

Tuesday, May 29, 1933.

FLOATING FRAGMENTS.

Mr. Scanlon in "Friend and Foe" at the Theatre to-night.

To-morrow being Decoration Day, the News will not issue again until Thursday.

There are messages at the Western Union Telegraph Office for Mrs. E. L. Webb, R. Cooper and a cable for Coda.

The regular weekly meeting of the City Council will be held this evening.

The regular monthly Priesthood meeting of this Stake will convene at the Assembly Hall at 11 o'clock next Saturday.

The Seventies of the Fourteenth Ward temporary organization will hold their regular monthly meeting in the Ward Assembly Rooms on Thursday evening, 31st inst., at 7 o'clock.

LOCAL AND OTHER MATTERS.

Home Mission.—The Home Missionaries of this Stake will meet in the Council House on Wednesday, the 30th inst., at 7:30 p.m.

WILLIAM W. TAYLOR,
Clerk of the Stake.

Funeral Services.—The funeral services over the remains of Brother John Larsen were conducted at the First Ward school house yesterday. The speakers were Elders C. A. Christensen, Andrew Jensen, Lorenzo D. Young, Joseph Booth and Bishop Warburton. The deceased was very highly esteemed, as an upright man and diligent and consistent member of Church.

Criminal Recklessness.—Last Sunday a boy took a rifle with him upon the beach east of the city. He fired a shot at a shanty at Simpson's beach, the bullet passing through the shanty structure. It also caused within a few inches of passing into or through an old man who was in the shanty, being there to attend to the rifle. That reckless act came near taking a human life by his inexcusable carelessness.

Shooting Sheep.—Last evening, immediately beyond the Sixth Ward bridge, a number of sheep, either belonging to or herded by J. B. Leveridge, entered the premises of J. W. Cochrane and commenced eating up his lucern, which so incensed him that he brought out his shot-gun and fired a charge of duck-shot into the browsers. Leveridge has entered complaint against him before Justice Spiers, for maiming and wounding the sheep.

A Narrow Escape.—Shortly before 1 o'clock, to-day, Bishop H. B. Clawson's horse was tied to a lamp-post in front of the Theatre. The blanket blew from the cart on to the animal's back, frightening him and causing him to run around the post, upsetting the vehicle. Bro. Clawson went out, and while he was trying to unhitch the horse it gave another turn around the post, knocking him down, and for a moment the cart, Bishop and horse were all mixed up. The animal kicked vigorously, but fortunately Brother Clawson escaped unhurt, with the exception of a few scratches.

Sunday School Festival.—As was anticipated, there was a crowded house last evening to witness the entertainment given by the members of the 21st Ward Sabbath School. It was rendered in a creditable style by the little ones. There were about 100 children on the stand, which was fitted up for the occasion, and presented an attractive spectacle.

The entertainment will be repeated on Monday evening next, the proceeds to be devoted for the new addition to the Meeting House, when a slight change in the programme will be made.

Fire at Snow Flats.—A correspondent of Snow Flats, Apache County, Arizona, informs that, on 23d instant, the residence of Brother W. D. Kanchner, postmaster of the settlement, was destroyed by fire. The flames caught from a stove in the kitchen, and were conducted to a couple of cans of coal oil. The burning liquid soon spread, enveloped the premises, which, with their contents, were consumed. Fortunately there was a space between the burning house and the post office, the latter being saved by the application of water, which was obtained from the town ditch, located a distance of 200 yards from the scene of the fire.

U. C. Shops.—A large amount of work is being done at the machine shops of the U. C. R. R. The largest lathe in Utah has just been procured. It is designed for turning wheels, axles, etc., up to a diameter of forty inches. The bed for this piece of machinery was cast at the U. C. foundry on Saturday. It is 18 feet long, 1 foot 7 inches high, 2 feet 3 inches wide and weighs 5,000 pounds.

The round-house has compartments for 18 locomotives and it is anticipated there will be an enlargement to accommodate 5 more in the near future. Part of the round-house is now occupied as a boiler shop.

The New Grounds.—Take a look at Washington Square and see what is being done there. Examine the improvements, costing upwards of one thousand dollars. Inspect the gold and silver medals in Switzer's window. Remember that three clubs will be out in uniform at 12:25 to-morrow; that the baseball team are well-matched and will play a close game. That the bicycle races are for valuable prizes and will be contested for upon the new track by riders, some of whom have never before competed; that you secure your tickets and go down and enjoy yourselves, inhaling the fresh mountain breezes and observing the young athletes in their trim sports on the diamond and the race track.

IRON.

