REVIEW OF WOOL MARKET

Boston, Mass., March 28.-The Amerton Wool and Cotton Reporter will say tomorrow: 'The wool market has ruled weak and lower, especially on fleeces. There has been a fair business done. but it has been generally at the ex-pense of quotations, although attempts to break the market on certain lines of Territories has not met with the meaeure of success anticipated. There can be no denying the fact that the fleece market is on a lower level than current quotations for the previous week would indicate, and generally speaking it is difficult to move any lines of wool ex-

The London sales closed last Saturday at a decline variously estimated at from 74 to 15 per cent, except on such of taking, which apparently show very little decline. The withdrawals aggregate more than 100,000 bales, and the purchases for American account are

given at something like 100,000 bales.

"The sales of the week in Boston amounted to 2,075,000 pounds domestic and 307,000 pounds foreign, making a total of 2,012,000 against a total of 3,-595,000 for the previous week, and a to-tal of 3,768,000 for the corresponding

"Sales since January 1st amount to 11.015,000 pounds, against 44.832,500 pounds for the corresponding time last year."

WALL STREET MARKET.

New York, March 29 .- Wall street: There was a demand for stocks at the opening which lifted prices in a majority of cases to a higher level. A violent break in sugar, and profit-taking at some points in the railroad list, however, gave an irregular appearance to the market. Sugar dropped to par, with a fall of 5% on the opening sales, and rallied only a point. Southern Pacific was most affected by profit-taking.

showing a loss of nearly a point. Northern and Union Pacific advanced 1 to 11/2. Sugar bounded to 101%, but a later raid forced it down to 981/2. The general list then ran off sharply, Prices gave way rapidly all round in the second hour, declines from the top extend-ing over a point in many active railroads, and exceeding that in the indus trials. Sugar was thrown over in large blocks and there were heavy offerings of People's gas and the tractions. A rally of over a point in sugar just before noon caused a firmer tone all through the market.

The bears made a raid on tobacco and local traction stocks in the last hour, forcing them down 2 to 4 points and uncovering stoplosa orders. whole market reacted in sympathy. Tobacco railled 1½, and steadled the market, and prices began to retrace their course to a higher plane. The closing was quiet and steady at mixed net changes.
The bond market was irregular and business was large.

CONTRACTS FOR BINCHAM SMELTER

The Stock Advanced on the Ex- Frantic Rush Today Carries Them Utah Light and Power Company Will Supply Power.

To Carry Fames Above Vegetation-Smelter to Cost \$200,000 - Value of Cave shipment.

The Bingham Copper and Gold company closed contracts today for electrical power and equipment, through W. H. Nutting, under whose direction the new smelter is to be erected. The contract for the supply of power was awarded to the Utah Light and Power company, while the General Electric company secured the contract to supply the 300 horse power motors and the necessary transformers and general equipment.

Within the next few days Mr. Nutting says the work of excavating for the foundation will begin. As far as possible Mr. Nutting intends to turn every benny among Utah mechanics. The smelter site has not been announced but it is thought that every-thing will be in shape for the an-nouncement of the site tomorrow or

The company has now let the four principal contracts. Besides those men-tioned above the Denver Engineering Works company was awarded the contract for three matting furnaces each of 100 tons capacity. The furnaces are to be built after designs worked out by

Mr. Nutting.
What is probably the most important contract was recently let to the Gil-lette-Herzoz company of Minneapolls, who will erect the building of iron and also supply the corrugated iron for the roofing. As far as possible wood has been eliminated in the construction of the building. The Minneapolis company will supply the steel floors of the furwill supply the steel floors of the fur-nace room and their contract also calls for the erection of the highest smoke stack in the valley. This will be built of iron and is to be 200 feet high and will have a diameter of 12 feet. The object in having the stack so high is to raise the fumes beyond the reach of vegetation or people in the vicinity of

Mr. Nutting says that if all goes as anticipated the smelter will be in com-mission at the end of the year. The cost cannot be figured to a cent but it is stated that everything will be in-stalled for \$200,000.

With the main contracts now off their hands Mr. Posey left for the coast yesterday and was followed by Mr. Weller today, while Mr. Nutting re-mains to look after numerous details yet to be arranged.

CARRIES GOOD VALUES. Shipment from the Cave Mine Brings \$23.77 Per Ton.

