"THE JAWS OF HELL."-Some fornia of March 21practice of keeping houses of ill-fame, of importing young women from, the East under false pretenses, is still carried on quite extensively, and only occasionally the police succeed in rescuing some poor girl just as she lands on the ferry-boat, coming from the overland train. One of thy. the keepers of these dens of vice on Sacramento street expected two women from the East last night, having engaged them in New York and advanced the passage money to come out here. One of the women changed her mind at Reno and remained there. The other was met last evening on the Oakland boat by the as- our views upon this and many sistant landlady, who held her photograph in her hand, sent in advance from New York. As she approached the woman, Captain Kentzel noticed her movements, and stepping up to the young woman, inquired of her whether she was aware of the house she was going to and the life free, and enlightened upon the she would lead. The woman replied that earth. Democratic government is she had engaged in New York to come out here as chamber maid for a private family. On being informed that she was about to be taken to a house of ill fame, she said she did not want to go there, and placed herself in the charge of the Captain, who brought her to Chief Crowley's office, er republics for mutual welfare, each and the chief after, hearing her story, directed that she be taken to some respectable hotel for the night.

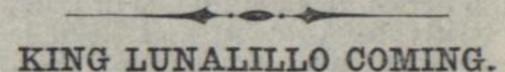

tween the federal and local courts in this Territory, until much of the public has come to believe that nostics of usurpation, as presented mixed, twisted, and snarled that cently quoted in the Senate of the is an utter impracticability, and that United States and are worthy of congressional legislation is absothe thoughtful consideration of lutely necessary to restrict and define the limits of the jurisdiction of the local courts.

The situation thus depicted is apparent rather than real. That there is a conflict is patent, but that conflict is not unavoidable. On the contrary it is manufactured for ulterior purposes, sought for and instituted without just cause. There isno plain, fundamental conflict. Such conflict as exists is merely technical and constructive, the technicalities being trivial and the construction far-fetched, and neither available except by a partizan, conspiring, revolutionary, or litigiously perverse spirit.

The Constitution and laws of the United States and the Organic Act and laws of the Territory give and define the jurisdiction of the courts, federal and local. Under these the local courts operate within a certain jurisdiction, fairly justified by the letter and spirit of the laws.

The conflict consists in the facts that the local courts exercise the jurisdiction thus conferred, and the federal courts seek opportunities to curtail and restrict the jurisdiction of the local courts, and confine them to the narrowest possible lim- him, to make a tour through the RESCUED FROM A LIFE OF SHAME .- The its. Of course this must be done for some manifest cause. The ostensible cause rests upon hairsplitting technicalities, the real cause, as is unavoidably inferred, is a very different one, and even less wor-In considering this subject, we must remember the kind of government under which we are living. If we were living under an autocratic, a despotic, an imperial, or even a monarchical government, other matters might be much modified in consequence. But we are not. We are living under a republican, a federal republican government, professedly the most liberal, government by the people. Republican government is government by representatives chosen by the people. A federal or confederate republic is a confederation or league of smallsnbordinate republic to be subject to the federation only in those particulars which are mutually agreed upon as essential to the good of the whole of the minor republics comprising the federation. The leading idea, therefore, not only of a democracy but of a republic, is selfgovernment, and of a federal republic, like this of the United States, local self government. With a proper regard to this distinguishing characteristic all legislation should be effected and interpreted.

stant, it will be inevitably interminable, so long as such a judge wields authority, unless and until the lower courts abjectly abdicate their proper position and leave the "superior" courts to exercise unlimited and unquestioned sway. This is the amount of the jurisdiction conflict in Utah, and the object of the special legislation so urgently pushed upon and sought for from Congress is chiefly to secure, by congressional enactment, such unlimited and unquestioned jurisdiction, a thing entirely foreign to any adequate idea of federal republicanism, and its promotion or adoption is utterly unworthy of any American citizen.

THE King of the Sandwich, not the Cannibal, Islands is coming to the United States, not however for the first time, so it is reported. The Washington Star says Gen. Sherman recently received several interesting letters from Major Gen. J. M. Schofield, who went to the islands a few months ago for the benefit of his health and other purposes. Gen. Schofield, having almost entirely recovered from his throat disease, expected to visit San Francisco by this time, though we do not recollect hearing of his arrival yet. The general expected to bring King Lunalillo (late "Prince Bill") with United States, in order to become more perfectly acquainted with the American people, for whom he professes to entertain great friendship; also, it is supposed, to study and more thoroughly understand the American theory of government of course not as interpreted by the judiciary in Utah), that he might know better how to judiciously reform his own government, and to endeavor to secure a more favorable commercial treaty with the United States, especially with a view to the reduction of the import on sugar, so as to operate advantageously to the sugar interests of the islands. It is to be hoped Lunalillo will come and will succeed in his endeavors, for his kingdom may be safely considered destined to become part and parcel of the dominant government of North America by and by, so that anything accomplished by judicious and neighborly concession for the growth, development, and increasing and permanent prosperity of the islands will only be so much put out at interest, which, with the principal, will redound to the advantage of the government here after a few years.

credit on the entire shipment and value.

Our producers are now brought in the market alongside of those of fine grain, vegetables and fruit in this Territory as can be produced in market here, they will for there is no care exercised in cleaning grain, in sorting vegetables and in selecting fruit, to send away, not only is the value of these articles depreciated, but discredit is thrown upon the Territory; and instead of our products being sought after as the best that can be obtained, they are received with hesitation and distrust. The day for slovenly, careless practices, which might have been tolerated in the past

It must be remembered that this was before the Credit Mobilier business was full blown. Had Horace lived till that time, there is no knowing what he would have said.

THAT INTERVIEW.
