MINING, BUSINESS AND STOCKS

UEVELOPMENT BE-ING PUSHED IN ALTA

Although Camp Has Suffered Some Severe Storms Work Has Gone On Uninterruptedly.

ORE BEING ACCUMULATED

At the Different Mines Which is to Be Shipped Out as Soon as Roads Will Permit.

Special Correspondence.

Alta, March 31 .- For the past 10 days the camp has experienced very severe snowstorms which blocked the roads entirely, and cut off all communication with the outside world for nearly a bring some very good results. week; no mall arriving during that time. The telephone line has also been down for the past 12 days; hence the old camp of Alta has been a very isolated and dreary place. Supplies are getting scarce, yet there is no need for

Development work has progressed, however, without interruption, and considerable ore has accumulated at the different mines, but no more has been extracted than has been absolutely nec-essary in prosecuting development

Some of the miners owning claims here are said to be making preparations to give some noted "knockers" a warm reception when they put in an appearance this spring, for it is well known they will not take their chances here in winter time along with the honest miners, but as soon as the snow has gone they make their appearance and lay claim to property belonging to other people and are not inclined to relin-quish their claims unless paid a money consideration, or a hig interest in the claims. This scheme has worked in several instances, but it will not again. It seems to be their method during the winter months to search the rec-ords carefully to see if they can find the least flaw or technically in the notices of location for a foundation for their "graft." If the least flaw occurs they jump at the opportunity to get "blood money" out of the owners, who have either to buy them off or else fight them

in a law suit. The people here are desirous of ridding the camp of this very undesirabe element, as they are neither useful nor ornamental, but on the contrary are camp, having blocked many good deals which no doubt would have turned out to be good paying propositions, such as the Columbus Con., Continental-Alta, and a good many others have turned out to be.

ON MINING EXCHANGE.

Daly-West Sold Bown to \$25.50-Tetro Strengthened Slightly.

The sales of the forenoon on the Salt Lake Stock and Mining Exchange amounted to 1,455 shares, for which was paid the sum of \$5,978.50. During the regular call, Daly-Judge and Daly-West were the only traders: the latter opened weak and fell to \$25.25 in the sales. Grand Central brought \$4.50 on the open board. Tetro strengthener to 32 cents. The closing sales and quotations were reported, as follows: TODAY'S QUOTATIONS.

SOME SHEBA ASSAYS.

Shareholders Advised of Important De-

velopments in Nevada Mine.

A circular just issued to stockholders of the Sheba Mining company has been placed in the mails and contains the fellowing:

few tons of ore from the recent strike in the new tunnel were first put through the mill and the samples taken from the tables gives the following account of themselves when assayed in this city yesterday: No. 1, sample \$1.5 per cent lead, 177.3 outces silver and \$21 in gold, and No. 2 sa sples, \$5 per cent lead, 190 ounces silver and 88.05 gold to the ton. The two samoles of concentrates made from the ores of the company's Mammoth mine assayed as follows: No. 1, 28 per cent leac; 120,4 ounces silver and \$18.18 in gold to the ton. No. 2, went 23 per cent 127 ounces silver and \$20.88 gold

success, and points to the manner in which the first ore chute developed by the new tunnel, is opening up. At the last measurement, taken after drifting over 30 feet, the vein measured nearly seven feet between walls, and as to values, Mr. Wilson called attention to the fact that concentrates made at the first run of the mill were from ore taken from the face of the drift where it was six feet wide.

The face of the new tunnel is also

beginning to show mineral again and Mr. Wilson says he found samples of the face which would run not far from 1,000 ounces to the ton. According to calculations made after measuring up the ore bodies in the upper workings, it should not be necessary to run much further in order to encounter another ore chute, while the hanging wall is still more than 100 feet ahead. None the less interesting is the fact that the largest ore bodies have been developed on the hanging wall side of the vein. In addition to the prosecution of de-velopments on the ore chute to the north and the work in the face of the tunnel, a drift has now been started south on the ore chute which will open the vein in the direction of the shaft and will develop the ore bodies along a fissure which intersects the main Sheba ledge 200 feet north of the shaft and is known as the "cross course." Considerable ore was developed in the

