

Manager Madsen Says Plant Will Be Built and Operated During Present Year.

THE IONA MINE.

NEW MILL FOR

6

# ENCINEER TO VISIT THE CAMP.

To Select a Suitable Site-The Big Vein of Milling Ore-Shipment From the Century.

The management of the Iona Mining company of Park Valley is preparing to build a mill at that property and an engineer will leave for camp in the near future to decide upon a site preparatory to drawing up the plans. C. J. Peter son, superintendent of the Century mine, who came down from Park Valley last night, has no hesitency in saying that the Iona is developing into a bonanza and that it may yet prove to possess the merit that is credited to the Century.

Some extensive bodies of milling ore are being developed, which are similar in character to those found in the Century, while the values run very much

Manager Madsen said today that he

hopes to have the new plant installed and in operation before the late fall. Mr. Peterson says the ore body re-cently encountered has been cross-cut for a distance of 25 feet and there are yet no indications of the hanging wall. yet no indications of the hanging wall. A shipment of concentrates from the Century mine will be forwarded to the local market next Sunday. On the same car will be eight tons of high grade galena ore, which, the superintendent mays, will assay 65 per cent in lead, 45 ounces in silver, and \$6 in gold. This, he declares, is the first crude ore ever shipped from the Park Valley district. Mr. Peterson will return to camp Mr. Peterson will return to camp again tonight.

#### FORENOON ON 'CHANGE.

#### Con. Mercur Active and Higher-The Closing Quotations.

There was more business transacted on the mining exchange today and the on the mining exchange today and the tone of the market was somewhat bet-ter than it was yesterday. Con. Mer-cur was in better demand and higher. Century opened with a transfer at 71½, with the closing sale marked a half a cent down. Tetro was offered at 30 and up to 30% cents, and the stock was taken as rapidly as presented. Da-ly-West brought \$23,75 on the open board.

board, The closing quotations and sales were as follows:

## CALLOW'S BUTTE SUCCESS.

Has Instructions to Install His Own Dressing Devices for M. O. P.

J. M. Callow, the well known me-chanical engineer, has returned from Montana after a month's absence from home during which time he has been miking some tests with the ore dress-ing devices of his own patenting at the works of the Montana Ore Purchasing company, of which James W. Neill is general superintendent. The result of the tests made there has

The result of the tests made there has roven entirely satisfactory and, in emphasis of this, Mr. Callow has reemphasis of this, Mr. Callow has re-ceived instructions to proceed at once to equip the mills of the M. O. P. ac-accordingly. The first order calls for several sets of his submerged screens, sufficient to take care of 750 tons of cre daily when crushed to 40 mesh. There are to be 30 tables and 60 set-tling taaks installed in the slimes de-partment: 36,000 pounds of steel will be required in the construction of the tanks alone. It will require several weeks' time to get the order filled. Mr. Callow said today that at least a portion of the order would be filled by Salt Lake machinery houses.

#### NEVADA OIL LANDS.

Interesting Situation Brought Up from Churchill County.

An interesting situation has develop-ed in the recently discovered oil fields in the Carson sink, Churchill county, ed in the recently discovered oil fields in the Carson sink, Churchill county, Nev, says the Mining & Scientific Press. Prospectors, quickly following the discovery of oil, located a large area of the adjacent lands under the placer location act, as provided by law. The hydrograhic branch of the United States geological survey is engaged in extensive reclamation of desert lands. This is the outgrowth of the investiga-tions made during the early years of the survey, when under the direction of J. W. Powell. These projects are lo-cated throughout the western states. The lands which it is intended to re-claim by irrigation methods have been withdrawn from all entry except under the homestead act, it being the desire of the government that these lands be taken up in small farming tracts, not exceeding 160 acres for each person who may make such entry, and the tract in Nevada where oil was recently discov-ered chances to be within one of these reclamation areas. As the value of the land for the oil it may produce is un-known, and as without irrigation it is practically valueless for any other pur-nose the government may make such entry in the prime of the propractically valueless for any other pur-pose, the government may possibly anake an exception in this case and al-

to Boston capitalists for \$125,000, of which \$25,000 was paid down. The property has been opened up by a shaft 100 feet deep, the jedge being eight feet wide and averaging \$150 per ton in gold, but rich specimen rock assaying up, the the upongends is repeatedly. the thousands is repeatedly

