

EMPEROR WILLIAM OPERATED UPON.

Compelled to Submit to Surgeon's Knife for the Removal of a Polypus from the Larynx.

IS GETTING ALONG VERY WELL.

At First it Was Thought He Might Be Suffering from Something Much Worse.

Berlin, Nov. 8.—Emperor William yesterday underwent an operation for the removal of a polypus from his larynx. The operation was performed by Prof. Moritz Schmidt and was entirely successful. The only inconvenience suffered by his majesty is that he has been enjoined not to speak until the wound caused by the operation has been healed. The bulletins announcing the result of the operation caused much excitement, even among court officials, who had no suspicion that his majesty was suffering from any affection of the throat.

The following bulletin was issued this morning:

"The emperor spent yesterday quietly in his room. He slept throughout the night without interruption. The appearance of the small wound is satisfactory and there is no pain or other discomfort in the throat. His majesty's temperature this morning was 38.3; pulse, 60.

The surgeons expect Emperor William will be out of doors in a week. He has arranged a hunting trip for Friday, Nov. 27.

The following is an authorized account of the operation as given to the North German Gazette:

"His majesty today underwent an operation for the removal of a polypus from his larynx. The operation was performed by Prof. Moritz Schmidt and was most successful. His majesty is only enjoined not to speak until the wound caused by the operation is healed.

"VON LENTHOLD, 'SCHMIDT, 'ILBERG.

The North German Gazette also publishes the report of Prof. Johannes Orth, the famous cancer specialist, who succeeded the late Prof. Virchow in the chair in pathological anatomy in the University of Berlin. Prof. Orth made a microscopic examination, which shows that the polypus consisted of a very soft connective tissue, containing a few cells. This tissue was covered all over with a scaly epithelium, sharply defined from the tissue. A portion of the connective tissue contained fine brown pigmented granules, which evidently were the result of former slight hemorrhages. The polypus also contained a large number of thin-walled corpuscles.

"It is, therefore," says Prof. Orth, "only a question of a benign connective tissue polypus."

The court circular this morning made the following announcement:

"The emperor yesterday went for a walk. No guests were invited to luncheon or dinner yesterday, but Count von Buelow, the imperial chamberlain, will be the emperor's guest at luncheon today."

The emperor received Count von Buelow today and afterward lunched with the empress and the count in his bedroom. Count von Buelow found the emperor as cheerful and animated as usual. The emperor wore a dressing gown instead of a coat. He took liquid food and did not indulge in the courses served. His general health has never been so good. He has not felt the ear affection which troubled him for years, and has quite outgrown the nervous trouble that formerly impeded him to incessant physical activity. It is stated that the emperor will continue to receive visitors on official business.

The growth in the larynx at once suggested that the emperor might be suffering from something worse than a simple polypus, but Prof. von Lenthold, Ilberg, Schmidt and Orth supplement the bulletins in relation to luncheon by the most personal declarations that the affection was merely a "good natured polypus, which is not likely to return or to be followed by any evil effects."

IN YELLOWSTONE PARK.

The Game There is Doing Well And Increasing.

Washington, Nov. 8.—Major John Pitcher's report on Yellowstone park is devoted largely to the condition of the game in that preserve. He recommends that provision be made for feeding game in the park in the winter. The danger of loss by starvation, he says, is increasing yearly, owing to the fact that the country around the park is setting up this limiting range. He thinks it would not be a difficult matter to feed the antelope and sheep, as their winter range is close to Fort Yellowstone.

He places the number of antelope in the park at about 1,000. The mountain sheep have increased considerably in number the past year, and there are now over 100 in the park. The bear seems to be increasing more rapidly than any other game in the park, at least they are becoming tamer and more fearless than any other species. The new buffalo herd, which is under the immediate charge of C. J. Jones, is doing exceedingly well, but the increase in the herd this year was not as great as was hoped for.

Major Pitcher says it is of the greatest importance that the boundary lines of the park, in addition to being surveyed, should be so thoroughly marked as to render it impossible for any one to cross the line without knowing that he has entered the reservation.

Crushed by a Locomotive.

Seattle, Nov. 8.—Two lives were crushed out beneath the weight of an engine of the Columbia & Puget Sound railway this morning by the overturning of a passenger car.

CURIOSITY.

Leads to Investigation and Truth.