The shipment from the old Cave mine, which lies about eight miles from Milford was sold on yesterday's market for \$23.77 a ton. The assay returns showed the presence of ½ ounce in gold, 23 per cent lead, 9 ounces silver and 29 per cent iron. Two more cars are on the way to the sampler south of the city, which are expected to show equal-ly gratifying values. This old producer, which has a record of several hundred thousand dollars, has shipped no ore for several years, with the exception of one small lot sold about six months ago.

HONORINE STILL SINKING. Shaft from Tunnel Level Now in Water About 25 Feet.

J. C. Reynolds came in from Stockton ast evening and reports the work of sinking still moving along at the Hon-orine mine in that district, under the di-rection of Mr. Raddatz. The shaft from the tunnel level is now down about 170 feet. It has entered the water a distance of 25 feet. As is known, the purpose in sinking is to strike the veins of their dip below the water lipe and prove up their values. The Honorine has produced heavily above the water, and if the present experiment opens up rich ore under the water it will result in a new era for Stockton. Mean-while the present expensive attempt to get depth is being watched with interest by mining men generally.

HAS UNLIMITED CREDIT.

William T. Easton Will Put Some Money in Utah Copper Mines.

With an unlimited letter of credit, good anywhere in the country, William T. Eaton, who owns "a little in the mining line," in the vicinity of Cripple Creek, passed through Denver yester-day en route to Salt Lake City, where he may put \$50,000 or so into some cop-

Mr. Eaton spent a few hours at the Markham, but he didn't have much to say. Why should he, with that beautiful little letter, was the comment of those who were in the secret. The mining man said the outlook for Utah copper properties was good, and he would probably have less money but own something from which plenty of the where withal would soon come. The copper claims are some distance from Salt Lake. Just where was not said. As yet they are not very much developed, but the investigations have developed large bodies of very rich ore. The present owners of the property have put the net price at the modest sum of \$46,000, and it is this sum that Mr. Eaton will invest if the claims jus-

tify his present expectations.-Denver Items from Uintah County.

John Pope is down from the Dyer mine, says the Vernal Express. He reports a new strike in that mine in tunnel B, from which they had removed a rich body of ore during the winter, all the ore coming from a level floor in leaving a smooth surface Last week, the miners in prospecting for ore sunk a drill in the bottom of the tunnel. After going through six inches of tale they encountered a body of high grade copper ore, equal to any heretofore discovered. They drilled six feet and did not go through the ore. This is the lowest level on which ore has been encountered, and Mr. Pope feels confident that the main vein of the Dyer is below the ore bodies that the Dyer is below the ore bodies that they are now working. He has been working in the mine this winter in the day time, and keeping store mornings and evenings. No snow at the mine, so he says, and the prospect for water next summer is very silm indeed.

S. M. Brown got home last Sunday night. He has been as far east as Denver and returns much improved in

health. He confirms the report that he has disposed of his entire interest in the Bromide mine, to Kansas City par-He held an eighth interest in

property. The amount received for it he would not disclose.

Adelbert Searle returned Thursday from the Carbonate Mining district, where he is working on Jesse Knight's tunnel. They are now in about 700 feet. His son Bert Searle and Charles Shanna are working with him on the tunno are working with him on the tun-nel. The character of the rock in the tunnel is changing.

WAYNE COUNTY MINES.

A Gold Mine Found Through the Dream of a Little Boy. Special Correspondence

Thurber, Wayne Co., March 24.-There is a good deal of excitement here just now on account of some promising mines being discovered in the vicinity

No less than three copper mines, one lead mine, one magnessia, and last, but not least, a gold mine have been opened up. The discovery of the gold mine was somewhat, romantie. A little boy dreamed that he found gold in a crevice of rock five miles from here. He told his father of it, and he went out and prospected on the ground and near the prospected on the ground and hear the curface found ore that assayed is in gold and for every foot he goes down the ore seems to improve at the rate of about one dollar per foot of depth. All of these mines could undoubtedly be worked at a profit if a smelter was built here, and there seems to be every probability of that becoming an accomplished fact before very long.

For Coconina Smelter. C. H. Nelson of this place has been engaged to superintend the forwarding and transfer of a lot of machinery and other freight from Richheld to a place about twenty miles east of Nanab, 110 miles from Marysvale, for the Coconina Smelting company. The freight will weigh about 100 tons, and will employ several men and teams to transport it. Mr. Nelson will work for the company in superintending work after he has completed the delivery of the machin-

Two wagon loads of pipe have been forwarded and the other freight is looked for any day.—Richfield Reaper.