SENSELESS VIEWS ON A GREAT INDUSTRY.

Has not the time arrived when the people of Utah should take hold with a will of the manufacture of iron? Nature has placed within her borders large bodies of the very best iron ore in close proximity to immense deposits of fuel, out of which iron has been successfully made. With railroad needs that are likely to be a great demand for iron and steel of every description, with the necessity for creating home industries, there was many a laborer for our young men and the people coming into our country, and also fought for these iron roads, should not the freight we export be of that class that we can create in greatest quantities, yielding the best profits from the raw material, and from what can we reasonably expect such grand results as from the raw material we have in our mountains of iron and coal.

Our neighbors of Colorado have established large iron works at Pueblo, which have by the use of their ores over 100 miles) and are doing a successful business, employing some 500 men and a number of boys under 16 years of age, doing so well that they are increasing the number of their furnaces. Others are moving towards establishing large works at Gunnison City, Col., and preliminary steps were taken, according to the Denver Tribune of a few days ago, by the leading citizens of Denver City to build iron works there. Committees which had been appointed made most satisfactory reports, the manufacture of iron being allowed to be the greatest of all industries. It was shown how by the establishment of iron works Denver would increase in numbers and wealth. How the farmers in the State would be benefited and prospered by having a home market for their produce, and by the means of employment being thus created for the mechanic, laborer and artisan, how the business of merchants, bankers and railroad men would all be enhanced, and the city and State filled with industrious people, the true source of prosperity and wealth.

There are Eastern manufacturers of wealth writing to persons here every little while to ascertain if we have commenced the manufacture of iron yet, for they are anxious to introduce the manufacture of stoves as soon as we can begin the making of pig-iron. A good business might be opened up in the manufacture of heavy castings, and there is nothing to hinder us from making pig-iron so cheap as we could supply Utah, Nevada, Wyoming, Idaho, Montana, Washington and California. Details of cost, etc., could be given, only it would make this article too lengthy.

To show that there is profit in the manufacture of pig-iron alone, the American Protectionist, a paper published in New York, in the iron interest, says: "As an index to what furnaces do in the south, it is stated publicly that the Alcoa blast furnace of Birmingham, Alabama, working on \$250,000, yielded to its proprietors a net profit of \$144,000 last year. This \$250,000 includes the purchase of coal and iron lands. Many of the wealthiest men of our day have made their fortunes from the manufacture of iron, but as we have not many wealthy men amongst us, let us take hold of this industry on the co-operative principle, and as we are nearly all operatives, we are all interested in the successful introduction of the manufacture of iron, for out of it would grow many others. We could certainly make iron much cheaper than it is imported, enabling our farmers and mechanics to manufacture machinery and the iron-work for farming implements, wagons, carriages, etc., much cheaper than they could be imported. In exchange for this turning freight for our railroads all over the Pacific Coast. It would appear that the Utah iron industry might be made a great source of profit to the Utah Central and Union Pacific Railroads, by carrying our iron east as far as the initial point of the Oregon Short Line, and then running it into Oregon, also on the Utah and Northern into Idaho and Montana. We could certainly make iron so cheap that we could supply the Western market."

Returned Missionary.—This morning we received a call from Elder Nathan Hawkes, of West Weber, who returned home on Friday last from a mission to Indiana. He left for that State on the 11th of October, 1881. He labored in ten different counties, in the southwest part of the State. About twenty joined the Church in the district to which his field was attached, but prospects are improving somewhat. He traveled in his field 4,425 miles, mostly on foot, held 207 meetings, about one-fourth of them without any companion Elder. He baptized four persons and assisted to administer that ordinance to four others, blessed six children and ordained one man to the office of a Priest. He administered to the sick who were greatly blessed through the prayer of faith. Elder Hawkes also labored ten weeks in St. Clair County, Illinois.

Zion's Benefit Building Society.—There was another meeting of persons interested in the formation of the Society in the Z. C. M. L. Shoe Factory last evening. There was a large attendance of ladies and gentlemen than on any previous occasion, and much interest was manifested in the proceedings. Brother Francis Cope occupied the chair, and the evening was spent in discussing and amending the by-laws drafted by the committee appointed for that purpose. Considerable progress was made, and in order to complete this work as fast as possible, another meeting will be held this evening at 7:30 at the Shoe Factory, to which all interested persons are invited.

Home Silk Fabric.—This morning we had the pleasure of examining a specimen of genuine silk fabric—main and grandis stripes—made in Utah. It had just been turned out of the loom by Brother James Chalmers, who has commenced the manufacture of silk fabrics at the premises of the Utah Silk Association, near the mouth of City Creek. The specimen is excellent for a start, being of better quality than is produced in the States, the weaver being determined to turn out goods that will not only be equal to imports in point of beauty and finish, but equal in durability.

