Tintic, but it now covers the Birgham Property the Bingham properties as well.

A great number of improvements are going on at the Johnny, among which is a new process for the treatment of the slimes. A crew of the men were the silmes. A crew of the men were put to work last Wednesday grading a new road to the mill from the main road near W. J. Dooley's house, thereby securing a moderate grade and a shorter pull for the wood haulers, etc.—Stateline Oracle.

After the first of the year Messrs.
Stinson and Peak will commence work on the Sidewinder property. The work on the Sidewinder property. The work nedium, 15017; fine, 15016.

off last summer, assays averaging \$55 to the ton in gold were taken from. These assays were taken from rock that did not show free gold, as does most of the ore on that bonanza, as the gentlemen wished to determine the value of the poorer grade of ore.—Stateline Oracle.

A telephone from Salt Lake yesterday brought the news that the Messrs. H.
J. Hoyt of Muskegon, Mich., and F.
M. Cook of Chicago, and the syndicate
of Eastern capitalists that these gentlemen represent had concluded to take up the option upon the Red Elephant group of mines near Bullion. A watchman took charge of the property today in their behalf, and preparations will be under way in a couple of days to begin operations upon an extended scale. Halley Times.

An important deal was consummated his week whereby C. E. Peak of Milthis week whereby C. E. Peak of Milford comes into possession of the Free Coinage group of claims lying between the Johnny and the Margaret, Mr. Peak buying it from George Rice and the Hedges brothers. Consideration unknown. This property, upon development, will no doubt prove to be one of the most valuable propositions in the district, since the Margaret vein extends through these three claims. On this property there is about 30e feet of extends through these three claims. On this property there is about 300 feet of work done in shafts and cross-cuts. Mr. Peak has put men to work sinking in the old shaft on the ledge. That shaft is now down 75 or 80 feet.—Stateline Orgale.

LOOKS LIKE A DULL WEEK IN STOCKS.

When Market Opened the Tone Was Hesitating and Very Irregular.

U. S. STOCKS WERE DEALT IN.

Common Reached Saturday's Low Level -Small Losses Were General Throughout the List.

ening stock market today was hesitating and irregular and the small volume o dealings indicated different views on the part of traders. A short and spirited selling movement in the United States Steel stocks forced the common down to a parity with last week's low level, while the preferred yielded 1% Small losses wer general throughput with the railroad stocks showing little resistance. Simultaneous bidding for the local traction stocks strengthened the market and the standard stocks recovered to Saturday's closing prices or above. Metropolitan Street Kallway advanced 2%. Brooklyn Transit 19%, and Manhattan 11%. United States Steel preferred recovered nearly all of its loss, but the common hung back. The purchasing movement ceased abrupily when the braders attempted to take profits in the local stocks. Justiess fell off immediately to nominal proportions, but there were no price changes cutside of United States Steel stocks which declined again to the low level of the morning. Renewed currency shipments to the interior influenced some offerings for the above list.

Honda were irregular at noon. Speculative Interest was focussed on United States Steel and the steady decline in the preferred to 51%, a new low record, checked conflict buying of the general market. Prices shaded off all around Colorado Fuel fell a point, American Express sanged 3, and Brooklyn Union Gas dropped 2%. A large fractional rally in United States Steel preferred afforded a standard stocks recovered to Saturday's

dropped %. A large fractional rally is United States Steel preferred afforded . new basis for fresh selling until it toucher sits. The common stock was rather quie and seemed to meet support at 10½ The general market was devoid of feature.

"Take Care of the Dimes

And the Dollars will care for themselves." aptly illustrates the necessity of attending carefully to the small things of life.

A want ad. for instance is a small thing, but it may supply some big need. It will pay you to read the want ad. column as closely as you do any others.

Hear That Knocking?

That's

Mr. Opportunity. He knocks through the Want Columns of today's paper. Don't neglect his call.