upper levels along this strata and it is

thought that the opening up of the same

Former Majestic Manager Came in from

New York Last Saturday. W. H. Alexander, former business manager of the Majestic Copper Mining & Smelting company, returned from the east Saturday night, after an absence of several weeks. Mr. Alexander was present at the meeting of the Majestic stockholders in Nw York last Monday, when the "voting trust" was given a vote of confidence. As to the pend negotiations to combine with the Monarch enterprise, Mr. Alexander expressed the belief that they would yet be brought to a consummation and would result to the best interests of all concerned.

UTAH CONSOLIDATED.

Bingham Company Made a Net Profit of More Than \$1,000,000 Last Year.

The annual report of the Utah Consolidated Mining company has been made public. The report covers the year 1903 and shows that \$1,964,805 was received from the sale of ore; the operating expenses were \$926,168, leaving a

profit for the year of \$1,038,637.

President Broughton in his statement, says there are new 1,075,000 tons of sulphide ore in sight, compared with 1,650,-000 the year before. A total of 190,256 tons of ore were mined, of which 6,390 were sold on a satisfactory basis. The smelter treated 178,125 tons, which yielded 12,715,693 pounds of fine copper, 198,-810.85 ounces of fine silver and 20,027,669 ounces fine gold. The general balance sheet shows \$58,601 reserved for liabili-ties and \$514,486 carried to profit and

POWER PLANT CONTRACT.

Let by the Newhouse M. & S. Corporation To Westinghouse Company.

The contract for the machinery the power plant to be built for the Cactus mine by the Newhouse Mines & Smelters corporation, was let Saturday afternoon to the Westinghouse company, represented by C. C. Chapelle and L. M. Cargo. The contract provides for two 800-horse power steam turbine engines and generators. The machinery is to be delivered by

Will Visit Oil Fields.

The oil, gas and coal committee of the Commercial club decided at its Satur-day night meeting to visit the Farmington oil fields at an earil date, and make a report to the club as to the results of the inspection.

MAJESTIC INDEBTEDNESS. Amount is Said to be Over \$300,000-

Monarch Consolidation. The proceedings of the late Majestle

special stockholders' meeting, as seen by " representative of the New York Con w cial, were reported as follows: The necting was attended by about 60 of the 1,800 stockholders of the com-pany, some of those present coming from Hartford, Boston, and other New England cities. From questions asked by the stockholders it was evident that all present realized the critical condi-tion in which the company's affairs stood. The fact that the Monarch company had withdrawn its offer to take in the Majestic properties left open only the question as to whether the stockholders desired the voting trust committee to continue.

"A. G. Loomis explained at consider. able length what the committee had been obliged to contend with. They found that the books had no: been kept as they should, he said. He placed con siderable faith in the proposition which the Monarch company had made to take up the properties, and while negotia-tions were off for the time being, he thought there was a good chance of the deal going through eventually. In his mind this was the only plan which would insure the company of becoming

a profitable enterprise.
"A report was read which was made by a committee of stockholders repre-senting 100,000 shares of the stock in which they stated that they had looked into the proposed consolidation with the Monarch company, and had four d the conditions satisfactory. The agreement for taking over the Majestic, as originally contemplated, called for the ex-change of the Majestic company's capital stock at the ratio of \$6,000,000 for \$2,500,000 of the Monarch, the provision being made that at least a majority of the Majestic stockholders would assent to the transfer. The report showed that the Majestic properties were not as well developed as prior investigationsi ndi-

cated "The company had outstanding debts aggregating more than \$300,000, while would take an additional \$500,000 to place the properties on a working basis. The report closed urging by the stockholders to give the voting trust such authority as was necessary to conclude negotiations. Information requested by some stockholders regarding what interests were behind the Monarch com any could not be furnished, as the list of the partles who were to figure therein, so it was said, had not been com-pleted. If the deal with the Monarch ompany is concluded, that company is to obligate itself to protect the debts of the Majestic company up to the sum of

TO BE SHIPPED TOMORROW,

New Locomotive for Copper Belt Railroad is Completed.