To-Night.—Those who attend the Theatre to-night will enjoy a pleasant evening. "Friend and Foe" is a stirring play, without a particle of evil, and Mr. Scanlon, as "Carroll Moore," acts and sings in a manner to entertain and amuse anybody. The company is a good one and the scenery very fine.

Closing Exercises.—The closing exercises of the University of Denver for the academic year 1932-3 will take place on Thursday next, at 2 o'clock p.m. in the University building.

Thomas' Musical Festival.—The chorus rehearsals will be held on Thursday, instead of Wednesday, this week. Each enrolled member of the chorus is requested to present a card to the Secretary, at the next rehearsal, with his or her full name plainly written thereon.

A Dangerous Fall.—Last evening little Joseph Patrick, aged about six or seven years, son of Brother Robert Patrick, of the Eighteenth Ward, was playing on a lot adjacent to the family residence, when he fell down an excavation made for a new building, being precipitated a depth of from eight to ten feet, striking upon the upper part of the forehead. With the exception of a cut and bruise upon the head he was uninjured, and is able to be about to-day.

Excursion to Ogden.—The excursion to Ogden on Decoration Day leaves the Utah Central depot at 7 a.m., and is under the management of the Sixteenth Ward Brass Band. The settlement on rates between the Utah Central and Denver & Rio Grande Railroads will not affect the price of this excursion. Anyone desiring to visit Ogden can go and return for \$1.50. Tickets should be purchased by six p.m. Tuesday, and are good to return on any train May 30th or 31st. It is understood this will be the only excursion to Ogden on that day. The band have been organized only a little more than a year, and through perseverance have made excellent progress.

The Shooting Case.—Richard Fowler, who was shot yesterday by David Gallant, is still alive. It was supposed yesterday that one of the bullets passed through the bladder, but this is now a consideration. It is believed by some physicians that he may recover. However, it is probable that the matter will be decided one way or the other by to-morrow. The unfortunate man is quite feeble, but has never, in his waking moments, lost consciousness.

Gallant was taken before Justice Spiers this afternoon, and the preliminary examination begun, Judge Snow and Mr. Winters appearing for the People and Mr. J. L. Rawlinson for the defendant. We understand that bonds of \$2,000 have been agreed upon.

The U. C. R. R. is 280 miles long, that being the distance between Ogden and Frisco, and works 20 locomotives.

Orchardists hunting for caterpillars will find the pecky pests in clusters of the greater at all indications, for out of it would grow many others.

We received a visit yesterday from W. D. Marlock, Esq., Traveling Passenger Agent for the Chicago & Alton Railroad, who is here in the interest of that road. His headquarters are at Kansas City, Mo.

SPIRITUAL BUSINESS NOTICES.

CALL NO. 2.
As minute men to call No. 1 did not respond (I say as you were), Cont. and Q. M.

Now to all who may call I will give a free set of Plain Teeth for \$24, or a full set of Gum Teeth for \$30. Jas. M. Barlow, Dentist, corner First South and Third West Streets, 16th Ward, Salt Lake City, May 29th, 1933.

WANTED.
A man of intelligence to take the general agency of Utah for the Mutual of Social and Business Forms. County agents also wanted. Call on or address D. W. McDevitt, Valley House, Salt Lake City.

Brown's Sarsaparilla
And Dandelion with Iodide of Potassium.
Cures Scrofula,
Cures Erysipelas,
Cures Dyspepsia,
Cures Kidney Diseases,
Cures Bolls and Tumors,
Cures Chronic Rheumatism.

Brown's Sarsaparilla
And DANDELION WITH IODIDE OF POTASSIUM, is the greatest success of the age in curing diseases of the Blood and Liver. The Brown Medicine Co. print the formula on every bottle, and Physicians and Druggists everywhere endorse it. It is fully "cured" from cancer with Brown's Sarsaparilla.—J. R. Way, M. D., Iowa. "Your Sarsaparilla is much better than any I have tried. It never fails."—Dr. Shacker, Columbus Kansas. "It is the best blood medicine ever sold in a drug store."—J. J. Carman, M. D., Denver.

Brown's Sarsaparilla
And all of Brown's Medicines are sold by Godde, Fitts & Co., Stewart & Chislett, Moore, Allen & Co., Z. C. M. L. Inst., Bevan & Hoyer & A. C. Smith & Co.

AT THE STUDENBAKER
