TODAY'S METALS:

SILVER 60 LEAD, \$4.55 CASTING COPPER 16

Today's call on the mining exchange passed off with the sale of 10,900 shares for \$1,910.37. Very little activity was seen in any of the stocks excepting Daisy, which dropped 7,000 at from % to 1/2. The application for a receiver seems to have inspired some new hope in the hearts of a few of the optimistic

Lower Mammoth was traded in around 48, while Mercur continues to

keep close to the \$5.50 mark.

A marked drop is seen in Daly-West, which was offered today at \$17.80.

Buillon Beck was much stronger, the stock being held at \$3.70, with \$3.20 offered. Valeo was much weaker, being traded in down to \$5. Joe Bowers let go

2,000 at 8.
With a shipment of ore on the way Northern Light was released at 51/2 and May Day was traded in up to \$1.04. Ontario was weaker today, being of-tered at \$8.00, with \$7.00 bid.

Closing quotations were posted as follows:

PRICE CHANGES ARE SMALL CONDITIONS AT

Tendency in Wall Street Was Slightly Downward.

Bond Movement Weak-Live Stock Liteady to Strong - Prodnce Qulet.

New York, May 1t,-Dealings were large, but changes in price generally small and mixed at the opening of the stock market. An active selling movement in the metal group lowered steel and wire and National steel 2½ each, and weakened the general market. Sharp declines occurred in sugar, American tobacco, Western Union, Itallmore & Ohio and Missouri Pacific Buying to cover shorts and realizing unsettled sugar, which fluctuated a point frequently. Towards 11 e'cloc. there was less effective support in th standard railroad stocks. Selling of American tobacco put it almost a point below yesterday's lowest. In the general list the tendency continued downwards but offerings slackened towards

A full recovery from the loss in su-gar made the bears doubtful and they bought some stocks to cover short con-tracts. The market became lifeless at the higher level and when tobacco was raided down to 30½, prices gave way all round. The closing was active and weak at wide net losses. The bond market was dull and ir-

THE MAMMOTH

President McIntyre Says a Dividend Will be Paid About June 1st.

RECEIVER FOR THE DAISY.

A. T. Moom Assumes Charge-Northern Light Shipment - Sacramento Sends in Heavy Consignment.

The details of an agreement were all arranged and the papers signed yesterday afternoon by which the Grand Central allows the Mammoth Mining company to run a short drift through its territory in order to connect the main workings of the mine with the ore body lately broken into on the 800 level. In return for this courtesy the Mammoth allows the Grand Central to drift from one of its lower levels towards the ore vein in dispute on the 700 level. This arrangemeint is of great benefit to the Mammoth as heretofore some of the ore from the \$00 level has been hoisted to the 700 and some has been dropped to the 900 through the 800. This has proven expensive and Mr. McIntyre will now be able, by running 79-foot drift, to convey the ore from he 800 level to the shaft. Mr. McIntyre says it will also help to materially in-rease the output as soon as this is

When asked about the payment of a dividend on the 20th, Mr. McIntyre said that whether one would be declared then he could not say, but one would be paid about June 1st.

THE DAISY RECEIVER.

A. T. Moon Appointed - Will Take Possession Tomorrow.

The receivership for the Daisy Min-The receivership for the thing and ing company has been granted and A. T. Moon has been appointed to act in that position. Mr. Moon has filed his bond of \$5,000, and also an injunction

Attorney C. S. Patterson went out to Pooele today to file the receiver's injunction against the sale of the Dalsy mine under the trust deed scheduled to take theer tomorrow. It is asserted that the trust deed was illegally given. Mr. Moon will leave for the mine to-morrow and will take possession of the property in behalf of the stockholders and creditors. Within the next few days suits amounting to about \$5,000 will be filed against the company and the hearing will probably come up in about days. The books and papers held by the old officers will also be placed in Mr. Moon's hands tomorrow.

SACRAMENTO SHIPMENT.

