UTAH MINES AND MINING.

Very Gratifying Activity Considering the Holidays.

Special Centennial-Eureka Dividends Becoming Almost Regular—Horn Silver Earnings—Quotations.

James A. Pollock, the well-known broker said in his weekly mining share market letter under date of today:

All holiday conditions taken into consideration, the local stock market showed very gratifying activity during the past week. There were few heavy orders filled, but the trading was more generally distributed than has been the case for some weeks past. After the first of the year some heavy increases in business may be expected and there should be hand some advances in the prices of most of the securities.

Alliance did not hold up as well as was anticipated would be the case, the reason being the renewal of law talk, which culminated in the filing of injunction proceedings by the Silver King people, who allege that one of the Alliance drifts is being run on their ground and that if it continues it will cut into water courses that will fill the workings of the King and cause a heavy expenditure for pumps. By reason of the injunction, the Alliance company was enjoined from working in the disputed territory pending further investigation by the court. The management of the Alliance will not make public their plans of action, but it is said to be based upon apex. Ajax and Gas were inactive and the same condition may be applied to Anchor. At the price the latter is being offered it should be a splendid buy. Both mine and mill reports continue favorable.

Bogan is doing nothing in the local market at present. The minority stockholders are still congratulating themselves on their victory. Bullion-Beck paid its dividend of $25,000 on the 20th. There is a good prospect of another distribution during January, but it will not be much if any more than $25,000, unless some very rich ore should be encountered in the mine. It is reported that the lower levels of the property are looking very well now, better in fact than for some months past. The stock is not very active. Centennial-Eureka stockholders are certain that they will receive the usual dividend of $1 per share on either the last of the present month or the first of the next. This special dividend is becoming almost a regular, coming as it now does without a break. Comstock is offered freely, but with the assessment on no business is being done. No Crescent is coming out at the quotations made by would be purchasers. The shipment of dump ore continues.

Dalton continues development work and the extraction of good grade ore. Orders have been sent to the property to continue the drift in the rich ore shoot that is known to exist, in fact, has been opened up in one place near the surface. Inquiries for the stock are being received from the outside in considerable numbers. Daly and Daly-West continue in their regular lines. Both are doing extremely well. Daly produced during the year 541,-[illegible] ounces of silver and seventy ounces of gold. The Daly West mill should get into operation shortly after the first of the year.

Horn Silver will pay its quarterly dividend on the 2nd of January. It will be 12½ cents per share, or $50,000. The property is making a splendid record of production. Its earnings for the year have been about $250,000 in excess of the dividends paid, the balance going into the surplus fund. A somewhat favorable change has occurred in the fact of the Lucky Bill shaft and something good is expected in the near future from the property. The shaft is down over 800 feet.

Mammoth held its own in splendid shape and a great deal of business in the stock is reported. The mill continues its good work and the mine is in first-class shape, especially the lower levels. It is one of the best buys the market affords at present quotations.

Morgan is putting in its hoist. The property is reported to be in good condition.

Mercur was inactive, except toward the close of the week, when some considerable business was done, but at prices far below where they should be, even with the De Lamar deal off. The lack of information regarding the option put the stock down. It is hardly likely that anything will be heard from De Lamar before his time is up. A deal of this character is not put through in a minute. Those on the inside are not worrying about the outcome.

Ontario produced for the year 1,855,-[illegible] fine ounces of silver, 1,024 fine ounces of gold and 612,939 pounds of lead, all selling for $983,794.53. The property is in good shape.

Sever did some business. Development work of an encouraging nature continues at the property. Silver King was in demand, with little of the stock coming out. The usual dividend will be paid on January 7th. Sunshine will make a shipment of product about the first. It will probably prove a surprise for those not on the inside on account of its value. The cyanide is saving the value in splendid shape. The ore averages over 20 per ton.

Gold Dust is taking with the investors in splendid shape, and orders are coming in from the outside as well as from strong local people in great numbers. The development work now going on at the properties of the company is giving very gratifying results. A heavy increase in operations is to take place at once. The books of the company close on January 10th.

Who Will Compete?

To the Editor:

While in Spanish Fork recently I paid a visit to an aged veteran, Brother George Meyers, who is now in his ninety-first year. He is still hale and hearty, is a constant reader of the News, and in giving his order for its continuance, he took my pen and signed his name without glasses.

He is the oldest man in Spanish Fork, and he thinks there is no man in the Church older than him who has been in the Church as long as he has. He joined the Church in 1835, hence has been in the harness fifty-two years without having his jubilee of rest. Is there any one older who has been in the Church as long?

CHAMBER OF COMMERCE.

Meeting Held Last Night and the Field of Future Prospects Looked Over and Matters Discussed.

The board of directors of the Chamber of Commerce met last evening and discussed the present financial condition and outlook of the city. They expect the coming year to be a most successful one and think that Utah is on the threshold of most important growth.

The chamber is at present very much hampered for lack of means with which to carry out the necessary projects to place the city in a thriving condition. The finance committee is sending out the following letter to members:

Dear Sir—During 1895 the directors of the Chamber of Commerce have faithfully endeavored to make the most of its limited income in carrying out the purposes of its organization. No one familiar with the work of the institution during the year can truthfully say that it has not been of value to the community. As a matter of fact, the failure to maintain a chamber of commerce in Salt Lake would be a serious mistake. Upon the faith of the loyalty of members the directors have incurred the necessary expense of maintaining the chamber. When members join a directory there is at least an implied promise on their part that they will sustain them in their work. If members will pay their dues the expense can be fully met and the credit of the chamber maintained. If they do not pay their dues, there will be a deficit. This deficit will be a deficit of the institution. The moral obligation to pay just debts of the chamber is upon the chamber and not upon its directors. The chamber pays its debts from the only source of its income—membership dues. If membership dues are not paid those just debts remain unpaid. The year is drawing to a close. We need the unpaid dues. Will you not send check to the secretary for your balance and enable us to maintain the credit of the chamber for the current year?

ANOTHER RAMBLER DAY.

The Rambler boys made a great showing in the Ogden races. The first event of the day was the ten mile road race, in which McConahay finished third, taking third prize and third time prize. Then came the trace race, Joe Hack taking second in the novice. Fowler first, Wolfe second, and Thatcher third in the mile scratch, class B, all "Ramblers" you will note. In the half mile class A, [illegible] took second, [illegible] third. Half mile, class B, Thatcher second, Fowler third. Five mile, class B, Fowler second. In this race a man in a yellow suit lost his head and fell, [illegible] and Wolfe being immediately behind him, the result was a spill for those parties and the race lost to Evans. The five mile, class A, was another Rambler event, May taking first, Joe Hack second and McConahay third. Fourteen prizes in one day is glory enough for any one.