Butte and Bingham Prospectus. The Butte and Bingham Copper Mining company has issued a neat prospectus of the company's Bingham proper-ties. The company has 1,000,000 shares Nichols of Butte, Mont., is president; Philip A. Garner of Butte, Secretary, and G. Stevenson, assistant cashler of the First National Bank of Butte, is

treasurer. The company owns by purchase the Snowbird quartz mining claim, located in the town of Bingham. The property is said to be admirably located for economical mining and the veins can be worked to a great depth by tunnels. The management is said to be driving a tunnel on a 6-inch vein on the Snow-bird claim that assays 90.8 ounces silver, \$3.40 gold, 11.7 per cent lead, showing ore of a total value of \$101.90 per ton. The tunnel, it is said, will shortly be completed to the intersection of the value which while sive nearly 1.20 feet. veins, which will give nearly 1,200 feet on the main vein and large bodies of ore will then be worked which will give greater values than the above assay. The stock is said to be selling at \$1 a share and is represented as being one of the safest investments offered to the public. The company proposes to erect a concentrating plant with the money derived from the sale of 200,000 shares of treasury stock. Prof. C. Sullivan is manager of the concomy with his office at 7 Water street, Boston, Mass.

MINING NOTES.

P. T. Farnsworth was visiting the Bullion-Beck at Eureka today. Prof. W. H. Tibbals was expected to reach Buffalo, New York, today.

A car of ore was on the market today from the Montezuma of Bingham. The vein is said to be encountered west of the porphyry in the Bunker Hill

at Stockton. L. H. Curtis, who has just visited the Red Wing, reports that Bingham prop-erty to be looking well. The leasers on United States prop-

erty in Bingham reported on the market today with a car of ore. A car of ore was on the market today from the Glasgow and Western Ex-ploration company's Nevada mines.

Mr. W. Choate, oneo f the purchasers of the Ophir mine at Stateline, arrived in the city from Detroit, Mich., last night. The Taylor-Brunton sampler report-

ed three cars of ore from Bingham, one from Nevada and seven from Tintic to-

An assessment of 9 cents a share has been levied by the Utah Guano com-pany, with which to meet the expenses of litigation. Charles C. Parsons, counsel for the Boston Con. and other properties in which Samuel Newhouse is interested.

is in the city from Denver. Manager George Moore, of the Con. Kansus City Smelter and Refinery's sampling rooms left for the south last night, on a visit, it is said, to Stateline

J. H. Clive, Will Orr and Mr. Richmond, of the Salt Lake Hardware com-pany, were scheduled to leave for the Charm mine in the Detroit district this evening.

The Lower Mammoth will now use electricity for motive power. A con-tract to that effect has been signed with the Telluride Power company, extending over a period of two years,

Word received today from Wm. Dix states that the tunnel in the Elamigo property at Park Valley is now in 345 feet and the interception of another lead is looked for in the next few days.

Four cars of ore from the Petro of Bingham, one from the Galena of Fish Springs and seven from the South Swansea, the shipment of which was chronicled in a former issue of the "News," were sold on today's market.

Fred Mitchell, who has been superintending work at the Mascotte at Bing-ham, expects to visit the New Pass gold mine in Nevada tomorrow. A new mill for this promising property is likely to

J. C. Reynolds expects to resume sinking on Monday in the Rush Lake group of claims near the Bunker Hill at Stockton. The shaft is down 100 feet and a fine copper stain is said to be entering the formation. entering the formation.

A letter from Tintle states that the A letter from Time states that the ore is stronger in the winze and of better grade than that encountered heretofore, in the West Morning Glory.

A meeting will be held tonight and a contract let for 100 feet of sinking.

R. C. Chambers came down from the Park and reports everything moving nicely at the Ontario. Shipments have been lighter for some time past, but more ore is being milled. The quarterly dividend will be announced from New York in the next few days.

J. F. Cowans has returned from Denver, where he went to test some ore from the Old Joe and Kenstone and

BEECHAM'S 10 cents and 25 cents, at all drug stores.

Strawberry groups in the Pony district, Montana. The ore was treated on Cam-met tables and a high percentage was

Beaver County Blade: Col. Carver was in Frisco Tuesday and reports work progressing rapidly on the Copper Mountain incline. They have reached a depth of 240 feet and, although they have not encountered water, they are in sulphides, which indicates a normal water level, but which has sunk to a low-er level on account of the long continued draught. Mr. Carver is very em-phatic in his declaration that the Copper Mountain is the greatest mine in southern Utah.

