

# ANVIL CHURUS STILL PRACTICING

Stocks on the Exchange Hammered Down  
For the Most Part—Big Business  
Done at Very Low Prices.

No reasons are given for it, but Daly-West was made to suffer today on the Salt Lake Stock and Mining exchange. The stock is now good for but \$22.00 in the bid column and is held at \$25.75 by owners. This is a loss of \$3.75 on the one side and an even dollar on the other. The company's treasury is well lined with cash, there is no indication that the customary dividend may fall in forthcoming, and the mine is reported to be in first class condition; but down went the stock and the bears succeeded in drawing out 280 shares at shameful prices, leaving this Pack City proposition in a condition of inertia. It is freely promised, however, that "she's going down," but why, this same sub rosa report fails to disclose.

On account of the litigation in which Grand Central is now involved a lively bear imagination may be excused in a fancied cause for depreciation, but the firmness with which the stock was held at \$4 by possessors of the same was a good indication of faith in the outcome and served the purpose of robbing the bazaar of its terrors. Indeed, when the firmness with which the stock was held at \$4 by possessors of the same was a good indication of faith in the outcome and served the purpose of robbing the bazaar of its terrors. Indeed, when the firmness with which the stock was held at \$4 by possessors of the same was a good indication of faith in the outcome and served the purpose of robbing the bazaar of its terrors.

Then here was Mammoth, Central's dispirited, equally silent in the trading, which was a loss of \$1.25 on Wednesday morning. The asked price, however, evened that up, for vendors wanted 25 cents less than the day named. Not a share went out, wrap any up for any such price and there was consequently a difference of \$1.25 between the would-be buyer and the man who didn't give a "continuation" whether he sold or not.

Then here was Mammoth, Central's dispirited, equally silent in the trading, which was a loss of \$1.25 on Wednesday morning. The asked price, however, evened that up, for vendors wanted 25 cents less than the day named. Not a share went out, wrap any up for any such price and there was consequently a difference of \$1.25 between the would-be buyer and the man who didn't give a "continuation" whether he sold or not.

At an average price of 11 cents Tesoro was a weak seller and barely made a 200 share for this stock as against \$1.25 bid on Wednesday morning. The asked price, however, evened that up, for vendors wanted 25 cents less than the day named. Not a share went out, wrap any up for any such price and there was consequently a difference of \$1.25 between the would-be buyer and the man who didn't give a "continuation" whether he sold or not.

Uncle Sam came in with a 74-cent suit of mail and brassy made a 200 share charge at the dragon, but the beast was "too many" for him and Uncle Sam was obliged to retreat step by step until the 74-cent line was reached and hostilities ceased.

Just think of 60 cents for California! But that's where it went to and the buyer averred that it wasn't worth that, but took it in "for a customer." Yankee Consolidated brought \$4 for a single 100 shares and was posted up at \$4.50 bid and \$4.85 asked. On Wednesday buyers indicated on the price list that they were willing to pay \$4 for the stock and holders said they wanted \$5 for it. Innocent spectators are thinking that perhaps the bottom of the mine has fallen through to China and that the Boxers have made it impossible to continue operations there.

However, no news to this effect has come from the mine and Dr. Franklin, although having been in San Francisco for a few days, is quite confident that the property may still be found in Tibet and that the workings are among the old ore bodies.

Ajax opened somewhat stronger in the sales this morning, commanding 78 and 79 cents, but it was pushed down to 74 before the buying was finished. Carls promised good business when it was called up and the stock held an even figure with that realized upon the first sale on Wednesday, when it was forced down to 75 cents and drifted along between that and 80 cents. Today the poorest realization was 58 cents, and between which figures the shares were parceled out.

**SEAT WANTED.**  
Broker Pollock, at the end of the call, wanted to buy at \$1.00 a seat on the exchange could be secured and \$800 was asked. Mr. Pollock offered \$600 and afterwards \$525 for one, but could not find a seat.

**THE PRICE LIST.**  
When the trading and efforts to that end had been completed the prices were found to be posted up thus:

Stocks.	Bid.	Asked.
Alice	1.42 1/2	1.45
Anchor	1.25	1.30
AJAX	74 1/2	75 1/2
Ben Butler	1.42 1/2	1.45

**SILVER APPEX.**  
(Special to the "News").  
Eureka, Nov. 26.—Secretary W. A. Holzhimer of the Silver Apex Mining company informs the "News" representative that all of the recent assessments is paid into the treasury and that the company expects to begin the development of the property, which lies about midway between Eureka and Mammoth on the opposite side of the mountain from the famous Centennial Eureka mine. At present sinking is going on under contract held by Messrs. Davis and Jorgensen and as soon as the shaft reaches the 200-foot level the company expects to begin drifting. The stock is nearly all held by business men of Eureka who have all kinds of faith in the ground.

