DISCUSSES RACE QUESTION.

SECY, TAFT TALKS

Touches on Injustice of Chinese Ex. clusion and Ends With Reference to Divorce.

Oxford, O., June 15 .- The feature of the eighty-first commencement of Miam) university here today was the of Secy, of War William ID Taft. It was delivered in the commencement tent erected in the campus among the forest trees. The unusually large audiance made frequent interruptions oth applause.

opening his speech Secy, Tart teached on the racial question in the outh and in this connection said:

encouraging feature of the impease of wealth is that a portion of this increase has the south, a part of our counheretofore has been largely agricultural and poor. The change in the material conditions in the south. is spite of the political difficulties that certainly are there, is creating a better state of things with reference to the racial question

The work of Booker T. Washington In teaching his people how to use tools instead of giving them a superficial miversity education which they can-bet use, added to industrial domand or skilled labor I am certain will put he negro repulation in a better con-silled materially, and when that is grought about, their spiritual and in-electual aplifting is much easier. The outhern studes are engaged in adopting oustilutions which seem intended to exclude the negro from the ballot in nervous sensation in general. I am able now to sleen like a log and am doing my threefold work with perfect regularity. Dr. Williams' Pink Pills are all right and I do not hesitate southern states are engaged in adopting constitutions which seem intended to exclude the negro. from the bailot in fact, without infringing the fifteenth amendment so pulpably as to lead to their amendment by the supreme court. I am hoping extraesily that the experi-ments of this sort will fail, but if they they will lead to a result in which the laws shall exclude internat whites and These are strong words supported by corresponding facts. Mrs. Harris can be found in the school, or the store, or the home, a woman of quick intelli-gence and stirring activity, serving her family and the community in a manner that shows how much benefit she has received from this wonderful blood and never topic

system without the written consent of both parties. As a result of what developed at the hearing Mayor Weaver late tonight ad-cepted the resignation of John W. Hill, whill also that of his son, H. W. Hill, who was assistant to his father. Chief Hill was the highest salaried of ficial in the city, his compensation be-ing \$17000 a year. The filtration system has cost the city about \$22,000,000, and it will take more than \$5,000,000 to complete the work. The McNichol firm has had con-tracts for about three-quarters of the work. All work on the city's filtration system has been ordered stopped. Another blow was dealt at the Repub-lican organization today when the streat railroad committee of councils referred back to that body the bills re-pealing the ordinances granting to the Philadelphia Rapid Transit company franchises for 10 miles of streets with-out payment to the city. The ordin-ances granting the franchises were passed over Mayor Weaver's yeto, and at his instigation the repealers were in-troduced. The cutcome of the attempt to bestow the franchises is regarded as a victory for the mayor, whose wishes in the mat-ter were opposed by the organization ments of this sort will fail, but if they they will lead to a result in which the laws shall exclude ignorant whithes and blacks equally from the ballot then po-ene can quarrel with the procedure which will be square and honest." Beference was made by Secy Tail to 'the cornnois material expansion of this country,' and to its standing among the nations beyond that which could be accorded by them to one which had to insular possessions and contined. "The powerful influence which it has created to bring about peace between the Russian and Japanese nations is fixel an evidence. The personality of the president has had much to do with the willingness of the powers to allow lime of inscription hav, the secretary need of excluding or preventing per-bags 500 Chinese coolies from slipping ito this country against the law, we for the mayor, wh self-destruction or despotism." Seey, Taft then directed attention to a few purely domestic questions with respect to which he declared the Amer-ican people ought to act. These includ-ed the maladministration of the crim-inal law the increase in divorce and leaders Rome, June 16.—The Italian heraillic court has decided, in accordance with the privileges guaranteed to the pope by the law of guarantees to consider as valid titles of nobility conferred by his holiness. This decision is considered of great importance and is looked upon as a new step toward an understand-the between church and state. the inadequate salaries paid to govern-ment officials. ment officials. Regarding the first, Secy, Taft said the maladministration of the criminal law is a disgrace to our communi-ity. "The ratio of the number of those convicted of manslaughter, murder in the second degree or murder in the first degree, to the number of homicides in a year the country over, is so small as to be startling. What is true in respect to homicides is true in respect to al-most all other crimes, although there