What shall we do to be saved? was the title of one of Robert Ingersoll's lectures. People of faith and people of no faith flocked to hear it. Thousands are asking, "What shall I do to get rid of dandruff?" The answer is, "Kill the germ that causes dandruff, falling hair and finally baldness, and the only thing that will do it is Novebor's Herpicide. That is the very latest discovery of the laboratory, and it is the only preparation that claims to, or that will, kill the pestiferous dandruff germ. It also is a delightful hair dressing, free from oil or grease or sticky substances. Try it and be convinced of its actual merit. Sold by leading druggists. Send ten stamps for sample to The Herpicide Co., Detroit, Mich. For sale by Z. C. M. I. Drug Dept.

HARD DRIVEN.

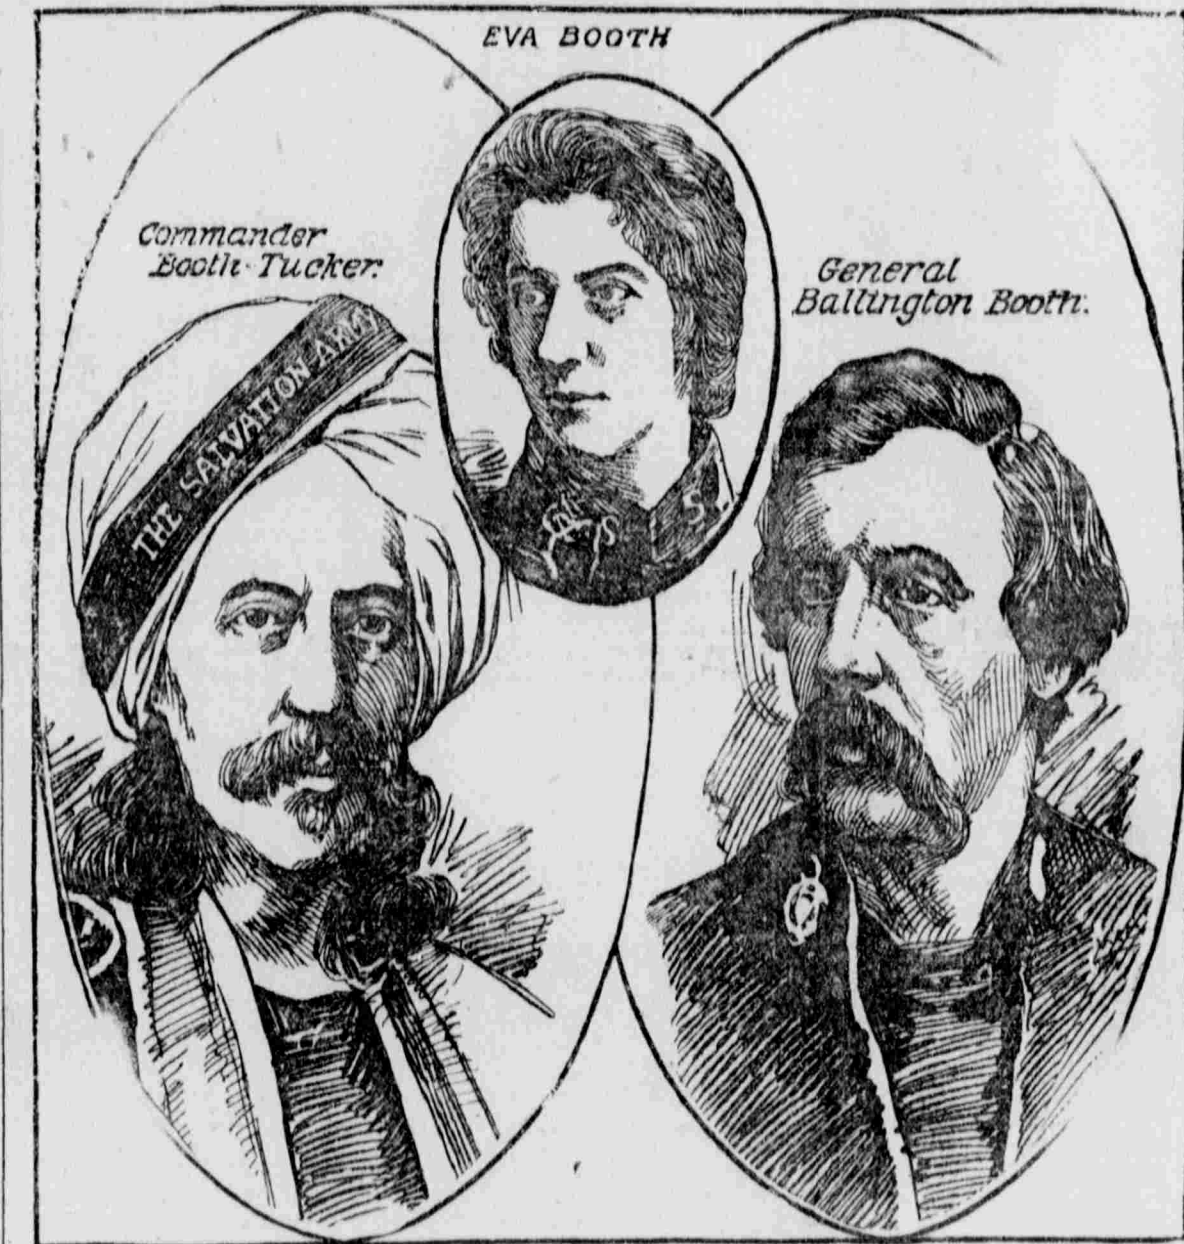

The mother slowly times her footsteps to those of her baby driver. Yet she is hard driven because not alone in the brief moments of play, but all day long, must she keep pace with baby's want and needs. Generally the mother who experiences a larger demand on her energies has less and less strength to respond. Sometimes she suffers from diseases peculiar to her sex, and often has never thoroughly recovered her strength after baby's coming.

For all women who are weakened by womanly diseases or who are kept down by maternal and household cares Dr. Pierce's Favorite Prescription is commended as a medicine which promptly cures disease and restores the strength. It establishes regularity, dries weakening drains, heals inflammation and ulceration and cures female weakness. It is unexcelled as a tonic and nerve for weak, run-down women.

"If mothers who dread the baby's coming would take Dr. Pierce's Favorite Prescription they would find it a great help and benefit," writes Mrs. L. E. Henderson (President Milwaukee Woman's Literary Club) of 623 Grand Ave., Milwaukee, Wis. "After the birth of my first child I did not seem to regain my health. I began to take your medicine, and in two weeks I felt stronger and able to be about. I kept taking it for two months and found at the end of that time I had completely regained my usual health. I also found that it was of benefit to take a few months prior to baby's advent. I feel it of great benefit in all forms of female weakness."

