Thursday, - - - January 18, 1972.

Anong our telegraphic dispatches today will be found the following paragraph-

Washington, 17.—At a regular meet-ing, this foreneon, the following was unanimously adopted in the Senate: Resolved, that in making Federal ap-pointments within the Territories, the President is respectfully requested to apply the same rule, by selecting citi-zens thereof, as is adopted in making appointments in the States.

This is a long needed step in the right direction, but it is not the only step that abould be taken in that direction. The common usage in Territorial ap- Afternoon Dispatches. pointments has been to choose strangers to the Territory and to the community to fill certain offices, the parallels of which in the States [are chosen by the people. This policy of choosing strangers who know not the people, who have no particular sympathy with them, who understand not their wants, their wishes, their manners, their customs, and who can hardly be expected to appreciate or act in harmony with the prevailing sentiments of the com-

pocket, directly and indirectly!

Starting Development. New YORK, 18.—The report of the increase of smallpox in this city begins to excite alarm. The number of cases have increased from sixty-eight to seventy-six. The disease seems to be confined to no section. Vaccina-tion is rapidly progressing, but among the lower classes of Germans, who ob-lect to vaccination, the contaction makes increase of Germans, who ob-

uence has been that little or normal al confidence has existed between the lers and the people, but a great lack of the state of this fact that it is desired to be illegal, the public good. And co-operation for the public good. We therefore cannot do other than con-clude that the prevalent appointing policy is not a good one, and that the policy of appointing resident citizens, would grant immunity from any pun-ishment for his crime. MEXICO. NEW YORK, 18.—A Mexican dispatch NEW YORK, 18.—A Mexican dispatch there is great re-

 main which the government and the Federal officials find themselves would have been avoided, and there is no question that the people of this Territory would have been infinitely better satiafied than they are with the existing state of things.
 THE planting of trees, for ample meteorological, hygenic, and financial reasons, to say nothing of utility otherwise and of beauty also, has recently been urged by many of our contemporaries, and some State legislatures have encouraged the good work by premiums, and exemptions of the nature of premiums. The Kansas legislature made

of the community. This reported resolution, then, of the Senate to adopt the policy of appoint-ing officials for the Territories from among the people of the Territories respectively appointed for, is a resolu-tion which every American, every re-publican must hall as in consonance-with true republicaniam, with the true-principles of American government. But there is another important step-which should be taken in this connec-tion, and which can not be reasonably which should be taken in this connec-tion, and which can not be reasonably abstained from by a republican Federal government, and that step is, for the nominating and confirming powers to nominating and confirming powers to appoint candidates from among those who are chosen by the people them-selves. Neither the justice nor the wiadem of this policy could be fairly questioned. If the people are not al-lowed to have a choice in their rulers, the government is not republican, but dictatorial, which is contrary to Ameri-can principles, and should not be in-dulged in by American people, un-

publican principle of recognizing the voice of the people, would be an im-mense improvement upon the present policy. If such a policy had been ac-ted upon in the past, the present dilem-ma in which the government and the Federal officials find themselves would