A dispatch from Belt, Mont., to the Anaconda Standard says: "D. Spogan has received word that a Salt Lake mining company that is doing some extensive development and prospecting work on the middle fork of the Big Blackfoot, near Marysville, has encountered an im-mense body of rich copper ore in a mense body of rich copper ore in a claim bearin githe same name as the famous Anaconda. The development work is being done under the direction of Fred Decker, a mining expert of Utah. It is said he has expressed confidence that the property will become one of the most valuable mining propositions in the State."

DENV ER STOCKA AN NOTES.

The efforts of politicians, land-grabbers and corporationists to stir up dissension among the stockmen on the land leasing question will not succeed. That such an effort is being made cannot be doubted, but Western stockmen cannot be worked in that way. They are intelligent enough to settle the land question for themselves, and they will all object to putting it into poli-tics. The great majority of the stock-men realize that the time is coming when some change in the present land when some change in the present land laws must be made, but they do not propose to be hurried, and when the change is made, the stockmen themselves will be there and have a hand in making the change. There is little question but that whatever political party may happen to be in power when that time comes will gladly do the bidding of a great body of citizens like the stockmen of the West, and when a bill is presented it will be backed by the solld support of the Western stock-

One set of stockmen in Colorado have had their eyes opened to the benefits to be derived from a separate range, and one on which they have assured protection. Having secured from the State 21,000 acres of grazing land in Canejos county, they are now ne-gotiating for the purchase of 125 pure-bred bulls. These men are in the catbred balls. These men are in the cattle business to make money, and they
are willing to spend money to make
good cattle. They would never have
thought of improving their herds so
extensively and expensively had they
not retured this separate range. Who
will blame them for wanting the exclusive use of their purebred animals?
The Colorado veterinary sanitary
board has concluded to remove the embargo on Mexican cattle, and such
stock will henceforth be admitted into
the State when a clean bill of health
is furnished. This action was taken at
a meeting of the board Saturday. This
is a business proposition with the is a business proposition with the stockmen, who have secured the order.

One strong reason was that Texas growers have persisted in demanding strong prices for their stock, and the Mexican stock can be bought cheaper. Fort Collins Express, 24th: During the present week Robertson & Mar-shall sold thirty head of young helfers to James A. Brown and several head to Henry Miller. A man named Hyde, whose residence is Salt Lake City, and who owns quite a herd of cattle near New Windsor, sold some 200 head to parties at Sterling, Colo., and they were shipped to that point on yester-

Rifle Reveille: Some of the people who held their hay for big prices were fooled and are now willing to sell for a very low price. The very mild open winter made the demand for hay very

light compared to other winters. Denver Stockman: "It looks like pure-bred cattle are going higher," said Mr. Woods, of the Woods Investment "We are supplying all demands from our customers now, but we are finding more and more difficulty in finding enough choice cattle to supply the demand. Shorthoons and Herefords are mand. Shorthorns and Herefords are selling like hot cakes, and those who intend buying this spring should get in their word early. Those who wait until June are going to find high prices and the tail end to select from."

PERFECT DINING CAR SERVICE
TICKET OFFICE 103 West Second South
street (Postoffice corner).

GOOD TRACK ALL THE WAY.

Not good "in spots," or here and there, or for stretches of fifty or a hun-dred miles, but good all the way-right straight through from Denver to Chica-

go and St. Louis.

Heavy steel rails—2,400 ties to the mile—plenty of ballast. Over a track like the Burlington's, a speed of eighty miles an hour is perfectly safe.

Two trains a day from Denver to the East—the Chicago Special at 9.00 a. m.; the Vestibuled Flyer at 10.00 p. m.— Omaha, Chleago, Kansas City, St. Louis. Through sleepers daily. Ogden to Chicago via Denver and the Burling-

Tickets at offices of connecting lines. Ticket Office, 214 S. W. Temple Street, Salt Lake City.

B. R. WATSON, General Agent. R. F. NESLEN, Trav. Pass. & Freight Agent.

For Passengers or Freight A. NASH, GEN'L WESTERN AS'T, OMAHA, NEE

THE DENVER &

of the World.

The only line havior three daily Fast Express Trains and Dining Care between Grand Junction and Denver, This is the popular route to Leadville, Cripole Creek, Pueblo, Denver and all points

B. F. NEVINS, H. M. CUSHING,