Dr. Pierce's Pleasant Pellets should be used with "Favorite Prescription" when ever a laxative is needed.

ing of the locomotive and two cars at the Y between Black Diamond and Franklin. The dead are Frank Dixon, brakeman, married, Walter Park, fireman, a single man. The injured: J. N. Hicks, engineer,

THE BOOTH FAMILY QUARREL, WHICH IS SAID TO HAVE BROKEN OUT ANEW.

It is reported that the quarrel between Ballington Booth and his relatives, instead of being patched up as a result of the tragic death of Mrs. Booth-Tucker, has been intensified. Report has it that the family refused to permit a service to be held for the members of the family and that Herbert Booth was also refused permission to speak in behalf of the relatives who were unable to be present. It will be remembered that Ballington Booth was superseded as head of the United States branch of the Salvation Army by his sister, Mrs. Booth-Tucker, and her husband. Ballington then organized the Volunteers of America. Later a merging of the latter body into the Salvation Army was suggested, but nothing came of the proposition, though the two armies never fought each other vindictively. Eva Booth, another sister of Ballington, is to succeed Mrs. Booth-Tucker as joint consul of the United States with Commander Booth-Tucker. It is thought that she will be able to close the long standing breach between Ballington and his father, General William Booth, commander in chief of the Salvation Army.

left arm fractured and bruised about body; will recover.

The accident was caused by the driving wheel of the engine mounting the left rail on the trip in.

Brakeman Dixon was in the cab on the left side. Beside him was Parker, the engineer. The engine raised both Dixon and Parker prepared to jump. They waited too long and landed on the ground on the left side of the engine just as the great locomotive tottered and rolled over on her side. Both men were caught beneath its weight. The condition of their bodies would indicate that they died instantly.

S. P. Sargent Has Paralysis.

Washington, Nov. 8.—Frank P. Sargent, commissioner of immigration, suffered an attack of paralysis of the left side yesterday, and for a time his condition gave his family considerable concern. He was better today, however, and because of his splendid physique Mr. Sargent's physicians hope for a speedy recovery.

