THE WHEAT KAINE.

Natwitheimsding the preduced, rise in wheat, when the time came by an increase in price the Jump was as undersee in price the Jump was as underseed as associations both in local and foreign markets. The anticipation now is that price will remain whete they are for a chort time, and then may increase slightly until the associations in the life harvest extend as liftheness.

The factors who has wheat to sell in

finence. The factor who has wheat to sell in The farmer who has wheat to sell is in a surpressively happy most at the rich wear promised for the total. His prices have been low for a long time, and one the sundan bound to a flutte unusually high brings a fractization aking to a good discovery. And while the farmer is rejuding at huntered returns the his product, the laburing risses, who have home a large share of the distress of recent fluxuacid stringwing, are correspondingly depressed at the glosury outlook before here; they need bread for themselves and resulties, and with liftle employment and sometime, and with liftle employment and sometime, and with liftle employment and sometime, and with liftle employment is not some contribution of the second of the secon

shift pieces it farther from that fearch. In the European countries, this increases in the price of arounded is sure to work a hearbidy, specially another the wint a hearbidy, specially another than the bearing observe, who now live from heard to motify and if the condition does not develop something of a dishipredig indice it will be straige increased in the part of the country the augmented and of bread will press corely upon some, and now is the time in preparator relieve the wants of the meedy—for the rolling that successory assistance may not be through a channel that properties those who must be helped, that successory assistance may not be through a channel that pumperies those who provided in the premises. Now as to the disposal three who received it. This suggestion should be conflicient to those other moral shell-gailing to seel in the premises.

Now as to the disposal of wheat by the people of this intermentalian register. There are many, transers and other, whose successfus frights that they should part with their grain to meet legitimate expenses, press, present and future. Therefore the circumstance now are not certain in duting so is quite proper. There are strained to meet legitimate expenses, press, present and future. Therefore the promises proposition. But the circumstance now are not certained in duting and returns much of the strahmap for the potential presses of the intermentaling, they are also being on the presses of the intermental region, and critically the is a set-best passes of the intermental passes of the intermental region of the press of the intermental region of the presses of the intermental region of the grain study? I want to be specially in the grain study? I want to be specially and the transformed into long of the presses of the intermental region of the presses of the intermental region of the presses of the intermental region of the presses of the p
