SHOWERS CON. RESUMES SINKING

Sales Made on the Exchange This Vein to be Explored at an Early Date on 600 Level.

UNCLE SAM MUCH WEAKER. ENCOURAGING AT MAY DAY.

Fine Body of Quartz on 200 Level-Returns From Carlsa - Boss Tweed Shipments.

Mining company has now been set in place and Mr. M. H. Walker announced today that sinking would be resumed at once. The shaft is now down to a point between the 500 and 600 levels. Mr. Walker says it will be pushed down to the 600, at which point a station will be cut and a big station pump will be installed. A crosscut will then be run about 150 feet to cut the vein. The plans of the Showers Con. will be watched with interest by those interested in Diamond as serving to show the value of the ore bodies at greater depth that has heretofore been reached. The Joe Bowers shareholders are also much interested in the results of the enterprise of the Showers Con. A very good ore showing is said to exist on the 400 of the Joe Bowers, and if the developments at the Showers are encouraging the Bowers people will also sink to the deep with a large double-compartment shaft, which will mean much for Diamond if the ore is proved to go down in paying quantities.

ENCOURAGING AT MAY DAY. Management Has Entered a Fine Body of Quartz on 200 Level.

Those of the May Day shareholders who know of the present condition of the 200 foot level of the mine are feeling quite encouraged in spite of the recent decline in the price of the stock. The directors were reticent on the matter today, stating that they expected some news in a few days. But it is learned that a series of caves has been encountered on the lower level and the management is now driving in a fine looking quartz in which lead and iron appear. Supt. Matthews con-siders that the company is on the verge of a new ore discovery on the 200 level. Everything is said to favor the belief that the company's reserves will be added to shortly by a fine disclosure.

Returns From Carisa.

from Tintic, after making of the Carisa, in which he is heavily in-terested. Mr. Evans did not care to enter into particulars regarding the property, but he said he was much impressed with the showing in the mine, and especially on the 250 level, where a splendid chute of high grade ore is being opened up. The ore chute seems to be going down very strong.

Carisa had two lots of ore on the market today of proverbial richness. One lot, which contained much native copper, assayed over 56 per cent copper, while the poorer shipment returned 32.5 per cent. The articles of incorporation of the new company will be filed as soon as certain technical formula arrives from Colorado.

The Advance in Tetro. The sharp advance in Tetro today has

caused a great deal of speculation as to its probable cause. One stockholder said that he heard from good authority that the McChrystal's have been picking up the loose stock for several days past. It has been expected that the Godiva ore body, with which the Mc-Chrystal brothers are familiar, will be followed to the Tetro lines, but when last seen Mr. Jackson McChrystal said it was too far off to say where it was trending. The rumor that the Mc-Chrystals are buying has been construed by at least one or two parties in town to mean that the Godiva ore is certain to enter the Tetro. There is, however, nothing certain about these rumors. Orders for the stock have come in from a number of outside places of late and it is quite probable that the Dice of the stock has been raised on se orders. No special change is reported at the property, but a slight im-provement is noticeable in the general condition of the property, which is confidently expected to develop into a mine

at no distant day.

Sampler Shut Down. The effect of last night's storm is very discouraging to those who are anxious to get returns from their ship. ments at an early date. The electric the Taylor-Brunton sampler and at noon today the mishap had not been remedied. About 120 cars of ore are in the yards of the company waiting to be sampled. For some time past the shipments of ore have been so beavy that the company has had about 100 cars ahead all the time, and the present acwill delay returns to mine owners for at least 24 hours.

Boss Tweed Shipments.

Four cars of copper ore are at the sampler from the Boss Tweed of Tintic. The ore comes in 2 lots of different grade. The best lot is expected to run about 15 or 16 per cent, in the red metal. The ore was extracted from the old workings by Mr. Gundry, who has several men working the property on a lease which expires Sept. 22. Mr Gundry said today that a carload of ore per week is being extracted at the pre-sent time. On the surrender of the lease, the Snyder crowd who now own the control, expect to begin an active development campaign.

United States Steel Holds About the Same Place-Livestock, Produce, Money and Bonds.

New York, Aug. 8.-The stock market showed strength at the opening, all the leading railroads, especially the international stocks, showing good fractional gains. The steel stocks continued the feature, six thousand shares of the common changing hands at from 41 to 41%, and 3,500 of the preferred at from 90% to 90%. The top prices were 1/2 and 1 respectively over yesterday's close. The preferred stock common held steady at 41. Purchases of stocks appeared to be made with more confidence and trading was brod-er and active. All of the active stocks were a point or more higher and many less prominent issues were from 1 to 31/2 better. United States Steel com mon increased its rise to a point, but the preferred hung back to about the lowest. At 11 o'clock the market was slightly off from the best all around.

The reaction did not extend far as offerings were small and traders bid up the market again. Prices, however, did not recover to the best aside from United States Steel common, which held steady at 41%. The preferred re-covered to 90%. Speculation was easier

ADVANCED PRICES.

Tin Plate Going Up on Account of the Big Strike.

New York, Aug. 8.-The Journal of Commerce says: The labor troubles in the steel industry is beginning to be reflected in higher prices for some of the products most directly affected. The price of tin plates has for some time been at a considerable premium above the American tin company's nominal price of \$4.30 per box. A number of orders for tin plate have been sent to Great Britain. In this connection it is of significance that the steamer Exeter City, just in from Swansea, brought 27,000 boxes of tin plate, the largest single importation for many years. This was chiefly consigned to order and believed to be for the American Tin Plate company. The London market for tin plates has advanced from 14s 9d to 15s 3d within a week.

A general advance of ten per cent has been announced in the prices of tin ware and enameled ware

The supposed recognition by the crowd of one of the men as Henry Christensen, caused the hostile move-ment. It was Christensen's wife who died without medical assistance about two weeks ago from injuries received in a fire, the faith healers failing to save her. The throng remembered the pub-lished statements of her death-bed sufferings, and they were in no humor to give the faith healers a cordial reception when they attempted to preach their doctrine on the street corners.