Suicide by Drowning.

St. Paul, Nov. 8.—William Nottier, a salesman for a local chair company, committed suicide today by jumping from the Smith avenue bridge, 200 feet into the Mississippi river. Nottier drove to the bridge and proceeding to the highest point, removed his overcoat, vest and collar and leaped over the railing.

Yellow Fever Continues.

Laredo, Tex., Nov. 8.—Yellow fever continues without much abatement. The official bulletin issued tonight shows 12 new cases, but no deaths. Dr. B. D. Murray, the international yellow fever expert, who has just returned from a trip as far as Saltillo, said today that conditions in Monterrey, if judged by other cities where yellow fever has been epidemic, indicated no less than 2,000 cases there this year, with the mortality rate placed conservatively at 5 per cent. The deaths have been greatly in excess of the number reported in the official bulletins issued in this city, and fully 500 cases exist at the present time.

The stations on the line of the Mexican Central between Laredo and Saltillo have, he says, suffered an invasion of the yellow fever and have contributed an unknown number of deaths and cases.

Antique Treasure Found.

Rome, Nov. 8.—Peasants, while dredging near Palazzolo Acreide, Sicily, found a rich treasure of ancient objects from Syracuse. The most valuable were an artistic diadem encrusted with precious stones and a belt of solid gold and several rings of beautiful shapes. There were also found a number of coins of different values. The government authorities took possession of the treasure on the ground that it was national property, but they will compensate the proprietor of the estate according to an estimate which will be made by experts.

Lynched by Stabbing a Policeman.

Brimley, Ark., Nov. 8.—Because Z. C. Cadie, a white man, stabbed a policeman to death in an altercation, a mob took him from the jail early today, shot him four times and then hung him to a telephone pole. The coroner's jury rendered a verdict to the effect that Cadie was lynched by persons unknown.

He Forged Lottery Tickets.

Lynn, Mass., Nov. 8.—William S. Wells, 45 years of age, is under arrest charged with printing lottery tickets, and also forgery. The police assert that counterfeit tickets of several lotteries have been sent from here to all parts of the country. Wells made a partial confession in which he implicated a man in Dayton, Ohio, as being the head of the plan and a New York man as being the active manager. The police refuse to give the names of these two men.

QUESTION OF VIVISECTION.

Causes Members of Vienna Medical Chamber to Resign.

Vienna, Nov. 8.—The members of the Vienna medical chamber, to which is entrusted the professional control of the doctors of the city, have resigned in a body as the result of a long fight between the anti-Semite members of the landtag and Count Klemmner, governor of Lower Austria on one side, and the general body of the Vienna physicians on the other.

A NEW ERA

in the clothing trade dawned when first appeared this famous mark

Alfred Benjamin & Co.
MAKERS OF NEW YORK

BENJAMIN tailoring revolutionized the business. Where before were filthy sweat-shops are to-day clean, light, airy workrooms; hasty, slovenly piece-workers have given way to salaried custom-tailors; loose, unsystematic methods have been succeeded by perfect system and infinite care for details. Is it any wonder that BENJAMIN Clothes have driven old ready-mades into oblivion?

his position as physician to the Vienna poor, which he had filled, without remuneration, for forty years.

The physicians declare that the whole agitation comes from the anti-Semites, who are hostile to the scientists, a large proportion of whom in Vienna are Jews. The professors at the university fear that the trouble will have a damaging effect in Europe and the United States on the reputation of the Vienna medical school.

COLORADO COAL MINERS QUIT WORK

Strike is Much Bigger Than the Officers of the U. M. W. of America Had Hoped For.

MEN HAVE PLENTY OF MONEY

In Wyoming There is No Trouble as The Men Are Receiving the Highest Wages.

Trinidad, Colo., Nov. 8.—It is now evident that the strike of the coal miners in this, the first district of the Colorado Fuel & Iron company, is no small affair. In fact, it is a strike all out of proportion to that even hoped for by the officers of the United Mine Workers of America and 10 times what was looked for by the coal operators. At the meeting of superintendents and pit-bosses, held in the C. E. & I. offices in Trinidad last Thursday night reports were made that in no camp would enough men go out to cause a shutdown. It is doubtful if enough men can be found in the whole district by tomorrow to work the mines at Pribera. At Gray Creek every miner but one has quit and that camp is surrounded by armed guards. At Bowen the men are quitting rapidly. At Terlico the men quit early. At Starckville, one of the camps reported as being wholly company men, nearly every man quit. At Peabody, the new Rock Mountain Fuel company camp, the men took their tools home. There is not one mine in this section that can start up tomorrow with half a crew of miners.

