FIRE IN THE GOULD & CURRY MINE

A Ropewalker Loses His Life at Niagara Falls.

JACOB SHARP LOCKED UP IN LUDLOW STREET JAIL.

BLOODY FIGHT IN MEXICO—WASHINGTON NOTES, ETC.

By Telegraph to the NEWS.]

The Queen's Card of Thanks.

LONDON, June 25.—The home secretary has received the following letter from the Queen:

"I am anxious to express to my people my warm thanks for the kind—more than kind—reception I met with going and returning from Westminster Abbey with all my children and grandchildren. The enthusiastic reception I met with there, as well as on all these eventful days in London as well as at Windsor, on account of the jubilee, touched me most deeply. It has shown them the labor and anxiety of fifty long years, twenty two of which were spent in untroubled happiness, shared by my beloved husband, and while an equal number were full of sorrow and trials borne without his sheltering arm and wise help, have been appreciated by my people. This feeling and sense of duty towards my dear country and my subjects, who are so inseparably bound up with my life, will encourage me with my task, often a very difficult and arduous one, during the remainder of my life. The wonderful order preserved on this occasion, and the good behavior of the enormous multitude assembled, merit my highest admiration. That God may protect and abundantly bless my country, is my fervent prayer."

CHAPTER OF CASUALTIES.

Fire in a Mine—Earthquake—Over Niagara, Etc.

LAWRENCE, Mass., June 25.—The most remarkable freshet known in the Merrimac river is now in progress. the water has risen over ten feet since yesterday, and is still rising. It is now within two feet of the temporary bridge just built across the river. Should it keep on an hour longer the bridge will be swept away. Large logs numbered by thousands are sweeping down the river.

VIRGINIA, Nev., June 25.—A fire broke out last evening in the Gould & Curry mine.

ALL THE MINERS

escaped with the exception of six employed on the 1,500 level of the Best & Belcher mine. Signals from them have ceased, and it is feared they have perished. An attempt is being made to reach them by volunteers.

LATER—In addition to the men imprisoned in the Best & Belcher five men are imprisoned in the 800 level, and four men in the 400 level of the Gould & Curry mine, making in all 15 miners imprisoned. But little hope is entertained of saving the men on the 400 level. The engines are busily engaged in pumping air to the levels where the miners are imprisoned. Thousands of people surround the mines, and the most intense excitement prevails. No effort is being made to put out the fire, as it is impossible to ascertain where it is.

UNAVAILING EFFORTS

were repeatedly made to rescue the six miners remaining entombed in the Gould & Curry mine, in which five miners lost their lives last night. The fire was extinguished about noon today and the cage sent down, but was driven back after it had reached the 1000-foot level. Relays of miners are tunnelling through from the Consolidated Virginia, and expect to reach the place of the imprisoned miners by noon to-morrow. The damage to the mine from the fire is very slight. It is known that the imprisoned men were alive at 2 o'clock this morning, which has occasioned great energy on the part of the relief party, holding out the hope that the miners may be still alive when the tunnel is completed.

A BOILER EXPLODES.

LIMA, O., June 25.—The boiler of the Standard Oil Refinery exploded this afternoon wrecking the building and burying engineer Levin Meyers in the debris, probably killing him. Six other workmen were injured.

DENVER, Colo., June 25.—Seang and Metz's Rocky Mountain reduction works took fire this morning. Being out of the reach of water the fire department was powerless to render any assistance. The works were totally destroyed. Loss $30,000. Uninsured. Cause, unknown.

EARTHQUAKE.

CARSON, Nev., June 25.—The Mono County marble quarry sixty miles from this city, was completely destroyed by a recent earthquake. The marble was broken up in cubes not over a foot square. The ledge is over five miles long and 400 feet wide, containing a fine grade of marble, ranging over seventeen shades from pure white to black. The mine was valued at one million.

PARIS, June 26.—A water spout burst to-day near Guays at Toulouse, submerging the wash houses, in which were eight persons, all of whom were drowned.

NIAGARA FALLS, June 25.—Steve Peer, a local celebrity who

OUTDID BLONDIN

in his daring feats around Niagara, and who recently crossed on a five-eighth inch cable, is dead. Ever since he did the daring act he has been drinking very heavily. This evening about 7:30 Peer went out unobserved with John Gillespie and a stranger, and later was seen in the same company near his home. As he did not show up by 8:30 p. m., and no trace of him could be discovered elsewhere and it was concluded he must have got on his rope and fallen from it, or turned over the bank, ropes and lanterns were procured and Peer's brother and another man lowered down, and near the bottom of the incline found his lifeless body badly cut about the head. The body was raised to the top of the precipice by means of ropes. The general belief is he attempted to walk out on the cable and lost his footing and fell into the abyss below.

CRIMES AND CRIMINALS.

Sharp in Confinement — Bloody Fight in Mexico, Etc.

NEW YORK, June 25.—On the request of the district attorney, the judge has ordered that Jacob Sharp be hereafter kept in

CLOSE CONFINEMENT.