Three Boxes of Cyanides-Mine Said

to be Looking Fairly Well. Three boxes of gold cyanides reached the sampling rooms of the Con. Kansas City Smelter and Refinery today from the Sacramento of Mercur. The gross weight of the shipment was 600 pounds. Manager R. E. McConaughy reports the mine looking fairly wall pounds. Manager R. E. McConaughy reports the mine looking fairly well. Work has been started at the cave and the debris is being cleared away preparatory to getting out some of the rich ore which has been covered up. More attention has lately been paid to the mine's base ore bodies, which are said to be showing up well. The tailings still run quite high in values, but it is hoped that this will soon be remedied. The new roaster machinery died. The new roaster machinery should be shipped within 30 days, and preparations are being made on the ground for the plant when it shall ar-

THE NORTHERN LIGHT. Shipment of 520 Sacks on the Way

- Mill to Resume. A shipment of 520 sacks of ore will shortly be on the market from the Northern Light of Lion Hill. The total weight of the consignment will run somewhere between 20 and 22 tons and will afford a nice piece of money to the company. Preparations are also being made to start the mill. The secretary said today that supplies will be purchased during the next few days and the mill will be started up in about 2 weeks. Owing to the fact that a much larger quantity of ore is blocked out for this season's run, it is expected the mill run will be longer and much more successful this season than was the saful this season than was the

case last year. THE BALTIMORE GROUP. A. H. Tarbet Talks of His Option on

Nevada Property. Messrs, A. H. Tarbet and W. G. Ben-Messis, A. H. Tarbet and W. G. Benham returned today from a trip to Elko County, Nev., where they went to inspect the Baltimore group of six claims recently bonded by Mr. Tarbet for \$50,000, \$1,000 of which was paid when the papers were signed, the balance to become due in one year. The additional states are signed to be the signed of the balance to become due in one year. come due in one year. The claims are situated in the Merrimac district and are all patented. They have been worked intermittently. Mr. Tarbet says, for the past 25 years. During that time some very good ore has been extracted. Only last summer several cars of ore were marketed in Salt Lake on controls showing as high as 20 per cent copper. In spite of the value of the ore the claims are so situated that they cannot be worked on a small scale. A large aerial transway is needed owing to the abruptness of the mountain, Some \$30,000 was expended by A. C. Burrage of the Standard Oil company

in the construction of a three-mile road up the mountain. At the time Mr. Burrage had an option on the claims, but when a patent was sought, the right to a patent was protested and Mr. Burrage failed to take up his option before the date of expiration. Mr. Burrage all used the diamond drill and sunk a hole 450 feet deep, but falled to expose ore of any particular value,

THE RAMSHORN MINE.

Said to be the Deepest Copper and Silver Property in Idaho.

In the Ramshorn mine of Bayhorse, Custer county, its owners can claim the distinction of having the deepest and best developed copper-silver mine in ldaho says R. N. Bell in the Boise Statesman. This famous old property was worked very extensively during the eightles, and produced silver, copper and gold bullon to the value of \$2,500,-

The principal values being in silver, active production of ore at the mine was discontinued when the white metal commenced to suffer the rapid decline in value. A small force of men, however, has been kept constantly emplayed on the property entirely on velopment work and the mine has since only shipped two or three car-loads of selected ore each year, suffi-ient to pay current expenses.

Today the Ramshorn mine has six miles of open workings, exposing measurable bodies of ore, which, acording to conservative estimates, contain an aggregate gross value of \$3,000,000. Besides all the surface ore bins and most of the chutes and cross-cuts in the mine, are stacked full of loose ore ready for shipment. There are fully \$200 confor shipment. There are fully 3,000 tons of this loose ore, and its average value

In silver and copper is \$100 per ton.

The canyon of Bayhorse creek in which the Ramshorn mine, and most of the other big mines of the Bayhorse district are situated, is deep and narrow, and presents an elaborate cross section of the street of the section. section of the geology of the region, as it cuts the formation almost at right angles to their trend.