MUCK, The O. K. mine which is owned by W. J. Sinclair, Geo. Duncan and Per-kins & Thurman has been bonded by W. Thatcher of Los Angeles for \$80,-000 and a substantial cash payment made. The shaft on this is 19 feet deen the lades being four focus wide deep, the ledge being four feet wide, averaging \$200 per ton. There are also streaks in it carrying from 5 to 19 per cent opper and 5 to 25 ounces silver. The first shipment from this mine will go to El Paso next week. "Billy" Sin-chair has some very beautiful pieces of ore from both mines, showing free gold which he says is not specimen rock. The formation of the district is porphyhy, with some syenite and diorite, Con. Crooks returned there on the 23rd inst. to attend to his numerous inter-

#### ONE CALL A DAY.

## Afternoon Call of Mining Exchange May

Be Discontinued. The question of the advisability of losing the Salt Lake Stock and Mining Exchange during the summer months has been brought up and although busi-ness is very lax at the present time, the proposition does not seem to meet with popular favor among brokers. Many believe it would be suicidal to take such a step, as such action would tend to drive away what business there is and outside interest in local stocks would

outside interest in local stocks would naturally enough, vanish. There is a strong feeling among the members of the exchange, however, that all the business can be done with only one call a day during warm weather, so it may be decided to dis-pense with the afternoon calls.

Disastrous Mine Fire.

A Prescott, Ariz., dispatch says: Fire at Thackberry, Big Bug district, deatroyed the hoisting plant yesterday, and restuled in the probable death of three miners. The hoist house was lo-cated directly over the shaft, and when the fire occurred two men were at work in the mine and were completely dut off by the fire.

Help was summoned from McCabe herp was summoned from Accase and Mayer, and the fire extinguished. One man, in his effort to go down into the shaft, fell 200 feet and is supposed to be dead. As no communication could be had with the two miners, they are

be had with the two miners, they are also supposed to be dead. At a late hour last evening rescuers had been unable to get into the shaft og account of the deadly fumes, but a hose has been sent down, through which air is being forced.

#### To Gather in Colorado.

Georgetown, Colo., June 2,--Announce Georgetown, Colo. June 2.—Announce-ment was made today that the joint summer school of mining of Co.-lumbia university of New York, the Roston Institute of Technology, the Lawrence Scientific school of Yale, and the State School of Mines of Gold-en, Colo., will be held here. The Dives-Pelican Seven-Thirty group of mines will be the principal scene of opera-tions.

The decision was made today Prof. H. S. Monroe, professor of min-ing in Columbia university, who is here, accompanied by Inspectors J. N. McClellan, H. R. Stewart and E. L.

Kurtze. The summer school will open June 11 upon the arrival of 40 students from Columbia university and 20 from 1 of sport and travel.

Harold Scheerer, at the head of the faculty of the Freiberg school of tech-nology, accompanied by Baron von Grabowsen and several others, have arrived in the city and will visit the mines, mills and smellers for the purpose of gaining knowledge of advanced meth-ods. The visitors expect to remain sev. eral days.

Preparations are under way for the commencement of work on the 800 level of the Honerine mine at Stockton. This level has been drained by the big tun-nel. The retimbering of the intermediate shaft will begin right away. Man-ager Snyder says, and the work of sinking to the tunnel level will soon be under way. The arrival of the machin-cry for the new sampler has been delay. ed. Word has been received that it will be shipped from the east until next Monday.

Prospectors along the line of the San' Pedro are sending in some fine speci-mens of ore and are enthusiastic over the spectrum of the sender of the sender to be confined to any particular locality, but is found at different points along the route. Gold, silver and cop-per seem to be plentiful, and some fine samples are being picked up in the va-rious localities. The advent of the rainforad has made exploration possible in southern Nevada, and it looks as if some good mining camps would be es-perdended.