The cause of this was the district attorney's statement to the court that he had been informed that an attempt would be made to carry Sharp beyond the jurisdiction of the court.

Sharp, this evening in conversation, said: "I am a very sick man, and it is a question which will last the longest—my strength or the trial. My family has been urging me to consult a physician, but I have not yet consented for fear his prescriptions might make me so ill that I would not be able to attend court. No, it isn't the change of quarters from my home to this place that has knocked me out. It is the result of an illness that has been steadily gathering strength for two years. I am suffering from an affection of the heart, kidney trouble and diabetes."

JUDGE BARRETT

to-night modified his order to the extent of allowing one member of the prisoner's family to remain with him in jail. In accordance with this Mrs. Sharp is the sharer of his confinement to-night.

SALINA, June 25.—E. T. M. Simmons, charged with arson in having set fire to the Hotel del Monte this year, was this afternoon acquitted on the first ballot. The Hotel del Monte, situated in Monterey, was the principal summer resort of the coast, and the structure, costing over half a million of dollars, was totally destroyed by fire on the night of April 1st last. Suspicion rested on E. T. M. Simmons, the former manager of the hotel, as having fired the building, and he was arrested on the

CHARGE OF ARSON.

The motives alleged for the act were revenge for his removal and a desire to conceal a shortage in his accounts. The evidence was purely circumstantial, and the defense submitted the case without the production of a witness.

READING, Pa., June 25.—The Berks County grand jury, which has been investigating frauds among the tax collectors, to-day returned bills of indictment against eleven collectors, all prominent citizens, for misappropriating and misusing public funds, aggregating $30,000. About thirty others will in all probability be indicted.

NOT CRANDALL.

BUFFALO, June 25.—Detective Curtin, who started a week ago for Salem, Oregon, to identify the man arrested there on the suspicion of being Bryant B. Crandall, supposed to have committed suicide at Niagara Falls, but reported to be alive in the west, telegraphs that the man in custody is not Crandall.

GALVESTON, June 25.—A dispatch from Eagle Pass to the *News* says: Intelligence was received here at a late hour last night, that a sanguinary conflict was in progress between the river guards and the smugglers at a point 15 miles below Piedras Negras in Mexico. The conflict is still in progress. A scouting party of river guards and police numbering 25 men surprised a band of about

TWENTY SMUGGLERR,

well armed, with a cavalcade of twenty pack mules. The smugglers at once showed fight and at the first volley two guards fell dead. The guards fell back and dispatched a courier for reinforcements. The smugglers fell back toward the Rio Grande with the evident purpose of crossing the river to the American side. The smugglers in their retreat are keeping up a desultory skirmish with reinforced guards, who are pressing them in the rear. A courier arrived in Piedras Negras late this evening from the scene of the action and reports the fight still in progress and one more guard killed. The loss of the smugglers is not known.

WASHINGTON.

Civil Service Affairs—Land Entries Canceled, Etc.

WASHINGTON, June 25.—The secretaries of the local civil boards at several of the larger cities called here to confer with the Civil Service Commission with a view to establishing a uniform system of examinations throughout the country and to exchange views upon questions affecting the civil service system, concluded their conference this afternoon. One of the most important questions discussed was the one of amending the present rules, so as to provide for the examination and marking of papers of applicants for positions anywhere in the customs or postal service by the present central board of examination located in Washington, enlarged by a permanent detail of one or more

EFFICIENT OFFICERS

from each of the several of the more important local offices in the country. It is claimed that by this system of examining papers, uniformity in marking and greater promptness would be secured, and that it would relieve the system of all the suspicion of favoritism. Mason, the secretary of the New York postoffice board, and Donovan, of the Chicago customs house, were appointed a committee to present in writing the views of the secretaries upon this subject.

The acting comptroller of the currency has received a telegram from Bank Examiner Sturgis saying that the affairs in Chicago have resumed their normal condition and that the management of the American Exchange National Bank is honest and reliable and its depositors well protected.

COMMISSIONER SPARKS,

to-day, took the necessary preliminary steps to cancel fifty-five desert land entries in Wyoming Territory, aggregating in area about 35,000 acres. The commissioner, in his letter to the register and receiver at Cheyenne, states that the final proof in all of these cases is substantially the same, and is to the effect that by means of ditches already constructed, an ample supply of water is at hand to properly irrigate the lands; that the claimants own the right to the water thus secured and have never parted with their interest in the land thus reclaimed and have never agreed to do so. A special agent of the general land office, upon investigation, reports

THE FOLLOWING:

"Upon a majority of the entries no ditches that would carry water had ever been constructed, while the few ditches that have actually been constructed never had been utilized. A survey of one large and several smaller ditches was made and plow furrows made in many places to show the line of surveys, but no actual, bona fide ditching was ever done by the claimants, nor by any one for them. All the ditching that was done was of the most shadowy nature and was not substantially useful nor intended to be so. The land has not been reclaimed nor irrigated to the slightest degree in any one of the fifty five cases enumerated, and was, at the date of investigation, in the condition it was at the time the entry was made. The Goshen Hale Ditching Company and the Union Cattle Company are