All day the C. F. & I. miners have been swarming into Trinidad, nearly all of them having their pay checks running from \$187 down. The checks were for such amounts that business men could not cash them and hence lost thousands of dollars in trade. All day long the miners have been joining the United Mine Workers. The police who were stationed near the office of that organization to prevent any possibility of a clash between the union and non-union men, estimated that at least 500 joined and came out showing their union cards. Commercial street for two blocks was at one time choked with the newly-made union men.

The Italians have quit almost to a man. They have not joined the union to any extent, giving as their reason that they were sold out by the labor organizations on two or three occasions and they preferred to go out on their own responsibility on this occasion. They will stay out, the officers say, until the last and when one goes back to work all will go. They have plenty of money as individuals and their secret societies have large sums on deposit in banks here.

All the railroads have laid off train crews. The Colorado & Southern, Santa Fe & Denver and Rio Grande have reduced their crews nearly one-half. It is said, while the Colorado & Wyoming is practically out of business as a coal road.

Sheriff Clark is securing deputies in bunches today and the men having been brought down from the saw-mills and timber lands in the Stone-wall valley. Today 15 were sworn in and 25 new men have been sent to Hastings.

So far as can be learned there has been no disturbance at any of the camps, but a clash is feared at Hastings. The expense of the operators for armed guards is now estimated at not less than \$1,200 a day.

NORTHERN MEN OUT.

Denver, Nov. 8.—A general strike in the northern Colorado coal fields was declared at Louisville today. In all about 1,725 men are idle, or will be tomorrow morning. At Louisville 500 men in the Rex 1, Rex 2 and Hecla voted to go out. At Lafayette 350 struck on the Simpson, 50 on the Garfield and 75 on the Mitchell. At Louisville 500 men struck, tying up all the mines except the Blue Ribbon.

At Superior 100 men struck, while at Marshall nearly 200 men are out. At Mitchell 20 men employed at the Joe Mitchell have joined the strike. This makes the shutdown practically complete, and only a few of the small independent mines will open tomorrow morning.

The action of the miners of the northern field was a surprise to the operators. After the conference held in this city, in which practically every demand except the eight-hour day was granted to the men, they determined to strike.

NO TROUBLE IN WYOMING.

Denver, Colo., Nov. 8.—A special from Cheyenne says: Tomorrow is the day set for the walkout of the coal miners of district No. 15, but so far as the mines of Wyoming are concerned there will be very few men who will quit work. There are only a few union miners scattered over the state, but even if they all go out it will not affect the mines in the least.

Efforts were made some time ago to organize the miners of Wyoming, but this proved a slight success. The chief objection to organization by the men was that they were receiving top wages and were satisfied. Another serious obstacle was that seven-eighths of the men are foreigners of various nationalities. In Rock Springs, the leading coal camp of the state, no less than 30 languages are spoken. In several camps the men have local organizations, but they do not affiliate with the national organization.

FOUR CHILDREN KILLED.

They Were Playing with Nitro-glycerine and Struck it.

Lancaster, O., Nov. 8.—Four children, playing with a can of nitro-glycerine, at Buck's Run today, struck it with a stone, and all were instantly killed, the bodies being terribly mutilated. The dead are Oscar and Charles Bohn, aged 14 and 12; their 8-year-old sister and the 3-year-old son of Robert Bohnard. The Bohn house was partially wrecked.

Stabbed to the Heart.

Alton, Ill., Nov. 8.—Samson Cooper, 59 years old, one of the princes of gypsies, was stabbed through the heart and robbed under an electric light here tonight by a negro, who escaped.

A good many people suffer with headache. More than really ought to when you consider the number of remedies for the trouble there are in existence. The great trouble with so many of these so-called remedies is that they don't cure. "Schramm's Headache and Neuralgia Cure" is one which we know has real merit. If you try it and it doesn't do the business, here's 25 cents back. That's what it costs.

SCHRAMM'S,
Where the Cars Stop.

Tell you what, we've been on the jump the past few days. Just couldn't fill the orders. A good many people ordered more than they could. So some whom really were out of coal were disappointed. We've lots of coal and will fill all orders until further notice. It will be "That Good Coal," too.
