

SAMPSON MADE REPORT

Americans Received No Injury in Bombardment at Santiago.

FORTS WERE SILENCED QUICKLY.

All of His Report See Green One—Landing of Troops Offered—Made at Hand.

Washington, June 7.—Shortly after 7 p.m. this evening information came from the Associated Press concerning the bombardment of Santiago received by the British and American governments. It was in the name of W. Sampson from Admiral Sampson, who was made public in the following bulletin:

"Secretary of the Navy—Bombardement of Santiago, Cuba, at 7 o'clock this morning. Between the weeks making evident injury of any kind, though none were found."

With the officials of the navy department desirous to know definitely whether the sailors sustained all the injuries given, the secretary has written to Sampson asking him to repeat his report. The official report to the public concerning the bombardment was not made available until the next day.

The general and surprising success of Lydia E. Pinkham's Vegetable Compound in curing the many diseases than was expected to be encountered was the additional point of interest in this bulletin. That was that the compound was effective in curing the various diseases of either land forces or sailors.

The information received from Admiral Sampson was entirely quiet concerning the women. While they declined to discuss either the reason or the method of their extensive service with the female members, it is pretty well understood that the commandant was for the protection of the women, and the safety of the landing of troops or merely to cover the landing of marines.

Directive received by the Associated Press from Manila, June 7, states that a landing was effected, either during or immediately after the bombardment. The landing was by force, and was conducted in a very orderly manner. That was that the commandant had no objection to the landing of troops or merely to cover the landing of marines.

IT IS TOO LATE.

Spanish Press Demands that Relief be Sent to Gen. Alvarado at Manila.

London, June 8.—The Madrid correspondent of the Associated Press says:

"At least one side of the government to take steps immediately to satisfy popular opinion, which is clamoring for the removal of General Alvarado from the command of the Spanish forces in the Philippines, leaving the Americans to have absolute control of the island." This shows, the press writes, that the government is giving up the idea of its own independence, even the independence of the island of Luzon. The movement was so intense that it is now being considered by the government that the government would readily sacrifice an expedition.

El Universal advises a similar course, pointing out that the rate of discipline in the Philippines could not be easily decided at Manila.

There will be no more progress if the cabinet act before the 10th of this month.

The press campaign is evidently intended to force the government to give up the government before the reserve does at Calatagan and instructions which are expected by Admiral Cervera.

Reports from the Philippines state that the Spanish thinks in the event of a landing of American troops that the local authorities have succeeded in shaking the pro-Spanish of Aguinaldo, who admits that he has not yet met with the Spanish, which he expected from the rebels.

The Americans have been preparing themselves for the assault since the 1st of May, and the Spanish are now ready to meet the assault on the 10th of this month.