These formations embrace various

horizons, from the carboniferous blue limestone, down to the archaen granite, Associated with them are to be found intrusions of diorite, sienite, quartz porphyry, and other more recent ig-neous rocks, together with the usual evidence of faiting, folding and fissuring, generally accompaning these for-

The Ramshorn vein is a compound fissure, cutting across the bedding planes of the thick series of metamorphic slates, almost at right angles. It courses north and south and dips west, at an angle of 50 degrees.

The nay stracks occur on at her well

The pay streaks occur on either wall The pay streaks occur on either wall of a zone of crushed slate. They are about 60 feet apart along the upper workings and give the appearance of two closely parallel veins. But as development was extended down, these pay veins gradually approached each other and in the lower levels of the mine are not to exceed twenty feet apart. They will probably unite at further depth and make one strong vein ther depth and make one strong vein of pay ore. The pay shutes now exposed in the various levels are from six nches to six feet thick and carry average values of from \$25 to \$500 and \$1,000 per ton. The walls are clean cut and well defined and the mineral readily separated from the gangue.

The principal minerals contained in these pay veins are brown and white carbonate of iron, mixed with chloride of silver and gray copper, with very little quartz. In the upper workings of the mine the rich sandy brown chloride predominates, but in the lower levels the copper sulphides are in excess. The writer sampled one chute of clean gray copper ore, over 24 Inches thick, that yielded an average value of 1,200 ounces of sliver and 25 per cent copper and was informed that these chutes of clean high-grade ore sometimes swelled to four feet wide, and that the average of all the ores mined had been in excess of

There is sufficient stoping ground now opened on the numerous ore chutes to accommodate 250 miners breaking ore without being in each other's way. The ore carries an excess of free smelt-ing iron and, with its other advantages and railroad transportation added, this property will prove one of the most profitable mines in the State.

The longest tunnel on the Ramshorn,

which is driven in on the vein all the way, was started several hundred feet above the creek level. It has pene-trated the mountain 3,000 feet and shows a handsome body of ore in the present face. The vertical depth is about 3,000 feet.

THE NEW STATE.

A Shipment of Several Tons of Gold and Copper Ore Being Sacked.

Work is still being pushed on the east and west drifts from the tunnel at the New State property at the mouth while its size varies in places, the average continues about the same. Good copper and gold values are found in the ore and a shipment of several tons is being sacied ready for market. The rock shows a liberal sprinkling of the gold in a number of places. free gold in a number of places.

HAD ONE GOOD POINT.

Nicholas L.czar of Russia, was the type of an absolute aristocrat. The succession of terrible wars which clouded his reign did not tend to soften his disposition or to render him less imperious. But rough and harsh as he was, Nicholas had a measure of chivalry in his disposition. He would not tolerate under any circumstances, an insult offered to a woman. As the czar was driving through the succets of St. Petersburg by careful in the succets of St. tersburg he caught sight of an officer of his household in the act of upsetting an old beggar woman, whose hands were raised in a prayer for alms. The official was quite unmindful of the au-gust witness of his act, and was rather pleased when, a few hours later, he was summoned to the imperial presence. summoned to the imperial presence. Nicholas soon undeceived him, and in the presence of a dozen courtiers cut him to the quick with his indignant reproof. "Enough!" said Nicholas, finally. "You will walk up and down that coridor all night, and every time you turn you will say, in a loud voice: "I am a puppy! I am a puppy!"

THE BEST PUBLICATION."

THE MEALS ARE ALWAYS GOOD.

"The train is crowded with agreeable surprises, but it is in the dining car that one is most impressed with the Burlington's superiority. Now, without being too utterly dainty, I am exceedingly particular about my meals, and about the way they are served. For breakfast all I want is eggs, rolls, and coffee. In a Burlington dining car I am able to get just what I want, just what I would have at my own table, and for the small sum of fifty cents. The exquisite neatness of the napery makes a good meal taste all the better."
—Interview with a Denver merchant.