A gradual development of the work is being conducted this fall in North Platte mining district and from the looks of the material, which has been examined by the company's experts, promising properties some paying mines will be opened up in this section before long. At the Annie Laurie group of claims Mr. R. S. Robertson is now comfortably quartered in his new three-room cottage which was recently completed. The tunnel which is now in about 280 feet is expected to tap the ledge which outcrops on the surface about 150 feet above the level of the tunnel. Hudson Smith is also pushing work on the Brooklyn Eureka group, which adjoins the Annie Laurie southeast. At present nothing is being done at the old Hot Stuff property in the same vicinity. This ground is owned by some Salt Lake attorneys.

**IDAHO EXCHANGE.**  
Everything is in readiness for the Opening Call Thursday.  
The Idaho Mining and Stock Exchange opens for business at 10:30 on the morning of Thursday, December 6, at which time the first business call will be made.

The Boise Capital News says that the officers of the exchange have been very busy making all necessary preparations for the opening and nearly all details are now completed. The blackboard is ready, the caller's stand is made, chairs are bought and in fact very little remains undone to insure a most successful opening.

The committee on arrangements have also arranged for a "stock call" to be followed by an entertainment and banquet.  
The "stock call" is more for the benefit of those not initiated in the workings of a full fledged exchange to show them the real value the exchange will be to Idaho.

The entertainment and banquet is designed to bring the members and friends into a closer friendly relationship and thus aid in the ultimate plan of success of the venture.  
The success of the exchange is now an assured fact and the business men of Boise as well as of Salt Lake City and other points are taking a lively interest in the start.

The exchange has already been the means of interesting a large delegation from Salt Lake City in the nearby mining properties and a number of other properties are being investigated by investors from other sections.  
In fact it looks as though Boise and Idaho were on the eve of a great mining boom, a thing unknown to this section since the excitement in the Basin thirty-seven years ago.

**WESTERN FEDERATION.**  
Work of Executive Committee at Meeting Held in Denver.  
At the recent meeting in Denver of the executive committee of the Western Federation of Miners it was decided that the federation continue to furnish aid, moral and financial, to the striking miners at Roseland and Northport, British Columbia. A revision of the constitution was also had for the purpose of eliminating conflicting provisions and objectionable features. At present the three organizers herebefore kept in the field will be continued until January 1, 1902, when two more will be added. Ed Hayes, Roseland, Wash. Id.; James Wilkes, vice president, Nelson, B. C.; W. D. Haywood, secretary-treasurer, Silver City, Idaho; John C. Williams, Green Valley, Cal.; John Kelly, Wallace, Idaho; Charles Meyer, Lead City, S. D.; Phil Bowen, Butte, Mont.; Thomas Sullivan, Leadville, Colo.; James A. Baker, Slocan, B. C.

**MINING NOTES.**  
Supt. Kirby of the Daly-West was a Thanksgiving visitor here.  
The Good Hope delinquent sale has been postponed for a month.  
On tomorrow the Showers Co., assessment of two cents a share becomes delinquent.  
For Monday is scheduled the annual meeting of the Mohawk Queen Consolidated Mining company for the election of officers.

M. J. Flynn, who was once with the Sacramento, and who has been in Aus-

## All Good

All doctors are good, but only the best can cure the hardest cases. Just so with cough medicines. All are good, but only the best can cure the hardest coughs. Buy the kind the doctors prescribe.—Ayer's Cherry Pectoral.

"For three winters I had a very bad cough. I then tried Ayer's Cherry Pectoral. In a short time I ceased coughing and soon was entirely cured."  
Mrs. Pearl Hyde, Guthrie Center, Ia.  
16c. 50c. 1.00.

India for some time, is expected to return here very soon.  
Halley Times: Messrs. Wolters, Pu-sidist and Wileup have located the extension of the rich tin mine on the Rock Creek road, near the town of They took a sample of their find that assayed \$144 in gold to the ton.

\*Tonopah Bonanza: F. J. Siebert, formerly of Austin, has been appointed assessor of the Clifford group of mines, recently acquired by Salt Lake parties. A steam hoist is to be placed on the property.

Virginia (Mont.) Madisonian: The lease of Ford and Dalles on the Hudson mine is about to expire. They have worked this mine for nearly a year, and it has been a wonderful producer. They reported at one time last summer that they were taking out \$1,000 a day. The exact truth of the results are only known to the lessees and owners of the property. It is approximately estimated that they have realized between \$75,000 and \$80,000 from their year's work. The mine is owned by C. L. Dahler and the Largey estate.

Butte Miner—The Highland Mining and Milling company, recently organized by J. J. O'Meara, W. E. Deene, and others, has been organized. The company, of this city, has bought the 10-stamp mill of the Red Lion company and is now transferring it from the ground of the Red Lion company to a place a few hundred yards away. The deal was perfected through Curtis & Majors, who have long had an interest in the Red Lion property. As soon as the mill is moved to the new place, the stamps will be unchained on ore from the Highland company's eleven claims, which are located in the Red Lion district, about five miles from the town of Anaconda.

The well known experts and meteorologists, H. G. Pearson and J. B. Bowen have returned from the site of considerable extent to the Malheur basin, says the Baker City Herald, where they made an exhaustive examination of the oil fields and some fine oil-bearing lands in the heart of the region. Two more sanguine men never returned from fields of future glory. They say the indications are splendid, and that the oil fields in the region are not the least doubt that oil will be found in all kinds of quantities. Dozens and scores of experts from every oil region in the United States, Mexico and Canada have visited the fields and without exception all of them have returned favorable reports to the men who have sent them in.

