FREIGHT TRAIN WRECKED. Catastrophe Occurs in Beaver Canyon

Over a Broken Rail.

Freight train No. 27 on the Oregon Short Line ratiroad sustained a wreck in Beaver canyon last night, and two car loads of hogs were detailed and the porcine freight was mushed into sausage meat. The catastrophe was caused by a broken rail.

THE ELECTION CANVASS.

Commissioner Woolley Gains Sixty Votes in Fifty first District.

The canvassing board convened again at 2 o'clock this afternoon, and proceded to count the 49th district. No errors were discovered in this district; but in the 51st Morse, Republican canbut in the first Morse. Republican can-didate for district judge, lost 20 votes and Woolley. Democratic candidate for Commissioner, gained 60. County Clerk Dunbar claimed that this increase elected Woolley over Harker, the Re-publican condidate for the same office. In four of the city precincts Mr. Dun-bar figured out that Woolley was 1.032 votes ahead of Harker, a majority it was claimed that could not be over-come by the Fifth and county precincts. Harker's friends, however, claim that he is still 45 ahead. he is still 48 ahead,

profit therefrom. At present such ore is subjected to a penalty, notwithstanding that much of it carries values in gold, silver, copper and lead. Prof. Sadiler's investigations have been conducted with a view to the production of retoris adapted to the distillation of ores containing such a percentage of zinc as to prevent their nomical treatment in the ordinary precious metal smelting furnaces, and such a percentage of oxide of iron or other corrosive bases as to prevent their economical treatment in the retorts of the ordinary zine distilling furnaces, says the Butte Intermountain. Valuable quantities of precious metals such as gold and silver, are often con-tained in ores of this character, but the iron oxide, etc., excludes their re-duction by the means used in zinc distillation, since the iron oxide when ex-posed to 'the heat required for such distillation slags with and corrodes the fire clay of which the retorts are composed, destroying them. If, on the oth-er hand, an effort be made to treat the zinc-bearing ore in the blast furnaces used for the smelting of ores carrying us metals, the zine being vapor ized and encountering the air blast, precipitated as a crust upon the walls of the furnace, gradually choking it, bstructing and finally stopping the p.erations of the furnace.

Prof. Sadtler, who is now in Butte, states that the presence 3 per cent of lead, is fatal to the suc-cessful extraction of the zinc, and it Frisco. was to the elimination of these diffi-culties that he addressed himself. He remembered that it had been custom-ary to line the iron blast furnaces with basic material to prevent corrosion, and it occurred to him that if it could be done in iron furnaces, there appeared to be nothing in the way of lining zind furnaces with some material that would resist corrosion. This is what has been done, and this is all there is to the pat-ent which Prof. Sadtler believes will evolutionize the treatment of sine res. It is stated that 85 per cent of the zine values can be extracted, while the residue, which is a desirable smelting product, carries all the precious metal values as well as the lead and copper, except such of the lead as may escape by volatilization. It is also asserted that mining engineers who have exam-ined the method regard it as one of the most important metallurgical discover-les of the century, and believe that it is

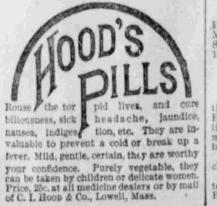

destined to make a heavy increase in the output of gold and sliver from the rmous bodies of zinc ores that are regarded as waste. he success of the method will be od with Joy by a number of mine

isrs in Utah. A great deal of zinc is found in Park City and the Horn Silver of Frisco is said to have upwards of \$5,000,000 in values tied up in zine ores which at the present time cannot be successfully treated.

COLORADO RIVER PLACERS.

John and David Day Have a New Method of Saving the Gold.

John and David Day, who have been working for a Boston syndicate, re-turned to Richfield from the Colorado river Wednesday, says the Salina Press. After throwing out the Mitchell and other machines and adopting a different method altogether they think they have

and \$1.85 for ten hours and carpenters wages from \$3 to \$2.50, with an in-crease from eight to ten hours. Labor circles are much excited over the mat-

ASPHALT MINES SOLD. Millet Provost Purchases the Mel-

endez Mine for \$30,000.

Caracas, Vez., Nov. 16.—Millet Pro-vost has purchased the Melendez As-phalt mines for \$30,000. The previous contract price was \$130,000. The reason for the reduction in price was a decree of the government requiring a valid ti-MINING NOTES.

E. W. Young, the well known broker, expects to go East on Sunday.

The Mammoth of Tintic had three cars of ore on the market today. The Carisa of Tintic was on the market today with three cars of ore.

The Cygnet company of Stockton had two cars of ore on the market today. The Montezuma of Bingham reached the market today with two cars of ore. Two cars of concentrates were on the

market today from the Horn Silver of It was expected that the West Argent company's mill at Stockton would be started up yesterday.

Director Richard A. Parker of the United States Mining company came in from the coast yesterday afternoon.

The St. Joe Mining company, of Bingham, is out with a neat prospectus of the company's property.

The Taylor Brunton Sampler reported four cars of ore from Tintic, two from Bingham, two from Stockton and two from Frisco today. Another car of silver ore was on the

market today from the Eagle and Blue Bell of Tintle. The new strike is said to be looking well.

The Lake View, No. 2, mining claims, situated in North Tintic mining district, has been located by O. H. Pulver, Eli Chase and J. M. Henry,

The Butter's laboratory is working on experimental tests with the Daisy ores, the results of which will likely be known next week.

James W. Neill is back from a trip to California and the Wood river coun-try, Idaho. The trip has increased Mr. Neill's admiration for the mineral districts of Utah. Colorado and Montana, The Golconda property adjoining the

Century at Park Valley is to be sur-veyed for patent, and a contract for further work in the tunnel is to be let. The tunnel is now in 300 feet.

A meeting of the directors of the Builion-Beck was held this afternoon at which routine business was transacted The company marketed two cars of ore today on controls which ran close to

ounces silver per ton. Mr. J. G. Jacobs came in from Bing nam and reports the Blo Grande West ern going ahead with surveys for the

extension from Bingham terminus. The ompany will build the road and lease Mr. Jacobs for a period of ten years,