KINDRED CORPORATIONS,

doing business in the Territory of Wyoming, and the officers of the latter are also officers of the former. The 'Ditching Company' had in hand for itself and the 'Cattle Company' the construction of a system of ditches with which to irrigate these entries, but at only one point along the whole line of thirty-five or forty miles has a ditch ever been constructed so as to be able to carry water, and even there it has not been utilized. At many points where cuts of from four to eight feet were required by the survey, a cut of only one foot is made, and where fills are required none are found. The surface line of the ditch presents the same general appearance, that is, a one-foot cut throughout its entire length. Again, where the

GROUND IS ROCKY

no attempt was made beyond a single plow furrow to mark the line of the intended ditch. Where flumes were required to span the 'gullies and gulches no flumes are to be found. It is evident from the nature and character of the work done that these skeleton ditches were made solely for the purpose of proving up. What was done was at the instance of Thomas Sturgis, president of the Goshen Hale Ditching Company and the officers of the Union Cattle Company. At the dates of final proof, it was known by Sturgis that the ditches so called, were not capable of carrying water on to the land. While each entry stands alone on the books, there is a connection between them all, and it lies in the fact that each was made in the

INTEREST OF ONE

of the two companies named or some officers or members thereof. Of the 55 entrymen, seven live in Wyoming, seven in New Jersey, 30 in New York and 11 in Massachusetts. Inspector Powers went to New York, New Jersey and Massachusetts and interviewed a number of the entrymen. The information thus gained shows that Sturges procured the making of the entries. These foreign entrymen made entries merely to oblige a friend and never considered they actually had any interest in the lands nor have they any individual water rights. They signed papers they did not even examine or know the purport of simply by so doing they could serve a friend, and not one of them ever anticipated any remuneration for so doing."

RAILROAD LANDS.

In response to a rule of the Secretary of the Interior, issued the 25d ult., on the land grant railroad companies to show cause on or before June 27th why the several orders of withdrawal from the settlement of lands within their indemnity limits should not be revoked and the lands embraced therein restored to settlement, the Northern Pacific Company filed an answer. The rules set forth that the records of the general land office show, in respect to the several withdrawals specified within the states and territories therein named, that the Northern Pacific Company among others has either made selections of all the lands to which it is entitled or has selected all liable to such selection. To this statement the

COMPANY ANSWERS:

"There is only one limit to indemnity lands and that is ten miles each side of and beyond the granted sections. This limit line of the grant extends along the entire line of the road from terminus to terminus, and it can make no difference whether it is less in Minnesota or Washington Territory, or whether it be greater or less in one than others, for the grant is common to the whole road and not to the road in Minnesota or the road in Washington Territory, and the losses are likewise common to the company, and so the indemnity land is equally common to the whole road and given to supply those losses."

So the second rule of the same date entered among others upon the

NORTHERN PACIFIC

setting forth that the company has not informed the department to what extent it was entitled to the lands in its indemnity limits and that ample time has been given it to assert its rights, hence no sufficient reasons exist for longer continuing to enforce the several orders of withdrawal or that a certain time should be fixed within which its rights should be exerted and that the lands to which the company is entitled by the indemnity limits should be restored to the settlers, the company in its answer sets forth that it has thus far promptly asserted its right to the land within its indemnity limits to the extent that the action of the government and the land department will permit, but it can go no further until the government surveys the

REMAINING GRANTED

and indemnity lands and no faster than those surveys progress; that until the completion of the surveys on the sections in the granted limits and the adjudication of the rights of the company thereto, neither the company nor your department can definitely determine to what extent it is entitled to lands within the indemnity limits; that these are sufficient reasons for continuing in force several orders of withdrawal affecting its lands, to which, however, may be added the right guaranteed to the company by Congress in its charter, that "it should have indemnity for all the lands disposed of prior to the location of the road."

Faceache is cured by St. Jacobs Oil. Its powers are marvelous. Price 50 cents.

SIMMONS LIVER REGULATOR

DYSPEPSIA

Up to a few weeks ago I considered myself the champion Dyspeptic of America. During the years that I have been afflicted I have tried almost everything claimed to be a specific for Dyspepsia in the hope of finding something that would afford permanent relief. I had about made up my mind to abandon all medicines when I noticed an endorsement of Simmons Liver Regulator by a prominent Georgian, a jurist whom I knew, and concluded to try its effects in my case. I have used but two bottles, and am satisfied that I have struck the right thing at last. I felt its beneficial effects almost immediately. Unlike all other preparations of a similar kind, no special instructions are required as to what one shall or shall not eat. This fact alone ought to commend it to all troubled with Dyspepsia.

TESTIMONIALS:

SALT LAKE CITY, March 26, 1886.

Rocky Mountain Churn Company,

GENTLEMEN:—We have carefully examined your Patent Churn, and take pleasure in stating that we believe it is one of the best inventions in that line ever brought before the public, and we have no doubt but that this churn will commend itself to every practical farmer and dairyman as being a great invention and labor-saving machine. In fact we cannot speak too highly of it.