W. G. Clark of Centerville, Ia., presl. dent of the Interstate Mining & Mill-ing company, went to Gold Basin the first of the week with his brother, Supt. first of the week with his brother, Supt. Clark, to inspect the property. Work on the Interstate mill is now being pushed with every man at work that can be used. It is the intention of the management to have the mill in opera-tion by Aug. L.-Grand Valley Times. W. H. Brevoort arrived from New York yesterday and reports having dis-posed of his interests in the Goid Roads mine in Arizona. He expects to leave for Oregon in a few hours to look over the Greenback mine, in which he is in-terested.

terested.

## Securities Company in Trouble.

St. Louis. June 2.-Suit for a receiver-ship was filed in the circuit court today against the Colonial Securities com-pany of St. Louis by three of the bond-holders, who allege that the company is insolvent, with \$1,500,000 liabilities and \$576,963 assets.

VALISE BOAT.

A boat large enough to carry six persons may be carried in a valise or corner of a trunk. This is because the principle of the pneumatic tire has been applied with such success to boat building. These boats are of two kinds either of rubber cloth inflated with air and divided into two compartments, or

and divided into two compartments, or of a series of inflated tubes coiled lengthwise. These are fitted with pneu-matic seats, and the oarlocks are buck-led on the sides. When deflated they are reduced to the smallest conceivable weight and compass, and the process occupies only a few moments. Experiments prove that these craft will not founder in the heaviest seas. They are so buoyant when filled with air that they will float a weight of several hundred pounds, while the rubber of which they are constructed is absolutely proof against puncture. This invention promises an entirely new ers in boabulding for purposes of sport and travel.

Chicago, June 3.-July wheat opened 14 to 54 to 54256 higher, at 8712 to 8754. After selling off to 8758, the price steadied around 8758. July later declined to 871408714, but adaround 57%. ## THE WAR GOD OF JAPAN.

Hachiman, the god of war in Japan, strange to say, loves the dove, a bird sympolical in the west of peace and not of war. Go to any temple or

not of war. Go to any temple or shrine where Hachiman is worshiped and you will find a great many doves cooing either on the roof of the temple or on the ground below. The tablet on which the name of the god is inscribed begins with the idograph of "Hachi," the two strokes of which are intended to pleture a pair of doves, the female on the right and the male on the left, Doves are Hachiman's favorite birds, meissengers by which he sends good

Doves are Hachiman's favorite birds, messengers by which he sends good tidings of peace and love. Our Hachiman never fights merely to satiate his thirst for blood; he fights battles for peace; he never makes sac-rifices of lives so that he may glory over the conquered. He is a great ene, my of tyrants and oppressors; he is ever ready to help those who are op-pressed and persecuted; he fights wars of justice; he wishes to see justice done on all sides; his banners bear inscrip-tions conveying the thought of right-eousness and justice.

tions conveying the thought of right-eousness and justice. Miserable will be the fate of any who ventures to violate the peace and wel-fare of the world; for Hachiman, in his righteous wrath, will crush down such a one under his mighty feet. Yes, our Hachiman loves peace.—U. Sasaki, in Chicago News.

# WHITE ANTS USEFUL.

A white ants' nest is about the last thing in the world one would decreate to be of practical service to mankind, yet in western Australia white ants and their nests are put to a variety of company uses conomic uses.

In the first place, the aborigines sometimes eat the ants, and there are even a few white residents who have tasted them for the sake of experience, and say they are not bad. But it is not a habit with the aborigines to eat the insects; they prefer to devour the moid out of which the ants build that nests.

capital ovens are frequently impro-vised by the Australian prospector out of these white ant molds. They make a solid floor, almost like cement, for the settlers' huts; and in the township of Derby, in western Australia, they have been turned to profitable use by being rolled to as a fon have on the being rolled in as a top layer on the public roads.

through sleeper leaves. No hasty breakfasting; no hurried packing; no running to catch early morning street cars.

A good time to arrive in St. Louis is at 7:19 a.m., when the Burlington Route's daily through sleeper gets there. Streets not so congested; hotels not so full; places not so hard to find.