Superintendent Harlson Clement has wired General Manager William Bay-ly, Jr., of the Copper Belt railway, ly, Jr., of the Copper Belt railway, that the new locomotive ordered recent-ly will be shipped from the factory at Lima, Ohio., where it was built, tomorrow. The railroads over which the engine was shipped have promised to do their best in making quick delivery.

AMERICAN AND BINGHAM CON.

Negotiations for an Exchange of Ores Have Been Concluded Between Two Companies.

NO COPPER PLANT FOR MURRAY

The Deal Probably Means the Abandonment of This Project -Bingham Con. May Enlarge.

It now looks as if the American Smelting & Refining company will not go to the expense of building a \$1,000,000 copper plant at Murray. Sometime ago the "News" published a story to the effect that the officials of the American and Bingham Consolidated had been in conference in New York and that among the matters discussed was that of an exchange of ores. The Bingham company had previously announced its intention to erect lead stacks and enter the open market for lead ores in competition with the American. On the other hand, the American round itself in a position that in order to take care of the constantly increasing volume of copper ores coming from the camps the point had been reached when it was absolutely necessary to do something to increase its facilities for taxing care of this business. Accordingly, the directors, at a meeting held in New York less than a year ago, set aside a fund of \$750,000 for the use of the local management for construction purposes Matters dragged; after a while ne-gotiations were opened with the Bingham Con., and during the recent visit of Gen. Manager Duncan McVichle to the Atlantic seaboard, they were brought to a consummation. The contract entered into stipulates that the Americ'an company is to turn over the ore secured on the contracts with the Newhouse Mines & Smelters corporation, which owns the Cactus mine in Beaver county, and the Utah Copper company at Bingham. In return for this, the Bingham is to turn over the lead ores of its Bingham mines, as well as that received from other sources.

The Cactus contracts extends over a

period of 10 years and that of the Utah Copper for seven and a half years.

That the arrangement entered into between the two companies is of immense advantage to the American there is not the slightest doubt. The latter has found it necessary on a number of occasions to call upon the Bingham for certain classes of silictons ores. The Bingham has been accommodated like-

wise; so these are matters which have helped to bring about the affiliation. It is probable that in order to take care of the business coming to it through the American, the Bingham will be required to build additions to its present plant, which, in a measure will make up for the disappointment in the American not carrying out its original

Off for the Cactus.

Abererolitote, the two latter being directors of the boson Consolitated attitus company, who arrived in the City on a rate train ast evening.

CONCENTRATES.

Three cars of Yampa matte reached the sampiers tals morning.

W. S. Ravenscroft of the Union Gas & Pipe Line company did not reach the city until this atternoon on account of the delayed trains.

The Ohio Copper company has one car of concentrates and two cars of crude ore at the smelters today.

The Daly-West directors are scheduled to meet in regular session tomor-

Joseph Dederich has gone to the Newhouse properties in Beaver county. General Manager Duncan McVichie of the Bingham Consolidated is expected

to arrive from the east tomorrow. W. F. Snyder of the Western Exploration company is expected to reach home on any train.

Superintendent 't'. P. Rigney of the Summit Placer company's ozcokerite deposits near Soldier Summit is in the city today to confer with Manager But-

Judge John W. Burton has disposed of his interests in the Sheba mine in Humboldt county, Nevada.

The bankruptcy proceedings institutd in the Federal court against the Majestic Copper company will come up before Judge Marshall next Saturday. The shipments of ore from the Mack.

intosh sampler and Sliver King for the past week are as follows: Daly-West, 2,613,000; Ontario, 427,000; Keith-Kearns, 233,060; Daly, 93,000, Total, 3,366,000.—Park City Miner.

Superintendent Harvey Trenam of the Beaver Con. is taking a vacation for a few weeks and T. W. Gallagher has charge of the mine.—Milford Times.