A "hot" story comes from Montana. The lessee of the Kelly hot springs, located four miles east of Butte, recently drilled an increased flow of water and commenced drilling a hole at a place near the other springs. At a depth of twenty-five feet a volume of water burst forth, which was so hot that it could not be touched. The water was gauged the temperature. The tester, which was provided with a thermometer attachment, was lowered into the water, and the thermometer showed the water to be 180 degrees. A steady flow of water is gushing out of the spring, and three times as much as has ever been seen at the hot springs before.

Butte Miner: All doubt as to the meeting of the International Mining congress at Butte, Mont., has been removed. The committee appointed to raise the necessary funds reported to the Business Men's association last night that \$2,750 had been subscribed and there was more than enough in hand to make good the \$3,000 guarantee. The secretary was instructed to make the collections and deposit the amounts raised. The president and secretary were instructed to notify Irwin Mahon, secretary of the mining congress, that the money plan of the association is \$2,500 or more will be required to defray the expense of the congress and the soliciting committee will continue their work until they have the necessary amount in hand.

The 10-stamp mill on the Sanger mine, owned by the Sanger Development company, a corporation organized principally of Salt Lake men, has been moved to the Sanger mine, beginning work on about 100 tons of rock on the dump, and the stopes between the mine and the dump will be furnished enough ore to keep the mill in continuous operation. Three quarters of a million dollars have already been taken up by the Sanger Development company for three years, until 1900, when Mr. Romig organized the Walla Walla company and purchased. The property is situated about 20 miles from this city and not in the John Day country, as a Walla Walla press dispatch to the Spokane Spokesman-Review erroneously stated. About 40 men are at present employed in mine and mill.

**TAKE A RECORD.**  
See How Many Friends Are Hurt by Coffee.  
It would be just as reasonable for a temperance advocate to drink a little diluted whisky as to drink a little coffee, one is as truly an intoxicant as the other, and persistence in the use of coffee brings on a variety of chronic diseases, notoriety among which are dyspepsia, heart palpitation and ultimately heart failure, frequently accompanied by nervous prostration.

This is only a small percentage of the great variety of diseases which come from an unbalanced nervous system, caused by the persistent daily use of the drug caffeine, which is the active principle of coffee. Another bit of prima facie evidence about coffee is the fact that the habit of great difficulty in giving it up.

They will solemnly pledge to themselves day after day that they will push them back and out of their lives. That it is shortening their days, but morning after morning they fall, until they grow to despise themselves for their lack of courage.

Any one interested in this subject would be greatly surprised to make a systematic inquiry among prominent bank workers in America. There are hundreds of thousands of men and women prominent people that have abandoned coffee altogether and are using Postum Food Coffee in its place, and for the most excellent reasons in the world. Many of them testify that ill health, nervous prostration, and consequently inability to work, has in times past, pushed them back and out of their lives. Proper standing in life, which they have been able to regain by the use of good health, strong nerves, and great vitality, since coffee has been thrown out and the Postum put in its place.

## MARKET WAS DEPRESSED.

Amalgamated Copper Was Sold Down to 76 1/2, Lowest Price on Record.

Sugar and Steel in Demand, Raising Them—Then They Ran Off Considerably.  
New York, Nov. 29.—International railroad stocks reflected the depression in the London market with fractional declines. Amalgamated Copper sold down over 3 points in response to the slump in coppers in the foreign markets. Elsewhere in the list there were some gains, principally in the specialties.

Free selling of Amalgamated Copper which sagged to 76 1/2, caused further reactions in the general market. Sugar came into large demand and rose rapidly 3 1/2 over 50 1/2; cotton, 1 1/2; United States Steel became active and advanced a point.

Reading sales were put out under cover of some new strong stocks, notably Reading common and second preferred and Wabash preferred which rose 1/8. Pressure then became more operative in the Pacific and western stocks and some of the specialties. Sugar ran off over a point and Amalgamated Copper broke to 77, the lowest on record.

The revival of activity in the steel stocks, which were maintained at their best, and steady liquidation of Amalgamated Copper tended to reduce deal-making in other stocks, which showed considerable irregularity. Generally speaking, the price movements of the standard and railroad stocks during the morning were narrow.

Minor stocks figured more prominently in the dealings and moved both ways, the most conspicuous examples having been the Standard Oil of California, second preferred, which rose 1/8 to 1 1/2; North American lost 1/8. St. Paul ran up quickly to 170 1/2, forcing the shorts in, but its price was without effect on other railroad stocks, which continued heavy and dull. Amalgamated was pegged for a while at 77, but eventually broke through and touched 76 1/2.

Prices went bid up spasmodically; Amalgamated Copper rallied to above 78 and Sugar returned to 127. Improvements among other leaders were not reflected in the market, which was extremely quiet. A block of 5,000 shares of Reading first preferred changed hands at 80 1/2. The Rubber stocks were bid up a point on the strength of a seasonable weather for the trade.

**SUGAR.**
