LETTER FROM ELDER WILLIAM WILLIS

24, Juan Baziar Street, } Calcutta, March 25, 1852. Beloved brother,-With feelings of great pleasure onter once again into the regions of description in relation to this Mission. In the first place, we have announced, and commenced the delivery of a course of twenty Lectures in our new Lecture Hall, which not twenty Lectures in our new Lecture Han, which has been attended by a numerous and highly respectable audience ever since. With the exception of two pious missionaries of the London Society, who hissed, and a youth who spoke and whistled during, and after the Lecture, all have been very quiet and attentive, and many have applied at the conclusion of each Lecture for the loan and purchase of tracts and also to enquire. Many native Baboos (gentlemen) have attended, and behaved like such in every respect.

The editor of the Citizen Newspaper has very

kindly inserted a letter from myself, and also Brother Joseph's article on Letter Writing, also a friendly letter concerning the Saints, from the peu of a mem-ber of the Church of England, who is attending the course, and will most likely be baptized very shortly

The Church now consists of twelve Luropeans and twenty natives, thirty-two in all; scarcely a week passes without administering the ordinance. The Lord is blessing us with love and unity, and the gifts

of healing, &c.
We now and then hear the low rumblings of the distant thunder of the sectarian ministers, provoked by the attendance of several of their flocks upon our ministry, and the circulation of tracts; as yet, the lambs of their flocks have not been enticed away by the wicked "Mormon;" so they (the missionaries and ministers) have not shewn their teeth.

DEAR Sin: —I have just returned from Iron Co., It is a general time of health. There has been but three deaths, (infants) during my stay of nearly one the brediren are determined to have from here in the course of a month or two. The futuace is completa new vein of coal, not so far up the Kanyon; the vein is from two to three feet thick, with a thin laykeys and their competitors of the upper 10,000: The er of stone between, but it is soft and they think it Mr. Cabet, Chief of the Nauvoo Icarians, has been their ability. Crops came in well, some very heavy cleaved by the French T. ibunals, of the accusations crops of wheat. The French Beet seed did not do well, consequently a small crop of beets has been the result. Some few of the brethren have desired to go to California, but have given it up. The brepleased, and on hand to go. All is well as far as I know, the prospect bids fair for Bishop Lewis to

have a large quantity of tithing grain.