John Leyshon, Abe Fotheringham, Garrett Reynolds and the other owners of the Beacon property have decided to resume work on the property and within a few days they will be shipping ore. The upper tunnel went through twentytwo feet of fine copper sulphide ore, for which the Salt Lake smelters offer \$14 per ton on the cars at Milford, and the owners believe they can ship a thousand cons or so of this ore without trouble. In other workings there is a large body of iron ore that carries \$13 in gold, and this can be shipped at a good profit. There is also some lead ore of a good shipping grade and there is no doubt but the property can be operated at a fine profit.—Milford Times.

STOCK MARKET

Result of Suit by U. P. Intrests Against the Northern Securities Dissolution Plan.

PRICES CENERALLY LOWER.

Everything Unsettled-Declines Were Followed by Recoveries, and Selling by Buying.

New York, April 4.-The stock market today opened feverish and unsettled as a result of the litigation by the Union Pacific interests against the Northern Securities dissolution plan. Union Pacific jumped 1% and St. Paul broke 2% as a reflection of this influence. Prices generally were lower, the declines running to about a point in Southern Pacific, Amalgamated Copper and Sugar. The decline in the market became pronounced when Union Pacific and People's Gas broke badly. Union Pacific down from 87% to 84 and People's Gas fell 2½ below Saturday's close. Declines elsewhere reached 4 points in Chicago & Eastern Illinois certificates, and 1 to 1½ in Atchison, Baltimore & Ohio, Reading, Delaware & Hudson, Eric first preferred, Missouri Pacific, Canadian Pacific, Kansas City Southern preferred and General Electric. St. Paul railled in face of the general decline, then reacted but raliled again and pulled up the market in sympathy. Prices hardened in sp te of the suspension of a stock exchange house which was not considered important. Union Pacific was taken in long strings of transations up to 59% and People's Gas rose nearly a point over last Saturday. The recovery in the general market reached only about Saturday's closing level. The advance was characterized by heavy selling of United States Steel preferred which carried it down a point and Union Pacific reacted to 88. United States Rubber preferred rose 2% while Wheeling & Lake Eric first and second preferred, Denver & Rio Grande and St. Louis Southwestern preferred fell 1% to 2. People's Gas fell 21/2 below Saturday's

Bonds were irregular at noon.

The market made a listless response to the strength in Union Pacific, which rose to 594. People's Gas was sold heavily against just before 1 o'clock and got back

against just before 1 o'clock and got back near 36.

Selling went on during the afternoon, forcing the list down to near the low point of the morning and some stocks below. The violence and frequence of the trading in Union Pacific and People's Gas had a repressive effect on the speculation. Wabash preferred lost a point Amaigamated Copper 1½, Sugar 1½ and Delaware & Hudson over 2. At 2 o'clock Union Pacific was hovering around 89. People's Gas railled to 57½ but ran off again. Smeliting preferred and Union Pacific preferred gained 1.

The petition by Union Pacific interests to enjoin the Northern Securities plan of distribution unsettled the stock market today and caused feverish fluctuations. These seemed due to puzzled efforts on the part of the professional traders to find the market without any clear idea of the actual effect of the news on values. The only fact left clear was that the suppositions on which they have traded for two weeks were unfounded. Their conflicting efforts to retrieve probable mistakes caused a very confused price movement, but the undertone was weak on account of the apparent hostility between great groups of capitalists. Union Pacific opened 1½ higher than Saturday's close and then receded as much below that level. St. Paul broke 2½ on the opening sales ed 1% higher than Saturday's close and then receded as much below that level, St. Paul broke 2½ on the opening sales and recovered half the loss while Union Pacific was running off. Losses ran to a point in a number of railroad stocks and specialties and prices ran downwrds and upwards in hesitating manner. In the course of an hour the market became ouleter.

quieter.
On the curb Nothern Securities was the only merger stock in which any actual trading was done in the first half hour today. It opened at 98, a decline of 2 points from Saturday's high price, sold off to 97½, then back to 98. About 1,500 shares changed hands in the first half hour. There were no transactions in the other stocks, but bid and offered prices were wide apart. Northern Securities stubs was 255 bid, offered at 250; Northern Pacific was 132 bid, offered at 140, and Great Northern was 168 bid, offered at 172.
