#### Entertains Aristocracy and Actresses at His Own Pleasure.

The great social fact of the new year is the big place King Edward has be-gun to fill in the public eye. Already he has become really the center of England's social system. When Queen Victoria reigned society was headless. Nowadays the king is the undisputed social autocrat. His countenance is the end-all of social distinction. Hence his resolution to hold drawing rooms at night instead of in the after-

noon, together with the understanding that admission is to be only by invitation, has shaken society to its founda-tions. It means that the court entertainments will be more select than heretofore, and that one's presence there will mean either an assured social status or special royal favor. The announcement that Maxine El-liott lunched with the king at Marlborough house just before Christmas has aroused much interest. Hers is the only name mentioned of the "party actresses" who composed the company on that unique occasion. Mrs. Tree, Edna May, Mrs. Brown Potter and Ada Reeve, it is understood, were also present, while the masculine balance was supplied in the genial persons of Lord Marcus Sassoon, Sir Thomas Lipton, Sir Ernest Cassel and Sidney Greville.

The actresses received their invitations to luncheon while Queen Alexandra was suffering from an alleged cold which prevented her from going to Sandringham. The invitations were verbal and informal. They were ac-companied by the express stipulation that no mention should be made of the unchease and that the they would take luncheon, and that the king would take it as a special compliment if the affair was kept as quiet as possible.

JUST TRY THESE REMEDIES.

Not One Can Hurt You and All Will Do Some Good.

If people can't sleep these scientific bits of advice may aid them. Drugs should only be taken when all natural methods fail.

First comes the digestion. First comes the digestion. Any disorders affecting it should be attended to before the sleeplessness question is taken up. Then comes the simple, so-called home remedies that are not always thought of at home, but which are frequently sufficient. First of all should be mentioned a wel ventilated room, not heated above

If this is insufficient, try bathing. Either a hot or cold plunge is frequent-ly efficacious. Care must be taken not to prolong the bath too much. If there tub, one may use a sponge bath or foot bath.
